Project Description/Justification:

The facility construction component within the Division of Water provides technical and financial support to Alaska's communities to design and construct drinking water and sanitation facilities. Communities apply each year to the state for grants for these projects. Applications are scored based primarily on the extent to which proposed projects address critical public health needs, as well as the communities' capacity to operate and maintain the facilities. High-ranking projects are placed on a

multi-year priority list, which identifies projects to receive funding over the next several years. The majority of project awards made under this program are eligible for grant funds made available to the state through the federal government. A portion of the federal grant monies available requires the state to appropriate matching funds.

Each year communities propose more projects than available state funding. When projects are proposed, total costs are estimated based on the best information available but are subject to change. Balances in these projects may be shifted to other projects that were underestimated or, applied to other approved projects on the waiting list based on a first-ready, first-served basis.

A portion of federal and state match funds may be used for the planning and development of alternative safe drinking water and sanitation technologies.

Appropriation: Village Safe Water and Wastewater Infrastructure Projects

Brief Summary and Statement of Need:

This request amends the original Governor's FY2022 capital budget request by adding \$4,545,200.00 for a new requested total of \$42,487,200.00. This change is due to our Congressional delegation securing additional federal funds to support the program, which requires additional State match. It also corrects a technical error in the original requested State match portion between the allocations of this appropriation.

Provides grant funding for first time service to communities to plan, design, and construct drinking water and sanitation facilities.
