**Prior Funding History / Additional Information:**

Sec1 Ch16 SLA2013 P84 L12 SB0 \$8,300,000

**Project Description/Justification:**

The airport has permafrost damage along much of the runway. Significant problems include longitudinal cracking and large rocks pushing up to the surface. There is a significant depression developing on one end of the runway effectively shortening the landing area. The dust palliative will reduce loss of surfacing materials and improve air quality in the community.
