This project allows the Division of Sport Fish to continue to construct and upgrade recreational power boating and sport fish angler access facilities statewide using Sport Fish Restoration apportionment funds comprised of 75% federal assistance and 25% non-federal match. Federal regulations require that 15% of the annual Sport Fish Restoration Act (Dingell-Johnson/Wallop-Breaux Amendment) apportionment be dedicated to projects that benefit recreational power boaters. Projects include boat launches, mooring floats, parking lots, restrooms, fish cleaning facilities, and other services or like projects.

 Sec1 Ch16 SLA2013 P65 L7 SB18 \$3,000,000

This proposal is a standing capital budget ask for \$3,000,000.

Project Description/Justification:

This project provides new recreational boating access sites and/or renovates and enhances other sites. The facilities that result from this project improve recreational boating and sport fishing angler access to the fish and wildlife resources of the state. The federal assistance in Sport Fish Restoration (SFR) Act (16 USC 777-777k), also known as the Dingell-Johnson/Wallop-Breaux program, mandates

that 15 percent of the federal funds available to the state be set-aside for boating access improvement and development projects. The annual amount of federal receipts requested is based on a set five-year, 15 percent average of Alaska's federal apportionment of SFR funds.

Development and maintenance of sport angler and recreational boating access facilities and improvements is a core function and goal of the Division of Sport Fish Strategic Plan. Additional and enhanced recreational boating access facilities are needed to provide improved and greater sport fishing opportunity throughout the state. Sites are selected so that all regions of the state have the opportunity to receive a share of this program. Site development projects will be accomplished in cooperation with local governments and other state agencies. It has been the experience of the department that local communities are very supportive of better recreation boating access facilities. The facilities are required to be accessible to users with disabilities in compliance with the Americans with Disabilities Act.

Sport Fish Restoration (SFR) funds require a match of one state dollar for every three federal dollars, or a state match of 25 percent of the total project cost. The required match dollars are an investment that produces an instant threefold return. Since federal SFR funds are derived from excise taxes on the sale of sport fishing tackle, this capital project is a user pay/user benefit approach to providing access facilities.

User fees can be established for new and renovated facilities to place them on a self-supporting basis. User fees are charged where feasible and will be used to offset the cost of site operation and maintenance. Under federal regulations, user fees charged at a facility developed with federal funds must be used for the operation, maintenance, or improvement of the facility. Fees collected in excess of actual site operation and maintenance costs must be credited back to the federal program. This ensures that the users of the facility benefit from the fees they pay.

 Sec1 Ch16 SLA2013 P65 L7 SB18 \$3,000,000

This proposal is a standing capital budget ask for \$3,000,000.

Project Description/Justification:

Project Description/Justification: Sport Fish Restoration (SFR) funds require a match of one state dollar for every three federal dollars, or a state match of 25 percent of the total project cost. The required match dollars are an investment that produces an instant threefold return. Since federal SFR

funds are derived from excise taxes on the sale of sport fishing tackle, this capital project is a user pay/user benefit approach to providing access facilities.

The facilities that result from this project improve recreational boating and sport fishing angler access to the fish and wildlife resources of the state. The federal assistance in SFR Act (16 USC 777-777k), also known as the Dingell-Johnson/Wallop-Breaux program mandates that at least 15 percent of the federal funds available to the state be set-aside for boating access improvement and development projects. The annual amount of the federal receipts request is based on a set five-year 15 percent average of Alaska's federal apportionment of SFR funds. Any portion of the 15 percent set-aside for boating access projects that is unused reverts to the U.S. Fish and Wildlife Service and is lost to the state; therefore, it is in the state's best interest to utilize these funds.

Sites are selected so that all regions of the state receive a share of this program. Site development projects are accomplished in cooperation with local government units and other state agencies. It has been the experience of the department that local communities are very supportive of better access facilities.

This project will provide some new access sites and will renovate or upgrade other sites. Many of the existing access sites throughout the state have either reached the end of their useful life and/or do not meet current standards. These sites no longer adequately serve the public and are very expensive to maintain. The facilities provided by this project will be designed for minimal maintenance over a service life of 20 years. The facilities will also be accessible to users with disabilities in compliance with the Americans with Disabilities Act.

User fees can be established for new and renovated facilities to place them on a self-supporting basis. User fees are charged where feasible and used to offset the cost of site operation and maintenance. Under federal regulations, user fees charged at a facility developed with federal funds must be used for the operation, maintenance, or improvement of the facility. Fees collected in excess of actual site operation and maintenance costs must be credited back to the federal program. This ensures that the users of the facility benefit from the fees they pay.

Development and maintenance of sport angler and recreational boating access facilities and improvements is a core function and goal of the Division of Sport Fish Strategic Plan. One of the performance measures of this goal is to complete construction of a total of five priority boating access projects per year over a five-year period. Additional and enhanced recreational boating access facilities are needed to provide improved and greater sport fishing opportunity throughout the state.

What was accomplished? Continued enhancements, renovation and improvements to recreational boating access sites across the state that benefit a wide variety of users both resident and non-resident.
