Project Description/Justification:

The AIAS Operating Agreement, effective FY2014, is a ten-year agreement signed by the majority of AIAS customer airlines, consisting of regional, domestic, international, passenger, and cargo operators. The AIAS Operating Agreement successfully represents a collaborative process to address commercial interests and the public interest of Alaskans. It establishes rates, fees, roles and responsibilities for the State of Alaska and airline partners; use of terminal and airfield space, and outlines long-term funding commitments by the Signatory Airlines in guaranteeing funding for future operating and capital improvement project costs.

The Alaska International Airport System (AIAS) is operated as a state-owned enterprise fund under the Department of Transportation and Public Facilities. Each year, the department requests legislative authority for AIAS projects based on the amount and type of funds estimated to be available to the state in a fiscal year.

The attached PDF contains the list of projects expected to be funded during FY2017.
