Homes are eligible to be licensed as Medicaid Providers.	,		0									

Homes are eligible to be licensed as Medicaid Providers. This policy change will reduce the amount of GF payment assistance/state subsidy previously required.

Total Medicaid receipt authorization required for FY05 was estimated at \$2,437.3 (\$1.4 million federal and \$1.0 GFM). The estimate was based on a nine-month period of operation in FY05. In FY06, when the program will run for 12 months, the Pioneer Homes will need an additional three months of Medicaid receipt authorization, or a total of \$3,249.7.

Since the time the FY05 budget was prepared it has been determined that Medicaid receipts will be paid to the Pioneer Homes as interagency (I/A) receipts from the Divisions of Health Care Services and Senior and Disabilities Services.

FY2006 CC: Reduce Staffing for Safety and Security of Residents  This increment funds six additional Certified Nurse Aides. I	Dec	-150.0	-150.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

This increment funds six additional Certified Nurse Aides. It adds two positions in each of the three homes that have the highest occupancy levels. Based on the October 2004 Occupancy Report, the Fairbanks, Ketchikan and Juneau Pioneer Homes were 93%, 96% and 87.5% occupied, respectively. The increment provides two additional direct-care staff in these highly utilized homes to help ensure we continue to maintain an injury rate below national standards. Without this increment and the positions it funds, the injury rate in the homes may increase.

The acuity level of Pioneer Home residents continues to increase. Over the past ten years, the percentage of Pioneer Home residents requiring very little or no care has dropped from 37 to 10 percent while the percentage of residents requiring the highest level of care has risen from 26 to 61 percent. Staffing levels have remained the same for a number of years. Some shifts are not adequately staffed to provide the level of resident safety required with the increased resident acuity level, especially in a fully occupied Pioneer Home.

The staffing levels at the Homes were the most significant complaints heard by the Pioneer Home Advisory Board

FY2007 Increased Medication Costs due to increased number of residents and allow pharmacy to buy/pckg/dispense medications.	Inc	1,966.4	0.0	0.0	0.0	1,966.4	0.0	0.0	0.0	0	0	0

The cost of medications purchased by the Pioneer Home centralized pharmacy and dispensed to Pioneer Home residents has increased dramatically. The increased occupancy and increasing acuity levels of the residents are just two of the reasons for the increased medication costs.

The FY 2006 increment for these purchases was \$1.5 million and was based on FY 2004 costs. The FY 2006 and FY 2007 costs are now estimated to be much higher. Medication costs in FY 2006 are estimated to be \$2.38 million or 46% greater than the \$1.63 million spent on medications in FY 2005. Applying this increase to the projected FY 2006 costs results in an estimated \$3.47 million needed for medication purchases in FY 2007. The resulting increment is \$1.97 million (\$3.47-\$1.5).

The transition from Medicaid and other third party insurance to Medicare Part D will impact the amount of SDPR. The potential increase of this transition is unknown and not included in this increment.

This increment will allow the pharmacy to purchase, package and dispense the medications required by the Pioneer Home residents on a regular basis. The health and safety of the residents depends on receiving their prescribed medications timely.

FY2007 Increased Staffing for Resident Safety and Security (continued)

elderly population, they are each unique in many ways. The Ketchikan (KPH), Juneau (JPH), and Fairbanks (FPH) Homes have historically high occupancy levels, but currently only the JPH and FPH have lengthy wait lists. Sitka (SPH) and Anchorage (APH) each have a number of vacant beds, but only SPH could fill their vacant beds with increased staffing. Filling the beds in the Anchorage Home requires capital improvements. APH is in the process of getting a higher fire designation that will allow them to request capital improvement funds to renovate areas of the Home for a higher level of care. That designation/renovation process could take two years. The Palmer Home (PPH) is being renovated to become the State's new Veterans Home. They will need to meet stringent Federal program and staffing mandates when the PPH becomes certified in the summer of 2006. Because of a combination of staffing and capital needs, the Division has decreased the number of licensed beds in the individual Homes to more realistically reflect the actual number of beds that can be occupied.

The acuity level of Pioneer Home residents continues to increase. Over the past ten years, the percentage of Pioneer Home residents requiring very little or no care has dropped from 37 to 12 percent while the percentage of residents requiring the highest level of care has risen from 25 to 59 percent. The Homes need additional staff to provide the level of resident care and safety required with the increased resident acuity level.

The Pioneer Homes request the following positions:

13 Certified Nurse Aides

7 Registered Nurses

1 Certified Nurse Aide II

- 1 Social Worker
- 1 Pharmacy Technician
- 1 Environmental Services Journey II

Justification for the positions at the individual home level are as follows:

#### Anchorage Pioneer Home

APH has approximately 16 more residents today than they did two years ago when positions were deleted. This combined with the higher acuity levels of residents require more staff in order to provide a safe environment, quality care and to meet the federal reporting requirements for Medicaid. APH seeks to add three registered nurses, four certified nurse aides and a social worker. The social worker would be charged with performing skilled clinical work and increasing the number of residents receiving the Medicaid Waiver.

#### Fairbanks Pioneer Home

The FPH requires an additional registered nurse on the day and evening shifts bringing the coverage from two to three nurses per shift. These positions are necessary to keep the approximately 80 residents in the two higher care levels healthy and safe, assist with the increased medication administration and physical monitoring and meet the increased documentation requirements for Medicaid. Two certified nurse aides would float between neighborhoods to provide transfer and bathing assistance and assist with feeding and all other aspects of personal care. A Certified Nurse Aide II on evenings would assist the nurse and provide direction, mentoring, orientation and training to the certified nurse aides on that shift. Those applying for Certified Nurse Aide positions currently are younger than in the past and require increased orientation, training and supervision.

# Alaska Pioneer Homes (continued) Pioneer Homes (continued)

FY2007 Increased Staffing for Resident Safety and Security (continued)

Juneau Pioneer Home

The Juneau Home requests three direct care certified nurse aide positions to provide the care and safety that is necessary for a resident population with continually increasing acuity levels. This increases the number of aides that care for 14 residents on the day shift and evening shift from one to two. All but one resident in this neighborhood requires Level II and III care. Currently, just two CNA's care for all 43 residents on the graveyard shift. This request adds a third aide to the night shift.

#### Ketchikan Pioneer Home

The KPH requests one additional direct care Certified Nurse Aide position to be assigned to the activity department. This will allow the home to maintain the same level of activities as in the past, with residents of a higher acuity level and having greater needs. The majority of Pioneer Home residents have some form of dementia. This makes off-site activities difficult when attempting to maintain the security of confused and wandering individuals, some of whom can be disruptive and/or combative. Additionally, many residents require more physician appointments and are unable to utilize senior transportation services offered in the community unless accompanied by staff. This position will provide increased safety, security and quality of life for the residents.

#### Palmer Pioneer Home

A review of statistical data for the PPH between fiscal years 1998 through 2006 indicates a progressive increase in resident days (the number of days of care provided in house during the fiscal year to all residents), admissions and census of those requiring Level II and III care and a decrease in those requiring Level I care. The Palmer Home requests one Registered Nurse to provide the necessary resident care and to meet the more stringent Board of Nursing delegation regulations. These regulations require a minimum of one registered nurse to ensure safe care and compliance with regulations. PPH also requests an Environmental Services Journey II.

#### Sitka Pioneer Home

The SPH has ten vacant beds available for applicants on their wait list, but need additional staffing in order to open them up for occupancy. In previous years, the SPH had very few applicants on their wait list and three positions were moved to other Homes with higher staffing needs. That scenario has changed and Sitka now has 17 on their wait list, ten of whom the home could accommodate if they had appropriate staffing to open the available beds. They request one RN and three Certified Nurse Aide positions to care for the residents who will occupy the ten beds.

#### Pioneer Home Centralized Pharmacy

The centralized Pioneer Home Pharmacy's two Pharmacy Technicians cannot keep up with the packaging of medications in addition to the other position requirements due to the large volume of orders leaving the pharmacy for the six Pioneer Homes. There has been a significant increase in orders over the past couple of years due to the increased resident census and the increased acuity level of the residents. The division has been unsuccessful in recruiting and filling vacant pharmacist positions and this technician would be dedicated to the packaging of medications allowing the other staff (pharmacists included) to focus on filling orders, preparing for the monthly cycle fills, ordering and stocking medications and meeting the Medicaid documentation requirements.

Funding at Palmer Home												

Reduce Increment for Number of New Veterans Beds in the Palmer Pioneer Home (-200.0 general fund)

The FY07 budget includes a \$904.0 general fund increment request for opening 18 veterans' beds in the Palmer Pioneer Home. There are only 12 beds available in the Palmer Home, so the department needs to reduce the original increment request by \$200.0. There are currently 19 veterans residing in the Palmer Pioneer Home. This addition will bring the total for FY07 to 31. This will have minimal impact on veteran's occupancy in the Home. Veterans will receive preference when filling vacant beds and, at the completion of a 5-8 year transition period, 75% of the beds will be designated for veterans.

This amendment also adjusts the staffing request by reducing the full-time request by 3 positions and increasing the part-time request by 1 position. Specifically, we propose reducing the initial request by eliminating the part-time nurse and 1 full-time certified nurse aide, as well as changing the time status of 1 food service worker and 1 housekeeper from full-time to part-time. Adjusted total positions requested through the original increment and this amendment are: 2 nurses, 2.5 certified nurse aides, 1.5 food service workers, 1.5 housekeepers and 1 maintenance general journeyman.

Reduce General Funds by Resident Fees and Federal Per Diem for New Veteran Beds (61.3 federal, -163.3 general fund, 102.0 receipt supported services)

FY2009 Increase Medicaid Waiver Receipts Inc 715.7 715.7 0.0

The Division of Alaska Pioneer Homes projects an additional \$1.5 million in Medicaid Waiver receipts for FY 2009.

These receipts come to the division as inter-agency receipts from the Division of Senior and Disabilities Services.

The division requests additional authorization for these receipts, the following positions, and the general fund match to ensure the division is obtaining the maximum federal receipts available. When Pioneer Home residents became eligible for Medicaid and the Older Alaskans Medicaid Waiver, the division did not request new positions to work directly with residents, families or their responsible parties on their eligibility and continued eligibility. Receiving and managing this funding has come with a significant increase in documentation, correspondence and follow-up that takes numerous man hours. In order for the Homes to continue to receive and increase these revenues, meet the increased documentation requirements, and assist residents in meeting the legislative intent that requires them to apply for all appropriate benefit programs prior to the state's payment assistance program, the Homes request that the funding be used, in part, for the following positions:

Anchorage Pioneer Home: 1 Social Service Associate II, 2 Medical Record Clerks and 1 Certified Nurse Aide

Fairbanks Pioneer Home: 1 Social Services Specialist II

Juneau Pioneer Home: 1 Nurse I and 1 Administrative Assistant III Ketchikan Pioneer Home: 1 Nurse III and 2 Certified Nurse Aides

Palmer Pioneer Home: 1 Licensed Practical Nurse Sitka Pioneer Home: 1 Social Services Specialist II

#### These positions will:

- Handle correspondence, transcription and paperwork for Medicaid residents
- Assist families and residents in the Medicaid application and re-qualification process
- Work as liaison between resident, power of attorney, eligibility technicians, physicians and care coordinators to manage the flow of information required for eligibility, authorization and service delivery
- Coordinate with health care providers for assessing services for Medicaid Waiver residents
- Assist families, residents and incoming seniors with a financial and resource assessment to determine Medicaid eligibility
- Track changes in resident care and reassess eligibility for Medicaid, the Medicaid Waiver, Medicare Part D, long term insurance coverage, and other insurance benefits to help them and the state cover the cost of care
- Provide the appropriate clinical and coding information required for Medicaid eligibility determination
- Coordinate with vendors to supply medical equipment and supplies to Medicaid residents rather than relying on

#### Ketchikan Pioneer Home

the Pioneer Home rate increases.

The Ketchikan Pioneer Home requests one nurse and four certified nurse aide positions. The nurse will perform duties associated with increased documentation standards, assessments and chart reviews. This position will also support the Assisted Living Care Coordinator at resident meetings and with assisted living plan development and provide registered nurse representation when dealing with challenging resident issues.

The certified nurse aides will provide resident care, transportation and restorative aide services. The home is less able to rely on communitity resources for transportation because the residents with higher acuity require accompaniment. Additionally, physicans in the community are less willing to see a resident without a caregiver present to assist with transfers, provide information and wait with the resident in the waiting area. Currently, there are more residents requiring restorative aide services than can be provided by existing staff. The Pioneer Homes work very hard at encouraging residents to maximize their strength so abilitites are not lost. This work promotes resident independence, quality of life and decreases injuries.

The Ketchikan Pioneer Home has not received any new positions since FY 2007 when one additional certified

FY2012 Additional Funding to Meet Medicaid Documentation Requirements	Inc	400.0	400.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

The division is currently at risk of losing Medicaid revenue.

The Pioneer Home system requests funding to pay for additional staff time to meet the documentation requirements mandated by the Home and Community Based Waiver program. This funding will allow us to utilize part-time positions, nonpermanent positions, and overtime to meet the documentation requirements and should provide for approximately 18,500 additional staff hours system-wide.

These additional staff hours are funded with resident payments or general fund/designated program receipts (GF/Prgm). The Division's collections of resident payments continue to exceed our authorization and we believe future receipts will be sufficient to pay for this base budget increment. We request that the Pioneer Home resident payments be used to fund staff that serve them.

According to 7 AAC 43.030, a provider shall maintain accurate financial, clinical, and other records necessary to support the care and services for which payment is requested. The provider is responsible to assure that the provider's designated billing service, or other entity responsible for the maintenance of financial, clinical and other records, meets the requirements of this section.

In FY2009, Myers and Stauffer LC performed a Medicaid Provider Payment Audit of the Alaska Veterans and Pioneer Homes calendar year 2006 claims and found that the documentation requirements were not met. As stated in the final report: "Documentation should support the medical need for each service. Documentation should also support that the services were actually provided to a Medicaid recipient including a record of the specific services provided, the extent of each service provided, the date on which each service was provided and the individual who provided each service." Based on the audit findings, the Division was required to pay back 68%, or \$329.4, of the total \$479.3 Medicaid receipts received for that service period. An additional \$153.8 was determined to be a Medicaid overpayment from an audit of FY06 and FY07 claims for all Homes concluded in June 2009. The division repaid this amount as well.

While we recognize the increased documentation requirements, without additional staff time we are unable to meet them while maintaining the current level of care we provide our residents.

If approved, this additional staff time will be used to:

- -Assist residents and representatives with their regular Medicaid and Medicaid Waiver applications.
- -Track and review resident's ongoing eligibility status for regular Medicaid and Medicaid Waiver programs.
- -Develop, implement and oversee Medicaid audit tools for medication administration, activities of daily living, social services and activities progress notes, vital signs, bathing and weights.
- -Print, post and retrieve activities of daily living logs and update medical records accordingly.
- -Enter physician's orders, medication administration records, vital signs and weights into electronic medical records system.
- -Attend care planning meetings and manage data input so the care plan reflects the services provided.

FY2014 AMD: Maintain Current Service Levels at the Pioneer Homes	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

This request provides funding needed as a result of uncollectible general fund program receipts and interagency receipts for Medicaid Waivers.

Since FY2010, increases in the division's general fund program receipt and inter-agency receipt authority for salary, benefits, fund changes and fiscal notes amounted to \$823.0 and \$289.7, respectively. These increases were the result of actions outside the division's control.

Although the division has been able to absorb these increases in the past, beginning in FY2013 this is no longer the case. Actual collections are not growing to the extent of the authority increases.

The general fund program receipt authority (resident payments) increased 22.9% between FY2007 and FY2012 while the actual collections increased only 17.57%. The FY2011 authorization of \$15,554.3 was very close to actual collections of \$15,540.1. However, since that time the authority increased another \$774.0. The FY2013 projected collections as of November 30, 2012 are \$710.6 below the program receipt authorization.

The interagency receipt of Medicaid Waiver collections for the past two fiscal years averaged \$5,577.0. The FY2013 projected Medicaid collections are \$5,652.7. The authorization for these receipts is \$5,690.1 or \$37.4 more than November 30, 2012 projected collections. The division has worked with families and responsible parties to move all qualifying residents to the Medicaid Waiver program. With the majority of this work complete, growth in this funding source will be minimal if at all.

Alaska Pioneer Homes (continued) Pioneer Homes (continued)												
FY2016 AMD: Reduce Pioneer Homes' Direct Service Staff, Non-Essential Services and Supplies	Dec	-1,673.4	-1,321.3	-1.0	-221.3	-126.5	-1.6	-1.7	0.0	-10	-3	-4

#### Personal Services

Decrements to this expenditure line will directly impact the care given to residents within the Alaska Pioneer Homes' six locations. Predicted impacts include, but are not limited to, (1) longer waiting periods for prospective residents to gain entrance into a home, (2) a reduction in the number of residents who can receive higher levels of care within the homes (e.g., memory care), (3) a reduction in licensed bed amounts, (4) residents will experience longer response times from staff, (5) compromising of resident safety due to low staffing ratios.

As of January 5, 2015, there are 275 individuals actively waiting for placement within a home while 4,599 individuals have placed themselves on the inactive waitlist which indicates that they will desire placement in the future. The home with the longest wait time is currently Juneau, at approximately four years.

The high level of care experienced by residents within each Pioneer Home is a source of great pride. However, the impacts of reducing staffing levels across the division will lower the overall level of care that residents will be able to experience within the homes.

To offset the negative impacts of a change in unrestricted general fund revenue, the division will be requesting a rate increase of 8.5 percent with future automatic increases to match the cost of living adjustments provided by the Social Security Administration. The 8.5 percent increase in rates should allow the division to collect an additional \$1.3 million in general fund program receipts and \$434.0 in interagency receipts annually.

#### Travel

Decrements to this expenditure line will require upper management to meet telephonically instead of face-to-face. This decrement will also impact the travel of the Pioneer Home Advisory Board members.

#### Services

Decrements to this expenditure line will require the termination of non-essential contractual agreements. These agreements include, but are not limited to, cable television services, veterinary fees, and contracted management services.

#### Commodities

Decrements to this expenditure line will require the division to leverage procurement efficiencies as the commodities purchased are vital to the care of residents.

#### Capital Outlay

Decrements to this expenditure line will require maintenance personnel in each home to develop safe and creative solutions for issues which previously would have been addressed using this expenditure line's authority.

#### Grants

Decrements to this expenditure line will not have an impact on current residents as this expenditure line is used to provide \$0.2 a month to residents without any income so that they may purchase personal care items. Currently, the number of residents receiving this allowance does not exceed the adjusted authorization for this expenditure line.

As Medicaid financing becomes available for behavioral health services, reduction in general fund grant funding becomes feasible. Behavioral health grant reductions will be accomplished through a phased, strategic process in order to stabilize services and avoid service reductions in communities. While this is a reduction in State expenditures, the Division of Behavioral Health expects no loss of services available to Alaskans in need. Primarily federal Medicaid funds, rather than general fund/mental health grant funds, will cover the cost of services

and institutional settings who experience a serious mental illness and other conditions. Emphasis is focused on intensive, responsive, community based mental health services to ensure successful community housing for persons identified as currently or previously cycling through emergency services. The focus locations for the project will include Anchorage and other locations where needed to assist individuals to remain safely housed in the community. This program is limited to locations where rental subsidies are available. Rental subsidies come from Alaska Housing Finance Corporation (AHFC) and other sources. Institutions targeted for re-entry include: Alaska Psychiatric Institution, Department of Corrections' facilities, hospital emergency services and other high-cost social service and health programs. The project allows for up to 100 individuals to receive less expensive, continuous services, including a rental subsidy (estimate based on 30 percent of income) in order to 'bridge' from institutional discharge onto the U.S. Department of Housing and Urban Development Housing Choice voucher program (formerly known as the Section 8 housing voucher program) paired with intensive in-home support services. This pairing of resources for beneficiaries has proven successful in other states in reducing recidivism and impacts on service systems. Alaska's success rate has been demonstrated in reduction of return to Department of Corrections and use of emergency-level services in the initial years of the project. These funds will allow for expansion of the program in other critical parts of the state outside of Anchorage and assist in increasing the intensity of services for people with more complex service delivery needs.

Fiscal Note 25 - SB 91

SB 91 section 156 requires that the Recidivism Reduction Program administered by the department increase access to evidence-based rehabilitation programs and support offender transition and re-entry.

The department will reinvest a portion of the savings from the criminal justice reforms implemented under SB 91 to fund grants for reentry support services for returning offenders. The strategies and services that will be supported are documented to reduce recidivism, and are based on the Alaska Prisoner Reentry Initiative and the Mental Health Trust Authority's Alaska Prisoner Reentry Initiative Framework. Reentry services are based on an assessment and prioritization of each individual's needs, and can include:

- -Substance use, alcohol, and/or mental health treatment, including medication assisted therapy
- -Housing
- -Job readiness and employment services
- -Primary health care
- -Peer and recovery support services
- -Case management
- -Life skills training
- -Moral Reconation Therapy (a SAMHSA approved treatment strategy to increase moral reasoning)
- -Other support services, such as birth certificates, driver's licenses or state IDs, bus passes, etc.

There is currently just one reentry center operating in Alaska, but there are also reentry coalitions in a number of communities that work together to connect transitioning offenders to needed services. Grant authority for this reinvestment will support expansion of the operations of the current reentry center, technical assistance and center design and development for communities seeking to establish a reentry center, and services provided through reentry coalitions. In future years, the grant authority will support ongoing operations of the existing and new reentry centers. An estimated 870 additional individuals will be provided reentry services through this reinvestment in FY2017, increasing to 2,826 by FY2022.

In FY2017 the division received an increment of \$1,000.0 and the fiscal note called for an additional increment of \$1,000.0 in FY2018, with continued funding of \$1,625.0 through FY2022. This authority is designated for grants

FY06 is the final year of a 5 year Federal Program to improve the FAS System in Alaska. General Funds are being requested to fund 2 key components of the FAS Program.

The first part of this increment (\$596.0) is requested to continue providing Fetal Alcohol Spectrum Disorder (FASD) diagnostic services in Alaska. These services are currently provided by diagnostic teams. FASD Diagnostic reporting estimates the cost of analysis and diagnosis to be approximately \$4.8 per diagnosis. No more than \$1.1 of the cost is reimbursable by Medicaid. The requested increment will cover the \$3.7 per diagnosis of non-reimbursable costs and will allow the division to continue to fund diagnostic teams to provide this needed service. During FY04 approximately 160 diagnoses were performed in Alaska.

Funding of teams could either continue as grant awards or the division could develop a per diagnosis performance contract. By continuing to fund the diagnostic teams the division continues to provide a much needed service, it initiates overall improved services for the individual and family, and it continues to collect quality FASD diagnostic data that provides increased insight into gaps in service, prevention strategies, and ongoing prevalence data to document outcomes and improvements in the overall state rates.

The second part of this increment (\$500.0) will fund Community Based Prevention and Service Improvement. Currently the Division of Behavioral Health's (DBH) Office of Fetal Alcohol Syndrome (FAS) is funding 40 community-based FAS Innovative grant programs across the state. The amount ranges from \$9.0 to \$150.0 per

FY06 is the final year of a 5 year Federal Program to improve the FAS System in Alaska. General Funds are being requested to fund 2 key components of the FAS Program.

1,096.0

The first part of this increment (\$596.0) is requested to continue providing Fetal Alcohol Spectrum Disorder (FASD) diagnostic services in Alaska. These services are currently provided by diagnostic teams. FASD Diagnostic reporting estimates the cost of analysis and diagnosis to be approximately \$4.8 per diagnosis. No more than \$1.1 of the cost is reimbursable by Medicaid. The requested increment will cover the \$3.7 per diagnosis of non-reimbursable costs and will allow the division to continue to fund diagnostic teams to provide this needed service. During FY04 approximately 160 diagnoses were performed in Alaska.

Funding of teams could either continue as grant awards or the division could develop a per diagnosis performance contract. By continuing to fund the diagnostic teams the division continues to provide a much needed service, it initiates overall improved services for the individual and family, and it continues to collect quality FASD diagnostic data that provides increased insight into gaps in service, prevention strategies, and ongoing prevalence data to document outcomes and improvements in the overall state rates.

The second part of this increment (\$500.0) will fund Community Based Prevention and Service Improvement. Currently the Division of Behavioral Health's (DBH) Office of Fetal Alcohol Syndrome (FAS) is funding 40 community-based FAS Innovative grant programs across the state. The amount ranges from \$9.0 to \$150.0 per grant. As we continue the momentum developed with the federally funded Alaska FAS Project, it is important to increase our service delivery capacities to provide improved services to those individuals affected by an Fetal Alcohol Spectrum Disorder (FASD), diagnosed with an FASD or exhibiting behaviors similar to those associated with prenatal exposure to alcohol. Through this increment we will fund up to 10 community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD.

H&SS Division of Behavioral Health proposes a15.0 MHTAAR increment to support the Barrow Therapeutic court project.

The project is a partnership betyween the Alaska Mental Health Trust and the Alaska Court System. This increment provides the full amount of \$120.0 MHTAAR for this project. The funds will be used to keep the current Barrow Therapeutic court project operational.

The Barrow project model is unique, as it provides therapeutic court support and intensively monitors treatment recommendations ordered by the court without the full structure of a therapeutic court setting. It is a very promising practice in the development, implementation and sustainability of therapeutic courts utilizing limited resources to deliver positive outcomes. The project target population is misdemeanant offenders diagnosed with Fetal Alcohol spectrum disorder. The goal is to reduce involvement with the criminal justice system caused by bail/probation violations that result from an individual's inability to follow or adhere to traditional conditions because of a diminished cognitive capacity, not volitional intent. The position requires the expertise of both substance abuse and mental health disorders and their associated treatments.

Division Performance Measures:

A: Outcome #1: Improve and enhance the quality of life for Alaskans with a serious emotional disturbance (SED),

Trans Tota1 Persona1 Capital Type Expenditure Outlay | Misc PFT PPT Services Travel Services Commodities Grants Behavioral Health (continued) Alcohol Safety Action Program (ASAP) (continued) FY2009 Underage Drinking Initiative Increment In February 2007, the committee met for several days to review plans developed by other states, to prioritize recommendations for Alaska's response, and to develop a state Plan to Reduce and Prevent Underage Drinking (currently in draft form). One of the top priorities identified by the committee is to expand assessment, treatment and prevention services to all youth, including those entering the court system for alcohol-related offenses. The Alaska Alcohol Safety Action Program (ASAP) is based on a national approach to provide screening, early and brief intervention, and referrals to education or treatment, as determined appropriate. In addition, ASAP provides monitoring of the clients' progress, their completion of services and ongoing change in client behavior. ASAP includes programs for adults, as well as youth. Past and recent audits of the Alaska ASAP programs show continued improvement in re-arrest rates for subsequent alcohol related offenses among clients who participate in ASAP services. This increment will enhance and expand the Alaska Juvenile ASAP program - enhancing the existing eight programs to reach more youth and their families, and expanding services to five new communities where data indicates a critical need for ASAP services for youth. The budget for this increment is \$823,400 and includes: One Adult Probation Officer II - ASAP to help identify and track habitual minor consuming offenders who have been referred to the statewide education and treatment system. This position will work with Juvenile ASAP programs across Alaska to develop outcome measures, evaluation tools and improved programming to increase appropriate services to youth, to reduce re-offenses/recidivism, and to decrease underage drinking in Alaska. Salary, travel, communications & supplies \$ 83,400 Increase funding to 8 existing juvenile ASAP programs (Anchorage- VOA, Fairbanks, Juneau, Kenai, Ketchikan, Kotzebue, Kodiak & Mat-Su) Increased juvenile ASAP grant capacity \$ 240,000 Expand juvenile ASAP grants to 5 new communities (Bethel, Barrow, Dillingham, Nome & Seward) where there have been repeated requests and support for ASAP services to screen, assess, monitor and treat minor consuming offenders. FY2009 Restore Underage Drinking Initiative Increment for one PFT position and funding (Juvenile ASAP Position) (continued)

establishing an underage drinking coordinating committee (Alaska Interagency Coordinating Committee on the Prevention of Underage Drinking) and hosting town hall meetings to address the underage drinking dilemma. Following Town Hall meetings in Anchorage (two times), Juneau, Valdez, Fairbanks, Galena, Yakutat, Nome, and Sitka, recommendations made it clear that Alaska needed to develop its own strategy to reduce and prevent underage drinking.

This increment is part of a comprehensive initiative to reduce and prevent underage drinking among Alaska's youth. It will allow a coordinated response by the Alaska Court system, Division of Juvenile Justice, Department of Motor Vehicles, local law enforcement and school districts to respond more effectively in addressing and reducing underage drinking in the state.

In February 2007, the committee met for several days to review plans developed by other states, to prioritize recommendations for Alaska's response, and to develop a state Plan to Reduce and Prevent Underage Drinking (currently in draft form). One of the top priorities identified by the committee is to expand assessment, treatment and prevention services to all youth, including those entering the court system for alcohol-related offenses.

The Alaska Alcohol Safety Action Program (ASAP) is based on a national approach to provide screening, early and brief intervention, and referrals to education or treatment, as determined appropriate. In addition, ASAP provides monitoring of the clients' progress, their completion of services and ongoing change in client behavior. ASAP includes programs for adults, as well as youth. Past and recent audits of the Alaska ASAP programs show continued improvement in re-arrest rates for subsequent alcohol related offenses among clients who participate in ASAP services. This increment will enhance and expand the Alaska Juvenile ASAP program - enhancing the existing eight programs to reach more youth and their families, and expanding services to five new communities where data indicates a critical need for ASAP services for youth.

The budget for this increment is \$823,400 and includes:

One Adult Probation Officer II - ASAP to help identify and track habitual minor consuming offenders who have been referred to the statewide education and treatment system. This position will work with Juvenile ASAP programs across Alaska to develop outcome measures, evaluation tools and improved programming to increase appropriate services to youth, to reduce re-offenses/recidivism, and to decrease underage drinking in Alaska.

In 2007, the Surgeon General of the United States issued a Call to Action to Prevent and Reduce Underage Drinking. Underage drinking in Alaska has long been a concern of health professionals, criminal justice personnel, educators, treatment providers, and prevention specialists. In 2005, Alaska joined states across the nation in establishing an underage drinking coordinating committee (Alaska Interagency Coordinating Committee on the Prevention of Underage Drinking) and hosting town hall meetings to address the underage drinking dilemma. Following Town Hall meetings in Anchorage (two times), Juneau, Valdez, Fairbanks, Galena, Yakutat, Nome, and Sitka, recommendations made it clear that Alaska needed to develop its own strategy to reduce and prevent underage drinking.

This increment is part of a comprehensive initiative to reduce and prevent underage drinking among Alaska's youth. It will allow a coordinated response by the Alaska Court system, Division of Juvenile Justice, Department of Motor Vehicles, local law enforcement and school districts to respond more effectively in addressing and reducing underage drinking in the state.

In February 2007, the committee met for several days to review plans developed by other states, to prioritize recommendations for Alaska's response, and to develop a state Plan to Reduce and Prevent Underage Drinking (currently in draft form). One of the top priorities identified by the committee is to expand assessment, treatment and prevention services to all youth, including those entering the court system for alcohol-related offenses.

The Alaska Alcohol Safety Action Program (ASAP) is based on a national approach to provide screening, early and brief intervention, and referrals to education or treatment, as determined appropriate. In addition, ASAP provides monitoring of the clients' progress, their completion of services and ongoing change in client behavior. ASAP includes programs for adults, as well as youth. Past and recent audits of the Alaska ASAP programs show continued improvement in re-arrest rates for subsequent alcohol related offenses among clients who participate in ASAP services. This increment will enhance and expand the Alaska Juvenile ASAP program - enhancing the existing eight programs to reach more youth and their families, and expanding services to five new communities where data indicates a critical need for ASAP services for youth.

H&SS Division of Behavioral Health proposes a \$155.0 MHTAAR funding increments for the following FY08 BH Grant Projects:

#### \$85.0 - Transition to Full Time Work Project

Temporary employment can give skill sets which are needed in a variety of industries. It gives clients a chance to develop work skills and habits which may then lead to more permanent employment. However, many of our beneficiaries need initial support and mentoring to stay on the job. This includes help managing activities of daily living and other employment logistics such as child care and housing. It also includes support for developing work attitudes and competencies. With help getting through the first steps of employment, the probability of eventual independence is greatly increased. A successful example of this is Gastineau Human Services partnership with Alaska Employment Group.

Many trust beneficiaries manage to obtain temporary jobs which sometimes lead to more permanent employment. This temporary employment project would employ 2 case managers to focus on the employment life domain and job retention for Trust beneficiaries. This project will partner with state and local entities to serve up to 100 beneficiaries a year from a variety of community referrals.

\$70.0 - Convene a biennial Summit on beneficiary issues and the justice system.

This \$70.0 funding will support the Alaska Mental Health Trust Authority's Disability Justice Workgroup recommendation to convene a FY08 follow-up Summit and provide funding for staff or contractual support for the coordination and organization necessary to convene the summit including conference site, materials and travel stipends for attendees.

This proposed follow-up summit was one of the two key recommendations from the 2002 Summit. The Trust's Disability Justice Workgroup agreed that it was time to convene a follow-up summit to address the following issues:

- 1) Assess the State's implementation progress of effective cross-system (justice, corrections, treatment) collaborative de-criminalization efforts.
- 2) Highlight relevant national policy and program trends in the decriminalization of persons with mental disorders

The Behavioral Health Grants component contains funds to be granted to local non-profit agencies to support mental health and substance abuse intervention and treatment services. These provide the comprehensive, statewide mental health and substance abuse identification and treatment system required by law. These programs primarily serve Alaskans without insurance or the ability to pay for services. This component also supports personal skills development and general support services for people with traumatic brain injury and provides for state-owned community mental health facilities. The division is challenged to meet the service needs of an increasing number of people who are ordered to get treatment or risk specific consequences like loss of custody of children or incarceration. With the on-going efforts of the Behavioral Health Integration Project (BHIP), the division will continue to develop an integrated behavioral health system of care and service delivery under which grantee providers will continue to be cross-trained in both mental health and substance abuse treatment and service delivery, commensurate with dual diagnosis capability. The division is challenged to improve data-collection strategies to support grantees and data needs at the state and federal level. Also, the integrated grant system provides special challenges in terms of financial management. The challenge of this integration effort, which is in its fourth year, is the elimination of any "wrong doors", increased administrative and fiscal efficiency and, most importantly, improved services. This is a complex undertaking involving two former divisions

FY2008 AMD: Enhanced Detoxification and Dual Diagnosis Treatment in Anchorage and Fairbanks (continued)

Detoxification and dual diagnosis treatment services target adults with mental illness and co-occurring substance use disorders. The service was designed to offer an alternative to Alaska Psychiatric Institute hospitalization for those requiring detoxification in conjunction with psychiatric treatment. The services are currently provided through the Clitheroe Center in Anchorage.

1) The increase would create five additional Social Detoxification (detox) beds in Anchorage.

Currently, there are 12 medical detoxification beds and no social detoxification beds available in Anchorage. There were 670 detox admissions during the past fiscal year; 187 people were turned away because of a lack of bed space. A utilization review of detox services provided during the last year indicated that nearly 65% of those served would likely have been appropriate for services at a less intensive level of care, otherwise known as social detoxification. The Municipality of Anchorage and a local provider have noted interest in providing social detox services. Funds requested would cover the treatment costs only for clients served; the Municipality may have a building with space to accommodate up to 5 beds for social detox. This has the potential to increase community capacity for detox services by as much as 350 - 600 people annually and reduce the strain on medical detox beds.

2) Fairbanks Behavioral Health Enhanced Detox Facility increment to increase capacity for detox beds.

The Division of Behavioral Health is requesting in the increment the ability to increase by 60% the detoxification capacity at the new Fairbanks facility.

Fairbanks is one of only five communities in Alaska with capacity to provide detoxification services for persons withdrawing from alcohol or other drugs. As a regional center, Fairbanks provides detoxification care for persons from throughout the Interior and Northern regions of the state. However, with only a ten-bed capacity for detoxification care, the beds are perpetually full and service is unavailable to large numbers of persons in need. Because Alaska law requires intervention with persons incapacitated by alcohol and other drugs, lack of adequate detox capacity in Fairbanks results in more than 1000 incapacitated persons being held in the Fairbanks Correctional Facility annually and many others served in the hospital emergency room. This results in inappropriate and unnecessarily expensive care and loss of an opportunity for effective intervention and long-term treatment.

In 2003, the Alaska Legislature appropriated \$1 million in capital funds to develop additional detox capacity. Department of Health and Social Services (DHSS), the Alaska Mental Health Trust Authority (AMHTA) and a coalition which included the Fairbanks Community Behavioral Health Center (FCBHC), Fairbanks Native Association (FNA), Fairbanks Memorial Hospital (FMH), Tanana Chiefs Conference/Chief Andrew Isaac Health Center (TCC), have obtained more than \$2 million in additional capital funding to construct a new 16 bed facility. The new facility will expand detox capacity by 60% and provide the capability of serving persons who cannot be served or are inadequately served in the current facility. The facility will house integrated detoxification and mental health care and will be a critical step towards the integration of substance abuse and mental health care services. It will serve as a statewide framework for coordination and integration of the community and regional behavioral health systems.

#### Behavioral Health (continued) Behavioral Health Grants (continued)

FY2009 Discontinue Private ProShare Refinancing (continued)

> The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

> ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments, and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general fund (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

> In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

> The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Performance Measures Affected:

Dept-Core Services--Manage health care coverage for Alaskans in need

Dept-Core Services--Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A2.1b--Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-A--Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

DPH-A--Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

MH Trust: AB-Gov Cncl - Brain Injury training for providers

FY2009 Add MHTAAR Funding for Brain Injury Training for

300.0

The traumatic brain injury (TBI) training program includes three separate components: 1) Contracted brain injury specialists utilizing Alaska Psychiatric Institute's telebehavioral health project and other communication options for case consultation; 2) Regional workshops specific to needs of the area utilizing multidisciplinary hub and spoke model highlighting the needs across several life domains, and 3) Developing training format and material to include self study modules utilized in other states. (Minnesota example www.mitbitraining.org; DVD training for specific provider groups Alabama, Rhode Island example, and Virtual Program Centers utilizing telehealth, Idaho example). The project is a designated grant request to the Alaska Brain Injury Advisory Board.

Inc0TI

100.0

The Comprehensive Integrated Mental Health Plan for FY09 has identified a lack of early-intervention services. Once a brain injury has occurred, early intervention, appropriate treatment, and skilled professionals are factors in the expected course of recovery for mild, moderate, and severe brain injury. It is estimated that there are more than 10,000 Alaskans living with a brain injury. In 2006, 800 Alaskans were hospitalized with a moderate to severe brain injury. There is little data showing the prevalence of mild TBI. In general, most mild TBI individuals recover completely within several months; nonetheless, a subset of patients do not return to their pre-injury level of functioning and are highly symptomatic. Nearly 15% of patients with mild brain injury continue to complain of symptoms one year after injury. Research indicates these patients will likely not get better. These survivors are being found in Trust beneficiary provider agencies, Division of Behavioral Health and Senior/Disabilities Services programs, Department of Corrections, the School Systems, Division of Vocational Rehabilitation, and the Veterans Administration.

This increment will ensure that every provider serving Alaskans with a brain injury will have access to brain injury specialists for consultation, will have a road map on how to address the screening, assessment, referral, and treatment planning, and will feel confident in their service capabilities.

The Alaska Mental Health Board, the Division of Behavioral Health (DBH), and the Mental Health Trust have identified a core group of hard-to-serve adults with severe and persistent mental illness and substance abuse problems, as well as repeated episodes of hospitalization, incarceration, and homelessness. These adults need a higher level of service than most other consumers in order to keep them stable, in housing and out of API or jail. At their current level of funding, behavioral health centers are not able to provide the level of care that these very ill adults need. In fact, in FY2008 three grantee community mental health agencies closed admissions because grant funds had been depleted before the end of the year. Current levels of grant and Medicaid funding have proven insufficient for these complex situations.

This increment request builds treatment capacity in the existing system by purchasing intensive individualized services. Services include nursing care, 24 hour/day case manager support, daily medication administration, residential dual diagnosis treatment, and transport to services. At least 107 individuals with very high needs can be served with these funds.

DBH calculated costs from invoices provided by the Department of Corrections' re-entry program for mentally ill adults exiting jail (APIC) and Salvation Army Clitheroe dual diagnosis residential treatment program. DBH estimates that of the 107 individuals served by the program, at least 1 in 6 will need 3 months of residential substance abuse treatment at \$4,950 each. All will need 12 months of intensive outpatient mental health treatment at \$14,450 each.

#### Outcomes:

- Decreased utilization of hospital emergency rooms;
- Decreased incidence of incarceration;
- Decreased psychiatric hospitalizations;
- Decreased homelessness;
- Decreased evictions from apartments and assisted living facilities;
- Increased ability to function in a sheltered workplace;
- More timely access to services upon discharge from API and corrections.

substance abuse services

The continuum of detoxification and substance abuse services within the State of Alaska remains under-funded in a number of our regions. We are seeking funding to institute a continuum of services that effectively treats our addicted population in the most appropriate level of care.

This increment represents a 9% increase to statewide grant funding for substance abuse treatment and will be used to serve an additional 270 individuals and pursue the following outcomes:

	0 MH Trust: ABADA - Grants for
	unity based substance abuse services
(contin	ued)
	This increment represents a 9% increase to statewide grant funding for substance abuse treatment and will be
	used to serve an additional 270 individuals and pursue the following outcomes:
	- Stabilize funding for fragile service system by providing more adequate funding for agencies that are not able to bill Medicaid (IMD exclusions and non-eligibility populations).
	bili iviedicalu (livid exclusions and non-eligibility populations).
	- Increase access to community based substance abuse services and specifically increase access to SA treatment
	for:
	SED youth who may be referred out of state for treatment without this option;
	OCS referred parents - help reunite families and help meet federal standards;
	Inmates discharged from prison;
	Probation cases who are released from Corrections:
	Therapeutic court clients;
	Divisions of Juvenile Justice and Public Assistance.
	According to the National Institute on Drug Abuse, substance abuse treatment is as successful as treatment of
	other chronic diseases, such as diabetes, hypertension, and asthma. Substance abuse treatment has been
	proven to reduce drug use by 40-60 percent and it significantly decreases criminal activity after treatment.
	For every dollar spent on treating an individual with a substance abuse problem, society saves approximately \$12
	in future costs, according to the National Association of State Alcohol and Drug Abuse Directors. On average,

The negative consequences of drug abuse affect not only individuals who abuse drugs but also their families and friends, businesses, and government entities.

almost 75 percent of those who go through a treatment program remain drug-free six months later and 63% are still drug-free one year later. Studies further show that employment rates nearly double and crime rates are

Type Expenditure

Children of individuals who abuse drugs often are abused or neglected due to the parents' preoccupation with obtaining and using drugs rather than the health and welfare of their children.

Economically, businesses often are affected because employees who abuse drugs are often unreliable. Moreover, absenteeism, lost productivity, and increased use of medical and insurance benefits by employees who abuse drugs affect a business financially.

It is important to note that the prevalence report of low income households within Alaska indicates 7,256 adults have substance abuse disorders. In addition, AKAIMS data indicates that for FY08 there were 493 people on a waitlist for substance abuse treatment.

Behavioral Health (continued) Behavioral Health Grants (continued) FY2010 MH Trust: Dis Justice - Grant 1192.03 Expand Treatment Capacity Therapeutic Court Participants w/ Co-occurring Disorders (continued) Disorders project will continue providing essential co-occur in the Palmer Mental Health Court. This project will be mar disseminated to a behavioral health provider.	•		•	•								
This project maintains access to a critical component of the to community co-occurring treatment services so an individ substance abuse issues that contributed to their contact wit safety and decreases the risk of future high costs incurred within correctional settings or the psychiatric institution.	ual can add th the crimir	lress the underlyi nal justice system	ng mental health a . This increases p	and oublic								
This project has been funded since in FY2007 with \$150.0 with \$75.0 MHTAAR and \$75.0 GF/MH.  1037 GF/MH (UGF) 75.0  FY2010 Fairbanks Behavioral Health Enhanced Detox Facility The Division of Behavioral Health is requesting a \$500.0 inductorification facility scheduled for completion in January 2.	Inc crement to d	500.0	0.0	0.0	0.0	0.0	0.0	500.0	0.0	0	0	0

The new facility will avoid the Medicaid Institute for Mental Disease (IMD) exclusion which prohibits the existing program from receiving Medicaid reimbursement because it is in a building containing more than 16 beds. It will allow the program to appropriately obtain federal funding participation for the care of Medicaid eligible patients who receive detox services and provide an important new funding source. However, most of the patients have neither Medicaid nor private insurance coverage and an increment of \$500.0 is needed to support the additional capacity and enhancements of the program to be operated in the new facility. The increment represents the difference between the total operating costs of the expanded capacity and the amount that can be generated from Medicaid and other third party billings.

#### Background:

The Department of Health and Social Services has statutory responsibility to establish a comprehensive and coordinated program for the treatment of alcoholics, intoxicated persons, drug abusers, and inhalant abusers (AS 47.37.130.) An essential element of that program is the provision of detoxification services. Alaska law requires that persons who are incapacitated by alcohol or other drugs must be taken into protective custody and provided appropriate treatment. Detoxification services are the essential component for appropriate emergency care, the critical pathway to treatment for persons with substance use disorders.

Fairbanks is one of only five communities in Alaska with capacity to provide detoxification services for persons withdrawing from alcohol or other drugs. As a regional center, Fairbanks provides detoxification care for persons throughout the Interior and Northern regions of the state. However, with only an eight-bed capacity for detoxification care, the beds are perpetually full and service is unavailable to large numbers of persons in need. Because Alaska law requires intervention with persons incapacitated by alcohol and other drugs, lack of adequate detox capacity in Fairbanks results in more than 1000 incapacitated persons being held in the Fairbanks Correctional Facility annually and many others end up in the hospital emergency room. This results in inappropriate and unnecessarily expensive care and loss of an opportunity for effective intervention and recovery.

This increment will sustain the Secured Treatment Unit (STU) pilot project which began in Anchorage in FY10 and was initiated by the 2007 Senate bill 100. The funding will be used to increase the treatment opportunities for chronic public inebriates within the State while decreasing the negative impacts that substance abuse has on the lives of the treated individuals as well as society as a whole.

The Secured Treatment Unit at Salvation Army Clitheroe operates in accordance with AS 47.37, the Uniform Alcoholism and Intoxication Treatment Act, specifically AS 47.37.030 (10). The program provides detoxification and residential substance abuse treatment services for adult chronic inebriates who are referred through AS 47.37.180-205 Emergency Commitment or individuals who are eligible for a non-voluntary commitment to treatment. The detoxification component has four available beds and the treatment unit has eight beds for clients who have completed detoxification and who are able to begin treatment.

The target populations for this project are individuals whose persistent and continuous use of alcohol has severely restricted their ability to function productively within society over an extended period of time. This group represents a traditionally difficult to serve segment of the State whose disproportionate use of local resources far exceeds that of many other priority populations.

The anticipated outcomes are:

- 1) Reduction of emergency room visits;
- 2) Reduction of Community Service Patrol pick-ups;
- 3) Reduction on use of alcohol and other drugs;
- 4) Increase in the number of days spent off the streets;
- Increase in days of employment;
- 6) Increase in perceived level of life satisfaction.

fiscal years to train behavioral health providers in trauma-informed care practices.

This increment supports direct services for adult victims of violence. Nationally, the estimate is that 1 in 4 women and 1 in 13 men will experience domestic violence (including sexual assault by an intimate partner) in her or his lifetime. In Alaska, a 2010 telephone survey of 871 women found that 47.6% reported experiencing threats or physical violence in their lifetime and 37.1% reported being victims of sexual violence during their lifetime. Applied to the total adult population, the UAA Justice Center estimates that 144,881 women have experienced intimate partner and/or sexual violence in their lifetime.

The incidence of current and past trauma among individuals seeking treatment services for serious mental health and substance use disorders is high: 76.1% of individuals screened through the Alaska Screening Tool reported an adverse childhood experience (past trauma) and 19.1% reported intimate partner violence. While the Medicaid system provides services for serious mental health and addiction disorders, generalized mental health and substance dependence needs are not high primary areas of focus in centers statewide, especially given the already strained capacity of community behavioral health centers.

For a victim of domestic violence experiencing a generalized mental health issue or moderate alcohol dependence, treatment services are out of reach unless the person has private insurance. Rather than wait until that person's condition worsens to become one of the Medicaid priorities for treatment services, this increment will

Drug Abuse: Substance Abuse Treatment for Unresourced												

The current substance abuse treatment system cannot meet the present demand for services. Without shoring up resources, it will not be able to meet the demand created by possibly 3,000 newly eligible clients in 2014.

The current reported wait for substance abuse assessment in Fairbanks is two-to-three weeks, and several weeks longer for a residential treatment bed. The same is true for residential programs in the Southeast that employ a cohort model (rather than rolling admission). This experience is also reported by rural behavioral health aides and village based counselors -- long waits and costs of service discourage clients from going to detox or residential treatment. Given the limited detox capacity in Fairbanks and Anchorage, beds in those facilities go first to clients with the most immediate needs; this often results in long waits for those needing medically monitored withdrawal.

This increment makes grant funds available to expand capacity to provide medical detox, residential, and/or intensive outpatient substance abuse treatment -- followed by aftercare -- to unresourced adults. It addresses the fact that demand for residential treatment, intensive outpatient, and aftercare continues to exceed the substance abuse treatment system's capacity. It is also designed to reinforce the existing treatment capacity in the face of a potential increase in demand for services. If the 141,000 uninsured Alaskans living at or below 250% of the federal poverty index become eligible for publicly funded health insurance after 2014, (based on 2006 prevalence estimates) at least 2,800 of these adults can be expected to experience a substance use disorder requiring treatment.

Medically monitored detox in Anchorage and Fairbanks facilities report a daily cost of \$300-\$516 per patient per day. Compare this to the FY2012 hospital rates of \$2,956.44 at the Alaska Regional Hospital and \$2,350.43 at the Fairbanks Memorial Hospital inpatient rate. If the increment were used exclusively for detox services, it would cover the cost of over 800 detox days -- saving nearly \$1.5 million in inpatient hospital costs.

This recommendation to expand substance abuse treatment capacity supports the efforts of the Domestic Violence and Sexual Assault initiative. According to a 2010 survey of Alaska OCS workers managing cases with families that have very young children, as many as 70% of cases involving risk of harm to a child involved substance abuse by one or more parent/adult in the household. The lifelong negative health consequences of growing up in a household in which one or more parent abuses drugs and/or alcohol (considered an adverse childhood experience) and domestic violence occurs have been well documented (CDC ACE Study). These health consequences include an increased risk for alcoholism and drug abuse (Relationship of Childhood Abuse and Household Dysfunction to Many of the Leading Causes of Death in Adults: The Adverse Childhood Experiences (ACE) Study (American Journal of Preventative Medicine, May 1998)), perpetuating the cycle of violence and addiction for Alaskan families. In the recently released 2010 Alaska Victimization Survey, 37.1% of adult women respondents self-reported they were victims of sexual violence during their lifetime. 26.8% of the adult women respondents indicated they had experienced at least one alcohol or drug prior to a sexual violence incident. The incidences of sexual assault to intentional or unintentional consumption of alcohol prior to the assault were also reported on in the Special Report by the UAA Justice Center (UAA Justice Center Domestic and Sexual Violence

FY2007 Bring The Kids Home (BTKH)

Expansion (continued)

infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state.

In the FY06 budget the Alaska Mental Health Trust provided \$2,058.0 of funding for this initiative. The proposed increment will build upon the success of accomplishments in the prior year to expand the BTKH initiative into the following areas:

Item 1: Regional and Out of State Placement Committees staffing \$100.0 GF/MH. \$100.0 Federal

This funding will provide adequate staffing of the regional and out of state placement/resource committees to increase their capacity to provide gate keeping functions. These teams currently provide these functions only for custody children. Through this funding, the teams will begin to serve non-custody children looking for referrals to residential care.

From 1998 to 2004 there was an across the board increase to the number of Alaska children served in out of state residential psychiatric treatment centers. During this period, the increase for custody children went from 17 children in 1998 to 560 children in 2004. During this same time period, the utilization increase for non-custody children went from 66 children in 1998 to 693 children in 2004.

The most consistent initial approach to addressing this over-reliance on out of state residential care by non-custody children is to implement a consistent system of gate keeping for all children. This requires sufficient staffing for the regional and out of state placement/resource committees to serve referrals for non-custody children. Currently, the resource teams are required to meet twice weekly for 1 1/2 to 2 hours each to serve custody children only. In order to serve non-custody children, 6 additional FTEs are required (2 in OCS, 2 in DBH, and 2 in DJJ), based on the current level of referrals. As in-state resources are developed and this impacts (decreases) referrals to residential care, the model may be refined.

Item 2: BTKH Project Manager \$90.0 GF/MH

Currently project management for the Bring the Kids Home Project is shared between the Alaska Mental Health Trust Authority (AMHTA) and The Division of Behavioral Health (DBH). The related workgroups of the BTKH project involve staff from the AMHTA, DBH, DJJ, OCS, the provider association (ABHA), and the Governor's Council on Disabilities and Special Education. The scope of this project ranges across the community, region, state, and out of state levels. With the maturity of this project, greater demands of project management have stretched current staffing capacity. This position will be authorized and tasked with complete project management of the BTKH Project. At present, there are several factions all working for this initiative, with minimal coordination of the overall effort. This position will be responsible for the coordination of the project and ensuring that all factions are moving toward outcome oriented results.

home, keep families more involved and intact, and more effectively carry out transitions and discharges.

Funding for existing services has often been inadequate and has led to the lack of a fully implemented continuum of care in Alaska. With financial support, this initiative will focus on successfully building upon the existing infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state.

In the FY06 budget the Alaska Mental Health Trust provided \$2.058.0 of funding for this initiative. The proposed increment will build upon the success of accomplishments in the prior year to expand the BTKH initiative into the following areas:

Item 1: Regional and Out of State Placement Committees staffing \$100.0 GF/MH. \$100.0 Federal

This funding will provide adequate staffing of the regional and out of state placement/resource committees to increase their capacity to provide gate keeping functions. 75.0 MHTAAR - On-going policy level planning and implementation workgroup

The \$75.0 funding will support the Alaska Mental Health Trust Authority's Disability Justice Workgroup recommendation to provide funding resources for follow-up planning and implementation workgroup sessions derived from the FY08 Criminal Justice/Mental Health Summit. The funding was designed to coordinate convening staff, facilitate, arrange meetings of relevant state agency policymakers to plan and implement recommended program changes, as well as to track progress.

FY2008 Bring the Kids Home (BTKH) Level of Care Licensing H&SS Division of Behavioral Health proposes a \$100.0 GF/ project for Level of Care Licensing.	Inc <b>MH increm</b>	100.0 ent for the Bring	0.0 the Kids Home (B	0.0 BTKH)	100.0	0.0	0.0	0.0	0.0	0	0	0

In FY07 the Trust provided one-time funding to establish a level of care assessment tool statewide to accurately assess youth placements to ensure we have the appropriate instate service capacity to place youth in the lowest appropriate level of care to meet their needs. Funding continues the implementation in FY07 of a Level of Care Assessment tool to be used at all residential levels of care from group homes to acute care. Priority would be to license Division of Behavioral Health (DBH) Utilization Review staff to use the tool for the gate keeping function planned, using the balance of funds to continue piloting the tool with a few key providers who have large BTKH youth caseloads.

The goals of the Level of Care Instrument are to provide an objective and standardized clinical guide to inform placement decisions, ensure a higher level of consistency statewide on placement decisions and better manage resources and avoid unnecessarily restrictive placements.

The InterQual Criteria is a Level of Care Instrument which was implemented within the BTKH Project in July 2006. Specifically, DBH utilization review staff is using the instrument to divert all inappropriate referrals to out of state Residential Psychiatric Treatment Center back in state to more appropriate levels of care.

The project will also provide funding for multiple pilot sites to test the appropriateness of applying this level of care instrument to lower levels of care from community based services to residential treatment. The funding will provide assistance in covering the expense of licensing, training, and implementing the instrument in multiple pilot sites located at community behavioral health centers.

## Behavioral Health (continued) Behavioral Health Administration (continued)

FY2009 CC: Secured Detoxification and Treatment for Involuntary Substance Abuse Commitment (continued)

The Division of Behavioral Health will select and fund a non-profit or municipal agency with a regional and accessible support network to operate a secure 24-hour detoxification and treatment center for persons who are involuntarily committed under AS 47.37.190. The facility would employ clinical staff who have been trained in integrated and comprehensive screening and assessment practices, and provide intensive case management services for persons who have been incapacitated by alcohol or drugs, including persons who are diagnosed with co-occurring disorders. The pilot project would terminate no later than July 1, 2012 and include an evaluation report with outcome measures, including baseline data. Long term impacts include reduced emergency room costs, lower acute care medical costs, decreased incarcerations, and reduced emergency responder costs.

The expansion in services creates the need for:

- -- 1.0 Probation Officer II, Range 16: provide training and triage with therapeutic courts to the successful applicant or grantee; provide urinalysis screening; and treatment referral;
- -- 1.0 Health Facility Surveyor II, Range 20: provide project oversight, training and technical assistance to the successful applicant or grantee, monitor for grant regulation and report compliance, monitor performance /outcome /evaluation measures of successful grantee;
- -- 1.0 Research Analyst III, Range 18: compile data on overall pilot project including performance measures, outcome indicators/measures, prepare evaluation report;
- -- Annual costs for office space, phones and supplies are calculated at a cost of \$8.8 per additional staff;
- -- One time cost for computers and software at \$2.2 for each additional staff; and
- -- \$1,700.0 additional grants issued through a competitive RFP.

#### Performance Measures Affected:

Dept-Core Services: Provide an integrated behavioral health system

Dept-B-2: Improve and enhance the quality of life for Alaskans with serious behavioral health problems. BH-A1, A3: Strategy #1C: Improve and enhance the quality of life of Alaskans with a SED, SMI and/or a substance abuse disorder through the development of a comprehensive, integrated Behavioral Health Service System.

This increment requests funding for a new Mental Health Clinician III position in Juneau for a Medicaid demonstration project for children with fetal alchohol spectrum disorder, and a new Medical Assistance Administrator IV position in Juneau for a Medicaid demonstration project for children with fetal alchohol spectrum disorder. \$300.0 of this increment will include provider training. These costs are eligible for 50% federal reimbursement from Medicaid.

This project allows Alaska to use Medicaid money formerly spent on residential psychiatric treatment on new home and community based services. Children with disabilities, such as those with Fetal Alcohol Spectrum Disorder (FASD) and those who are Severe Emotionally Disturbance (SED), are particularly difficult to identify. These youth are often misdiagnosed and are subsequently provided with treatment that is often ineffective. Alaska was one out of ten states chosen for this demonstration and is the only state targeting interventions based on modeling, mentoring and monitoring for these dually-diagnosed 14 to 21 year olds. Our hope is that Alaska will become a model for other states at the end of the five-year project.

# Behavioral Health (continued) Behavioral Health Administration (continued)

FY2009 Medicaid Fetal Alcohol Spectrum Disorder Demonstration Project (continued)

Youth with an FASD and SED stay in residential psychiatric treatment centers (RPTC) nearly twice as long as the general population because traditional mental health treatments are ineffective due to the brain damage caused by prenatal exposure to alcohol. As these youth age, the health issues become more complex. Coping and learning skills are often compromised so they are more susceptible to pregnancy, poverty, drug and alcohol abuse, incarceration and victimization.

The FASD/RPTC Demonstration Project was launched in October 2007 with the goal of reducing the number of youth, ages 14 to 21, in RPTCs who are dual-diagnosed with FASD and SED. The Demonstration Project will focus on services that mirror the Alaska Native practices of modeling desired behaviors and mentoring children to learn their roles in a larger culture while monitoring the youth as the treatment is delivered. This is especially important because Native Americans are disproportionally represented in the target group. The children selected for this demonstration will be clients of Behavioral Health, Children's Services, and Juvenile Justice. The project has capped funding and has a requirement that services under the waiver cost no more than the institution services. This limits enrollment in the waiver to no more than 88 children.

The department has responsibility for approval and oversight of plan implementation and fidelity to the model. The Mental Health Clinician will approve individual plans for waiver clients twice a year. These plans will describe the youth's service package. The Mental Health Clinician will also identify system issues including problems of duplicative service delivery, barriers to collaboration, or other service delivery, and to bring these to the waiver project manager for resolution. The intensity of oversight and review of individual plans of care require the addition of one Mental Health Clinician III to handle the caseload.

The Medical Assistance Administrator oversees the implementation of the demonstration project and functions as a coordinator between divisions by interfacing with appropriate division directors to ensure compliant and effective policy development for children in the target group. Duties of this position include: ensuring effective and timely communication of all policy and procedure decisions; ensuring active stakeholder involvement in policy development by coordinating advisory groups and committees and overseeing all communication between the department and stakeholders. Project management also requires specialized Medicaid administrative experience to assist with implementation plan development, state regulatory requirements, demonstration project implementation across divisions, and contract management. The department has responsibility for adhering to all the evaluation criteria, financial reporting, and data analysis required by the federal agency.

Contractual services will be used to procure training services to identify evidence-based trauma-informed interventions. Under the waiver, service providers must undergo a State approved training program resulting in qualifying endorsement. To become qualified as providers of all waiver services, agencies must ensure their employees have received specific training related to the service delivery model and the needs of children with co-occuring SED/FASD. The state will offer training on topics such as wraparound service delivery, treatment planning, transition planning, aftercare, and physical environment for youth with FASD to ensure a level of proficiency and the ability to deliver effective technical assistance to community agencies. The department is required to show evidence of continuing provider training upon annual recertification of the waiver.

Dept-Core Services-Manage health care coverage for Alaskans in need Dept-Core Services-Provide an integrated behavioral health system

FY2011 Maintain Existing Tobacco Enforcement and Education	Inc	175.0	60.0	20.0	95.0	0.0	0.0	0.0	0.0	0	0	0

The Alaska Tobacco Enforcement and Education program was integrated into DBH in 2003, moving from the Division of Public Health. Since that time, no increase in funding for this program has occurred. At this time, the Tobacco budget component does not fully cover all associated personnel (3.0 FTE investigators, multiple student interns and .5 FTE admin clerk) and the required travel. This program operates throughout the state with just those three investigators. Two investigators are located in Anchorage with a third investigator in Juneau. In addition, training and signage materials for this program have not been updated, revised or reprinted during this time. In researching best-practices related to decreasing sales of tobacco to minors, we plan to implement a system of public and personal recognition to clerks and retailers who do not sell tobacco to minors via certificates, incentives and public recognition. These funds would be used to fully fund the current positions, update the training and signage materials, and fund required tobacco education and enforcement travel.

#### Consequences of no funding:

Tobacco enforcement and education of retailers is a critical piece of our substance use prevention and early intervention efforts in that access to tobacco promotes more use by teens while inaccessibility reduces use. Through these funds we will be able to enhance our existing program through improved training, updated and more current signage related to not selling to minors and a 'best-practice' approach to recognition and reward for those individuals who are supporting our efforts by not selling to minors. Without funding we will be unable to improve our retailer training program and will be unable to implement a new recognition program to thank our partners in the retail industry. Our goal is to continue seeing a decrease in the number of Alaska youth who smoke tobacco or use other tobacco products.

In addition, if Alaska does not comply with the enforcement stipulated in this regulation, the statute (42 USC 300X-26(c)) requires the reduction of the State's Substance Abuse Prevention and Treatment (SAPT) Block Grant allotment for non-compliance. Currently, the SAPT Block Grant supplies a critical funding component to grantee agencies providing substance abuse treatment services.

#### The anticipated outcomes are:

- 1. Increase the availability and effectiveness of retailer education about the State's tobacco enforcement efforts and the importance of not selling tobacco to youth under 19 years of age by 20% by FY13.
- 2. Increase the effectiveness, visibility and quantity of retailer signage related to no-sales of tobacco to individuals under age 19 by 40% by FY13.
- 3. Decrease the percentage of youth purchasing tobacco products at a retail outlet to 4% by FY13 (using data from the YRBS).

FY2013 MH Trust Workforce Dev Committee on Workforce	Inc0TI	50.0	0.0	0.0	50.0	0.0	0.0	0.0	0.0	0	0	0

Direct care health and social service workers are often the primary caregivers for Trust beneficiary groups. However, these workers typically have little formal training and receive minimal support while on the job. Strengthening their skills is a priority among the Trust's workforce activities, leading to the development and release of the Alaskan Core Competencies (FY2009), tools to assess worker competency (FY2010), and curriculum development (FY2011 and FY2012).

Guidance and project oversight is provided by the Committee on Workforce Competency (CWC), chaired by Melissa Stone, Director of the Division of Behavioral Health at DHSS, and Duane Mays, Director of the Division of Senior and Disability Services for DHSS. Staff from the Annapolis Coalition and WICHE Mental Health Program will provide support for this project.

In FY2013, the project will employ a strategy similar to the Institute for Healthcare Improvement (IHI) quality improvement collaborative model. This model tests changes in real work settings. The model guides the test of a change to determine if the change is an improvement. The project consultants, with quidance from the CWC, will identify and work in partnership with five organizations, one from each of the Trust's beneficiary groups (i.e., service sectors) on implementing the competencies and assessment. A one and a half day technical assistance meeting between project consultants and all five sites will be conducted at one point during the fiscal year, with follow-up consultation provided via phone.

At the conclusion of FY2012, all the principal tools will have been created that are necessary to support adoption of a competency based approach to development of the direct care workforce in Alaska. This includes: identified competencies; assessment tools that allow for both self-assessment and agency assessment of the worker's strengths and learning needs; and a comprehensive, portable curriculum that can be used in person or via distance learning methods to train workers in the competencies.

The next step is to facilitate and demonstrate adoption. The proposed method is centered on the use of a Quality Improvement Collaborative method that will bring selected agencies together to facilitate the adoption of best practices in the use of the competencies. One agency from each of the five Trust Beneficiary areas would be selected. The priority would be to select agencies that are widely recognized as "early adopters", interested in using the competency tools and invested generally in innovation and quality.

The process would involve bringing all agencies together at the start of the process to jointly receive technical assistance on the use of the competencies, assessment tools, and curriculum. Over the course of the day and half long retreat, the representatives of each agency (ideally two to three people per agency) would build a draft adoption/implementation plan for their organization, share it with other participants and the consultants, and modify the plan based on the feedback received.

Each agency then "returns home" and pursues implementation, linked together by monthly teleconferences in which successes and barriers are discussed, emerging best practices are shared, and continued consultation is

The Rural Human Services System Program is a partnership between DBH and the University of Alaska Fairbanks (UAF) School of Rural Services. This program began over 10 years ago with the goal being to develop a trained, local and competent social services workforce across rural Alaska. The overarching goal is a "counselor in every village."

Across the state of Alaska one of the continuing and most devastating problems is having too few trained, qualified, culturally competent and stable service providers in rural Alaska. Our most rural and remote Alaskan villages often lack trained service providers who are behavioral health generalist, able to address and respond to a variety of daily issues such as child abuse, domestic violence, alcohol abuse, depression and other issues. Those trained individuals who move to rural and remote Alaska usually do not stay more than 1-2 years, leaving villages with constant turnover and gaps in service delivery and availability.

The RHSS Program aims to identify individuals who already live (most often were born and raised) in communities, to provide them training and to establish these RHSS positions as local providers who work under the supervision of a professional clinician providing ongoing support, resources, referral and general early intervention services in their community of origin.

With these new dollars the RHSS program will be able to add ten new positions to the existing RHSS Program and, in the process provide 10 new villages with paraprofessional behavioral health services. This funding will enable each paraprofessional counselor to attend the UAF Rural Human Services certification program and it will pay for a portion of these paraprofessional positions to provide supervised services within their home community.

These positions are vital to our statewide coverage for early intervention services in the most rural and remote locations. These positions also enhance our Treatment and Recovery grant programs in rural Alaska. In FY04, the RHSS Program had 89 RHS Counselors who served 13,004 non-emergency clients and responded to 1,926

The Division of Behavioral Health recommends an increase for grant programs providing prevention and treatment services for substance abuse and mental health clients. This increase will enhance the community-based program models to recruit and retain a qualified workforce and respond to other inflationary pressures. Approval of this request will avoid a reduction in capacity due to increased grantee costs and continue serving our vulnerable Alaskans.

This ingrament replaces federal funding with general fundi	a dua ta tha d	iocontinuation of	the Drivete Droc	horo								

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

#### Performance Measures Affected:

Dept-Core Service--Manage health care coverage for Alaskans in need

Dept-Core Services--Protect and promote the health of Alaskans

Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A1.1a--Improve and enhance the quality of life of children with serious emotional disturbance by implementing the Bring the Kids Home program

DBH-A-1-A2.1b--Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-A-Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

of Proshare SPEP								•				

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Single Point of Entry Psychiatric (SPEP) Medicaid program by the federal Medicaid Agency. The larger, non-SPEP, portion of the Private ProShare program was previously disallowed and change records reflecting that disallowance are already included in the Governor's Budget. This amendment became necessary after the reconsideration of the SPEP portion of the ProShare program was denied.

There is an existing change record in the Governor's Budget Health Care Services (HCS) Medicaid component requesting a \$16,000.0 decrement in federal funding. There is also a corresponding amendment in HCS Medicaid reducing federal funding by an additional \$1,100.0.

The department has made payments to hospitals for several years under this program. SPEP was an important part of the ProShare program and the department's strategy to provide access to quality health care services. ProShare SPEP Medicaid funds have supported mental health care programs that benefit many Alaskans. Without the ProShare SPEP Medicaid program the same services will have to be funded with 100 percent GF.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed

Evaluation and Treatment Expansion

Through a variety of avenues, public comment to the Alaska Mental Health Board this year has consistently been that Alaskans experiencing psychiatric emergencies cannot receive adequate services in their community. We have heard that rural hospitals are resistant to providing this acute care due to the cost, facility requirements, staffing requirements, and perceived obstacles to reimbursement. We have heard that Alaska Psychiatric Institute (API) is often at the limits of its capacity, with the majority of admissions coming from the Kenai Peninsula and Mat-Su areas. We have observed that Alaskans experiencing psychiatric emergencies in rural communities are too often being held in the custody of a village public safety officer or local police as a way of being kept safe pending transport to API. The system providing acute stabilization and treatment is at risk, as seen by the recent closure of the Designated Evaluation and Treatment (DET) beds at Mt. Edgecombe Hospital in Sitka due to the

Inc0TI

300.0

Cost is an increasing concern, given that the need regularly outstrips the resources currently allocated for these services. Additional funds are needed to meet the costs of serving people in need of DES/DET services. These services are a more economical solution than transporting people in crisis to API. DBH reported that the average cost of transport per person in FY08 was \$1,384.51 which does not include the costs of treatment.

This project proposes to prevent further erosion of already limited services by providing additional short-term funding for existing services. This will encourage existing service providers to maintain their DES/DET facilities by offering a consistent source of reimbursement. This will also support the rising transport costs of getting people in crisis to a DET facility and home again. DBH staff has reported that commercial transport costs have increased 17% in the past year and further inflation (exceeding 20%) is expected.

Recognizing that the above is only a short-term solution, this recommendation includes the use of telemedicine for acute stabilization as a cost-containment measure. API has offered use of its existing telemedicine infrastructure as a basis for this recommendation. Initially, pilot projects with hospitals demonstrating a high degree of readiness are recommended. The goal is that these pilots will demonstrate success and cost-effectiveness. DBH reports that 209 people were transported from their home community to API in FY06 and 147 in FY07, at a cost of nearly \$200.0 each year. API staff and potential community hospital partners in Kenai have reported that a stabilization room in a rural site with a videoconference or other telehealth connection to an on-call psychiatrist can be set up for less than \$30.0 and staffed at a rate far less than annual cost of transport to API.

transportation. Offering stabilization and treatment closer to home will help avoid far more costly API services and thereby ease capacity concerns at API. This recommendation is that the savings reaped from providing localized acute stabilization services should be reinvested in expanding the pilot projects, further reducing transportation costs and enhancing emergency services available in rural communities.  It will take at least five years for pilots to be developed to a sufficient degree to have any impact on the need for transport to API. Thus, the GF/MH funding for existing DES/DET will need to be appropriated for FY10-15 (at least), with savings realized during that time reinvested in the pilots. Then, will hocal psychiatric emergency services available in rural hub hospitals, the nearly \$600.0 or more spent annually (based on DBH data for FY06 and FY07) on transport to API could be substantially reduced.  1092 MHTAAR (Other) 300.0  FY2014 Add/Delete Pair: Transfer to Designated Evaluation Dec 129.9 0.0 0.0 -129.9 0.0 0.0 0.0 0.0 0.0 0.0 0.0 0.0 0.0		work toward	the goals of redu	cing suicide and	the

## Behavioral Health (continued) Services to the Seriously Mentally III (continued)

FY2009 Discontinue Private ProShare

Refinancing (continued)

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching GF through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Performance Measures Affected:

Dept-Core Services--Manage health care coverage for Alaskans in need

Dept-Core Services--Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A2.1b--Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-A--Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

TICS-D--Flovide alloldable access to quality fleatill care services to eli

DPH-A--Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

Alaska's current system of care does not include appropriate services for individuals with cognitive disabilities and complex behaviors. Because of this, many of these individuals are served by API, where they languish in an unnecessarily restrictive environment for extended periods of time, or they are inappropriately held in places such as jails and emergency rooms. Many are ultimately sent out of the state for care, where in many cases they remain indefinitely. Risk for out-of-state placement typically occurs when the individual exhibits behaviors that are so complex that they are outside the range of expertise of local caregivers and providers, or the available treatment options in the state have been exhausted without resultant success for the individual. The result of the lack of appropriate services in Alaska is a cost to the individuals and their families. In addition, there are key risks and costs to the State of Alaska, including but not limited to:

Potential exists for Americans with Disabilities Act (ADA) violations, specifically regarding Olmstead versus LC. The Department of Justice expects states to demonstrate progress on their waiting lists to move individuals with disabilities to less restrictive, integrated community-based settings, to have a clearly defined method to manage movement on the waiting lists, and to demonstrate their methodology regarding how their lists are developed and tracked. It appears that while limitations in state budgets may affect the state's rate and scope of compliance with the ADA's integration mandate, budget limitations do not relieve the state of its obligation to take effective steps to end inappropriate institutionalization. Such lawsuits are quite costly to states due to imposed court mandates and while such lawsuits may result in the development of needed services, they are not the most effective or cost efficient way to develop them.

Continued un-budgeted, non-Medicaid general fund expenses related to things such as the need to provide additional staff to manage and contain some individuals, cover out-of-State travel and related expenses.

#### Behavioral Health (continued) Services to the Seriously Mentally III (continued)

FY2012 MH Trust: AK Alc Bd - Alaska Complex Behavior Collaborative (continued)

Continued escalating costs associated with providing an inadequate continuum of care, which currently adds additional expenses by bringing in extra staff to 'manage and contain' complex behaviors, instead of investing up-front in the workforce and programs to provide appropriate interventions and services.

The proposed Alaska Complex Behavior Collaborative consists of three primary components: the Alaska Complex Behavior Collaborative: the Hub, Brief Stabilization Services, and Intensive Intermediate Intervention Services. Below the Hub and Intensive Intermediate Intervention Services are discussed. The recommended model would have services available through three sites.

The Hub is conceptualized as a point of entry into the Alaska Complex Behavior Collaborative (Collaborative). Individuals may be brought to the attention of the Hub when their behaviors are complex; presenting a high risk of danger to self or others and the interventions required to ensure the safety of those involved are outside the skill-set of the current program staff. The services provided by the Hub will be available for individuals who are already receiving services supported by the Department of Health and Social Services, and will not be considered a means of achieving eligibility for services. The Hub will offer comprehensive assessment and diagnostic services by drawing on a pool of identified experts. These experts will be local or from outside of the state when a particular expertise is not available locally. Short-term contracts with expert consultants may be utilized to fill this workforce need. Individualized triage services will be available, in order to direct each individual to the appropriate level of care within the Collaborative or outside of it. In some cases, individuals may require brief stabilization or longer-term support through one of the two intervention arms of the Collaborative, which, based on the needs of each individual, could occur within their current placement or may require transfer to specialized services. It is estimated that implementation of this component would cost approximately \$650.0 GF/MH.

The Intensive Intermediate Intervention Services (FY12 \$300.0 GF/MH) component of the Collaborative will provide a residential option to individuals who require longer-term services prior to returning to previous or lower-acuity placements. This Service will be community-based and will provide a high level of structure and active behavioral intervention. The Intensive Intermediate Intervention Services will consist of approximately five beds. The unit will be staffed by highly trained specialists capable of providing intensive behavioral interventions. The unit will also be secure (either by staff, delayed egress or door locks) in order to provide maximum safety for the individual, staff, and public when it is clinically indicated. The anticipated length of stay will be between one and eighteen months, with comprehensive discharge planning and consultation with receiving providers/caregivers initiated at admission and continuing throughout the specialized interventions. Transition back to community services will include continued active consultation with receiving providers/caregivers and planned, well-coordinated, collaborative transfers of individuals back to their original residence and services. Ongoing follow-up services to the community will occur, in order to provide ongoing support and consultation with a goal of mitigating the need for return to more intensive placements. It is estimated that implementation of this component would cost approximately \$300.0 GF/MH.

It is anticipated that there will be one time start-up costs (\$150.0 MHTAAR) which could include but are not limited to training, facility modifications, and staff recruitment.

Designated Evaluation and Treatment FY2009 Designated Evaluation and Treatment Increment	Inc <b>350.</b> 0	0.0	0.0	0.0	0.0	0.0	350.0	0.0	0	0	0

As a payer-of-last resort, the Designated Evaluation and Treatment program funds are made available to designated local community and specialty hospitals for evaluation, stabilization and treatment services, inpatient physician services and transportation for people under court-ordered commitment. It is also available to people who meet those criteria, but have agreed to accept services voluntarily in lieu of commitment, and who would otherwise go to the Alaska Psychiatric Institute. Local hospitalization is often the treatment of choice, keeps an individual connected to family or other support, and facilitates a rapid return home. Clinical management procedures have contained the growth rate to just the most needy individuals, only the necessary hospital days, and with the most economical transportation to Alaska Psychiatric Institute or other designated hospitals, but costs have continued to rise just as they have in other medical areas.

Using this funding, a local Designated Evaluation and Stabilization/Treatment facility may provide up to 72-hour inpatient psychiatric evaluations, up to 7 days of crisis stabilization, or up to 40 days of inpatient hospital services close to the consumer's home, family, and support system. Component funding also supports consumer and escort travel to designated hospitals and back to their home community and inpatient physician services that are not covered under the hospitals' daily rate. Fairbanks Memorial Hospital in Fairbanks and Bartlett Regional Hospital in Juneau provide designated evaluation and treatment services, and Ketchikan General Hospital in Ketchikan, Mt. Edgecumbe Hospital (SEARHC) in Sitka and Yukon-Kuskokwim Health Corporation in Bethel provide designated evaluation and stabilization services.

However, this State mandated program has continued to be under-funded each year for the last 6 years; budgets have usually been short between \$500,000 -750,000 each year. Due to an inadequate budget, some of the payments to hospitals, physicians and guard/escort services have been delayed. Efforts are made to use subsequent year's budgets to pay unpaid bills from the previous year, continuing the inadequacy of each year's budget. 6615 bed days were covered for 1215 patients costing a total of \$10,541,653.85; the overall daily hospital rate has increased \$1,611.76 or 18.7% between FY 03 and FY 08. There were 992 physician bills paid costing a total of \$292,852.24; the amount for covered physician charges has increased \$11,507.32, or 16.8 %, between FY03 and FY06. There were 3015 transports to Alaska Psychiatric Institute or other designated hospitals, costing a total of \$1,871,090.21; this cost has increased \$259,715.02 or, 80.2%, between FY03 and FY06.

Performance Measures Affected:

Dept-Core Services: Provide an integrated behavioral health system

Dept-B-2: Improve and enhance the quality of life for Alaskans with serious behavioral health problems.

AS 47 requires DBH to respond to psychiatric emergencies statewide, providing transportation, evaluation, and hospitalization for individuals at imminent risk of harming themselves or others, or gravely disabled by mental illness. In recent years, the demand for this service has risen dramatically, putting intense pressure on API's census, on the transportation system that supports the program, and on local communities statewide, many of whom have to hold very ill people in jail cells until transportation and a hospital bed can be made available for their

too often being held in the custody of a village public safety office or local police as a way of being kept safe pending transport to API. The system providing acute stabilization and treatment (DET/DES) is at risk, as seen by the recent closure of the Designated Evaluation and Treatment (DET) beds at Mt. Edgecombe Hospital in Sitka

due to the costs and lack of adequate staffing.

Capital

Outlay | Type Expenditure Services Travel Services Commodities Grants Misc PFT PPT Behavioral Health (continued) Designated Evaluation and Treatment (continued) FY2010 MH Trust: AMHB/ABADA - Psychiatric **Emergency Services: DES/DET Expansion** (continued) care. In FY2008 the DET/DES Program served 383 clients, provided 800 bed days at an approved DES/DET Facilities and paid for 285 transports. The billing remains open for this program for 180 days following the last day in June 2008 so these numbers are likely to grow. \$950,000 in GF is requested specifically to meet the current costs of the DET program. In particular, the costs of transporting ill people safely to API, Fairbanks Memorial or Juneau's Bartlett Hospital have risen dramatically: 17% in FY2008 and an additional 20% projected in FY2009. Further, because community hospitals with DES beds are overwhelmed with expensive psychiatric cases, they are increasingly reluctant to take these cases at all; in FY2008 Mt. Edgecombe Hospital in Sitka decided to close its DES beds. As DES beds disappear, psychiatric cases must be re-routed to Juneau, Fairbanks or Anchorage, an expensive transport cost. Finally, because DBH pays hospitals at the going Medicaid rate, and because Fairbanks and Bartlett's daily Medicaid rates recently rose 18% and 31% respectively, the current levels of funding are not adequate to fund the DET/DES system. With additional funding, the division hopes to prevent further erosion of already limited services by providing additional short-term funding for existing services. This will encourage existing service providers to maintain their DES/DET facilities by offering a consistent source of reimbursement. This will also support the rising transport costs of getting people in crisis to a DET facility and home again. Anticipated Outcomes: Decrease admissions to API: Reduce transportation; Provide care closer to home. Partners: Mat Su Regional Hospital; Central Peninsula General Hospital; Maniilag Health Center: South Peninsula General Hospital: Norton Sound Health Corporation; API Telepsychiatry.

## Behavioral Health (continued) Designated Evaluation and Treatment (continued)

FY2010 MH Trust: AMHB/ABADA - Psychiatric Emergency Services: DES/DET Expansion (continued)

that Alaskans experiencing psychiatric emergencies cannot receive adequate services in their community. We have heard that rural hospitals are resistant to providing this acute care due to the cost, facility requirements, staffing requirements, and perceived obstacles to reimbursement. We have heard that Alaska Psychiatric Institute (API) is often at the limits of its capacity, with the majority of admissions coming from the Kenai Peninsula and Mat-Su areas. We have observed that Alaskans experiencing psychiatric emergencies in rural communities are too often being held in the custody of a village public safety office or local police as a way of being kept safe pending transport to API. The system providing acute stabilization and treatment (DET/DES) is at risk, as seen by the recent closure of the Designated Evaluation and Treatment (DET) beds at Mt. Edgecombe Hospital in Sitka due to the costs and lack of adequate staffing.

AS 47 requires DBH to respond to psychiatric emergencies statewide, providing transportation, evaluation, and hospitalization for individuals at imminent risk of harming themselves or others, or gravely disabled by mental illness. In recent years, the demand for this service has risen dramatically, putting intense pressure on API's census, on the transportation system that supports the program, and on local communities statewide, many of whom have to hold very ill people in jail cells until transportation and a hospital bed can be made available for their care. In FY2008 the DET/DES Program served 383 clients, provided 800 bed days at an approved DES/DET Facilities and paid for 285 transports. The billing remains open for this program for 180 days following the last day in June 2008 so these numbers are likely to grow.

\$300.0 in MHTAAR is requested to expand the Designated Evaluation and Treatment (DET) and the Designated Evaluation and Stabilization (DES) system. The Division of Behavioral Health (DBH) is currently working with community hospitals across the state to develop new DES beds, focusing on local stabilization, which is clinically and financially a better option. It is anticipated that new DES beds will come on line in FY2010, so funding for these beds, and the cost to transport clients to DES facilities, is critical to support the statewide emergency response system.

With additional funding, the division hopes to prevent further erosion of already limited services by providing additional short-term funding for existing services. This will encourage existing service providers to maintain their DES/DET facilities by offering a consistent source of reimbursement. This will also support the rising transport costs of getting people in crisis to a DET facility and home again. DBH staff have reported that commercial transport costs have increased 17% in the past year and further inflation exceeding 20% is expected.

Anticipated Outcomes:

Decrease admissions to API; Reduce transportation; Provide care closer to home.

Partners:

Mat Su Regional Hospital; Central Peninsula General Hospital; Maniilaq Health Center;

Bring The Kids Home (BTKH) is an initiative to return child	dren with seven	e emotional dist	urhances from he	havioral								

Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of-state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges.

Funding for existing services has often been inadequate and has led to the lack of a fully implemented continuum of care in Alaska. With financial support, this initiative will focus on successfully building upon the existing infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state.

There has been a steady increase in the number of custody and non-custody children and youth placed in out of state residential psychiatric treatment centers. In FY04 the division estimated that 733 children ranging in ages from six to seventeen were served out of state. The Child and Adolescent Needs and Strengths Assessment revealed that Alaska Native children represent 49% of the population of children in custody and 22% of the non-custody children sent to out of state placements. Frequently out of state treatment is not as therapeutically beneficial to children and their families as services delivered close to home.

The Bring The Kids Home initiative has three major long term goals:

- To build/develop and sustain the community-based and residential capacity to serve children with all intensities
  of need within the service delivery system in Alaska.
- 2) To develop an integrated seamless service system in Alaska that will allow children and youth to be served in the most culturally competent, least restrictive setting, closest to home as determined to be safe and appropriate.
- Significantly reduce the existing numbers of children and youth in out of state care and gate-keep ensuring that the future use of out of state facilities is kept to a minimum.

In FY 06 the the following strategies will be funded to support this initiative:

- 1) Development and/or enhancement of family group homes, group homes with 24/7 staff, OSLC multi-dimensional homes and crisis/nursery homes. These homes will provide a consistent level of care that is not fully attainable in a residential home staffed with shift workers. 24/7 homes that do not use shift-worker models are approximately 20% less costly (\$1,067.0)
- 2) Provide technical assistance and training for existing foster care providers to ensure the proper level of care is

Services for Severely Emotionally Disturbed Youth (continued)

FY2007 Bring the Kids Home (BTKH)
Expansion-Reinvest funds for in-state services
and capacity development (continued)

Item 1: Regional and Out of State Placement Committees staffing \$870.0

This funding will provide adequate staffing of the regional and out of state placement/resource committees to increase their capacity to provide gate keeping functions. These teams currently provide these functions only for custody children. Through this funding, the teams will begin to serve non-custody children looking for referrals to residential care.

From 1998 to 2004 there was an across the board increase to the number of Alaska children served in out of state residential psychiatric treatment centers. During this period, the increase for custody children went from 17 children in 1998 to 56 children in 2004. During this same time period, the utilization increase for non-custody children went from 66 children in 1998 to 693 children in 2004.

The most consistent initial approach to addressing this over-reliance on out of state residential care by non-custody children is to implement a consistent system of gate keeping for all children. This requires sufficient staffing for the regional and out of state placement/resource committees to serve referrals for non-custody children. Currently, the resource teams are required to meet twice weekly for 1 1/2 to 2 hours each to serve custody children only. In order to serve non-custody children, 6 additional FTEs are required, based on the current level of referrals. As in-state resources are developed and this impacts (decreases) referrals to residential care, the model may be refined.

Item 2: BTKH CMHC Grant Support for Care Management for SED Youth \$1,250.0

This funding will provide additional grants to the Community Mental Health Centers (CMHCs) to work with families and youth prior to consideration by the placement/resource committees for residential care. The CMHCs or Regional Health Corporations will play a pivotal role in working with the family and youth to develop a local placement. When this fails, CMHCs will assume the responsibility of bringing the placement request to the Placement/Resource Committees to consider the child for regional/out of state placement.

Currently, non-custody children (and some few custody children) may never connect with a CMHC prior to moving into residential care. To increase the capacity for in-home and community based services, this connection is vital. Currently, children and youth from rural and outlying areas have limited access to CMHCs and may not receive a thorough evaluation and access to an array of behavioral health services before moving into residential care. In addition, privately funded behavioral health services seldom cover the costs of care coordination to develop complex community based services. The service continuum offered is limited and includes services such as family and individual therapy. Children and families often require additional rehabilitation services in the home and community in order for the child to remain in a normalized setting. Without granting funds to enhance the CMHCs ability to develop and implement complex service packages for an increasing service load, children will continue to move into residential care.

H&SS Division of Behavioral Health proposes a \$950.0 GF/MH increment and a decrement of (\$910.0) MHTAAR funding for the BTKH Individualized Services and Home and Community Based Start Up Grants.

Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges.

This increment will support the ongoing efforts of Bring the Kids Home, a joint project of the Division of Behavioral Health, the Division of Juvenile Justice, Office of Children's Services and the Mental Health Trust Authority in the following areas:

Item 1: BTKH Individualized Services which is a \$700.0 GF/MH increase and (\$200.0) MHTAAR reduction. Individualized Services procedures for Seriously Emotionally Disturbed Youth (SED Youth) needing residential care are in place for FY07. This saves a considerable amount of state funding by providing additional care not qualified under Medicaid thus enabling youth to stay at lower levels of care. In FY06 and FY07 this program was initiated with funding from the Trust.

Item 2: BTKH Home and Community Based Start Up Grants which is a \$250.0 GF/MH increment and a (\$710.0) MHTAAR reduction.

The Trust has funded this effort through FY06 and FY07 at \$1.1 million. As group homes are established at the

FY2008 BTKH Anchorage Crisis Stabilization  H&SS Division of Behavioral Health proposes a \$184.0 GF/I the Kid Home Project, Anchorage Crisis stabilization - Fundi					0.0	0.0	0.0	284.0	0.0	0	0	0

Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges.

This increment will support the ongoing efforts of Bring the Kids Home, a joint project of the Division of Behavioral Health, the Division of Juvenile Justice, Office of Children's Services and the Mental Health Trust Authority in the following area:

Anchorage Crisis Stabilization program is proposed at 15 beds to assist in keeping youth-in-crisis in parental custody and in as low a level of care as diagnostically appropriate. The funding will be used to assist both custody (Juvenile Justice and Children's Services) and non-custody youth (Division of Behavioral Health). Some youth will be Medicaid-eligible, some will not; hence the proposed mixture of grant funds and Medicaid match.

#### Division Measures:

A: Outcome #1: Improve and enhance the quality of life for Alaskans with a serious emotional disturbance (SED), a serious mental illness (SMI) and/or a substance abuse disorder.

Target #1: 75% of individuals will report improvement in one or more of the following life domains: productive activity/employment, housing situation, health status, economic security, education attained.

Measure #1: Outcomes data as reported through the use of the Client Status Review Form as part of the Federal Government Performance and Results Act.

A1: Strategy #1A: Improve and enhance the quality of life of children with a SED by implementing the Bring the Kids Home Program.

home, keep families more involved and intact, and more effectively carry out transitions and discharges.

This increment will support the ongoing efforts of Bring the Kids Home, a joint project of the Division of Behavioral Health, Division of Juvenile Justice, Office of Children's Services and the Mental Health Trust Authority in the following areas:

Item 1: BTKH Peer Navigators Funding to Non-Profits (Parent and Youth), a \$50.0 GF/MH and \$150.0 MHTAAR increment

Peer Navigator funding would allow both parents and youth to be hired to assist their peers who are trying to navigate the service delivery system to help best utilize the behavioral health and community-based system and their family's resources. Youth volunteers would be recruited to develop a youth advisory group, with travel and stipends, that would educate various groups about issues from their perspective. To provide a variety of approaches, funding would be managed to encourage peer navigators from several different agencies. Impacts of this program include:

- 1) increased ability of consumers to use the behavioral health system effectively.
- 2) decrease in need for higher levels of care because of early intervention.
- 3) increased parental effectiveness in dealing with a child with behavioral health needs.
- 4) increased consumer knowledge of community supports including emergency food, clothing and housing, low cost telephone services, and public benefits such as special education and Medicaid.
- 5) increased system responsiveness to the needs of its clients.

Item 2: BTKH Parent and Youth Navigators, a \$150.0 GF/MH increment

Peer Navigator funding would allow both parents and youth to be hired to assist their peers who are trying to navigate the service delivery system to help best utilize the behavioral health and community-based system and their family's resources. Youth volunteers would be recruited to develop a youth advisory group, with travel and stipends that would educate various groups about issues from their perspective. To provide a variety of approaches, funding would be managed to encourage peer navigators from several different agencies. Impacts of this program include:

- 1) increased ability of consumers to use the behavioral health system effectively.
- 2) decrease in need for higher levels of care because of early intervention.
- 3) increased parental effectiveness in dealing with a child with behavioral health needs.
- 4) increased consumer knowledge of community supports including emergency food, clothing and housing, low cost telephone services, and public benefits such as special education and Medicaid.
- 5) increased system responsiveness to the needs of its clients.

Division Measures:

A: Outcome #1: Improve and enhance the quality of life for Alaskans with a serious emotional disturbance (SED), a serious mental illness (SMI) and/or a substance abuse disorder.

#### **Behavioral Health (continued)**

Services for Severely Emotionally Disturbed Youth (continued)

FY2009 Discontinue Private ProShare

Refinancing (continued)

ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching GF through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Performance Measures Affected:

Dept-Core Services--Manage health care coverage for Alaskans in need

Dept-Core Services--Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A2.1b--Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-A--Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

DPH-A--Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

beds and develop single point of entry

Anchorage Crisis Stabilization program and Single Point of Entry project expands services to youth-in-crisis for higher placements via 15 crisis stabilization beds, and develops a new single point of entry for children's services: assessment, service coordination and placement in community stabilization and/or into acute care as appropriate. It provides multiple grants to assist both custody (Juvenile Justice and Children's Services) and non-custody (Division of Behavioral Health) youth. Some youth will be Medicaid eligible; some will not (non-resourced), hence the proposed mixture of grant funds and GF/MH Medicaid match for operations of the facilities. This critical component of the BTKH overall plan is expected to save Medicaid funds for acute hospitalizations and eventual referrals to Residential Psychiatric Treatment Centers (RPTCs). This project was first funded in FY08 at \$100.0 MHTAAR and \$184.0 GF/MH; in FY09 funding levels are \$100.0 MHTAAR and \$200.0 GF/MH increment. Including the base funding, this project totals \$484.0: \$384.0 GF/MH and \$100.0 MHTAAR.

1037 GF/MH (UGF) 150.0 FY2007 Phasing in (year 1 of 3) of Medicare Rate Change for psychiatric care resulting in loss of Medicare revenue.	Inc	500.0	0.0	0.0	500.0	0.0	0.0	0.0	0.0	0	0	0

Alaska Psychiatric Institute (API) was historically paid by Medicare at a reasonable cost of the actual expenditures. In January of 2005 Medicare implemented a new payment system for psychiatric care to be phased-in over a three year period. The payment will be based on the diagnosis and how long Medicare believes it should take for the average patient to recover. All Inpatient Psychiatric Facilities (IPF's) will see a reduction in most payments and close to a totally phased out cost reimbursement method in 2007. API will experience payment reconciliation by their fiscal intermediaries between the payment rates based on diagnosis and length of stay. The result is that the financial responsibility of caring for these acute, complex patients will fall back to the State of Alaska Mental Health funds or other funding sources.

API serves both acute, short-term patients, and longer-term care patients who have organic or highly complex case diagnoses that would make it extremely difficult to place them in a community setting for care. Most of the Medicare patients API serves are either over 65 years of age or they may be the more complex cases. In many instances these patients exceed the Medicare 90 day limit for payment for psychiatric days. Because of this, for FY 07 API anticipates a loss of close to \$500.0. API is requesting this increment to bridge the financial gap to continue patient care due to this regulatory change in payments for Medicare.

FY2009 SDPR and GF Fund Change due to new Medicaid Revenue Enhancement Regulation Changes (continued)

Receipt (SDPR). SDPR collections have increased over the past two fiscal years due to revenue enhancement strategies. The increased authority to collect will allow API to continue improving patient care and treatment, help the Veteran's Administration serve Alaskans returning from active duty with psychiatric needs, and pay for TeleBehavorial Health and the Electronic Medical Record System.

This funding request will be in addition to the \$3,133.8 SDPR approved in the FY08 budget and the FY08 supplemental request for an additional \$2,200.0. It was not known that additional SDPR authorization would be needed during the FY08 budget process. The new Medicaid billing and collection processes did not become apparent until late in FY07.

#### **PURPOSE**

SDPR collections have increased due to new Medicare regulations effective 7/2/2006, which allowed reimbursement for:

- -- Diagnosis Related Group activities at the institution;
- -- billing for Medicare Part B (Physician Services) identified by consultants in October 2006;
- -- billing for Medicare Part D (Pharmaceutical) as identified by consultants in October 2006; and
- -- scheduled increases in the Medicaid daily rate that impacts the amount billed to Medicare and other third party payers.

The increase in Medicaid hospital in patient daily rate has increased from \$982.15 in FY06 to \$1,016.16 in FY07 and is anticipated to be \$1.048.23 in FY08.

The SDPR funding will be used to improve and implement the following API activities.

- -- The exploration of improvements to person centered treatment plans and implementation of a mall concept service plan has begun at this type of facility across the United States. Currently, API has implemented this new care concept that allows patients to receive disease-related education and psychiatric treatment in a setting that will promote recovery for chronic and acute patients. This program educates and encourages patients to learn to function more independently in their daily life, and to become less dependent on the structures provided by a hospital setting. It is anticipated that this system of care will reduce recidivism.
- -- Tele-Behavioral Health (TBH) is emerging as a new technique across the United States, and has been piloted in Alaska with a federal grant, which expired August 2007. This program will allow for psychiatric evaluation and treatment of patients from remote villages. The development of this infrastructure allows for rapid treatment in the patient's home setting without requiring transport to API.
- -- The Veteran's Administration has limited resources to assist returning Alaskans Veterans from active duty in Iraq and Afghanistan. These services will be provided as in-patient treatment as well as outpatient treatment through TeleBehavioral Health.
- -- The Electronic Medical Records (EMR) system is partially funded with an existing Capital project and the balance (approximately \$350.0) from the operating budget. This system is designed to track important patient data and will provide API with reliable funding and census information.

## Behavioral Health (continued) Alaska Psychiatric Institute (continued)

FY2009 SDPR and GF Fund Change due to new Medicaid Revenue Enhancement Regulation Changes (continued)

TIMING ISSUES

The new TeleBehavorial Health program in FY07 was federally funded through August 30, 2007. The excess \$1,247,289 collected in FY07 is being carried forward to FY08, which reduces API's ability to care for clients as intended by the Statutory Designated Program Receipts. Because of the shortage of medical professionals and the difficulty in recruiting in Alaska, the program will be carried out by existing positions, contracted physician services (Locum Tenens physicians) and on-call nurses.

Acute psychiatric care will continue to be a community need across the State of Alaska, as API continues to build a clinical infrastructure to meet anticipated needs as the default "safety net" when other services are not available. It is anticipated that approximately 3,600 combat troops from Stryker Brigade and 700 non-combat reserves are expected to return to Alaska from the Iraq War Theater this fiscal year. It is estimated that up to 30% of this population will require screening and intervention for Post Traumatic Stress Disorder. In the past five years increase in care to this population has grown between 13-17% yearly, with the largest increase this year.

#### **BUDGETARY ISSUES**

Continuing authority will be requested in future budget submissions to assist API in its dedication and commitment to serve the citizens of the State of Alaska. Recovery is our goal.

#### Performance Measures Affected:

Dept-Core Services: Provide an integrated behavioral health system

Dept-B-2: Improve and enhance the quality of life for Alaskans with serious behavioral health problems. BH-A1, A3: Strategy #1C: Improve and enhance the quality of life of Alaskans with a SED, SMI and/or a substance abuse disorder through the development of a comprehensive, integrated Behavioral Health Service System.

#### FY2010 Increase SDPR for Telepsychiatry

This increment would provide additional Statutory Designated Program Receipt (SDPR) authority to fund psychiatric services within the TeleBehavioral Health program. SDPR collections have increased over the past two fiscal years due to revenue enhancement strategies to increase receipts from private insurance and self payors.

Inc

200.0

API has experienced numerous turnovers in psychiatry positions at the hospital. At the same time, there is a statewide shortage of psychiatrists. API psychiatrists often provide telephone consultation and guidance to rural and frontier hospital Emergency Departments and rural health clinics, a practice which is expected to grow. API psychiatrists also staff the API TeleBehavioral Health Program (telemedicine), which provides 'real time' access to Alaskans who otherwise would have to travel to a regional hub for evaluation by a licensed practitioner.

Approximately 40% of API admissions come from rural areas; with an average of 1300 annual admissions per year, this amounts to 520 admissions. Half (50%) of the aggregate rural admissions come from the Kenai and Mat-Su regional service areas. By increasing access to psychiatric evaluation and medication management services via telepsychiatry, it is determined that over a three year period, Division of Behavioral Health-API will

The Alaskan IMPACT project is using the IMPACT model (Improving Mood - Promoting Access to Collaborative Treatment), a collaborative model for treating depression in adults, to establish protocols for identifying and intervening with depressed Alaskans within the primary care setting, where people feel most comfortable. This tested model relies on regular contact with a depression care manager and psychiatrist, with an emphasis on identifying manageable steps toward positive lifestyle changes, and working closely with primary care physicians providing patient education and support for the antidepressant medication when

needed.

According to the CDC, risk factors for suicide include "family history of child maltreatment," isolation and hopelessness (common feelings among victims of domestic violence), and depression. In Alaska, 76.1% of individuals screened through the Alaska Screening Tool reported an adverse childhood experience (past trauma) and 19.1% reported intimate partner violence (past or present). Thus, the number of Alaskans whose risk of suicide is heightened due to exposure to or victimization as a result of domestic violence is substantial.

The rate of suicide among Alaskan adolescents and young adults is far above the national average of 11.26/100,000. The cumulative rate of youth suicide from 2000-2009 for youth age 15-24 years was the highest of any age group. For all young men, the rate is 56.1/100,000. For Alaska Native young men, the rate is 141.6/100,000. For all young women, it is 16.6/100,000 and for Alaska Native young women, 50.3/100,000. The rate of suicide attempts among Alaskan youth is 99.3/100,000.

A quarter of traditional high school students and over one-third of alternative high school students reported feelings of significant depression and hopelessness. In traditional high schools, 14.6% of students surveyed reported seriously considering suicide in the past year. Among alternative school students, suicidal ideation was reported by 21.2%. Suicide attempts in the past year were reported by 8.7% of students in traditional high schools and by 13.2% of alternative high school students. Of these attempts, 2.7 -- 6.2% required medical attention.

Reduction Act												

The Department of Health and Social Services, Office of Children's Services requests \$105.5 in general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance

# Behavioral Health (continued) Residential Child Care (continued)

FY2008 Shortfall due to implementation of the Federal Deficit Reduction Act (continued)

on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Residential Child Care Component to be \$108.6. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care maintenance penetration rate. The penetration rate determines the percent of state foster care maintenance expenditures that will be considered reimbursable at 50% or the applicable Federal Medical Assistance Percentage (FMAP) rate. Congressional adjustments to Alaska's FMAP do not extend to foster care.

Residential Child Care (RCC) Component Estimate of Reimbursable Expenses:

- 1,435.9 estimated total RCC expenditures
- x 44% current IV-E maintenance penetration rate
- = 631.8 expenditures eligible for IV-E reimbursement
- @ 50% estimated FY 2008 FMAP
- = 315.9 pre DRA federal fund participation

#### Reduced Federal Fund Participation for Rosales:

- 1.435.9 estimated total RCC expenditures
- 29.3% with 14.7% reduction to IV-E maintenance penetration rate for Rosales
- = 420.7 expenditures eligible for IV-E reimbursement
- @ 50% estimated FY 2008 FMAP
- = 210.4 post DRA federal fund participation

RCC Summary of Reduced Federal Fund Participation for DRA

- 315.9 pre DRA federal fund participation
- 210.4 post DRA federal fund participation
- = 105.5 FY 2008 RCC general fund need

To the extent possible, OCS has made adjustments to calculations to account for any duplicate FTEs that will not be claimable as a result of the either Rosales or unlicensed relatives under the DRA.

Services within the Residential Child Care component for Title IV-E eligible children include incidentals and special needs for the well being of each child, including family preservations services, escort travel, and clothing. Component costs are those that are not included in daily rates or covered by Medicaid.

#### Missions and Measures

While this funding does not directly impact any specific OCS performance measures, it is an extention of essential services provided to children in custody and therefore indirectly impacts every OCS performance measure. In addition, several DHSS divisions are working closely to enhance in-state services available to these children with special needs through the Bring the Kids Home project. Children placed in residential care may have primary mental, emotional, and behavioral disorders or developmental disabilities resulting from substance abuse and/or mental illness of the parents.

This decreased rate will take effect on

The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. The amount of federal funds the state receives depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%.

The regular FMAP is projected to drop from 52.48% to 50.53% in FFY09 and the enhanced FMAP from 66.74% to 65.37%.

The rates used here are estimates. The final FMAP rate for FFY 2009 will not be known until November/December.

This fund source change effects every aspect of the OCS's ability to provide services to children in need.

The Department of Health and Social Services recognizes the need to maintain services provided by its grantees. While many of the grants in the Office of Children's Services are at least in part funded by the federal government, no recognition from the federal government for the tremendous increase in living expenses has been forthcoming. Because of the extraordinary increases seen of late, the DHSS is requesting a 4.6% increase (tied to CPI) in grant funds. This is necessary to simply maintain current levels of services. If not for this increase, existing grant funds must be used to cover overhead costs, reducing the services currently being provided to vulnerable Alaskans. These grants now total \$7.4 million.

Residential Child Care grants provide core services (room and board) for children in residential care. Residential care services are provided to children with behavioral problems that require 24-hour supervision.

If these Children's Services grantees must absorb the hike in energy costs and other general overhead costs, grantees will have no alternative but to reduce services. A reduction in services will affect every outcome for the Office of Children's Services as we depend on our grantee/community partners to provide the follow-up services to help keep children safe and families together.

Department Level Measures:

End Result C, Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse and neglect.

Strategy C1: Implementation of new safety assessment model to provide front line workers with a better tool to identify safety issues in the home.

Strategy C2: Children placed outside the home are protected from further abuse and neglect.

Strategy C3: Retain and effective and efficient workforce.

ORCA (Online Resources for the Children of Alaska) Services/Support Ownership

This request will provide the OCS (Office of Children's Services) with adequate funding to continue contracted services for the more complex and high profile portions of the ORCA application such as financial processing, financial reporting, and provider payments. This request also funds the level of help desk support required for the OCS to function at an optimal level. Help desk functions are currently provided via contracted services.

ORCA and the State of Alaska receive National recognition

The ORCA information system went live in September 2004, only six weeks behind its original schedule. The extremely complex financial and payment system went live in February 2005, 22 months after project inception. Typical system development time nationwide is 4 to 5 years. Alaska's achievement is noteworthy.

On September 7, 2005, the ORCA system was recognized by two prestigious, independent organizations, the Center for Digital Government and the American Public Human Services Association - Information Systems Management: "The Center for Digital Government Award honored Alaska's new Online Resource for the Children of Alaska (ORCA) system, which provides the State's over 450 social workers spread across 33 geographically dispersed locations with the ability to instantly share information on the more than 10,000 child abuse and neglect cases that are investigated annually.

Richard Varn, senior fellow at the Center for Digital Government, presented the award to CGI-AMS noting that, "the Center recognizes CGI-AMS and the State of Alaska for its transformational ORCA system. We conducted a thorough nationwide review and the ORCA project stands as one of the finest examples of technology advancing a critical public service offering."

Alaska's social workers can access case records in real-time through a Web-based system that supports child abuse, foster care, adoptions, and financial processing. Best practices in areas of risk assessment, placement, and payment processing are fully supported. ORCA was implemented in 14 months [sic]." www.cgi.com/web/en/news\_events/news\_flashes/2005/65192.htm

OCS Note: the actual implementation took 17 months.

ORCA Federal Review - No Payback of \$6 Million in Federal funds
In September 2005, the U.S. Department of Health and Human Services conducted an assessment of ORCA.
Federal reviewers visited 5 locations and interviewed nearly 100 OCS staff about ORCA. The review, while in draft status, notes that

- 1. Prior to ORCA, Alaska had spent over \$6.0 million in federal funds and made no significant progress toward implementing a system;
- 2. Alaska has made significant progress in meeting federal requirements and is no longer in jeopardy of having to pay back matching Title IV-E funds expended during the previously failed development effort;
- 3. OCS workers are embracing ORCA as a system that supports the OCS business model;

# Children's Services (continued) Children's Services Management (continued)

FY2007 Online Resources for Children of Alaska (ORCA) Services Ownership and Upgraded Infrastructure (continued)

- 4 Performance related concerns relate to bandwidth issues; and
- 5. Preliminary findings have identified that staff need additional help desk and training support to leverage the functionality available in the ORCA system.

#### FY 2007 Request Detail:

1) Personal Services - \$215.0 Current levels of Level II help desk support have proven to be inadequate to respond to the need. OCS carries a backlog of approximately 70 open ORCA Help Desk tickets. Eighty percent of these are more than one week old, so overflow inquiries and ORCA payment problems are being responded to by the provider payment accounting staff. While highly qualified in their area of expertise, provider payments, it has been a burden on accounting staff when tasked with these time consuming requests, complaints, and training issues related to ORCA.

Under the current contract, help desk services and implementation support cost \$550.0 for three assigned FTE's. In FY 2006, OCS received \$80.1 of the total \$500.1 for one help desk staff. This request includes \$215.0 for three additional FTE's (and associated travel and supplies) to provide program help desk, implementation, and maintenance support:

Program Coordinator R20 81.7
Project Assistants (2) R16 128.2
Travel and Commodities Costs 5.1
Total 215.0

- 2) Continuation of CGI Maintenance Contract \$500.0 Lately, it has become evident that OCS/FMS (Finance and Management Services) will not be adequately prepared to fully assume ORCA maintenance requirements in FY 2007. A knowledge transfer from contractor to state is in progress, but the complexity of the financial system, the steep learning curve, high staff turnover, and difficulty recruiting for these highly technical and specialized positions has proven to be insurmountable. This request for \$500.0 is to continue contracted maintenance services for one year to support these difficult areas of the process and to maintain a good risk mitigation strategy under the circumstances.
- 3) Infrastructure Upgrade for ORCA sites \$35.0 OCS is requesting \$35.0 for network infrastructure upgrades for regional sites that were not part of the recent Statewide Area Network (WAN) improvement project. These sites experience extreme communication delays and productivity loss due to the slow performance of network connections. This affects the use of the ORCA management information system as well as agency email. This request will purchase the necessary satellite equipment with the necessary bandwidth to avoid lost productivity and worker frustration in the non-WAN sites of Aniak, King Salmon, Galena, McGrath, and St. Mary's.

These costs are Title IV-E eligible at 50% of the foster care and adoption blended penetration rate.

From 1998 to 2004 there was an across the board increase to the number of Alaska children served in out-of-state residential psychiatric treatment centers. During this period, the increase for custody children went from 17 children in 1998 to 56 children in 2004. During this same time period, the utilization increase for non-custody children went from 66 children in 1998 to 693 children in 2004.

To address this over-reliance on out-of-state residential care by non-custody children, a consistent system of gate keeping for all children will be implemented. This requires sufficient staffing for the regional and out-of-state placement/resource committees to serve referrals for non-custody children. Currently, the resource teams are required to meet twice weekly for 1 1/2 to 2 hours each to serve custody children only. In order to serve non-custody children only.

Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of-state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges.

Dec

Funding for existing services has often been inadequate and has led to the lack of a fully implemented continuum of care in Alaska. With financial support, this initiative will focus on successfully building upon the existing infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state.

The Department of Health and Social Services, Office of Children's Services requests \$652.1 in general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act (DRA) of 2005 reversal of Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance and administrative costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relative's home from which the child is removed.

# Children's Services (continued) Children's Services Management (continued)

FY2008 Shortfall due to implementation of the

Federal Deficit Reduction Act (continued)

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Children's Services Management Component to be \$389.8. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E reimbursable at 50%.

#### Unlicensed Relative Placements

The Federal Deficit Act of 2005 also changed Title IV-E administrative claiming allowances pertaining to unlicensed foster care. Previously the State of Alaska was reimbursed for its Title IV-E administrative expenditures for children in both relative and non-relative unlicensed foster care placements. The new law prohibits claiming federal fund participation for not-fully licensed non-relative foster care placements and restricts reimbursement to less than 12 months for any relative foster care placement in the process of getting licensed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Children's Services Management Component to be \$281.1. Unlicensed relative placements account for about 11% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E reimbursable at 50%.

Children's Services Management (CSM) Component Estimate of Reimbursable Expenses:

#### Reimbursable Expenses

- 5,154.8 Total Expenditures
- x 66% IV-E Adminstrative Penetration Rate
- = 3,402.2 Expenditures Eligibe for IV-E Reimbursement
- x 50% Federal Administrative Reimbursement Rate
- = 1,701.1 Pre DRA Federal Fund Participation

#### Rosales and Unlicensed Relative

- 5.154.8 Total Expenditures
- x 40.7% 25.3% Reduction in Penetration Rate
- = 2,098.0 Expenditures Eligibe for IV-E Reimbursement
- x 50% Federal Administrative Reimbursement Rate
- = 1,049.0 Post DRA Federal Fund Participation

#### Component Summary

- 1,701.1 Pre DRA Federal Fund Participation
- 1,049.0 Post DRA Federal Fund Participation
- = 652.1 FY2008 GF Need

To the extent possible, OCS has made adjustments to calculations to account for any duplicate FTEs that will not be claimable as a result of the either Rosales or unlicensed relatives under the DRA.

#### Children's Services (continued) Children's Service's Management (continued)

FY2008 Shortfall due to implementation of the Federal Deficit Reduction Act (continued)

Children's services management provides management and support to all OCS programs.

#### Missions and Measures

Funding for this increment is essential to OCS's ability to meet all of its department and division level performance measures related to child protection services, early intervention services, recruitment and retention of qualified workers, and adoptions (all strategies relating to the end results cited below will be impacted). In particular, the division will not be able to complete implementation of the safety assessment model that will in turn affect the OCS's ability to decrease the rate of repeat maltreatment. Nor will the OCS be able to build on its work to retain an effective and efficient workforce. It will also limit the division's ability to improve the referral process from protective services to early intervention services, reunify children with their families, promote safe and timely adoptions, and increase the number of resource family assessments.

#### Department Level Measures

End Result: C: Outcome Statement #3: Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse or neglect.

#### Division Level Measures

End Result: A. To prevent children from abuse and neglect.

Children's Services (continued) Children's Services Management (continued) FY2008 Replace federal funding due to implementation of the Federal Deficit Reduction Act (continued) Frunding for this increment is essential to OCS's ability to meet all of its department and division level performance measures related to child protection services, early intervention services, recruitment and retention of qualified workers, and adoptions (all strategies relating to the end results cited below will be impacted). In particular, the division will not be able to complete implementation of the safety assessment model that will in turn affect the OCS's ability to decrease the rate of repeat maltreatment. Nor will the OCS be able to build on its work to retain an effective and efficient workforce. It will also limit the division's ability to improve the referral process from protective services to early intervention services, reunify children with their families, promote safe and timely adoptions, and increase the number of resource family assessments.  Department Level Measures End Result: C: Outcome Statement #3: Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse or neglect.

The Department of Health and Social Services, Office of Children's Services requests \$223.6 in general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance and administrative costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Children's Services Training Component to be \$133.6. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E

FY2008 Shortfall due to implementation of the Federal Deficit Reduction Act (continued) reimbursable at 50%.

Unlicensed Relative Placements

The Federal Deficit Act of 2005 also changed Title IV-E administrative claiming allowances pertaining to unlicensed foster care. Previously the State of Alaska was reimbursed for its Title IV-E administrative expenditures for children in both relative and non-relative unlicensed foster care placements. The new law prohibits claiming federal fund participation for not-fully licensed non-relative foster care placements and restricts reimbursement to less than 12 months for any relative foster care placement in the process of getting licensed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Children's Services Training Component to be \$96.4. Unlicensed relative placements account for about 11% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E reimbursable at 50%.

Children's Services Training (CST) Component Estimate of Reimbursable Expenses:

FY2009 Basic Staff Training and Development	Inc	427.0	0.0	207.5	219.5	0.0	0.0	0.0	0.0	0	0	0

This request addresses an area that the Office of Children's Services (OCS) anticipates will make a positive difference to its ability to retain staff at a minimal cost to the state: 1) improve new employee training for frontline workers by extending the length of training so that it is in line with other child welfare agencies nationwide and by enhancing the curriculum to provide new employees with all of the tools necessary to achieve OCS system improvements; and 2) provide all OCS staff the opportunity for continued education that is on point with their specific job class and beneficial to the state.

Any effort toward extending retention of employees is key to accomplishing our mission to protect children from abuse and neglect.

Enhanced Training for Frontline Workers: Two weeks of Training of New Employees (TONE) curriculum is offered to each newly hired child protective services caseworker through contracted services from the University of Alaska. This training is mandatory for every new front line worker and should include the critical tools necessary to achieve OCS system improvements. It should provide a solid base for new workers whereby OCS can retain and recruit effective staff members so that our mission to protect children from abuse and neglect can be achieved. This training should be in step with nationwide standards.

In July of 2006, Office of Children's Service (OCS) management began to review the training curriculum, and formed a TONE Advisory Group that consisted of OCS staff and Tribal partners. The goal of the advisory group was to review and revise the current curriculum to be more practice oriented, incorporate the new replaced practice standards and enhance cultural competency throughout all training, rather than offering it in just one training module. OCS has also reached out to consultants and staff for guidance.

Prior to the OCS-initiated effort to assess currently offered TONE, the DHSS contracted with ACTION for Child Protection, Inc., a national child safety intervention organization, to study and evaluate the OCS business functions. The ACTION report recommended that training should employ the Adoption & Safe Families Act as a foundation or framework to the entire curriculum; that the training curriculum should clearly identify the OCS mission and define who OCS serves; that there be a clear distinction in curriculum regarding the difference between maltreatment, risk and safety; and that much more time should be spent training staff on state-of-the-art best practice standards. The executive summary portion of the ACTION report recommended that OCS develop an exceptional training program for new and experienced workers.

# Children's Services (continued) Children's Services Training (continued)

FY2009 Basic Staff Training and Development (continued)

In January of 2007, the University of Alaska Anchorage's School of Social Work - Social Work Evaluation Program, released a brief to the OCS titled "Child Welfare Training Opportunities in Alaska". This brief was prepared in response to a request from OCS to provide additional recommendations about Alaska's child protection new worker training.

UAA's research revealed what they refer to as "overarching issues and recommendations" that include:

\* Alaska has a low number of training days as compared to other states. Arizona 6 weeks; Oregon 5 weeks; Nevada and Idaho 4 weeks; and Alaska follows with only 2 weeks. In fact, 3 weeks was the lowest number of full weeks reported other than Alaska's 2 weeks.

Recommendation: Alaska could expand the breadth and depth of new employee training to be consistent with other states' standards.

\* Cultural competence is discussed but not clearly so.

Recommendation: Alaska's child welfare training should rigorously incorporate the elements of Native culture and the laws that affect Native children into new employee training.

\* There could be strong relationships between Children and Family Services Review (CFSR) outcomes and training.

Recommendation: Alaska CSFR deficiencies are improving; however, the state can tailor training so that employees have stronger skills in the areas of CFSR deficiencies.

In addition to the two studies previously discussed, OCS initiated an employee survey recently in an effort to determine what staff within OCS agreed with and disagreed with. Questions focused on salaries, organization, leadership, communication, problem recognition and solving, supervision, community relations, quality of office settings, records management, and training. Of the 345 respondents, 39.4% disagreed and 20.9% strongly disagreed with the statement: The quality of initial and ongoing training for staff is good. Further, 52% of all staff responding said that initial and ongoing and quality of training for staff requires the most immediate attention in order to improve the effectiveness of the organization.

This increment request reflects the DHSS' desire to expand OCS TONE training by two additional weeks to offer its staff the full spectrum of training that is being recommended by national experts, UAA professionals, Tribal partners and its own management. OCS anticipates \$219.5 in costs to expand the existing TONE curriculum with the University of Anchorage based on the average cost for 92 new employee training episodes annually. OCS anticipates \$207.5 of travel related costs associated with an additional 2-week training course for new frontline workers. Travel costs are based on an average two-week TONE training expense of \$2,260 per employee. This includes transportation, per diem, and lodging. Prices increase significantly when training occurs between May and October in Anchorage.

Alaska's children and their families deserve caseworkers that have been given the tools and training necessary to

The federal Child and Family Services Review (CFSR) completed in September of 2002, highlighted inadequacies within the Office of Children's Services (OCS) in ensuring the safety of children, finding children permanent homes and making sure their health, education and mental health needs are met. Many of the areas identified as needing improvement were attributed to high caseloads.

In order to keep children safe, recruit more resource families to provide foster/adoptive homes, meet the outcomes defined in the federal program improvement plan, and enhance safety in foster/adoptive homes, the Office of Children's Services requests 31 additional positions in FY06 to respond to growth in caseload and assign front-line workers to prevention, protection and permanency.

Ten positions will be assigned to perform home studies of foster homes and adoptive homes. Two positions will be assigned to supervise home study workers. Three positions will be assigned to enhance ongoing efforts to recruit and retain foster families. Eleven positions will be assigned to perform intake, investigation, follow-up and ongoing case management to respond to growing caseload and more timely follow-up with more regularity. Finally, five positions will be assigned full time to serve as business analysts/expert resources/data processing liaisons to all the users of the recently-implemented ORCA computer system.

Additional travel and contractual funds (for vehicle leases) are requested in FY06 to perform home visits and site visits in order to satisfy programmatic quality assurance goals of the federal program improvement plan.

To enhance staff retention, OCS will begin to pay licensing fees to ensure licensure credentials are current for front-line workers, supervisors, and management staff. Many front-line workers are not renewing their social worker licenses because of increases in licensing fees (currently \$500 per license for a two-year period). This will allow for the renewal of an estimated 250 licenses per year.

Office renovation involving, moving, and wiring is required in order to co-locate and consolidate existing and new staff to the extent possible in Anchorage and Fairbanks.

Increased costs for the positions and support costs are being partially offset by a fund change built into the calculation of fund sources for this increment. GF has been reduced by 900.0 and federal increased by 900.0 to reflect anticipated increased Title IVE collection.

Care Admin Claims - Unlicensed Foster Care

Provisions in the 2006 federal Budget Reconciliation Bill limit the state's ability to claim IV-E maintenance and administrative costs. The bill was passed out of Congress in early February and signed into law on February 8, 2006.

## Children's Services (continued) Front Line Social Workers (continued)

FY2007 Provide 50% awaiting ruling AMD: Limits to Foster Care Admin Claims -Unlicensed Foster Care (continued)

It is unknown at this time whether provisions of the bill are effective as of February 8, 2006 or are retroactive to October 1, 2005.

The bill eliminates Title IV-E administrative claims for otherwise-federally eligible children in unlicensed foster homes with the exception that claims can be made for up to 12 months for a child in a relative home that is in the process of being licensed. OCS estimates a monthly loss of federal revenue of \$111,256 or \$1,335,072 annually.

With the limitations placed on the ability to claim administrative costs for unlicensed foster homes, the OCS anticipates there may be increased costs as the division continues to focus on relative placements under the provisions of last session's CH 64, SLA05 (HB 53) related to child-in-need-of-aid proceedings. More than 50 percent of the state's relative homes are unlicensed.

General funds are required in the Front Line Social Workers component to replace lost federal receipts and maintain the current level of support to the State's foster and adoptive parents and foster kids.

This shortfall was not addressed in the FY07 Governor's Budget request because the action by Congress was not known at that time.

Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance and administrative costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided

to IV-E eligible children through the Front Line Social Worker Component to be \$1,259.87 adjusted for the FY 2007 appropriation. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E reimbursable at 50%.

Unlicensed Relative Placements

The Federal Deficit Act of 2005 also changed Title IV-E administrative claiming allowances pertaining to unlicensed foster care. Previously the State of Alaska was reimbursed for its Title IV-E administrative expenditures for children in both relative and non-relative unlicensed foster care placements. The new law prohibits claiming federal fund participation for not-fully licensed non-relative foster care placements and restricts reimbursement to less than 12 months for any relative foster care placement in the process of getting licensed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Front Line Social Worker Component to be \$697.6 adjusted downward for the FY 2007 appropriation. Unlicensed relative placements account for about 11% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered IV-E reimbursable at 50%.

Front Line Social Worker (FLSW) Component Estimate of Reimbursable Expenses:

FY2008 AMD: Implement Medicaid Targeted Case Management for Foster Care Administration (Reg Chg)	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

This change is based on implementation of Medicaid Targeted Case Management within Child Welfare.

Estimates by the Office of Children's Services indicate a potential savings of \$800.7 in general funds for the 4th quarter of FY 2008.

The Department of Health and Social Services received a Medicaid State Plan Amendment (SPA) for approval to reimburse the Office of Children's Services (OCS) for targeted case management services provided to Medicaid eligible children who are in state custody and under the age of 21 years.

There are challenges with implementing targeted case management. Alaska mush proceed carefully to ensure that appropriate procedures are in place for assuring compliance with federal requirements.

Challenges related to implementation and maintenance of the program include:

1. Difficulty in development of a structure for service delivery within the OCS centers around the elements needed to calculate claiming for activities allowed under the plan. OCS has never had a need to distinguish between case management and administrative functions or between medical referrals, assessments, and case planning. This is a major change in practice that requires a software update to the division's Random Moment Time Study (RMTS) and changes to the Online Resources for the Children of Alaska (ORCA) case management system.

The RMTS is a federally mandated mechanism by which front line workers must report activities. At any given time they are sampled and asked to indicate by the use of 12 different codes, what they are working on. The program randomly generates 3,000 emails to staff each month. This study is required so that OCS can claim

# Children's Services (continued) Front Line Social Workers (continued)

FY2008 AMD: Implement Medicaid Targeted
Case Management for Foster Care
Administration (Reg Chg) (continued)
federal funds for front line social worker costs.

The more difficult system change involves coordinating updates to OCS's online data system known as ORCA. With the number of pending changes that are under federal mandate or related to changes in practice, some system changes are taking 10 to 12 months to develop and implement. Any added change with an implementation deadline like this will bump other OCS priorities from the schedule.

- 2. Confusion in determining the difference between Child Welfare Targeted Case Management and Title IV-E Case Management. Case management services are provided to Medicaid eligible children in custody. Medicaid allowable activities include assessment of individuals to determine service needs, case planning/development of specific care plans, case plan implementation/referral and linkage activities to obtain needed services, and case plan coordination/monitoring and case plan reassessment/follow-up. Because referrals to medical care providers are also Title IV-E reimbursable, those services will not be Medicaid eligible under Medicaid third party liability policy. These determinations will be made by the case worker in the field.
- 3. Impact on front line workload and training necessary. Claiming will be based on front line worker responses to the RMTS. There is a margin for error inherent in these responses given workload and other circumstances in the field. Without adequate training beyond the training a new worker must already receive and a good understanding of the services eligible for Medicaid vs. those eligible for IV-E, services are easily coded incorrectly and could result in a situation whereby claiming is done incorrectly, such as occurred with Massachusetts.
- 4. Required documentation for compliance with federal law is labor intensive necessitating duplication of effort, i.e., documented proof that a IV-E eligible service was not charged to Medicaid.
- 5. A quality assurance component will be required to remain in compliance. Concentrated effort will be required to make certain front line and other staff understand the complexities of the program. The required knowledge and expertise of both Title IV-E and Medicaid each an extremely complex, heavily monitored federal program needed to implement and monitor targeted case management will most likely not be found in state outside of the department. Existing staff will be tasked with this project in addition to their other full-time duties.
- 6. Claiming process is complex and labor intensive. The State Plan amendment is clear regarding rate computation as set out below. In this instance, the OCS case workers become the providers. Under this plan, the OCS must undertake careful review to ensure Medicaid eligibility and appropriate billing of both programs that will require increased efforts by case workers, managers, and administrative staff. The OCS will utilize the updated and federally approved Random Moment Time Study to allocate administrative activities separately from targeted case management activities and will bill Medicaid for the appropriate activities via the Medicaid Management Information System (MMIS).

The monthly rate for these eligible services is based on the total average monthly cost per client served by the OCS and is restricted to the direct service and administrative costs associated with case management service delivery. The rate is computed by taking the monthly case management cost divided by the monthly number of children that are provided case management services. The rate is determined prospectively with the first year based on estimated costs as set out below and numbers of clients serviced. Subsequent years will be based on

showed the full general fund amount is needed.

The Office of Children's Services proposes to reduce the original request for general funds by \$152.2 to \$1,720.4 through changes in practice that should increase the number of IV-E eligible children early in the process through

The following summary of a proposed method of tracking and monitoring funds within the four OCS regions follows new OCS field practice rather than historical expenditures and case FTEs. If changes in practice are successful, increased federal dollars will be earned. That savings is consolidated in foster care special needs as well as incorporated into this request.

Using ORCA (Online Resources for the Children of Alaska case management system) data to monitor expenditures in each region within the protective service practice categories of 1) investigation, 2) open for services (in-home), 3) out-of-home placement, and 4) trial home visits, we can effectively build in accountability for ORCA data entry and budget management, and promote best practice through case management.

1) Investigations -- Once a protective services report is screened in, an investigation begins, and necessary costs are incurred. Current investigations are to be completed in 90 days. A policy changing that time period to 30 days is being proposed.

With targeted funds allocated to investigative work, managers will want to encourage workers to close

case plans that qualify for reimbursement.

FY2009 Implementation of Front Line Workload Study	Inc	860.9	602.7	30.5	204.8	15.5	7.4	0.0	0.0	10	0	0

In response to legislative concerns and Citizen's Review Panel findings, the Department contracted with Hornby Zeller Associates in 2006 to conduct a six-month workload study and analysis to determine whether or not front line caseworkers have sufficient time to meet the basic requirements of their jobs -- protecting children and serving families.

The six-month study compared the time needed to handle a case appropriately to the time available for case-specific work and caseload per worker. Staff was categorized by the type of work completed by each position: intake, ongoing, generic, licensing and supervision. A random moment survey and time study was conducted for a six-week period, and Online Resources for the Children of Alaska system (ORCA) data was analyzed.

Findings indicated, but were not limited to the following.

- \* Of 132.1 hours available for work each month (excludes nonwork time and training):
- case specific time for supervisors is 84 hours per month, 86 hours for licensing workers, 111 hours for urban and midsized regional area workers, and 105 for workers in remote areas;
- Administrative time for supervisors is 40.4 hours per month, 38.2 for licensing workers, 13.4 for urban and midsized regional area workers, and 19.15 hours for workers in remote areas.
- \* Of the types of cases handled by workers, permanency cases require the most time up to 19.9 hours per month; in-home services with court involvement consume 11.9 hours per month; investigations 9 hours per month; licensing assessments 5.8 hours; and intake 3.2 hours.
- \* Face-to-face contact occurs most frequently among intake workers; workers in remote areas are in contact with clients less frequently in part due to fewer clients, more time necessary for court preparation, and travel.

In summary, the results published indicate a need for 19 additional workers. OCS has noted an error in the study accounting and determined the need to be 17 additional workers after adjustments for unassigned existing positions. The OCS received 6 additional workers in FY 2008 and is now requesting funding for 7 of the remaining recommended positions and 3 administrative staff workers.

The OCS is requesting 3 support positions to help alleviate some of the administrative duties that fall on line workers. The workload study revealed that line workers spend an average of 12.4% of their time on administrative tasks. OCS has increased its frontline staff by 63 positions over the last 3 years.

The addition of these workers had a significant impact on the total number of workers available to provide direct services at any given time - an increase of 14% from 2004 to 2005 and an additional 5% from 2005 to 2006, holding steady in 2007. In addition, vacancy rates fell from 11.35% in FY 2006 to 9.5% in FY 2007.

The division requested and received \$550.0 from the legislature to procure the additional lease space required.

A Request for Proposals (RFP) was issued to procure 30.500 square feet of office space for 132 employees. The

proposal was challenged, and in 2005, OCS was still without additional space.

#### Children's Services (continued) Front Line Social Workers (continued)

FY2009 Increased Lease Costs - Anchorage (continued)

Since the original request in FY 2003, the OCS Anchorage office staff has increased in size by 44 positions. This increase is in part due to the increased number of line workers in the Anchorage office as well as the transfer in of positions from the Division of Public Health as a result of the Department of Health and Social Services reorganization of 2004. OCS staff in Anchorage are currently housed in 3 different buildings with more than 40% of professional frontline workers sharing office space.

In May of 2005, the OCS received permission to resurrect the 2-year old RFP and update it based on new staff counts. A new RFP was issued in 2006 and after more challenges and false starts, OCS is finally planning to move to new space in March of 2008.

Since the original funds were appropriated, costs have increased due to the higher number of staff. Also, the space needs have been reconfigured to comply with state standards, resulting in increased square footage. The new space configuration provides for adequate security and safety of OCS employees and clients.

In addition, the OCS has absorbed \$81.0 in lease costs to support a recently established facility known as Alaska CARES. Alaska CARES is a very successful Children's Advocacy Center (CAC) in the Anchorage Providence Alaska Medical Center that provides waiting areas, interview rooms, and exam rooms -- a "one-stop" center for children and non-offending family members experiencing the crisis of sexual and/or severe physical abuse.

The center also provides Multidisciplinary Team (MDT) staff offices, training facilities, and meeting space. The foundation of a CAC is the MDT. Alaska CARES MDT members include staff from Alaska CARES, the Anchorage Police Department, Office of Children's Services, medical practitioners, mental health professionals, prosecutors, victim advocates, and prevention. MDTs, while never working directly with a victim, guide a case through the investigatory process that may lead to prosecution while making certain all non-offending family members receive the appropriate services to help them through the trauma. The CAC provides the best setting in which an investigation can occur to assure victims are not re-traumatized by repeated interviews and examinations.

With these changes, the OCS finds itself in need of \$583.3 to fully fund current space needs over that which was funded in FY 2003. AKSAS records show that the Anchorage regions expended about \$45.0 on leased space in 2003. Costs are currently \$576.9. Costs in FY 2008 will increase to \$1,160.2. Without this funding, OCS will be forced to cut services in other areas of the budget to cover increased lease costs.

While a comfortable, adequately sized space in which to work should be provided to every employee, this request also addresses OCS's ongoing recruitment and retention issues. It also is directly related to the OCS's efforts to provide prevention services to children who come into the OCS system. Currently, all prevention service staff for OCS are housed in the Frontier Building, completely separate from regional and field staff. Bringing management, child protective services, and prevention staff into the same building will promote communication and interaction, thus promote the awareness of prevention services available to children and families.

The additional meeting space available to staff in the new Anchorage Office of Children's Services (OCS) building enhances the ability of OCS staff to partner with other professionals in Alaska's child protection system and invite stakeholders to gather face-to-face in a collaborative effort to improve the system. Having the ability to host large meetings on OCS premises also provides OCS with a real opportunity to educate and engage the Anchorage

FY2010 Complete Implementation of Front Line Workload	Inc	403.8	351.4	0.0	52.4	0.0	0.0	0.0	0.0	5	0	0

This request is for \$403.8 to fund four frontline positions that will complete the final phase of the 2006 Office of Children's Services (OCS) workload study recommendations for increased staff as well as an additional support staff position.

In response to Legislative concerns and Citizen Review Panel findings, the Department contracted with Hornby Zeller Associates in 2006 to conduct a six-month workload study and analysis to determine whether or not front line caseworkers have sufficient time to meet the basic requirements of their jobs - protecting children and serving families.

The outcome of this six-month study was based on the time needed to handle a case appropriately, the time available for case-specific work, and caseload per worker. Staff was categorized by the type of work completed by each position: intake, ongoing, generic, licensing and supervision. A random moment survey and time study was conducted for a six-week period, and ORCA (Online Resources for the Children of Alaska system) data was analyzed.

Findings indicated, but were not limited to the following.

Of 132.1 hours available for work each month (excludes nonwork time and training):

-case specific time for supervisors is 84 hours per month, 86 hours for licensing workers, 111 hours for urban and midsized regional area workers, and 105 for workers in remote areas;

-administrative time for supervisors is 40.4 hours per month, 38.2 for licensing workers, 13.4 for urban and midsized regional area workers, and 19.15 hours for workers in remote areas.

Of the types of cases handled by workers, permanency cases require the most time - up to 19.9 hours per month; in-home services with court involvement consume 11.9 hours per month; investigations 9 hours per month; licensing assessments 5.8 hours; and intake 3.2 hours.

Face-to-face contact occurs most frequently among intake workers; workers in remote areas are in contact with clients less frequently in part due to fewer clients, more time necessary for court preparation, and travel.

In summary, the results published indicated a need for 17 additional workers. The OCS received six additional workers in FY2008, seven additional workers in FY2009, and is now requesting funding for the final four frontline worker positions.

In FY2009, the OCS requested and was provided funding for three administrative staff to help support line workers - when you increase the number of line workers, administrative workload increases exponentially. During this final phase of the project, the OCS is requesting an additional Social Services Associates (SSA). The SSA provides

# Children's Services (continued) Front Line Social Workers (continued)

FY2010 Complete Implementation of Front Line Workload Study Recommendations - Final Phase (continued)

valuable services that free line worker time to respond to and investigate child protective reports and manage caseloads. Examples of duties performed by a SSA include supervising visits between parents and children, transporting children for parental visits, moving (when a child must leave the home, the Associate packs and facilitates that move), providing information to clients regarding services available, facilitating the provision of services required by a case plan, scheduling client appointments, escorting children to and from visitation or medical appointments, updating and maintaining case records, assisting with crisis intervention, and completing applications for the provision of services required by a child or parent.

Increasing the number of line workers and the number of support staff for line workers is recommended by the Alaska Citizen Review Panel in their 2008 Annual Report. While their recommendation is not specific to SSAs, SSAs provide the most direct support services to clients that also free line worker time. The Panel reports that "Many workers are at their breaking point with demanding caseloads and insufficient support services in their areas to offer clients. Very few OCS offices have enough staff either due to existing positions being vacant or funding that is inadequate to hire the necessary number of workers." OCS believes that eight SSA positions will make a substantive difference to these conditions. SSA vacancy rates, internal promotions excluded, are only 3%, indicating these positions can be filled and retained.

Request: \$403.8: \$92.9 Federal; \$310.9 General Fund Match

Cost: \$61.2 (includes core service costs)

Adequate staffing in OCS will impact the achievement of several desired end results for this division. This request for additional front line workers rides on the back of the above referenced Workload Study and follows three years of staffing increases for OCS.

Almost all division and department performance measures pivot upon the ability of frontline workers to provide the direct services required to keep children safe. Without adequate staffing, caseload numbers increase, the ability to provide quality service decreases, worker frustration increases, and people leave their jobs. Funding of this request directly impacts the following end results and all efforts to meet them:

Department Level Measures:

End Result C: Outcome Statement #3: Children who come to the attention of the Office of Children's Services are first and foremost protected from abuse or neglect.

Strategy: C3: Children placed outside of the home are protected from further abuse and neglect.

Strategy: C4: Retain an effective and efficient workforce.

Revise the FY2006 fund source for Front Line Social Work Expansion and Title IV-E Foster Care Realignment increment to reflect actual revenue sources. The original funding sources included a projected \$900.0 reduction in GF needs based on a federal match rate that is unattainable. This resulted in disproportionate levels of federal funding that cannot be earned by the division, creating general fund shortfalls.

In FY2006, 31 positions were added to frontline staff in response to the 2002 results of the Child and Family Services Review. This federal review resulted in a program improvement plan in which the addition of 31 front line workers to perform home studies; recruit foster homes; perform intake, investigations, and case management; and to meet mandated data needs was required to avoid financial sanctions. The last line of the resulting FY 2006 incremental request stated: "Increased costs for position and support costs are being partially offset by a fund change built into the calculation of fund sources for this increment. GF has been reduced by \$900.0 and federal increased to reflect anticipated increased Title IV-E collection." This meant a IV-E federal fund participation rate of 72.6%, which is not possible to attain. Title IV-E claims for administrative work are calculated at the ratio of IV-E eligible casework to non IV-E eligible casework determined by a Random Moment Time Study (RMTS) x 50% federal match rate. RMTS statistics average 30% quarterly equaling a 15% IV-E federal fund participation rate.

The incorrect funding sources eventually resulted in shortfalls. The OCS did not feel the immediate impact in FY2006 or 2007 because it took several months to establish the new positions and hire new staff, and the division carried a high vacancy rate (11% in FY2006 and 9.5% in FY2007). Therefore, the empty authority was not a priority and was not addressed. By FY2008, vacancy rates were at 7% and the division realized a \$600.0 general fund need in order to close out the year. In FY 2009, while the vacancy rate increased to 9%, the ability for the division to earn IV-E revenue decreased by approximately 4% because of a decrease in the number of IV-E eligible children. The budgeted general fund shortfall of \$900.0 was exceeded by almost \$1,700.0 as a result.

The inability to earn revenues because of ineligible children is being addressed through changes in administrative and field efforts, and the OCS immediate goal is to increase eligibility and thus earnings by \$850.0. These additional earned revenues combined with approval of this \$900.0 request will allow the OCS to pay salaries and overhead costs within a budget that represents our anticipated ability to earn revenues and pay expenses.

This effort to adjust the OCS FLSW component budget is in keeping with department goals to stabilize division budgets so that authorization is in line with expenditures and fund sources are in line with the ability to earn revenues.

The Child Welfare Citizen's Review Panel (CRP) recently completed a review of the Office of Children's Services (OCS), Southcentral regional office located in Wasilla. This office serves the Mat-Su, Kenai, Homer, King Salmon, Kodiak, Seward, Glennallen, and Valdez. Preliminary results indicate their recommendation will be for increased staff and funding in support of this office.

The Southcentral regional office is currently working at an estimated 140% capacity - meaning with all case carrying positions filled, the workload exceeds those levels recommended by the CWLA (Child Welfare League of America) by 40%. OCS is working toward a comprehensive analysis of the actual need in each area of the state to determine if it is feasible to move an estimated 11 positions from other areas of the state into this office without shifting OCS staff shortage issues from one area to the other.

Assuming the results of management and CRP findings continue to indicate 11 positions as a reasonable solution, and assuming those 11 positions could be transferred from other state offices, funding will fall short given the high budgeted vacancy factor. Additional funding will reduce the budgeted vacancy factor to allow OCS to hire existing

Federal awards for Child Abuse Prevention and Training Act/Children's Justice Act (CAPTA/CJA) will double beginning October 2005. DHSS will grant to subawardees to enhance ongoing advocacy/justice activities. The following services are provided through these grants:

Child-Appropriate/Child-Friendly Facility: A children's advocacy center provides a comfortable, private, child-friendly setting that is both physically and psychologically safe for clients.

Multidisciplinary Team (MDT): A multidisciplinary team for response to child abuse allegations includes representation from the following: law enforcement; child protective services; prosecution; mental health; medical; victim advocacy; children's advocacy center.

Forensic Interviews: Forensic interviews are conducted in a manner which is of a neutral, fact-finding nature, and coordinated to avoid duplicative interviewing.

Medical Evaluation: Specialized medical evaluation and treatment are to be made available to CAC clients as part of the team response, either at the CAC or through coordination and referral with other specialized medical providers.

Therapeutic Intervention: Specialized mental health services are to be made available as part of the team response, either at the CAC or through coordination and referral with other appropriate treatment providers.

Victim Support/Advocacy: Victim support and advocacy are to be made available as part of the team response, either at the CAC or through coordination with other providers, throughout the investigation and subsequent legal proceedings.

Case Review: Team discussion and information sharing regarding the investigation, case status and services needed by the child and family are to occur on a routine basis.

Case Tracking: CACs must develop and implement a system for monitoring case progress and tracking case outcomes for team components.

The Department of Health and Social Services, Office of Children's Services requests \$650.0 in general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

Reduction Act

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance and administrative costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Family Preservation Component to be \$388.7. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered reimbursable at 50%.

#### Unlicensed Relative Placements

The Federal Deficit Act of 2005 also changed Title IV-E administrative claiming allowances pertaining to unlicensed foster care. Previously the State of Alaska was reimbursed for its Title IV-E administrative expenditures for children in both relative and non-relative unlicensed foster care placements. The new law prohibits claiming federal fund participation for not-fully licensed non-relative foster care placements and restricts reimbursement to less than 12 months for any relative foster care placement in the process of getting licensed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided

to IV-E eligible children through the Family Preservation Component to be \$280.3. Unlicensed relative placements account for about 11% of the foster care population resulting in a like drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered reimbursable at 50%.

Family Preservation (FP) Component Estimate of Reimbursable Expenses:

#### Reimbursable Expenses

5,138.3 Total Expenditures

- x 66% IV-E Adminstrative Penetration Rate
- = 3,391.2 Expenditures Eligibe for IV-E Reimbursement
- x 50% Federal Administrative Reimbursement Rate
- = 1,695.0 Pre DRA Federal Fund Participation

#### Rosales and Unlicensed Relative

5,138.3 Total Expenditures

- x 40.7% 25.3% Reduction in Penetration Rate
- = 2,091.3 Expenditures Eligibe for IV-E Reimbursement
- x 50% Federal Administrative Reimbursement Rate
- = 1,045.6 Post DRA Federal Fund Participation

#### Component Summary

- 1,695.6 Pre DRA Federal Fund Participation
- 1.045.6 Post DRA Federal Fund Participation
- = 650.0 FY2008 GF Need

To the extent possible, OCS has made adjustments to calculations to account for any duplicate FTEs that will not be claimable as a result of the either Rosales or unlicensed relatives under the DRA.

Family Preservation provides funding for grantee services to provide family support and preventative services to Alaskans.

#### Missions and Measures

This incremental request does not directly effect any specific OCS performance measure but does effect the ability to provide funding for grantee services and thus reducing the services available through the Tribes and through private grantees. These services not only help prevent aduse and neglect, but help heal children who have suffered under maltreatment.

#### Department Level Measures:

End Result: C: Children who come to the attention of the Office of Children's Services are, first and foremost, protected from child abuse and neglect.

Strategy: C3: Children placed outside of the home are protected from further abuse.

Division Level Measures:

Deficit Reduction Act												

The Department of Health and Social Services, Office of Children's Services requested \$650.0 in general funds for anticipated reduced federal receipts as a result of the federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis showed the full general fund amount is needed.

The Office of Children's Services proposes to reduce the original request for general funds by \$82.0 to \$568.0 through changes in practice that should increase the number of IV-E eligible children early in the process through case plans that qualify for reimbursement.

The following summary of a proposed method of tracking and monitoring funds within the four OCS regions follows new OCS field practice rather than historical expenditures and case FTEs. If changes in practice are successful, increased federal dollars will be earned. That savings is consolidated in foster care special needs as well as incorporated into this request.

Using ORCA (Online Resources for the Children of Alaska case management system) data to monitor expenditures in each region within the protective service practice categories of 1) investigation, 2) open for services (in-home), 3) out-of-home placement, and 4) trial home visits, we can effectively build in accountability for ORCA data entry and budget management, and promote best practice through case management.

1) Investigations -- Once a protective services report is screened in, an investigation begins, and necessary costs are incurred. Current investigations are to be completed in 90 days. A policy changing that time period to 30 days is being proposed.

With targeted funds allocated to investigative work, managers will encourage workers to close investigations timely, open cases for services when necessary, develop case plans, keep ORCA updated, and make sure that all other documentation to support IV-E claiming is in place.

2) Open for Services - In-Home.

If a child is determined to be unsafe but can remain in their homes with services, the investigation is closed and a safety plan is put in place. A case plan is then developed. With proper documentation, both a safety plan and a case plan trigger Title IV-E eligibility.

3) If a child is determined to be unsafe and a safety threat exists that cannot be controlled in the home, the child is removed from the home. Services provided to the child are IV-E eligible as long as a worker can show

FY2009 Discontinue Private ProShare Refinancing (continued)

Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching GF through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Performance Measures Affected:

Dept-Core Services--Manage health care coverage for Alaskans in need

Dept-Core Services--Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

HCS-A--Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

DPH-A--Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

In 2002, the Division of Family and Youth Services, predescessor to the Office of Children's Services (OCS), requested federal authority in order to receive and utilize federal grants from the United State Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) to establish and operate Child Advocacy Centers in Alaska. Alaska was to receive specific funding for a 5-year period beginning in 2001/2002. From the

FY2009 Continued Support for Child Advocacy Centers (continued)

beginning of Phase 1 of the project through 2007, Alaska has established and helped to maintain seven fully functioning CAC's located in Juneau, Wasilla, Anchorage, Nome, Bethel, Dillingham, and Fairbanks. To date, the CACs in Juneau, Anchorage, and Wasilla are nationally accredited and Fairbanks CAC accreditation is pending.

Beginning in July 2005, Alaska Statute 47.17.033 required that all child sexual abuse interviews be videotaped at a Child Advocacy Center (CAC) whenever possible. Because this Statute states "whenever possible", it is not an absolute mandate. However, OCS believes legislative intent strongly urged utilization of the Child Advocacy Centers and alluded to "whenever possible" only because there were few centers available at the time. Nonetheless, OCS has committed to the use of CACs statewide and to making certain CACs are available where needed.

In SFY07, OCS Child Protective Services investigated 2,837 reports of child sexual and physical abuse. Of these 2,837 reports, 1,378 or 49% were referred to Alaska's Child Advocacy Centers.

Region/Area	Sexual Abuse	Physical Abuse	Total Allegations	Total Referrals
Anchorage	287	859	1,146	720 - 63%
Northern	126	374	500	197 - 39%
Southcentral	279	587	866	329 - 38%
Southeast	80	245	325	132 - 41%
TOTAL	772	2,065	2,837	1,378 - 49%

Child Advocacy Centers provide child sexual abuse and severe physical abuse victims age 0 through 18 and their non-offending parents a safe, child-friendly place to interview, receive forensic medical examinations, and mental health services or referrals. Each victim is assigned a specialized family advocate who will remain with the child and family throughout the investigative process. CAC interviews are legally sound and neutral, and they coordinate fact-finding to avoid duplicative interviews.

The foundation of a CAC is the Multidisciplinary Team (MDT) that is comprised of community, tribal, medical, social service, and legal representatives. MDTs, while never working directly with a victim, guide a case through the investigatory process that may lead to prosecution while making certain all non-offending family members receive the appropriate services to help them through the trauma. The CAC provides the best setting in which an investigation can occur to assure victims are not re-traumatized by repeated interviews and examinations.

Each MDT receives training from Office of Juvenile Justice and Delinquency Prevention (OJJDP) Regional Children's Advocacy Centers (RCACs). The RCACs provide regional services to help strengthen Children's Advocacy Centers, and provide training that allows each MDT member, from their specific approach, to serve each family with the least amount of intrusion upon the victims.

Currently, there are fully trained MDT's in Kotzebue, Homer, and Kenai. These areas are ready for CACs. In addition, Galena, Glenallen, and Ketchikan are in various stages of developing MDTs, and the OCS continues to receive inquiries, most recently from Prince of Whales Island, regarding development of new MDTs and CACs.

To date, a good portion of the costs to establish Alaska's CACs and MDTs have been funded through OJJDP federal grants. Once established, the CACs work hard to find other sources of support through grants and fund

#### Children's Services (continued) Family Preservation (continued)

FY2010 Replace Federal Title IV-B Child Welfare Services Funding (continued)

> Keeping families together is accomplished through community-based family support services provided by grantee organizations that specialize in strengthening family relationships to provide children a safe and supportive family environment. These preventative grants promote safety and permanence and are essential to prevent the unnecessary separation of children from their homes. Grantees focus on family support, family preservation, time-limited family reunification and adoption promotion and support services.

> The federal IV-B budget allows each state a base amount of \$70,000. Additional appropriated federal funding is determined on the federal fiscal year and distributed in proportion of a state's population of children under age 21 multiplied by the complement of the state's average per capita income and reduced by payments to Tribes. Alaska's IV-B funding is distributed between the state and about 16 Tribes that have a plan in place for child welfare services. If more Tribes apply, funding levels for OCS will be reduced even further. There is a 25% match requirement for IV-B funding.

> While difficult to determine the exact reason for reduced funding, this reduction to Alaska's Title IV-B funding is the combined result of lower federal appropriations and formula calculations used to determine state allotments. Lower funding levels have reduced the OCS's ability to fully fund time-limited family reunification services that facilitate the timely reunification of a child safely and appropriately. Adoption promotion and support services intended to encourage adoptions and provide the follow-up care that is considered critical to sustain the adoption have also been limited. These replacement funds will allow the OCS to provide grantees the funding they require to provide the services needed at the same level received in prior years.

A reduction in funding directly impacts the OCS's ability to meet specific performance goals and has an overall impact on the mission of the OCS and the Department of Health and Social Services. Performance measures most impacted include:

### Department Level Measures:

End Result C, Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse and neglect.

Strategy C2: Children placed outside the home are protected from further abuse and neglect.

Children's Services Results Delivery Unit Measures:

End Result A. To prevent child abuse and neglect.

Strategy A1: Increase the number of referrals from Children's Protective Services to Early Intervention/Infant Learning Program services.

Strategy A2: To reunify children in out-of-home placements with parents or caretakers as soon as it is safe to do

### Children's Services (continued) Family Preservation (continued)

FY2010 Replace Federal Funds for Alaska Child Advocacy Centers - Final Phase (continued)

funding for a five-year period to build a Child Advocacy Center presence statewide. From the beginning of Phase 1 of the project through 2008, Alaska has established and helped to maintain seven fully functioning CAC's located in Anchorage, Wasilla, Juneau, Bethel, Nome, Fairbanks and Dillingham. To date, the CAC's in Anchorage, Wasilla and Juneau operate with full national accreditation.

Alaska Statue 47.17.033 encourages that all child sexual abuse interviews be videotaped at a Child Advocacy Center (CAC) whenever possible. Child Advocacy Centers provide child sexual abuse and severe physical abuse victims age 0-18, older youth who have developmental challenges, and their non-offending care providers a safe, child-friendly place to interview, receive forensic medical examinations, and get mental health services or referrals. Each victim is assigned a specialized family advocate who will remain with the child and family throughout the investigation process. CAC interviews are legally sound and neutral, and they coordinate fact-finding to avoid duplicative interviews.

The foundation of a CAC is the Multidisciplinary Team (MDT) that is comprised of community members representing behavioral heath, medical, law enforcement (police and state troopers), juvenile justice, tribal, education, legal (assistant attorney general and public defender), and OCS staff. MDT members collaborate with direct service CAC staff, to guide each case through the investigatory process that may lead to prosecution while making certain all victims and non-offending family members receive the appropriate services to help them through the trauma. The CAC is designed to assure that victims are not re-traumatized by repeated interviews and examinations.

To date, a good portion of the costs to establish Alaska's CACs and MDTs have been funded through the OJJDP federal grant. Once established, Alaska CACs work hard to find other sources of support through grants and fund raisers, but most, and in particular the CACs located in rural sites, have struggled to raise the funding required to maintain their centers. By the end of FY2009, the remaining \$1,123.8 federal funds available to help establish new centers and maintain existing centers will have been exhausted.

CACs continue to be successful in Alaska. Since the creation of the Lake Plaza Multidisciplinary Center in Anchorage, the referrals to the Anchorage CAC have increased 13%. The Children's Place Child Advocacy Center located in Wasilla is in the process of designing a new facility, and they are actively involved with the OCS to create a Multidisciplinary Center model where the Office of Children's Services plans to place a full investigative unit. OCS is currently making plans to co-locate staff in the Fairbanks CAC. OCS is committed to continuing their efforts toward supporting multidisciplinary co-location lease funding to place investigative units in Alaska CAC's.

In FY2008, OCS Child Protective Services investigated 2,784 reports of child sexual abuse and physical abuse. Of these 2,784 reports, 1,557 or 56% were referred to Alaska's Child Advocacy Centers. This is a 7% increase over FY2007.

#### FY2007

Beginning with FY2009, the Copper River Basin area and the Kenai Peninsula have begun formation of new Alaska Child Advocacy Centers. These are located in Homer and Glenallen, and will increase the number of Alaska Child Advocacy Centers from seven to nine.

The National Children's Alliance (NCA) guidelines are the cornerstone of all our Alaska CAC's. Alaska CAC's and MDT have a strong national connection and active statewide network support through our State Chapter, the Alaska Children's Alliance. Much of the training for our Child Advocacy Center staff is enhanced through maintaining an Alaska Children's Alliance Coordinator. OCS plans to fund a half time state coordinator position to increase Alaska's ability to continue receiving National Children's Alliance grants for training and enriching our state's CAC's.

Alaska CAC's are designed to assure our child victims are not re-traumatized after experiencing child sexual abuse or severe child physical abuse and to assure that our non-offending family members as well as the child victims receive support and treatment when required. This supports OCS's mission to promote strong families and safer children. While every OCS performance measure is geared toward that goal, CAC's are more closely attached to the following measures:

#### Department Level Measures:

End Result C, Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse and neglect.

Strategy C2: Children placed outside the home are protected from further abuse and neglect.

Strategy C3: Retain and effective and efficient workforce.

#### Children's Services Results Delivery Unit Measures:

End Result A. To prevent child abuse and neglect.

Strategy A2: To reunify children in out-of-home placements with parents or caretakers as soon as it is safe to do

Gov Amd transaction fund source had to be changed from General Fund Match to General Funds in order to prevent a negative fund source (LFD transaction).

This transaction reverses a request made in the Governor's Request.

Alaska's TANF is a block grant created by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. TANF replaced the Aid to Families with Dependent Children (AFDC) program that had provided cash welfare for families with children since 1935. TANF funds were designated for use in four broad areas: 1) provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives; 2) end the dependence of needy parents on government benefits by promoting job preparation, work, and marriage; 3) prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and 4) encourage the formation and maintenance of two-parent families. Within these guidelines, TANF can transfer up to 10% of its grant funding to the Social Services Block Grant (SSBG). In Alaska, the SSBG is appropriated to the Office of Children's Services (OCS).

Alaska has experienced decreased federal revenue through the TANF program in recent years, as a result of elimination at the federal level of high performance bonus. Current TANF block grants are sufficient to cover the primary purpose for TANF funds in the Division of Public Assistance. Other allowable uses, such as represented in Office of Children Services are no longer affordable under the annual block grant level, and will need to be

# Children's Services (continued) Family Preservation (continued)

FY2015 Expand "Strengthening Families Alaska" to Rural Communities in Alaska's Northern and Western Regions (continued)

Alaska has one of the highest rates of child maltreatment in the United States with a rate of 16.7 children maltreated per 1,000 compared to the national average rate of 10.1 per 1,000 children (United States Department of Health and Human Services, 2010).

The rate of child maltreatment, along with substance abuse, domestic violence and sexual abuse is more significant in many of our rural communities/villages. That pervasiveness results in families with chronic neglect and violence which is largely often the result of alcohol. While many of the Tribes/Tribal Organizations and communities have some programs or focus on prevention, much of the resources are focused on after the abuse has already happened. The work of the Strengthening Families initiative of the past several years has focused on several large urban hubs, but has not expanded to those areas where there are less or no resources as compared to the larger communities.

The consequences of maltreatment are costly. Preventing maltreatment is a challenging task, but one providing long term benefits to individuals and society. Existing research points to several "protective factors" related to a reduced incidence of child maltreatment. The Strengthening Families Protective Factors Framework incorporates this research in strategies to prevent child abuse and neglect, reduce adverse childhood experiences, strengthen families and support optimal child development. As a comprehensive approach to working with families and not a "model" program, Strengthening Families is intended to be adapted to different contexts, programs and service systems. The strategies can be implemented in already existing early childhood, youth and family support programs, schools, and communities. The Protective Factors Framework applies to all families and focuses on building strengths. Strategies are intended to be adapted to the cultures, traditions and values of participating families. It is an ideal framework with Alask's diverse population which would support tribal leadership efforts in villages to build on the strengths of the healthy and strong families to better use traditional culturally relevant "services" and supports as a community approach to helping those individuals or families that are struggling.

Additional general funds will support the maintenance of current programs and expansion of the Strengthening Families Protective Factors approach in rural locations with the Northern and Western regions of Alaska. Funding will be used to: (1) Facilitate a coordinated approach that is driven by the Tribe/community and uniquely tailored to meet diverse needs, build a common language, increase partnerships, and increase access to department services that may not be known or used; and (2) Maintain support for the early childhood and youth serving programs currently implementing the Strengthening Families Protective Factors Framework.

Without this funding, children will continue to experience "adverse experiences", the State of Alaska will have no consistent "framework" to guide the development of prevention services, and the State of Alaska's need to provide high-end, high-cost services continues to will continue to grow.

# Children's Services (continued) Foster Care Base Rate (continued)

FY2009 AMD: Foster Care Base Rate Increase Proposal (continued)

Senior and Disabilities Services have also experienced cost increases as social workers and foster parents work for adequate reimbursement of the costs of care.

Beginning in 1990, the Department could include in its annual budget request to the governor's budget office, and ultimately the legislature, a request for sufficient funds to increase the family foster care base rate based on the federal poverty guideline. 7AAC 53.020. This strategy worked for the first two years. Since, there has been one family foster care rate increase in the last fifteen years and that was eight years ago. Even then, the rate increase was based on a four-year old poverty guideline.

The rate setting methodology for family foster parents became effective 16 years ago. Since that time, there have been three rate adjustments:

FY 1991 (effective July 1, 1990) - based on 1989 poverty guideline - \$20.49 FY 1992 (effective July 1, 1991) - based on 1990 poverty guideline - \$21.48 FY 1999 (effective July 1, 1998) - based on 1993 poverty guideline - \$23.84

The foster care base rate is calculated using a standard rate provided by the United States Health and Human Services (HHS) Poverty Guidelines. The 1993 standard rate is currently applied.

This FY2009 increment is proposing to utilize the FY 2007 standard rate of \$34.98 as published in the US HHS Poverty Guidelines for an Alaska family unit of one and applies a seven-year median average growth rate. A percentage of the standard rate will apply to the following age ranges:

(A) birth through 29 months - 90 percent (B) 30 months through 11 years - 80 percent (C) 12 years through 19 years - 95 percent

After the standard (or base) rate has been determined and adjusted by percentage for age or emergency shelter status, the final foster parent daily rate is multiplied by the geographic cost-of-living differential. This differential was set originally by Kenneth M. McCaffres in his arbitrated decision on Alaska Geographic Wage Differentials dated October 24, 1986. It was adopted for determining the foster care rate. Its application to the family foster care rates is spelled out in the administrative code.

The differential is based on where the child is living. For example Anchorage and Juneau are both coded at the base rate adjusted for age. Currently this is \$21.45 per day for a 1 year old. If the foster parents move to a community with a higher cost of living, their daily rate is adjusted based on the differential. For example, if the child moves from Anchorage to Ambler, Big Horn, Canyon Village, Fort Yukon or Deadhorse, the daily rate for the same 1 year old increases to \$30.46 per day (an increase of \$9.01 per day). Of course, if the family moves from Fort Yukon to Anchorage, their family rate decreases by \$9.01 per day.

All communities in the state are coded for the differential rate. The rate changes when the address for the child and thus the monthly payment to the foster family changes. It is the responsibility of the social worker as the case manager to enter a change of address when the child's address changes.

# Children's Services (continued) Foster Care Base Rate (continued)

FY2009 AMD: Foster Care Base Rate

Increase Proposal (continued)

Under this incremental request, foster care for a 1 year old in Anchorage or Juneau would increase from \$21.45 to \$32.06 per day. Example:

FPL in use = \$23.84\*90%=\$21.45 x 30.25 days = \$645.86 monthly Current FPL = \$34.98\*90% = \$37.48 x 30.25 days = \$952.27 monthly

#### Incremental Request Calculations:

7 year median average FTEs 1,181 2007 Annual cost 10,086,071 Average monthly cost per FTE 712 Percent daily increase 31.39% Monthly rate increased 935 Monthly cost 1,104,299 Annual cost 13,251,584 Incremental Need 3,165,513

Foster homes are licensed and in place to assure children who must be removed from their homes under traumatic circumstance are cared for appropriately and adequately. Adequate reimbursement to foster parents for the cost of providing the best possible care to foster children under these most difficult circumstances has a direct effect on OCS's ability to recruit and retain good homes and therefore has some impact on every OCS outcome.

#### Department Measures

C: Result - Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse or neglect.

Target #1 Decrease the rate of substantiated allegations of child abuse and neglect in Alaska.

Target #2 Decrease the rate of repeat maltreatment to meet or exceed the national standard of 6.1 percent.

Target #3 Decrease the percentage of substantiated maltreatment by out-of-home providers.

Target #4 Annual employee turnover rate; number of positions available to provide direct services.

#### OCS Measures

A: Result - To prevent children from abuse and neglect.

Target #1 Increase the number of Early Intervention/Infant Learning Program screenings for children age 0 - 3 to meet federal requirements.

A1: Strategy - Improve the referral process from Children's Protective Services to Early Intervention/Infant Learning Program services.

FY2009 AMD: Increased Cost for Foster Parent Payment Due to Growth (continued)

provided to children in custody. Current growth rates of about 15 percent indicate a need for \$2,770.6 in general funds to match \$414.0 in federal funds.

This request also amends the existing FY 2009 budget request for a \$600.0 increase in Receipt Supported Services (RSS) authority. New projections for RSS collections indicate that an additional \$200.0 of authorization (for a total of \$800.0) may be needed to cover costs for increased foster care caseload.

There are approximately 1,200 licensed foster homes in Alaska that provide care to over 2,000 abused and neglected children at any given time. Foster homes provide temporary care for children in state custody while the state works to rehabilitate and reunify children with their families. In some cases, reunification is not an option and foster homes are used while the state seeks adoptive parents for the child. Foster homes receive monthly reimbursement for the costs of care provided to foster children. Expenditures that are reimbursed include food, clothing, daily supervision, personal items, school supplies, games and recreational activities, allowance, usual transportation costs, and other items relevant to raising a child.

The Office of Children's Services monitors and projects foster care costs for base rates by FTE (full time equivalent) calculated on the number of days service is provided rather than the number of children that receive services. FTEs provide the division with a more accurate picture as children move in and out of the system regularly. One FTE equals thirty days of services provided.

Not unlike many other states in the nation, Alaska has been experiencing increased volume of workload, reports of abuse and neglect, and investigations that have resulted in increased FTEs for foster care base services. In FY 2007:

Protective Services Reports increased 11.8%; Investigations completed increased 15.1%; Substantiated investigations increased 8%; Children removed from the home 36.4%

While the reasons for the increases are difficult to pinpoint, national trends indicate an increase in neglect cases with methamphetamine use and mental health being cited as two of the reasons. For example, the State of Washington is currently experiencing a 16 percent increase in the numbers of children in foster homes. Alaska's growth has increased by 15.2 percent in FY 2007 and is on track to increase 15.5 percent in FY 2008. With the uncertainty of the economy, casework trends, and national trends that do not indicate a slowing of children entering into the system, the OCS must move forward under the assumption that increases in the number of children in FY 2009 will follow those experienced in FY 2007 and FY 2008.

A 12 year history of foster care FTEs with FY 2008 projected through fiscal year end and based on monthly averages to date, clearly shows marked increases over the last two years. These marked increases begin in FY 2006 after a stagnant period of 6 years. With historical expenditures within such close proximity for so many years, the OCS was cautious about increases in FY 2007 but now is seeing the same increases in FY 2008 and has no reason to believe FY 2009 will experience decreases. The following lists FTE averages and percentage increase for the past 12 years:

# Children's Services (continued) Foster Care Base Rate (continued)

FY2009 AMD: Increased Cost for Foster Parent

Payment Due to Growth (continued)

FY	Ave FTEs	% Increa	ise
1996	878		
1997	846	-4%	
1998	990	17%	
1999	1,150	16%	
2000	1,216	6%	
2001	1,141	-6%	
2002	1,090	-4%	
2003	1,125	3%	
2004	1,170	4%	
2005	1,215	4%	
2006	1,358	12%	
2007	1,564	15%	
2008	1,807	16%	Projected

The current average cost per FTE is \$724.00 per month. Rates are determined in consideration of a child's age and the location of the foster home. For example, foster parents receive reimbursement for the cost of a one-year old child in Anchorage or Juneau at a daily rate of \$21.45. If that same child were to be placed in Fort Yukon, the daily rate increases by \$9.01 to \$30.46.

Calculations below set out the division's projected costs based on a current average monthly rate of \$724.00:

FY 2006 monthly average FTEs 1,358 @ \$724.00 per month for annual total of \$11,798,304 FY 2007 monthly average FTEs 1,564 @ \$724.00 per month for annual total of \$13,588,032 FY 2008 projected average FTEs 1,807 @ \$724.00 per month for annual total of \$15,699,216 FT 2009 projected average FTEs 2,087 @ \$724.00 per month for annual total of \$18,131,856

A supplemental request has been submitted for FY 2008, and this amendment request brings that anticipated shortfall into the base budget as follows:

Additional cost in FY 2008 = \$2,111,184

Additional RSS in FY 2008 = 680,000 (net \$800.0 - \$120.0 for retroactive federal reimbursement)

Additional GF to cover growth = 1,245,130 Additional Federal to cover growth = 186,053

The included amendment request related to growth in FY 2009 has been calculated as:

Additional cost in FY 2009 = \$2,433,421

Additional RSS in FY 2008/2009 = 680,000 (net \$800.0 - \$120.0 for retroactive federal reimbursement)

Additional GF to cover growth = 1,525,476 Additional Federal to cover growth = 227,945

Total request for anticpated growth in FY 2008 and FY 2009:

Rcpt Sup Srvcs= 200.0 General Funds = \$2,770.6 Federal Funds = \$ 414.0

# Children's Services (continued) Foster Care Base Rate (continued)

FY2014 AMD: Foster Care Rate Adjustment (continued)

full costs of caring for a child. Most recently, the Ninth Circuit Court of Appeals ruled against the state of California in their rate structure and methodology in California Alliance of Child and Family Services vs. Allenby, 589 F 3d 1017 (9th Cir 2009). This decision was issued in early 2011 and became the basis for litigation in Alaska in the Mulgrew vs. State of Alaska matter. In the Mulgrew matter, the court determined that, while the basic structures of how the Office of Children's Services division established foster care rates has merit, the application of the 2003 federal poverty guidelines and 1986 geographic differentials were dated and the use of age and percentages to adjust the base rates were arbitrary because they were not based on a solid methodology.

The Office of Children's Services recently completed a foster care rate study. This study was tasked with examining whether the division's rates are sufficient to support the costs of caring for children in foster care, updating the division's current methodology, and providing alternatives to the division's rate structure. Through the study, it was determined that most states use the US Department of Agriculture's (USDA) report of Expenditures on Children by Families data to develop the reimbursable rates for basic foster care maintenance.

Based on the findings of the foster care rate study, the request for the Office of Children's Services, Foster Care Base Rate is \$1,850.0 and is comprised of:

\$525.0 for increasing the foster care base rate

\$725.0 for adjusting geographic differentials from the current system to the 2008 regional differentials currently used by Medicaid

\$600.0 for adjusting the foster care augmented rates to better cover the cost of care for special needs children in out-of-nome placements.

\$1,850.0 Total

These estimates are based on the Office of Children's Services FY2013 projection of children served multiplied by the percentage increases recommended in the study. These adjustments total \$1,850.0; \$1,360.0 general fund and \$490.0 federal receipts for projected revenues from Title IV-E and Medicaid.

In addition, the Department of Health and Social Services has entered into an agreement in the amount of \$750.0 in general fund for a rate increase as mandated by the settlement of the Heitz and Mulgrew lawsuits.

This is a new request for FY2014. This request was not included in the FY2014 Governor's budget as evaluation of the need was ongoing.

This statutory rate is used for parents and providers for services provided to children in sta	Title IV-E fu	ınded programs tı	hat reimburse fos	ster	0.0	0.0	0.0	0.0	0.0	0	0	0

The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. The amount of federal funds the state receives depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%.

The regular FMAP is projected to drop from 52.48% to 50.53% in FFY09 and the enhanced FMAP from 66.74% to 65.37%.

The rates used here are estimates. The final FMAP rate for FFY 2009 will not be known until November/December.

# Children's Services (continued) Foster Care Special Need (continued)

FY2008 Shortfall due to implementation of the Federal Deficit Reduction Act (continued)

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Foster Care Special Needs Component to be \$350.8. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care maintenance penetration rate. The penetration rate determines the percent of state foster care maintenance expenditures that will be considered IV-E reimbursable at 50% or the applicable Federal Medical Assistance Percentage (FMAP) rate. Congressional adjustments to Alaska's FMAP do not extend to foster care.

Foster Care Special Needs (FCSN) Component Estimate of Reimbursable Expenses:

4,639.1 estimated total FCSN expenditures

- x 44% current IV-E maintenance penetration rate
- = 2,041.2 expenditures eligible for IV-E reimbursement
- @ 50% federal fund participation
- = 1,020.6 pre DRA federal fund participation

Reduced Federal Fund Participation for Rosales:

4,639.1 estimated total FCSN expenditures

- x 29.3% with 14.7% reduction to IV-E maintenance penetration rate for Rosales
- = 1,359.2 expenditures eligible for IV-E reimbursement
- @ 50% estimated FY 2008 unadjusted FMAP
- = 679.6 post DRA federal fund participation

FCSN Summary of Reduced Federal Fund Participation for DRA

- 1,020.6 pre DRA federal fund participation
- 679.6 post DRA federal fund participation
- = 341.0 FY 2008 FCSN general fund need

To the extent possible, OCS has made adjustments to calculations to account for any duplicate FTEs that will not be claimable as a result of the either Rosales or unlicensed relatives under the DRA.

Foster Care Special Needs provides children in care those services and items that can and should be a matter of course for a child's well-being. These funds provide clothing for initial placement or under extenuating circumstance such as a growth spurt, mental health treatment if necessary, child care not covered by any other

The Department of Health and Social Services, Office of Children's Services requests \$341.0 in general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson. In the FY07 budget the legislature provided approximately half of the necessary funding that OCS requested. Analysis shows the full general fund amount is needed.

#### Rosales

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits Ninth Circuit states' ability to claim IV-E maintenance costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Office of Children's Services (OCS) estimates the reduced ability to claim federal funds for services provided to IV-E eligible children through the Foster Care Special Needs Component to be \$350.8. Rosales accounts for about 15% of the foster care population resulting in a like drop in the foster care maintenance penetration rate. The penetration rate determines the percent of state foster care maintenance expenditures that will be considered IV-E reimbursable at 50% or the applicable Federal Medical Assistance Percentage (FMAP) rate. Congressional adjustments to Alaska's FMAP do not extend to foster care.

Foster Care Special Needs (FCSN) Component Estimate of Reimbursable Expenses:

4,639.1 estimated total FCSN expenditures

x 44% current IV-E maintenance penetration rate

regions follows new OCS field practice rather than historical expenditures and case FTEs. If changes in practice are successful, increased federal dollars will be earned.

This proposal has been developed in an effort to promote incentive and accountability within the regions for FCSN expenditures. With past methods of allocating these funds, regions were rewarded for high expenditures and, potentially, for leaving cases open.

Using ORCA data to allocate special needs funds to each region within the protective service practice categories of 1) investigation, 2) open for services (in-home), 3) out-of-home placement, and 4) trial home visits, we can effectively build in accountability for ORCA data entry and budget management, and promote best practice through case management.

#### 1) Investigations

Investigations are not funded by Title IV-E. But, they are the first of two areas where regional managers control spending. Once a protective services report is screened in, an investigation begins and necessary costs are incurred. Current investigations are to be completed in 90 days. A policy changing that time period to 30 days is being proposed.

The outcome of an investigation determines whether a child is safe or unsafe. A child determined to be safe, but at risk and in need of some services, is not IV-E eligible. OCS will standardize processes for referring children and families to community services not paid through the special needs budget.

Reports from ORCA will help managers track investigation status. With targeted funds allocated to investigative work, managers encourage workers to close investigations timely, open cases for services when necessary, develop case plans, keep ORCA updated, and make sure that all other documentation to support IV-E claiming is in place.

#### 2) Open for Services - In-Home.

If a child is determined to be unsafe but can remain in their homes with services, the investigation is closed and a safety plan is put in place. A case plan is then developed. With proper documentation, both a safety plan and a case plan trigger Title IV-E eligibility.

Once a child is determined to be unsafe, services must be provided. Managers have less control over these costs

If a child is determined to be unsafe and a safety threat exists that cannot be controlled in the home, the child is removed from the home.

Out-of-Home Placements are eligible for IV-E. Work continues providing treatment to remedy the reasons a child is unsafe, i.e., anger management, therapy, psychiatric evaluations, substance abuse treatment. These types of services provided to the child are IV-E eligible as long as a worker can show reasonable efforts to reunite the child

Services												

All too often children in the child welfare system experience multiple losses of caregivers and multiple out-of-home placements, increasing their vulnerability as well as their risk for attachment disorders and other social and emotional problems. Stable foster homes and consistent child care for these children are paramount to their long term success.

Family foster care is an essential and valuable child welfare service for children who must be separated from their parents because of physical abuse, sexual abuse, neglect, maltreatment, special medical needs, or other circumstances. In order to recruit and maintain stable, quality foster homes, foster parents must be fairly compensated. For foster parents with young children in their homes, this includes the full cost of child care. Many foster parents are working parents and have the same child care needs as biological parents. If child care is not adequately reimbursed they are faced with the choice of quitting their jobs, paying out of their own pockets, or no longer taking in young foster children.

Thirty-five percent of protective services reports in Alaska are for children under the age of six. Research has shown that during this critical period, chronic stress can have an especially damaging affect on the developing brain and lead to lifelong learning, behavior, physical health and mental health problems. Children dealing with this special set of physical and emotional concerns require careful consideration when placed in child care. All child care programs are not equal in terms of quality. Staff training, staff retention, child/staff ratios, and programming may be very uneven. These children need compassionate, well-trained teachers in high quality programs providing for their care.

It has been the policy of the Office of Children's Service (OCS) for several years to reimburse foster families, unlicensed relatives, and biological parents needing child protective services child care) a maximum rate of \$550 for full-time child care services. This one rate applies regardless where the family lives or the age of the child. Those who are eligible for child care assistance due to low income status, receive child care assistance from the Department of Health and Social Services Division of Public Assistance (DPA). DPA child care assistance rates are based on geographic location and the age of the child (rates for children under six vary from \$550/month to \$730/month). Foster parents, unlicensed relatives, and biological parents needing child protective services child care who are not income eligible for child care assistance through DPA are receiving the lower \$550/month OCS rate. This creates a disparate system whereby foster parents and unlicensed relatives are receiving less support for this expense.

In addition, child care utilization rates have increased. This request is based on the increase in utilization experienced from 2004 through 2007. No funding has been requested for child care cost increases since prior to 2004.

OCS child care assistance payments are well below what most child care programs charge. Even DPA child care assistance payments are often below that which child care programs charge. Foster parents and unlicensed relatives are often in the position of paying for the balance of what the child care program charges out of their personal funds or placing the child in child care which may be of questionable quality. This request includes 96.1 to assist foster parents in making up the difference between state approved child care assistance rates and actual rates.

Currently foster parents, unlicensed relatives and biological parents are required to apply for DPA child care

Protective Services (continued)

assistance, if deemed eligible based on income. They may be eligible for only a portion of the child care assistance reimbursement. When that is the case, DPA pays for a portion of the child care and OCS pays for a portion. This creates a dual approval system and a dual accounting system. It creates confusion on the part of providers who must bill both state agencies, and at worst, creates an opportunity for billing errors and over charging. If child care eligibility and reimbursement could be handled primarily through one system, these issues could be eliminated. This request includes 100.0 to purchase child care administrative services from the Division of Public Assistance so that foster parents are not forced to work with two separate child care agencies.

This request for funding will: (1) allow OCS to provide reimbursement to working foster parents, unlicensed relatives, and biological parents needing child protective services child care at the DPA child care assistance rate; (2) provide additional funds to cover the balance of the child care costs (not covered by the DPA child care assistance rate) when a quality child care program cannot be found for that amount; (3) allow funding to process child care applications in one location for foster parents and unlicensed relatives; and (4) will provide adequate funding for child care utilization by foster parents and relatives.

#### Request

1,099.0 Increased costs to bring OCS daycare rates in line with DPA daycare rates and growth 96.1 Estimated average 5% difference between child care assistance rates and actual costs 100.0 Estimated cost to purchase services placing all child care under the DPA umbrella

### 1,295.1 Total Request

This request for foster parent and unlicensed relative child care assistance does not relate directly to any OCS performance measure. It does however promote foster home recruitment and retention and therefore promotes child safety.

#### Department Measures

C: Result - Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse or neglect.

Target #1 Decrease the rate of substantiated allegations of child abuse and neglect in Alaska.

Target #2 Decrease the rate of repeat maltreatment to meet or exceed the national standard of 6.1 percent.

Target #3 Decrease the percentage of substantiated maltreatment by out-of-home providers.

Target #4 Annual employee turnover rate; number of positions available to provide direct services.

### OCS Measures

A: Result - To prevent children from abuse and neglect.

Target #1 Increase the number of Early Intervention/Infant Learning Program screenings for children age 0 - 3 to meet federal requirements.

A1: Strategy - Improve the referral process from Children's Protective Services to Early Intervention/Infant Learning Program services.

Target #1 Increase the percentage of child protection services referrals to children ages 0 - 3 and attain federal compliance.

OCS has identified current trends resulting in increased reimbursement to foster parents for care provided to children in custody. Current growth rates of about 15 percent indicate a need for \$1,325.5 in general funds to match \$180.7 in federal funds for a total need of \$1,506.2.

There are approximately 1,200 licensed foster homes in Alaska that provide care to over 2,000 abused and neglected children at any given time. In addition to a monthly reimbursement for costs of care related to items every parent would expect to provide, the Office of Children's Services (OCS) provides special funding on an as-needed basis to cover certain costs not covered under foster care base rate reimbursements. These costs include child care for working foster parents; respite care for parents with children at risk; clothing and food in emergency situations; travel related to the safety of a child or for continuity in placements such as foster family vacations or visitation with biological parents; and other costs associated with the individual needs of each child.

The Office of Children's Services monitors and projects foster care costs for special needs by FTE (full time equivalent) calculated on the number of days service is provided rather than the number of children that receive services. FTEs provide the division with a more accurate picture as children move in and out of the system regularly. One FTE equals thirty days of services provided.

Not unlike many other states in the nation, Alaska has been experiencing increased volume of workload, reports of abuse and neglect, and investigations that have resulted in increased FTEs for foster care base services. In FY 2007:

Protective Services Reports increased 11.8%; Investigations completed increased 15.1%; Substantiated investigations increased 8%; Children removed from the home 36.4%

While the reasons for the increases are difficult to pinpoint, national trends indicate an increase in neglect cases with methamphetamine use and mental health being cited as two of the reasons. For example, the State of Washington is currently experiencing a 16 percent increase in the numbers of children in foster homes. Alaska's growth has increased by 15.2 percent in FY 2007 and is on track to increase 15.5 percent in FY 2008. With the uncertainty of the economy, casework trends, and national trends that do not indicate a slowing of children entering into the system, the OCS must move forward under the assumption that increases in the number of children in FY 2009 will follow those experienced in FY 2007 and FY 2008.

A 12 year history of foster care FTEs with FY 2008 projected through fiscal year end and based on monthly averages to date, clearly shows marked increases over the last two years. These marked increases begin in FY 2006 after a stagnant period of 6 years. With historical expenditures within such close proximity for so many

### Children's Services (continued)

Subsidized Adoptions & Guardianship (continued)

FY2006 Projected 8% caseload growth for Subsidized Adoption and Guardianship (continued)

The following table shows the number of children in the Subsidized Adoption & Guardianship program from FY1992 to FY2006 (FY2005 and FY2006 are projected). At the close of FY2004, there were 2,098 children in the Subsidized Adoption & Guardianship program. The Department anticipates the number of children receiving these benefits to increase to 2,216 in FY2005, with an additional 8% growth to 2,393 in FY2006.

Several factors have contributed to the success and growth of the Subsidized Adoption & Guardianship program. Federal and State policies, including Alaska's HB 375 (Chapter 99, SLA 98) pertaining to children in need of aid, and the Federal Adoption and Safe Families Act of 1998, mandate the Department to continue the increased emphasis on permanency planning and to move quickly to find permanent homes for children in State custody. AS 25.23.190 further stipulates that "A hard-to-place child in the permanent custody of the department in a foster home for not less than one year may not be denied the opportunity for a permanent home if the achievement of this depends on continued subsidy by the state."

A child must have special needs in order to qualify for the Subsidized Adoption and Guardianship program. Special needs categories include physical or mental disabilities, emotional disturbance, recognized high risk of physical or mental disease, age, membership in a sibling group, racial or ethnic factors, or any combination of these conditions.

The Subsidized Adoption & Guardianship program provides the State with a cost-effective alternative to foster care. State law stipulates that adoption and guardianship subsidy payments may not exceed what would have been paid had the child remained in foster care. In FY2004 the average daily cost per child for the Subsidized Adoption & Guardianship program was \$23.45, compared to an average daily cost of \$26.83 for children in foster care (includes the Foster Care Base Rate and Foster Care Special Needs programs). In addition, in FY2004 approximately 32% of the children in foster care had extra-ordinary on-going needs and received a rate augmentation, which averaged \$16.52 per day. There are also indirect cost savings for Subsidized Adoption & Guardianship cases as typically these children are not carried as part of the Office of Children's Services social

Provisions in the 2006 federal Budget Reconciliation Bill limit the state's ability to claim IV-E maintenance and administrative costs. The bill was passed out of Congress in early February and signed into law on February 8, 2006.

It is unknown at this time whether provisions of the bill are effective as of February 8, 2006 or are retroactive to October 1, 2005. In addition, it is unknown as to how states will be expected to discontinue or phase out Rosales.

In the Rosales case, the court ruled that a child did not need to be Title IV-A (AFDC now TANF) eligible in the same home from which s/he was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the eligibility month. States were able to choose the home in which to base eligibility. Alaska became eligible to claim maintenance payments under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective. However, with the changes in the Budget Reconciliation Bill, Alaska will lose this eligibility.

The Office of Children's Services has done an initial analysis on the potential annual cost to the State. The OCS estimates a loss of federal revenue of \$11,448 per month or \$137,373 annually for adoption maintenance. There are 34 children eligible under Rosales. This loss will impact the Subsidized Adoption & Guardianship component.

There is a possibility that children currently in custody and eligible for IV-E under the Rosales decision, may be grandfathered in. This would reduce the impact of the Budget Reconciliation Bill changes.

General funds are required in the Subsidized Adoption and Guardianship component to replace lost federal receipts and maintain the current level of support to the State's adoptive parents.

This shortfall was not addressed in the FY07 Governor's Budget because the action by Congress was not known

FY2010 Fund Increased Costs for Subsidized Adoptions and Guardianship Due to Growth	Inc	677.4	0.0	0.0	0.0	0.0	0.0	677.4	0.0	0	0	0

This request for \$677.4 will provide funding to cover increased numbers of adoptions and guardianships. The program has experienced steady growth each year for the past seven years. This is the first incremental request for growth in the subsidy program during that same time period. OSC has been using the Social Services Block Grant (SSBG) to fund increased numbers of subsidies up to this year, but the cost for the subsidies has now surpassed the funds available for adoption and guardianship costs. Costs have increased by \$2,617.1 from 2004 to 2008. The SSBG is a very flexible fund source and also funds prevention and intervention services (family support grants, in-home case management), protective services (family preservation grants and investigations), adoption case management services, reunification services, food bank of Alaska, substance abuse treatment services for women and children, and family preservation services where funding levels from federal grants are steadily eroding.

The Subsidized Adoption and Guardianship program facilitates permanent placements in adoptive and guardianship homes for an increasing number of children in custody whose special needs make them hard to place. Adoption is viewed as the most permanent and preferable option for children who cannot return to their own homes.

Guardianships are considered for children who cannot be freed for adoption, but for whom a reasonably permanent home is provided through guardianship. This is often the best choice for children who cannot live with their parents but continue to have an important emotional tie to their families that should not be severed.

By the end of 2008, 2,395 children were living in permanent homes assisted through subsidized adoptions and guardianships. Since 2005, subsidized adoptions and guardianships have grown an average of 3.37% annually. This four-year average growth is the basis for this request. Prior to 2005, adoption and subsidy growth was much

The Department of Health and Social Services, Office of Children's Services (OCS) is requesting \$2,269.5 to complete the final phase of rate increases for Alaska's resource families. In FY2009, \$3,165.5 was appropriated to increase foster care base rates related to the reimbursement to foster homes for expenditures incurred for the care of state custody children. In FY2007, rate increases were approved for Behavioral Rehabilitative Services in the amount of \$2,214 for custody children who need facility services 24 hours a day, 7 days a week.

Subsidized adoption rates are negotiated with the foster care base rate levels being the cap. Most rates are negotiated at about 85% of the base rate. Rates are set with consideration for a child's special needs and the circumstance of the adoptive family. When base rate levels increased by 28.9% in FY2009 - the first increase in eight years - new subsidized adoptions began to be negotiated with the higher starting point of the new base rates as of July 1, 2008. This means that if an adoption or guardianship is put into place in FY2009, the negotiated rate will be 28.9% higher than those put into place in FY2008. For foster parents, foster rates are calculated monthly, and therefore each foster parent received the increased rates as of July 1, 2008. This request allows adoptive parents that same increase for rates negotiated in FY2006 forward, and captures most adoption and guardianship subsidies in the pipeline.

This request is calculated by applying the 28.9% increase to the average base rate used as the cap for negotiated subsidies in FY2006, 2007, and 2008 then applying the average negotiated rate for each of those years to all new subsidies issued during the year beginning with FY2006.

Adontion/Guardianship Grantees												

The Department of Health and Social Services recognizes the need to provide an inflationary allowance to grantees. While many of the grants in the Office of Children's Services are at least in part funded by the federal government, no recognition from the federal government for the tremendous increase in living expenses has been forthcoming. Because of the extraordinary increases seen of late, the DHSS is requesting a 4.6% increase (tied to CPI) in grant funds. This is necessary to simply maintain current levels of services. If not for this increase, existing grant funds must be used to cover overhead costs, reducing the services currently being provided to vulnerable Alaskans. These grants now total \$7.4 million.

Subsidized Adoptions and Guardianship grants promote and support adoptions and provide training to adoptive families. Most adoptions through the OCS are special needs and many times parents need support and help to provide for those needs.

If these Children's Services grantees must absorb the hike in energy costs and other general overhead costs, grantees will have no alternative but to reduce services. A reduction in services will affect every outcome for the Office of Children's Services as we depend on our grantees/community partners to provide the follow-up services to help keep children safe and families together and establish permanency when families cannot remain together.

#### Department Level Measures:

End Result C, Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse and neglect.

Strategy C1: Implementation of new safety assessment model to provide front line workers with a better tool to identify safety issues in the home.

Strategy C2: Children placed outside the home are protected from further abuse and neglect.

Strategy C3: Retain and effective and efficient workforce.

Children's Services Results Delivery Unit Measures:

End Result A. To prevent child abuse and neglect.

Strategy A1: Increase the number of referrals from Child Protective Services to Early Intervention/Infant Learning Program services.

Strategy A2: To reunify children in out-of-home placements with parents or caretakers as soon as it is safe to do so.

FY2014 AMD: Foster Care Rate Adjustment	Inc	1,850.0	0.0	0.0	0.0	0.0	0.0	1,850.0	0.0	0	0	0

In recent years, the federal cost of care guidelines, interpreted by states, have come under increased scrutiny at the national level. One concern expressed is that states are not meeting the full costs of care for children in foster care custody. In some instances, states have engaged in cost of care rate studies to determine a methodology for establishing and maintaining costs of care for foster care. The state of Indiana, in response to litigation and as part of a settlement, engaged in a rate study to define current foster care rates.

In other instances, states have experienced litigation to determine if the foster care costs of care are meeting the full costs of caring for a child. Most recently, the Ninth Circuit Court of Appeals ruled against the state of California in their rate structure and methodology in California Alliance of Child and Family Services vs. Allenby, 589 F 3d 1017 (9th Cir 2009). This decision was issued in early 2011 and became the basis for litigation in Alaska in the Mulgrew vs. State of Alaska matter. In the Mulgrew matter, the court determined that, while the basic structures of how the Office of Children's Services division established foster care rates has merit, the application of the 2003 federal poverty guidelines and 1986 geographic differentials were dated and the use of age and percentages to adjust the base rates were arbitrary because they were not based on a solid methodology.

The Office of Children's Services recently completed a foster care rate study. This study was tasked with examining whether the division's rates are sufficient to support the costs of caring for children in foster care, updating the division's current methodology, and providing alternatives to the division's rate structure. Through the study, it was determined that most states use the US Department of Agriculture's (USDA) report of Expenditures on Children by Families data to develop the reimbursable rates for basic foster care maintenance.

Based on the findings of the foster care rate study, the request for the Office of Children's Services, Subsidized Adoptions and Guardianship is \$1,850.0 and is comprised of:

\$525.0 for increasing the foster care base rate

\$725.0 for adjusting geographic differentials from the current system to the 2008 regional differentials currently used by Medicaid

\$600.0 for adjusting the foster care augmented rates to better cover the cost of care for special needs children in out-of-home placements.

\$1,850.0 Total

These estimates are based on the Office of Children's Services FY2013 projection of children served multiplied by the percentage increases recommended in the study. These adjustments total \$1,850.0; \$1,110.0 general fund and \$740.0 federal receipts for projected revenues from Title IV-E.

Since the adoption subsidies are based on foster care rates, the subsidized adoption projected increase is also \$1,850.0

This is a new request for FY2014. This request was not included in the FY2014 Governor's budget as evaluation of the need was ongoing.

FY2017 Growing Number of Children in Subsidized Adoptions and Guardianships	Inc	9,650.0	0.0	0.0	0.0	0.0	0.0	9,650.0	0.0	0	0	0

Increased number of subsidized adoptions and guardianships as well as the increased rates paid for children entering into a subsidized adoption or guardianship.

The subsidized adoption and guardianship program facilitates permanent placements in adoptive and guardianship homes for an increasing number of children in custody whose special needs make them hard to place. Adoption and guardianship is considered for children who cannot return to their parents.

At the end of FY2015, 3,309 children were living in permanent homes assisted through subsidized adoptions and guardianships. Since FY2009, the number of subsidized adoptions and guardianships has steadily increased at a rate of 4.5 percent annually.

While it is difficult to point to one definitive reason for the growth, there are elements that appear to be growing trends. Some of those contributing factors are: annual rate of children in out-of-home placement is growing, the special needs of many of these children are increasingly complex in nature, and many of the families require the maximum amount allowable based on the child's needs and the rising cost of treatment services.

Additionally, the Office of Children's Services increased foster care rates twice in recent years; in July 2008 and again in July 2013, following a lawsuit. In addition to the change in basic foster care rates, in July 2013 a significant increase was made to the augmented care rates. Augmented care rates provide additional assistance to families caring for children with needs for a higher level of care due to special needs. Subsidized adoption and guardianship rates are tied to the current foster care rate. Therefore, the increase in foster care rate impacts the subsidy expenditures.

Health Facilities Licensing and Certification (HFLC) has a shortfall of \$457.0 in general fund match. With the number of complaints increasing 67% from the previous year, adequate funding is needed for staff to perform the inspections of residential living facilities. During FY2012, HFLC received a total of 821 complaints that needed to be followed up within 48 hours, 542 investigations, and 2,394 complaints that required immediate licensing staff action, renewed 517 licenses, opened 61 new facilities, and performed surveys of 75 facilities.

HFLC is responsible for ensuring the health, welfare and safety of over 5000 Alaskans receiving services in approximately 686 resident living facilities. In addition, the Section's Background Check Program is charged with reducing the risk to the health, safety and exploitation of Alaska's most vulnerable and is accountable for the background check processing of all licensed and certified programs under the Department. Currently, 3600 records are being processed in the Background Check Program. These include but are not limited to: hospitals, nursing homes, child care facilities, children's residential and adult facilities, home health care, hospice, boarding schools, and residential psychiatric treatment facilities. The section's programs require adequate staffing and funding in order to maintain basic functionality.

In addition, HFLC inspects all residential living facilities and is responsible for conducting investigations on an increasing number of complaints to ensure quality care and safety of Alaskans. Not only are these investigations timely, they are also very costly.

If this request is not approved, the division cannot follow up on complaints received with investigations. This could cause harm to the residents/patients in the facilities. If the division resorts to conducting limited or inadequate investigations, we can conclude that it would put vulnerable Alaskans at risk of injury and possibly death. This could create a liability for the State and the department as the oversight agency.

Health Facilities Licensing and Certification has always maintained vacant positions to make up the shortfall in match. With the number of complaints increasing, State and federal mandates, and the training requirements for staff to perform these surveys, this is no longer a viable option. During FY2012, Health Facilities and Licensing had 44 complaints that had to be investigated with eight having to be done within two days. In addition, they performed surveys of 75 facilities.

Health Facilities Licensing and Certification needs \$457.0 of additional general fund revenue to continue to license and/or certify hospitals, nursing homes, ambulatory surgery centers, hospices (paid and volunteer), outpatient physical therapy providers, rural health clinics, freestanding birth centers, home health care providers, Frontier Extended Stay Clinics, and end stage renal disease facilities. Certification takes part through an agreement with the Centers for Medicare and Medicaid Services for those facilities that take part in the federal Medicare and state

Residential Licensing FY2006 Enhance Certification & Licensing Services through	Inc	225.0	125.0	10.0	80.0	10.0	0.0	0.0	0.0	0	0	0

The primary role of the Certification and Licensing Section (C&L) is to license and inspect a broad range of health care facilities and providers, including hospitals, nursing homes, home health agencies, assisted living providers, and other health care facilities. Centralization of the certification and licensing functions previously performed by several divisions within the department, as well as work performed by other state agencies, began with the official transfer of licensing functions specifically related to health/medical services and assisted living to the Division of Public Health in July 2004.

The current allocation of staff resources for the Assisted Living Home program is not adequate to maintain the current Assisted Living Homes Program requirements or anticipated needs. As of October 2004 there are 402 homes currently licensed in Alaska, with an average increase approximating 15% annually. This equates to a current caseload in excess of 90 homes per licensing specialist. While there is no "industry standard" for a manageable assisted living home caseload due to differences in programs from state to state, the accepted limit is 65-70 depending on the mix and complexity of the home clientele.

Continued operation at existing staff resource levels translates into the Assisted Living Home program's inability to sustain minimal standards of service, jeopardizing the health, safety and well-being of the Department's assisted living clientele. It also has an adverse effect on the program's ability to effectively monitor and continue risk reduction efforts.

Support for this increment will allow the division to accomplish the following:

a. annualize the cost of three new Community Care Licensing Specialists established in the FY05 Management Plan and budgeted for 9 months. These positions were established to promote, license and monitor community assisted living homes for the severely mentally ill and/or developmentally disabled adults, and for assisted living homes providing care primarily to persons who have a physical disability, who are elderly, or who suffer from dementia. The new positions will also function as lead investigators on complaints of neglect and/or abuse reported to the assisted living program office;

b. appropriately reclassify existing assisted living staff who have now assumed new and additional

FY2006 AMD: Additional Federal Authority for new Background Check Grant (continued)

- ackground crieck Grant (continued) programs; 4) Develop and implement electronic data interchange interfaces for submitting and reporting background
- investigation requests;
  5) Improve the overall safety and security of vulnerable individuals in state licensed and certified LTC facility.
- Improve the overall safety and security of vulnerable individuals in state licensed and certified LTC facilities;
- 6) Extend the background check services to all programs currently licensed by the Department of Health and Social Services.

The key elements of this model program include:

- \* Creating the infrastructure to provide centralized background checks;
- \* Creating and enforcing uniform definitions and descriptions of disqualifying information applicable to all DHSS licensed and certified programs;
- \* Supplementing existing state and federal criminal history information with other disqualifying information, including employee misconduct and court records; and
- \* Designing and implementing an appeal process that is limited to the accuracy of the records for specific barrier crimes.

As part of the pilot program, DPH will research and develop a proposed fee structure for covering the costs of conducting background checks under the new background check process before the pilot program funding has ended. At this time, we anticipate the fee structure will be similar to those that programs are currently paying.

This increment request for \$1.5 million federal funds is to increase DPH federal fund authorization in FY06 to accommodate the first phase of the joint development project with the University of Alaska and to fund the first year costs for 12 new permanent full-time positions and one existing permanent full-time position.

Personal Services: \$655.0

- 1 Records and Licensing Supervisor \$65.3 This position is responsible for managing the new criminal background check unit's daily workflow processing, assigning tasks, and adjusting responsibilities based on workload, backlog and changing priorities. In addition, it will perform quality control checks to ensure data in the fingerprint care tracking system is accurate, concise and complete, with strict adherence to regulatory requirements; and compile and submit monthly statistics of work received and completed by the background check unit.
- 3 Administrative Clerk III's \$128.1 These positions are responsible for processing requests for criminal justice information reports associated with background checks for employment as a service provider requiring checks of state and national criminal justice information files. Under the direction of the records supervisor, these positions evaluate and initiate the processing of fingerprint cards submitted for the purposes of obtaining state and national criminal history record background checks.
- 4 Criminal Justice Technicians I and 2 Criminal Justice Technicians II \$316.6 These positions review criminal backgrounds obtained from court records, registries, name checks, state and FBI fingerprint background checks of individuals that apply for employment in agencies or programs under the oversight of the Criminal Background

When a loved one is no longer able to care for him or herself, families are faced with excruciatingly difficult decisions. Deciding whether to bring a personal care attendant into the home or enter a long-term care institution is challenging enough. Alaskans shouldn't need to worry whether their elderly or frail family member is safe and well cared for when they're entrusted to a caregiver. This increment request is for a \$400.0 RSS increase to support implementation of the new Background Check Program. This request is also for \$150.0 GF to replace

FY2007 Public Health Protection: Protecting the health and safety of Alaska's vulnerable individuals (continued)

MHTAAR funding previously used to support staffing for the Assisted Living Licensure program. These funds will be used to improve the safety and security of vulnerable Alaskans.

#### ASSISTED LIVING LICENSING AND INVESTIGATIONS - \$150.0 GF

The \$150.0 GF requested in this increment will be used for the continuation of licensing of assisted living homes and for timely evaluation and response to complaints. These funds will help support the salaries of two Community Care Licensing Specialists, with the remainder going towards training of staff and travel. The Assisted Living program has received a Mental Health Trust grant since fiscal year 2002, which has provided support for current licensing staff (through FY 06), but will lose this funding for fiscal year 2007.

The number of assisted living homes in Alaska is increasing by 15% per year. Currently there are over 500 assisted living homes in our state. These homes are required to have annual onsite reviews by Assisted Living Home Program staff. These annual survey visits are a very important element in assuring safe and high quality care to frail and elderly Alaskans. The same seven staff responsible for the 500 annual reviews are also responsible for responding to complaints and conducting all resulting investigations. Because the number of elderly Alaskans is predicted to steadily increase in the years to come, there is every reason to expect the numbers of assisted living homes to continue to increase into the future.

Assisted living homes need to know that licensure review will be timely and that site visits will occur regularly. Alaskans need to be assured that complaints or concerns will be evaluated and responded to promptly. We strive to ensure that 100% of assisted living homes will be visited annually and all complaints or concerns will be evaluated within 24 hours. If the requested \$150.0 GF is not funded it would be extremely difficult to continue meeting our performance standards of 100% annual review of homes and 24-hour turnaround times on complaints.

#### BACKGROUND CHECKS - \$400.0 RSS

As a result of the passage of SB 125 in the last legislative session, implementation of a comprehensive background check program is presently underway. The goal of this program is to reduce neglect and abuse of individuals in state licensed and/or certified institutions and programs. The Background Check Program will consolidate the efforts of multiple agencies to develop a comprehensive centralized database. The ultimate goal is to provide interstate access for prospective employers, giving them access to an employee's record that may include a red flag when a barrier crime is listed.

At least 19 different types of providers (such as hospitals, nursing homes, and pediatric care facilities) will eventually utilize this process to obtain background checks on staff working within their facilities or programs. Nine provider types are scheduled for implementation in the new centralized Background Check Program in March 2006. At full capacity, it is anticipated that an average 14,000 background checks will be processed annually.

The Background Check program currently is supported by a federal start up grant, but is intended to be self-supporting with fee revenues by the time it's fully implemented and the federal grant ends (by 2008). In order to phase in the use of background check fees for fiscal year 2007, it is estimated that the program will need an additional \$400.0 in Receipt Supported Services (RSS) authority. If approved, the \$400.0 RSS portion of this increment request will pay for a reimbursable services agreement to the Department of Public Safety for the

FY2008 AMD: Safety of Vulnerable Alaskans An investment in the ongoing consolidation of certification a health and residential care facilities are inspected in a timely		•			0.0	0.0	0.0	0.0	0.0	1	0	0

An investment in the ongoing consolidation of certification and licensing functions is critical to ensure that Alaska's health and residential care facilities are inspected in a timely manner, licensure requests are processed expeditiously, new state and federal safety mandates are met, and reports of harm or other complaints are investigated promptly and thoroughly. This request for \$200.0 in general funds will strengthen staffing capacity in the health facility licensure unit to meet the requirements for expanding services to new facility types and the growing number of facilities, without compromising timeliness of recertification surveys and complaint investigations.

In 2003, Executive Order 108 reorganized the Department of Health and Social Services (DHSS) to make service delivery more efficient and cost effective. As part of that reorganization, DHSS centralized its inspection, regulation, enforcement, and appeal rights of programs licensed and certified by several divisions within DHSS under the new Section of Certification and Licensing (C&L) in the Division of Public Health. C&L has unified 19 programs that were originally administrated under 12 different statutory schemes. C&L is continuing work on centralized licensing and related administrative procedures including consistent licensing and certification definitions, licensure requirements, license renewal processes, requirements for employee and volunteer background checks, conditions for denial of a license, complaints and appeals processes, enforcement actions and penalties, and confidentiality requirements.

Certification and Licensing specialists and surveyors inspect all health and children's residential facilities in the state to determine whether they meet state and federal standards, and also investigate complaints made against care providers. The purpose of these inspections is to determine a care provider's ability to offer services which are safe and of an acceptable quality. Certification and Licensing staff is now responsible for nearly 700 facilities statewide, from hospitals to nursing homes to children's residential facilities. New facility types for which regulations are being developed and implemented include long term acute care hospitals, hospices, and freestanding birth centers. There currently is insufficient staff capacity to accommodate addition of these new facilities to the workload.

# Health Care Services (continued) Residential Licensing (continued)

FY2008 AMD: Safety of Vulnerable Alaskans (continued)

Vulnerable Alaskans, those needing care because they are elderly, disabled, or infirm, deserve to be cared for in environments that are safe and by providers they can trust. Funding provided through this increment request will help to ensure that the care provided by entities licensed by the Department is safe and appropriate.

#### RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This request is a long-term investment in the health and safety of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the percent of health facilities surveyed), 2) interim impact goals (e.g., prevalence of pressure ulcers in nursing homes), and 3) desired long-term outcomes (e.g., annual growth rate of assisted living homes). This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU for percent of licensed and certified long term care facilities surveyed and recertified annually.

#### MISSIONS AND MEASURES REFERENCE:

Public Health M&M for percent of licensed and certified long term care facilities surveyed and recertified annually (A4:2)

This \$200.0 GF increment will support:

Personal Services- \$200.0 (\$88.3 1.0 new FTE; \$111.7 existing under-funded positions)

These funds will support one new Health Facility Surveyor I position. Overall the Health Facility Surveyor I position will support new regulatory requirements, additional facilities to be licensed, growing caseloads, and compliance with increasing federal mandates. An additional position will reinforce safety and a higher quality of care for Alaska's elderly and other "at risk" populations when they're entrusted to a caregiver. The remaining funds will support the reclassification of certain existing Health Facility Surveyor positions to the Nurse Consultant classification to more accurately reflect the duties of and expertise and credentials required by these positions, and to improve recruitment and retention.

FY2009 Incremental funding to support growth demand for Background Check Unit (continued)

providers. However, as of August 31, 2007, 23,009 applications have been processed. This is a significant workload increase; the good news is that this program is also generating more fees.

In FY07, C&L was authorized to collect \$630.7 Receipt Support Services revenue (RSS); C&L exceeded their RSS authority in FY07 by \$234.6, the excess authority was transferred to C&L utilizing surplus receipts in other sections within the Division of Public Health (DPH). At the end of the first quarter of FY08, C&L has collected 87.4% of its authorized RSS.

This trend is not likely to diminish in FY09 as C&L will be adding foster care homes and child care centers for background check processing. This increment request is to provide adequate authority to continue collection of receipts supporting the statutory and regulatory mandates.

This increased authority will support the mission of Certification & Licensing by:

Increase existing RSA with Dept of Public Safety, \$535.4

The majority of this incremental request will be to support the reimbursable services agreement (RSA) with the Department of Public Safety (DPS). Under this RSA, DPS conducts the fingerprint search through the State of Alaska database and the FBI national database. DPS returns the results to the Background Check Unit (BCU), which then investigates any flagged applications. 45% of applications processed have been flagged as indicating the possibility of criminal activity. All records are kept by the BCU. The cost of processing one application and set of fingerprints is \$79.85; of this, C&L/BCU collects \$25 RSS for the application fee and \$54.25 RSS pass-through to process fingerprints. Due to increased transactions, the RSA needs to be increased accordingly.

RSA with DHSS-Finance and Management Services, Departmental Support Services, \$79.7 Current levels of accounting support need to be increased by one full-time position. Increasing the RSA will provide one Accountant III position dedicated to the revenue and expenditure tracking for C&L, as well as preparation of the required Centers for Medicaid and Medicare reports.

Personal Services, \$135.5

Two additional Criminal Justice Technician positions are being requested for the BCU to meet the higher-than-expected need for background checks and the upcoming increased demand as responsibility for conducting checks on child care and foster care providers (an additional 2,600 providers). The BCU is responsible for the intensive research of background information to meet mandates ensuring that service providers with a criminal past are prevented from employment with vulnerable populations. This populace is dependent on care providers for basic daily necessities. Ultimately, these positions will help ensure that vulnerable Alaskans are protected from potential harm, neglect or abuse.

Travel \$75.0

The need for travel will continue to increase with the addition of responsibilities and staff for the Background Check Program. Certification and Licensing staff is responsible for inspections and complaint investigations for over 700 health care and licensed facilities statewide and made more than 1,200 site visits last year. The purpose of these inspections/investigations is to determine a care provider's ability to offer services which are safe and of an acceptable quality.

This increment is needed to implement new Medicaid case eligibility and medical service review requirement mandated by federal "Payment Error Rate Measurement" (PERM) regulations.

Centers for Medicare and Medicaid Services (CMS) issued proposed regulations that require states to sample payments on Medicaid claims. CMS issued these regulations to meet requirements in the Improper Payments Act (IMPA) passed by congress. CMS makes these regulations effective October 1, 2005. The regulations mandate a quality control review of payments to medical providers, including a review of the eligibility criteria, medical necessity, and correctness of the payment. The proposed requirements assume a 50% error rate for all states, and CMS wrote the sampling requirements to ensure each state would draw approximately the same number of claims in an annual sample. This creates a statistically valid National Sample, and an inordinately large sample size for Alaska.

## Health Care Services (continued) Medical Assistance Administration (continued)

FY2013 AMD: Patient-Centered Medical Homes

with Integrated Services (continued)

A portion of funds (anticipated \$200.0) requested will be utilized to further strategic integration plan development initiated in FY2012 through a contractor who will also be conducting ongoing assessment of the statewide need and state of readiness for Patient Centered Medical Homes with Integration. This contractor will also provide continued technical assistance to medical home pilot participants and others interested regarding such topics as:

- Patient tracking and registry functions
- Use of non-physician staff for case management
- The adoption of evidence-based guidelines
- Patient self-management support and tests (screenings)
- Referral tracking
- Patient engagement and personal responsibility

The remaining funds (anticipated \$300.0) will be made available as a one-time competitive grant for up to four pilot programs for medical home infrastructure development, such as the addition of a behavioral health clinician or specialized case manager and/or collaborative developments with the goal of expanded access to mental health specialists.

This model has the potential to expand outreach and linkage to services for some of our most vulnerable Alaskans. Failure to attempt such integration will result in status quo or worsened conditions and continued disparity for Alaska Medicaid recipients with concurrent mental health/substance abuse conditions and medical concerns. We already know the life expectancy for these individuals is significantly lower on average than individuals without mental health/substance abuse concerns. Additionally, as we anticipate this portion of our population to continue to grow within Medicaid, we must find an appropriate model to address their needs in the most cost-effective manner that allows recipients to get the right care at the right time in the right place.

This is a new request Mental Health Trust recommendation for FY2013.

This is to transfer funds from Medicaid Services to the Rate Review component for critical Medicaid items:

Independent Certified Audits for Disproportionate Share Hospital Payments: By federal law, beginning with FY 2005 each state must submit an independent certified audit of its Medicaid disproportionate share hospital (DSH) program to the federal Centers for Medicare and Medicaid (CMS) Services to receive Federal disproportionate share hospital payments. The department relies almost exclusively on the DSH program for operational expenses at the Alaska Psychiatric Institute. Annual DSH expenditures of over \$15 million generate almost \$8 million in federal funds for Alaska.

Although this statutory requirement has been in place since 2005, CMS has not yet adopted regulations regarding

CMS has required that the department develop and implement a new Medicaid Waiver rate setting system as a requirement for continuing participation in the Medicaid Waiver program. The Waiver program is currently at risk due to an inadequate, antiquated, and unfair reimbursement system. Without this staffing and additional funds, federal Medicaid participation in Alaska's home and community based services programs could be in jeopardy. Inadequate staffing may result in CMS financial findings and related disallowances, potential lawsuits from

## Health Care Services (continued) Rate Review (continued)

FY2013 Rate Settings and Acuity Measurement Systems (continued)

state and federal laws and regulations are invaluable in avoiding federal findings, and ensuring access to quality care for Medicaid recipients. After many meetings with providers and much review of formal public comments, the need for a robust acuity measurement system is obvious for rate setting and claims payment purposes as well as for Behavioral Health program administration.

We propose to hire experienced consultants to design and implement a rate setting system and related acuity measurement system for outpatient behavioral health services in Alaska. The design would include cost related adjustments to Medicaid payment rates for various acuity levels, as well as meet the needs of the Division of Behavioral Health program staff with regard to the administration of the Division of Behavioral Health services.

Without an accurate measurement of acuity, long term cost containment in rate setting would be compromised, access to services could eventually deteriorate for Medicaid clients, accurate trends in the condition of Medicaid clients and related impacts of policy decisions could not be measured, and provider concerns about the fairness of payment rates cannot be addressed completely. Recipients would not be receiving the right care, in the right place, for the right price.

Home Health Rate Setting and Acuity Measurement System \$100.0 (\$50.0 Federal/\$50.0 GF)

The department has recently been informed that federal state plan reviewers find the current state plan requirements for home health services, in particular the rate setting methodology, unacceptable.

We propose to hire experienced consultants as necessary to design and implement a rate setting system for Medicaid home health services in Alaska. The design would include a relationship to costs and related adjustments to Medicaid payment rates for various acuity levels.

If funding is not approved, the department may be faced with a federal mandate to update the payment methodology for home health services. State non-compliance with a federal mandate in this area could result in elimination of federal matching funds for the Medicaid home health program.

Home and Community Based Services Acuity Measurement System \$300.0 (\$150.0 Federal/\$150.0 GF)

The department over the last 2-3 years has worked to establish a new rate setting system for home and community based services. After many meetings with providers and much review of formal public comments, the need for a robust acuity measurement system is obvious for rate setting and claims payment purposes as well as for Division of Senior and Disability Services program administration. Without an accurate measurement of acuity, long term cost containment in rate setting would be compromised, access to services could eventually deteriorate for Medicaid clients, accurate trends in the condition of Medicaid clients and related impacts of policy decisions could not be measured, and provider concerns about the fairness of payment rates cannot be addressed completely.

We propose to hire experienced consultants to design and implement an acuity measurement system for home and community based services in Alaska. The design would include cost related adjustments to Medicaid

FY2008 AMD: Behavioral Health Clinicians for McLaughlin Youth Center and Fairbanks Youth Facility

> This request includes funding for three Mental Health Clinicians (MHC). It is anticipated that the positions will include one MHC III in Anchorage; one MHC II in Anchorage and one MHC II in Fairbanks. The Mental Health Trust has agreed to fund two positions; the division is requesting enough general fund dollars to fund one position. Over the next year or two, three more mental health positions will be phased into the system.

Inc

273.1

231.5

Nationally, the trend to treat behavioral health residents in juvenile detention and treatment facilities is moving in two directions. Either complete units are being built at facilities to treat residents with these problems or staff is being hired to work with residents within existing facilities. The division (DJJ) is taking the latter approach.

National recommendations are that one MHC be on board for every 20 residents. Currently, at the McLaughlin Youth Center (MYC), we have one MHC for the entire facility (160 beds); at the Fairbanks Youth Facility, we currently have one MHC for 40 beds. By acquiring these three additional clinicians, the needs of the residents will be more fully met, as they will provide direct clinical services to youth as well as crisis intervention. The mental health clinicians will provide suicide risk assessment, conduct behavioral health evaluations, assist with treatment planning, provide individual and group counseling and referral to community services. They will be able to perform court-ordered evaluations and provide behavioral health staff training and consultation. In short, these clinicians will assist with identification of a youth's behavioral health needs, improve our ability to provide targeted behavioral health treatment and assist with transition and after-care planning back to the community. This added clinical capacity within DJJs facilities will help to ensure there is an appropriate and robust continuum of care for youth with behavioral health needs who are also involved with the juvenile justice system.

In 2001, DJJ reviewed the case files by hand for all youth served (1,318) on a particular day and recorded data related to DSM-IV diagnosis and other factors such as age, gender, race and number of prior delinquency reports. Of the 1,318 files reviewed, 42% (560) were identified as having a primary Axis I diagnosis. Of these, 40% also had a documented substance-related disorder. In 2006, DJJ added the ability to record DSM-IV diagnosis to the Alaska Juvenile Offender Management Information System (JOMIS). Preliminary data for 2006 indicate that 35% of youth served on a given day had at least one Axis I diagnosis. Of those, 85% had multiple diagnoses and 44% had a substance-related disorder.

The Division of Juvenile Justice (DJJ) requests additional funding to better staff the McLaughlin Youth Center (MYC) in Anchorage. The division is currently asking for five of the additional 19 Juvenile Justice Officer positions that are needed to provide the minimum staffing required to meet national practice standards for monitoring youth, ensuring the security and safety of residents and staff.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts (such as when they need to tend to a youth acting out, participate in training, take their regularly scheduled time off or earned leave, or deliver a youth to a court appearance), the division has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). This factor has guided the division's calculation of the number of staff needed for the facilities constructed or renovated in the recent past, and now serves to point out the need for additional staff positions at McLaughlin Youth Center and three other juvenile facilities in Alaska.

McLaughlin Youth Center is currently staffed at a ratio of 1.45 staff per duty post. This lower staffing ratio has resulted in a number of challenges.

The lower staff-resident ratio limits effective interactions with youth. This is demonstrated by MYCs outcomes in the national Performance-based Standards (PbS) quality assurance process. According to the most recent report on McLaughlin's performance (April 2006), the average amount of time residents of McLaughlin's program units engage in "idle time" (i.e., are not actively engaged with staff in treatment activities) was higher than the national average for this measure. The program units also reported higher use of room confinement/isolation of residents per 100 resident days than the national average. In contrast, at both Nome Youth Facility and Kenai Peninsula Youth Facility, which are staffed at a ratio approaching 1.76 staff per duty post, youth had lower average amounts of idle time than the national average and were lower than the national average in the use of room confinement/isolation per 100 resident days.

# Juvenile Justice (continued) McLaughlin Youth Center (continued)

FY2008 AMD: McLaughlin Youth Center Facility Staffing for Safety (continued)

Higher staff-resident ratios at MYC would reduce the frequency and length of idle time and room confinement and allow for more effective interaction. When permanent staff have frequent opportunities to work with residents, problems can be identified and resolved before they pose a threat to safety. Juveniles feel safer, feel less exposed to unknown threats, and are less likely to act out and harm others.

The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals (National Commission on Correctional Health Care), and more frequently if they have expressed suicidal thoughts. At current staffing levels McLaughlin Youth Center is unable to conduct these checks on the routine basis needed to ensure resident safety in some of the treatment cottages.

The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY06, MYC utilized more than 10,900 hours of work from non-permanent employees and more than 5,700 hours of overtime. On just one unit alone, it is anticipated that non-perm and overtime costs to cover for inadequate staffing cost approximately \$61,000. At MYC, most of the hours and dollars attributed to insufficient staffing occur in the Center's detention and treatment units. Four of these positions would be placed in the detention units; one would be placed in a treatment unit.

The lower staff-resident ratio at McLaughlin decreases the consistency of services youth receive. The detention units at McLaughlin had to cancel school for their residents on more than a dozen occasions over the course of FY06 due to short staffing that prevented adequate supervision of residents attending the McLaughlin School. Workers on the unit most consistently filled to capacity at McLaughlin (the Detention II Unit) also report that inadequate staffing is a significant source of stress that appears directly related to the number of incidents of resident misconduct and assaults, as well as the amount of sick leave utilized by staff on the unit.

The hiring of five additional juvenile justice officers would begin to bring McLaughlin Youth Center into line with Alaska's staff-resident ratio and could be expected to result in the following positive outcomes:

- a) Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- b) Reduced idle hours by youth;
- c) Decreased need for room confinement for youth;
- d) Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of successful suicide attempts;
- e) Decreased need for non-permanent employees and overtime hours by existing staff;
- f) Increased ability to conduct school and other activities according to schedule;
- g) Decreased incidence of resident misconduct and assault, and staff sick leave, in the Detention II Unit.

FY2009 General Funds Required Due to Elimination of ProShare funding (continued)

grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Juvenile Justice began utilizing ProShare funds in late FY04. Medical costs that would normally have been paid directly to a provider for medical needs were submitted to Providence Hospital for payment. These medical needs included everything from prescriptions, psychiatric evaluations, dental work, to any necessary surgeries or hospital stays. The divison is required by Alaska statute to provide necessary medical services to clients that are housed in our Juvenile Justice facilities (AS 47.12.150, AS 47.14.020). With the elimination of the ProShare funding for Juvenile Justice, these funds are necessary to provide the division the funding needed to continue these services.

Performance Measures Affected:

Dept-Core Services -- Manage health care coverage for Alaskans in need

Dept-Core Services -- Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

FY2009 Front Line Staffing at McLaughlin Youth Center, Year 2 of Division Plan (continued)

monitoring youth, ensuring the security and safety of residents and staff. The facility also is in need of one additional Nurse to provide adequate medical services.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. Using guidelines from the National Institute of Corrections, the division determined that an additional five staff are needed at McLaughlin Youth Center to enable this facility to further meet its minimal needs to assure the safety and security of residents and staff. Indeed, a number of challenges faced by the facility can be directly attributed to less than adequate staffing:

~ The current low staff-to-resident ratio limits effective interactions with youth. This is demonstrated by MYC's outcomes in the national Performance-based Standards (PbS) quality assurance process. According to the most recent report on McLaughlin's performance (April 2007), the average amount of time residents of McLaughlin's program units engage in "idle time" (i.e., are not actively engaged with staff in treatment activities) was more than two times the national average for this measure. In contrast, at the Nome Youth Facility which is staffed at a ratio approaching 1.76 staff per duty post, youth continued to have lower average amounts of idle time than the national average during the same reporting period.

Higher staff-resident ratios at MYC would reduce the frequency and length of idle time and room confinement and allow for more effective interaction. When permanent staff have frequent opportunities to work with residents, problems can be identified and resolved before they pose a threat to safety. Juveniles feel safer, feel less exposed to unknown threats, and are less likely to act out and harm others.

- ~ The current low staff-to-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals (National Commission on Correctional Health Care), and more frequently if they have expressed suicidal thoughts. At current staffing levels McLaughlin Youth Center is unable to conduct these checks on the routine basis needed to ensure resident safety in some of the treatment cottages.
- ~ The current low staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY07, MYC utilized more than 10,000 hours of work from non-permanent employees and more than 8,400 hours of overtime. At MYC, most of the hours and dollars attributed to insufficient staffing have occurred in the Center's detention and treatment units. In FY08, four of the five new positions went to the detention unit. One of the shift supervisors said that for the first time he was able to schedule shifts for the month without having to use non-perms for a shift. If the positions are approved for the FY09 request, four of these positions would be placed in the Treatment units and another in one of the detention units.
- ~ The current low staff-to-resident ratio at McLaughlin decreases the consistency of services youth receive. The detention units at McLaughlin had to cancel school for their residents on more than a dozen occasions over the course of FYO7 due to short staffing that prevented adequate supervision of residents attending the McLaughlin School. Workers on the unit most consistently filled to capacity at McLaughlin (the Detention II Unit) also report that inadequate staffing is a significant source of stress that appears directly related to the number of incidents of resident misconduct and assaults, as well as the amount of sick leave utilized by staff on the unit.

# Juvenile Justice (continued) McLaughlin Youth Center (continued)

FY2009 Front Line Staffing at McLaughlin Youth Center, Year 2 of Division Plan (continued)

- ~ Teenagers we see on a daily basis are often the same size as adult offenders and have committed crimes as serious as adult offenders. However, due to their age and lack of maturity they have a tendency to be more volatile, more unpredictable, and less able to understand the benefits of compliance. To keep our juvenile facilities safe, we do not use weapons, we do not use azors, we do not use pepper spray; we do not even use isolation. What we do use is our ability to relate to the youth in a professional manner to build a positive relationship based on trust and integrity, and that trust is what keeps our facilities safe. Without full staffing, it is much harder to build this trust if we have to use non-perms to fill shifts on a consistent basis.
- ~ Statewide, all of our facilities are dealing with a high number of youths who have a DSM-IV diagnosis. On October 9, 2007 we did a one day count trying to figure out how many of our youths do have a DSM-IV diagnosis and the number was 69%. Given that our youths are all considered to be high risk, when you add the mental health issues to the mix, this creates an atmosphere where numerous crisis situations could develop. These crisis situations cry-out for trained staff to assist the youths we serve.
- Juvenile Justice does not have a training academy like the Office of Children's Services or the State Troopers, so our training is dependent upon one-on-one supervision by a seasoned staff with new workers; usually this intense one-on-one supervision lasts anywhere from four to six months. This method of training staff requires keen attention to strength of shift concerns as it is critical that staff on all shifts have the experience and training to maintain facility safety and security. Without full staffing, it is very difficult to make up shifts that ensure the seasoned staff are there.
- ~ A new problem at MYC is that gang members coming into MYC are more sophisticated, deeper into the criminal mindset, and recognize immediately that to gain an upper-hand they look for the weakest link amongst the authority figures, and that is the non-perm.

The hiring of five additional juvenile justice officers would help bring McLaughlin Youth Center into line with national recommendations for staff-to-resident ratios and could be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism:
- ~ Reduced idle hours by youth;
- ~ Decreased need for room confinement for youth;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of successful suicide attempts:
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Increased ability to conduct school and other activities according to schedule:
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave, in the Detention II Unit.

This budget narrative also includes a request for an additional nurse position in the McLaughlin Youth Center. As with the other additional staff requested through this increment, this request is made to help assure the safety and health of residents.

# Juvenile Justice (continued) McLaughlin Youth Center (continued)

FY2009 Front Line Staffing at McLaughlin Youth Center, Year 2 of Division Plan (continued)

McLaughlin Youth Center has far fewer nurses per resident than any other juvenile facility in Alaska. Currently, all youth facilities in Alaska except for McLaughlin are staffed with nurses at a rate of 1 fulltime nurse for every 10-20 juveniles. McLaughlin Youth Center, with 160 beds, employs 3 nurses, resulting in a ratio of 1 nurse for more than 50 juveniles. As a result, the nursing staff at McLaughlin Youth Center is overwhelmed in their ability to deal with their routine work:

- ~ Providing direct care to juveniles who are injured or sick;
- ~ Management and administration of medications;
- ~ Providing education and training to staff, particularly in providing initial health screenings for newly admitted juveniles;
- ~ Assisting and consulting with the contract physician and/or nurse-practitioner;
- ~ Providing information to parents and agencies that may work with the youth;
- ~ Conducting adequate documentation and recordkeeping.

The difficulties that the nursing staff at McLaughlin have in meeting these needs are compounded when emergencies arise, or when a nurse must be in training or take sick leave. Indeed, to adequately meet the health care needs of youth at the facility at least two nurse positions are truly needed. However, inadequate space in the nurse's station effectively prevents an appropriate number of nurses from being requested and hired at this time.

#### Performance Measures:

This increment request pertains to Department Measure E, Outcome State #5 (Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety). Targets 1 and 2 state: 1) Reduce percentage of juvenile who re-offend following release from institutional treatment facilities to less than the year before; and 2) Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than the prior year.

By having the facility more appropriately staffed, the division will be able to focus on reducing the number of youth that re-offend. Permanent, trained staff is better able to carry out the division's programs that will help reduce the recidivism and assist the probation staff to go into the community to educate and mentor youth to keep them from re-offending.

This request includes funding for one specialized Mental Health Juvenile Probation Officer (JPO) located in Fairbanks.

The State is responsible for ensuring appropriate probation services are provided for youth who have behavioral health disorders. Demonstrated best practice indicates that treatment courts are the most appropriate course for many juveniles who have a primary behavioral health disorder and who have broken the law. The goal of the treatment court is to ensure the youth receives adequate treatment while at the same time does not violate any conditions of probation, including committing another offense. Juvenile Justice is a key partner with the Alaska Court System and other community stakeholders in the creation of the newly-developing Fairbanks Juvenile Treatment Court, the first juvenile court in Alaska. This request includes funding for one specialized Mental Health

FY2009 Fairbanks Juvenile Treatment Court Support (continued)

Juvenile Probation Officer (JPO) located in Fairbanks. The specialized JPO position will provide intensive case-management for these youth and families.

Data for FY07 has shown that 46% of youth formally involved with the Alaska Juvenile Justice system had at least one primary behavioral health disorder as defined by the Diagnostic and Statistical Manual of Mental Disorders. Of those youth, 40% also had a co-occurring substance-related disorder. This is consistent with the first Juvenile Justice behavioral health data review conducted in 2001. Further, on October 9, 2007, facility data demonstrated that 69% of youth securely confined in either a detention or treatment institution in Alaska had an existing behavioral health disorder. With 2,186 admissions to secure detention and treatment in 2007, it is imperative that the State fulfill its responsibility to provide adequate access to behavioral health screening, evaluation, treatment and community referral for continued care.

Short-term outcomes are anticipated to include a decrease in the number of episodes of client behavioral management that include the use of physical restraints or room confinement, improved crisis intervention, and a decrease in the length of stay in treatment facilities for youth with DSM-IV diagnoses. Longer-term outcomes of having an appropriate staffing level of MHCs and a specialized Juvenile Treatment Court may include a shorter length of stay in detention, reduced recidivism in the juvenile system and a lowered risk of contact with the adult criminal system.

This increment request is part of the Division's plan to increase behavioral health services for youth in state custody. It is closely tied to the Trust recommendation for Mental Health Clinicians. Since the Trust did not recommend funding for this position, it was placed in a separate change record.

#### Performance Measures:

This increment request pertains to Department Measure E, Outcome State #5 (Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety). Targets 1 and 2 state: 1) Reduce percentage of juvenile who re-offend following release from institutional treatment facilities to less than the year before; and 2) Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than the prior year.

Trust Description:

Grant 1386.01

The MH Trust: Dis Justice - MH Clinical Capacity for Juveniles In/Transitioning out of Detention project will maintain momentum for ensuring that there is the adequate mental health clinical staff capacity to provide appropriate treatment to youth within Alaska's juvenile justice system statewide. The goal is have six new mental health clinicians statewide in youth facilities. This project will be managed by the Division of Juvenile Justice staff with funds targeted to those youth facilities with inadequate mental health clinical staff capacity.

This project maintains the momentum of a critical component of the Disability Justice Focus Area plan by ensuring mental health treatment is provided while a youth is detained as well as ensuring treatment is incorporated into each youth's transition plan back into the community as needed. The MH Trust: Dis Justice - MH Clinical Capacity

FY2009 MH Trust: Disability Justice - Mental Health Clinical capacity for juveniles in and/or transitioning out of detention (continued)

for Juveniles In/Transitioning out of Detention was successful in securing funds for three positions in FY08 with \$189.2 MHTAAR.

This change record continues this funding for FY09.

#### Department Description:

This request includes funding for three Mental Health Clinician II (MHC) positions located in Anchorage. One of the MHC positions located in Anchorage will travel and serve both the Mat-Su Youth Facility and the Kenai Peninsula Youth Facility.

The State of Alaska is responsible for ensuring that the basic health needs of juveniles who are placed within its 24-hour secure institutions are met. These health needs include screening, evaluation and treatment for behavioral health disorders. The Department of Justice has found that constitutionally-mandated, reasonably safe, conditions of confinement include the right to adequate medical care, and behavioral health treatment has been identified as part of that medical care. Several states that have not provided basic access to behavioral health services within its 24-hour secure institutions have been found to be in violation of the federal Civil Rights of Institutionalized Persons Act (CRIPA).

Nationally, the trend to address the behavioral health needs in juvenile detention and treatment facilities is moving in the following two directions: either complete and separate units have been built at secure facilities to treat residents with these problems or clinical staff have been hired to work within existing secure facilities. The latter is the route DJJ is taking. It is recommended that one Mental Health Clinician (MHC) be on board for every 20 residents. Currently, at the McLaughlin Youth Center (MYC), there are three MHC positions for the entire facility (160 beds) and no MHC for either the Kenai Peninsula Youth Facility (KPYF) or the Mat-Su Youth Facility (MSYF). This request includes funding for three MHC II positions located in Anchorage. One of these MHC positions will travel and be the sole clinician serving both KPYF and MSYF.

Data for FY07 has shown that 46% of youth formally involved with the Alaska Juvenile Justice system had at least one primary behavioral health disorder as defined by the Diagnostic and Statistical Manual of Mental Disorders. Of those youth, 40% also had a co-occurring substance-related disorder. This is consistent with the first Juvenile Justice behavioral health data review conducted in 2001. Further, on October 9, 2007, facility data demonstrated that 69% of youth securely confined in either a detention or treatment institution in Alaska had an existing behavioral health disorder. With 2,186 admissions to secure detention and treatment in 2007, it is imperative that the State fulfill its responsibility to provide adequate access to behavioral health screening, evaluation, treatment and community referral for continued care.

Short-term outcomes are anticipated to include a decrease in the number of episodes of client behavioral management that include the use of physical restraints or room confinement, improved crisis intervention, and a decrease in the length of stay in treatment facilities for youth with DSM-IV diagnoses. Longer-term outcomes of having an appropriate staffing level of MHCs may include a shorter length of stay in detention, reduced recidivism in the juvenile system and a lowered risk of contact with the adult criminal system.

This increment request is tied to the separate request for a Mental Health Juvenile Probation Officer in Fairbanks.

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Juvenile Justice began utilizing ProShare funds in late FY04. Medical costs that would normally have been paid directly to a provider for medical needs were submitted to Providence Hospital for payment. These medical needs included everything from prescriptions, psychiatric evaluations, dental work, to any necessary surgeries or hospital stays. The divison is required by Alaska statute to provide necessary medical services to clients that are housed in our Juvenile Justice facilities (AS 47.12.150, AS 47.14.020). With the elimination of the ProShare funding for Juvenile Justice, these funds are necessary to provide the division the funding needed to continue these services.

## Juvenile Justice (continued) Fairbanks Youth Facility (continued)

FY2010 Front Line Staffing for Fairbanks Youth Facility (continued)

The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts (such as when they need to tend to a youth acting out, participate in training, take their regularly scheduled time off or earned leave, or deliver a youth to a court appearance), the division has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). Currently, the Fairbanks Youth Facility is at 1.55 per post.

A number of challenges faced by the facility can be directly attributed to less than adequate staffing:

- ~ Increased likelihood that residents will harm themselves.
- ~ Increased need for non-permanent employees and overtime hours.
- ~ Decreased consistency of services youth receive.
- ~ Increased possibility of escapes from the facility.

The hiring of an additional juvenile justice officer would help bring the Fairbanks Youth Facility into line with national recommendations for staff-to-resident ratios and could be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- ~ Reduced idle hours by youth;
- ~ Decreased need for room confinement for youth;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of successful suicide attempts:
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Increased ability to conduct school and other activities according to schedule;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave, in the Detention II Unit.

This budget increments also includes a request for an additional maintenance position to help provide for a level of services that is now required to properly operate the facility. The Fairbanks Youth Facility has continued to increase in size since its inception in 1980. What began as a small facility of just under 14,000 square feet has grown to a robust building of over 35,000 square feet once the mezzanine project is completed around December of 2008. The growth of the building coupled with an increase in the original facility aging, exterior improvements (i.e. rear fencing, more parking) has greatly increased the responsibilities of the lone maintenance specialist at the facility and has made it extremely difficult to keep up with routine duties such as preventative maintenance; snow removal (winter); facility grounds upkeep (summer); project oversight; painting; vehicle upkeep; security systems, key control and lock repairs; and certification and repair of critical building systems including fire and life safety systems.

FY2009 General Funds Required Due to Elimination of ProShare funding	Inc	33.9	0.0	0.0	0.0	0.0	0.0	33.9	0.0	0	0	0

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

FY2009 Front-Line Staffing for Bethel Youth Facility, Ye	ar 2 of Inc	95.0	83.3	0.0	11.7	0.0	0.0	0.0	0.0	1	0	0

The Division of Juvenile Justice is requesting an increment in the amount of \$95.0 to better staff the Bethel Youth Facility (BYF). Currently, BYF is in need of three additional Juvenile Justice Officer positions to meet national practice standards for monitoring youth and ensuring the safety and security of residents and staff. To stay in line with the Division's five year plan, the division will request one of the three needed positions.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. Using guidelines from the National Institute of Corrections, the division determined that an additional staff is needed at the Bethel Youth Facility to enable this facility to further meet its minimal needs to assure the safety and security of residents and staff. Indeed, a number of challenges faced by the facility can be directly attributed to less than adequate staffing:

Bethel Youth Facility is currently staffed at a ratio of 1.54 staff per duty post. This lower staffing ratio has resulted in a number of challenges:

- ~ The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals, and more frequently if they have expressed suicidal thoughts. At current staffing levels BYF is unable to conduct these checks on the routine basis needed to ensure resident safety.
- ~ The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY07, BYF utilized over 2,700 hours of work from non-permanent employees or overtime from current staff. A portion of

# Juvenile Justice (continued) Bethel Youth Facility (continued)

FY2009 Front-Line Staffing for Bethel Youth Facility, Year 2 of Division Plan (continued)

these hours and dollars were attributed to insufficient staffing in the Facility's detention and treatment units. Only two workers staff BYF during graveyard shift, a dangerous situation that prevents any more than one staff from being present on either of the facility's two units. When an emergency or admission occurs during graveyard shift, a staff person often must be called in from home to assure that the duty posts are adequately staffed. Similarly, when difficulties arise late in the evening, such as a resident acting out in an aggressive or harmful manner, staff from the earlier shift are required to work overtime to ensure adequate staffing levels on the graveyard shift.

~ The lower staff-resident ratio at Bethel Youth Facility decreases the consistency of services youth receive. BYF is the most routinely overcrowded juvenile facility in Alaska, responsible for detaining youth and providing treatment services to juveniles from Bethel and the 56 neighboring villages throughout the Yukon-Kuskokwim Delta. Being filled over capacity regularly requires staff to escort youth to other facilities around the state; these escorts are in addition to the routine and frequent local escorts staff must make with youth to court and the local medical clinic. The constant pulling of staff away from their duty posts compounds the problem of being short-staffed, limiting opportunities for anger-management treatment groups, community work service, and other treatment-related activities.

The hiring of one of the three needed additional juvenile justice officers would bring Bethel Youth Facility more into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- ~ Reduced room confinement and isolation of youth;
- ~ Decreased idle hours for youth;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts:
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Increased ability to conduct school and other activities according to schedule;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave.

#### Performance Measures:

This increment request pertains to Department Measure E, Outcome State #5 (Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety). Targets 1 and 2 state: 1) Reduce percentage of juvenile who re-offend following release from institutional treatment facilities to less than the year before; and 2) Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than the prior year.

By having the facility more appropriately staffed, the division will be able to focus on reducing the number of youth that re-offend. Permanent, trained staff is better able to carry out the division's programs that will help reduce the recidivism and assist the probation staff to go into the community to educate and mentor youth to keep them from re-offending.

standards for monitoring youth and ensuring safety and security of residents and staff. For FY10, the division is asking for one (PCN 06-#512) of the two positions still needed. The other position will be requested in FY11.

The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts (such as when they need to tend to a youth acting out, participate in training, take their regularly scheduled time off or earned leave, or deliver a youth to a court appearance), the division has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). Currently, the Bethel Youth Facility is staffed at 1.61 per post.

A number of challenges faced by the facility can be directly attributed to less than adequate staffing:

- ~ Increased likelihood that residents will harm themselves
- ~ Increased need for non-permanent employees and overtime hours.
- ~ Decreased consistency of services youth receive.

The hiring of one of the two remaining juvenile justice officers needed would bring Bethel Youth Facility more into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism:
- ~ Reduced room confinement and isolation of youth;
- ~ Decreased idle hours for youth;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts:
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Increased ability to conduct school and other activities according to schedule;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave.

ProShare funding

#### Agency: Department of Health and Social Services

PPT	TMP
0	0
1	0

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

Juvenile Justice began utilizing ProShare funds in late FY04. Medical costs that would normally have been paid directly to a provider for medical needs were submitted to Providence Hospital for payment. These medical needs included everything from prescriptions, psychiatric evaluations, dental work, to any necessary surgeries or hospital stays. The divison is required by Alaska statute to provide necessary medical services to clients that are housed in our Juvenile Justice facilities (AS 47.12.150, AS 47.14.020). With the elimination of the ProShare funding for Juvenile Justice, these funds are necessary to provide the division the funding needed to continue these services.

The Division of Juvenile Justice (DJJ) is requesting an increment in the amount of \$56.4 to acquire one additional Juvenile Justice Officer at the Johnson Youth Center (JYC) in Juneau. Although JYC is in need of three additional Juvenile Justice Officer positions to meet national practice standards for monitoring youth and ensuring safety and security of residents and staff, we are only asking for one of the positions at this time. The other two positions will be phased into the system over the next few years.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts, (such as when they need to tend to a youth acting out, participate in training, take earned leave, or deliver a youth to a court appearance), the Division of Juvenile Justice has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). This factor has guided the Division's calculation of the number of staff needed for the facilities constructed or renovated in the recent past, and now serves to point out the need for additional staff positions at Johnson Youth Center and three other juvenile facilities in Alaska.

Johnson Youth Center is currently staffed at a ratio of 1.56 staff per duty post. This lower staffing ratio has resulted in a number of challenges:

The lower staff-resident ratio limits effective interactions with youth. This is demonstrated by JYCs performance in the national Performance-based Standards (PbS) quality assurance process. According to the most recent report on JYCs performance (April 2006), the average amount of time residents of JYCs program unit engage in "idle time" (i.e., are not actively engaged with staff in treatment activities) is higher than the national average for this

# Juvenile Justice (continued) Johnson Youth Center (continued)

FY2008 AMD: Johnson Youth Center Facility Staffing for Safety (continued)

measure. (In contrast, at both Nome Youth Facility and Kenai Peninsula Youth Facility, which are staffed at a ratio approaching 1.76 staff per duty post, youth had lower average "idle time" than the national average.)

Higher staff-resident ratios at JYC would reduce the frequency and length of idle time and allow for more effective interaction. When staff have many opportunities to work with residents, problems can be identified and resolved before they pose a threat to safety. Juveniles feel safer, feel less exposed to unknown threats, and are less likely to act out and harm others.

The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals (National Commission on Correctional Health Care), and more frequently if they have expressed suicidal thoughts. At current staffing levels JYC is unable to conduct these checks on the routine basis needed to ensure resident safety.

The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY06, JYC utilized more than 4,200 hours of work from non-permanent employees or overtime. A portion of these hours were incurred to make up for the lack of permanent direct line staff.

The lower staff-resident ratio at Johnson Youth Center (JYC) decreases the consistency of services youth receive. This past year, the lack of adequate supervision at JYC allowed one resident to escape and another resident to bring contraband (drugs) onto the facility grounds. According to the Performance-based Standards report for April 2006, staff self-reports demonstrated that employees were concerned for their personal safety at a level that exceeded the national average. The potential of two new community partnerships (Boys and Girls Cub and Big Brothers Big Sisters) has been limited to date due to the lack of staff at JYC that can be made available to assist with the start up and implementation of these programs.

The hiring of three additional juvenile justice officers would bring JYC into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- a) Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- b) Reduced room confinement and isolation of youth;
- c) Decreased idle hours for youth;
- d) Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts:
- e) Decreased need for non-permanent employees and overtime hours by existing staff;
- f) Increased ability to conduct school and other activities according to schedule;
- g) Decreased incidence of resident misconduct and assault, and staff sick leave.
- h) Decrease staff concern for personal safety;
- i) Increase effectiveness of partnerships with Boys and Girls Club and Big Brothers Big Sisters.

#### Juvenile Justice (continued) Johnson Youth Center (continued)

FY2009 General Funds Required Due to Elimination of ProShare funding (continued)

> ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first vear. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

> In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

> The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

> Juvenile Justice began utilizing ProShare funds in late FY04. Medical costs that would normally have been paid directly to a provider for medical needs were submitted to Providence Hospital for payment. These medical needs included everything from prescriptions, psychiatric evaluations, dental work, to any necessary surgeries or hospital stays. The divison is required by Alaska statute to provide necessary medical services to clients that are housed in our Juvenile Justice facilities (AS 47.12.150, AS 47.14.020). With the elimination of the ProShare funding for Juvenile Justice, these funds are necessary to provide the division the funding needed to continue these services.

#### Performance Measures Affected:

Dept-Core Services -- Manage health care coverage for Alaskans in need

Dept-Core Services -- Protect and promote the health of Alaskans

Dept-D-4--Provide quality management of health care coverage services providers and clients

HCS-A--Mitigate service reductions by replacing general funds with alternate funds

HCS-B--Provide affordable access to quality health care services to eligible Alaskans

DPH-A--Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

# Juvenile Justice (continued) Johnson Youth Center (continued)

FY2009 Front-Line Staffing at Johnson Youth Center, Year 2 of Division Plan (continued)

developed a five-year plan to acquire needed positions statewide; this is the second year of the plan and will bring us closer to full staffing at JYC.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. Using guidelines from the National Institute of Corrections, the Division determined that an additional staff is needed at the Johnson Youth Center to enable this facility to further meet its minimal needs to assure the safety and security of residents and staff. Indeed, a number of challenges faced by the facility can be directly attributed to less than adequate staffing:

- ~ The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals, and more frequently if they have expressed suicidal thoughts.
- ~ The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY07, JYC utilized more than 6,500 hours of work from non-permanent employees or overtime. A portion of these hours were incurred to make up for the lack of permanent direct line staff.
- The lower staff-resident ratio at Johnson Youth Center decreases the consistency of services youth receive. According to the Performance-based Standards report for April 2007, staff self-reports demonstrated that employees were concerned for their personal safety at a level that exceeded the national average. The potential of two new community partnerships (Boys and Girls Club and Big Brothers Big Sisters) has been limited to date due to the lack of staff at JYC that can be made available to assist with the start up and implementation of these programs.

The hiring of an additional juvenile justice officer would help to bring JYC into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts;
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave.
- ~ Decrease staff concern for personal safety;
- ~ Increase effectiveness of partnerships with Boys and Girls Club and Big Brothers Big Sisters.

#### Performance Measures:

This increment request pertains to Department Measure E, Outcome State #5 (Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety). Targets 1 and 2 state: 1) Reduce percentage of juvenile who re-offend following release from institutional treatment facilities to less than the year before; and 2) Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than the prior year.

The Johnson Youth Center is still in need of four addition	nal iuvenile iustice	officers to me	et national practic	ρ								

The Johnson Youth Center is still in need of four additional juvenile justice officers to meet national practice standards for monitoring youth and ensuring safety and security of residents and staff. For FY2010, the division is asking for one (PCN 06-#513) of those four positions still needed. The other three positions will be requested in FY2011 and FY2012.

The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts (such as when they need to tend to a youth acting out, participate in training, take their regularly scheduled time off or earned leave, or deliver a youth to a court appearance), the division has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). Currently, the Johnson Youth Center is at 1.53 per post.

A number of challenges faced by the facility can be directly attributed to less than adequate staffing:

- ~ Increased likelihood that residents will harm themselves.
- ~ Increased need for non-permanent employees and overtime hours.
- ~ Decreased consistency of services youth receive.
- ~ Increased possiblity of escapes from the facility.

The hiring of additional juvenile justice officers would help to bring this facility into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts:
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave.
- ~ Decrease staff concern for personal safety;
- ~ Increase effectiveness of partnerships with Boys and Girls Club and Big Brothers Big

Sisters.

The Division of Juvenile Justice (DJJ) is requesting \$56.4 to acquire one additional Juvenile Justice Officer at the Ketchikan Regional Youth facility (KRYF). Although this facility is in need of two Juvenile Justice Officer positions to provide the minimum staffing required to meet national practice standards for monitoring youth, ensuring the security and safety of residents and staff, we are only asking for one at this time.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. The National Institute of Corrections recommends that juvenile justice agencies determine their staffing patterns based on a variety of factors such as the agency's mission and the needs of the population served. Alaska regulation requires that juvenile facilities must be staffed to no less than one worker for every 10 residents during active hours and no less than one worker for every 20 residents during sleeping hours. To ensure that facilities are meeting these requirements even when individual workers are called away from their posts, (such as when they need to tend to a youth acting out, participate in training, take sick leave, or deliver a youth to a court appearance), the Division of Juvenile Justice has followed national recommendations to develop a "shift relief factor." Alaska's shift relief factor is 1.76, meaning that for every shift position in a juvenile facility, 1.76 individuals are required to ensure adequate staffing at that position at all times. Thus to adequately staff a facility that requires 10 workers on duty at any given moment, the facility actually needs to have 17.6 individuals available to work (10 x 1.76 = 17.6). This factor has guided the Division's calculation of the number of staff needed for the facilities constructed or renovated in the recent past, and now serves to point out the need for additional staff positions at Ketchikan Regional Youth Facility and three other juvenile facilities in Alaska.

Ketchikan Regional Youth Facility is currently staffed at a ratio of 1.49 staff per duty post. This lower staffing ratio has resulted in a number of challenges:

The lower staff-resident ratio limits effective interactions with youth. The facility consists of two units, a Detention Unit where youth are brought while awaiting a court appearance for an offense; and a Crisis Stabilization Unit, where youth are held in a non-secure setting to deal with mental health and other crisis needs. The crisis stabilization unit requires staff to spend a significant amount of time lining up services for youth and helping them access these services. Short staffing requires staff to forego many of these meetings or treatment related skill-building activities to stay behind at the facility to assure minimum safety and security.

The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals (National Commission on Correctional Health Care), and more frequently if they have expressed suicidal thoughts.

# Juvenile Justice (continued) Ketchikan Regional Youth Facility (continued)

FY2008 AMD: Ketchikan Regional Youth

Facility Staffing for Safety (continued)

At current staffing levels KRYF would be able to provide these room checks but unable to conduct any additional treatment programming or activities. This past year, employees on the Crisis Stabilization Unit routinely were needed to assist staff in the Detention Unit, creating situations where youth in the Crisis Stabilization were unsupervised by direct contact for lengths of time, which increased the risk of harm or undetected misconduct.

The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY06, KRYF utilized more than 2,400 hours of work from non-permanent employees or overtime. A portion of these hours were incurred to make up for the lack of permanent direct line staff.

The lower staff-resident ratio at Ketchikan Regional Youth Facility decreases the consistency of services youth receive. The potential of new community partnerships, such as for community work service projects and victim-offender mediation has been limited due to the lack of staff at KRYF that can be made available to assist with the start up and implementation of these programs.

The hiring of two additional juvenile justice officers would bring KRYF into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- a) Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- b) Reduced room confinement and isolation of youth.;
- c) Decreased idle hours for youth;
- d) Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts:
- e)Decreased need for non-permanent employees and overtime hours by existing staff;
- f) Increased ability to conduct school and other activities according to schedule;
- g) Decreased incidence of resident misconduct and assault, and staff sick leave.
- h) Decrease staff concern for personal safety;
- i) Increase partnerships with agencies that can benefit juveniles and victims, such as victim-offender mediation.

1004 Gen Fund (UGF) 4.2 FY2009 General Funds Required Due to Elimination of ProShare funding  This increment replaces federal funding with general funds of	Inc	17.6	0.0	0.0	0.0	0.0	0.0	17.6	0.0	0	0	0

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching general funds (GF) through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

Trans Total Personal Capital Outlay | Type Expenditure Services Travel Services Commodities Grants Misc PFT PPT Juvenile Justice (continued) Ketchikan Regional Youth Facility (continued) FY2009 General Funds Required Due to Elimination of ProShare funding (continued) In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law, and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board. The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money. Juvenile Justice began utilizing ProShare funds in late FY04. Medical costs that would normally have been paid directly to a provider for medical needs were submitted to Providence Hospital for payment. These medical needs included everything from prescriptions, psychiatric evaluations, dental work, to any necessary surgeries or hospital stays. The divison is required by Alaska statute to provide necessary medical services to clients that are housed in our Juvenile Justice facilities (AS 47.12.150, AS 47.14.020). With the elimination of the ProShare funding for Juvenile Justice, these funds are necessary to provide the division the funding needed to continue these services. Performance Measures Affected: Dept-Core Services -- Manage health care coverage for Alaskans in need Dept-Core Services -- Protect and promote the health of Alaskans Dept-D-4--Provide quality management of health care coverage services providers and clients HCS-A--Mitigate service reductions by replacing general funds with alternate funds HCS-B--Provide affordable access to quality health care services to eligible Alaskans DPH-A--Healthy people in healthy communities DPH-A-A4--Assure access to early preventative services and quality health care 1004 Gen Fund (UGF) 17.6 70.0 63.3 0.0 6.7 0.0 0.0 0.0 0.0 1 0 FY2009 Front-Line Staffing for Ketchikan Regional Youth Inc Facility, Year 2 of Division Plan The Division of Juvenile Justice is requesting an increment in the amount of \$70.0 to adequately staff the

The Division of Juvenile Justice is requesting an increment in the amount of \$70.0 to adequately staff the Ketchikan Regional Youth Facility (KRYF). This facility is in need of one more Juvenile Justice Officer position to provide the minimum staffing required to meet national practice standards for monitoring youth, ensuring the security and safety of residents and staff. In FY08, the division requested and received one of the needed positions. This will be the final position needed to bring the facility to full staffing levels.

This request is in keeping with the division's commitment to base decisions on resource needs on recommended practices and data based evidence. Using guidelines from the National Institute of Corrections, the division determined that this final position is needed to meet its minimal needs to assure the safety and security of residents and staff. Indeed, a number of challenges faced by the facility can be directly attributed to less than adequate staffing:

~ The lower staff-resident ratio limits effective interactions with youth. The facility consists of two units, a detention unit where youth are brought while awaiting a court appearance for an offense; and a crisis stabilization Unit, where youth are held in a non-secure setting to deal with mental health and other crisis needs. The crisis

#### Juvenile Justice (continued) Ketchikan Regional Youth Facility (continued)

FY2009 Front-Line Staffing for Ketchikan Regional Youth Facility, Year 2 of Division Plan (continued)

stabilization unit requires staff to spend a significant amount of time lining up services for youth and helping them access these services. Short staffing requires staff to forego many of these meetings or treatment related skill-building activities to stay behind at the facility to assure minimum safety and security.

- ~ The lower staff-resident ratio increases the likelihood that residents will harm themselves. With fewer staff to monitor and engage youth, the frequency and length of time that they are confined to their rooms is increased. When youth must be confined to their rooms, they still must be checked at a minimum of 15-minute intervals, and more frequently if they have expressed suicidal thoughts. At current staffing levels KRYF would be able to provide these room checks but unable to conduct any additional treatment programming or activities. This past year, employees on the crisis stabilization unit routinely were needed to assist staff in the Detention Unit, creating situations where youth in the crisis stabilization were unsupervised by direct contact for lengths of time, which increased the risk of harm or undetected misconduct.
- ~ The lower staff-resident ratio increases the need for non-permanent employees and overtime hours. In FY07, The Ketchikan Regional Youth Facility utilized more than 3,700 hours of work from non-permanent employees or overtime. A portion of these hours were incurred to make up for the lack of permanent direct line staff.
- ~ The lower staff-resident ratio at Ketchikan Regional Youth Facility decreases the consistency of services youth receive. The potential of new community partnerships, such as for community work service projects and victim-offender mediation has been limited due to the lack of staff at KRYF that can be made available to assist with the start up and implementation of these programs.

The hiring of this juvenile justice officer would bring the facility into line with Alaska's staff-resident ratio and would be expected to result in the following positive outcomes:

- ~ Increased interactions of staff with institutionalized youth, resulting in better outcomes and lower likelihood of recidivism;
- ~ Reduced room confinement and isolation of youth.;
- ~ Decreased idle hours for youth;
- ~ Increased ability to provide continuous, regular monitoring of youth at all shifts, decreasing the risk of suicide attempts;
- ~ Decreased need for non-permanent employees and overtime hours by existing staff;
- ~ Increased ability to conduct school and other activities according to schedule;
- ~ Decreased incidence of resident misconduct and assault, and staff sick leave.
- ~ Decrease staff concern for personal safety;
- ~ Increase partnerships with agencies that can benefit juveniles and victims, such as victim-offender mediation.

#### Performance Measures:

This increment request pertains to Department Measure E, Outcome State #5 (Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety). Targets 1 and 2 state: 1) Reduce percentage of juvenile who re-offend following release from institutional treatment facilities to less than the year before; and 2) Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than the prior year.

FY2016 AMD: Reprogram Ketch a Dually Diagnosed Treatment F		FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

The Division of Juvenile Justice will reprogram the Ketchikan Regional Youth Facility from a detention facility to a residential facility that provides substance abuse treatment to dually diagnosed (mental health and substance abuse) youth. By changing the purpose of the facility, the division will become a Medicaid provider and be reimbursed for the services provided to youth. The facility will serve up to ten youth at any given time.

The Ketchikan Regional Youth Facility currently is budgeted with \$1,946.4 of general fund authority; \$28.5 of I/A receipt authority; and, \$2.0 of federal authority. By reprogramming the facility, \$998.0 of the general fund authority and the \$2.0 of federal authority would be changed to I/A receipt authority. (Another \$100.0 of the general fund authority will be moved to the Johnson Youth Center component to account for the additional client travel that would be incurred by requiring the detention youth be housed at the Johnson Youth Center in Juneau rather than in Ketchikan.)

Staff at the Ketchikan Regional Youth Facility would require additional training in order to provide effective substance abuse and mental health treatment services. It is anticipated that this initial training will cost approximately \$50.0. In addition, there will be a cost associated with remodeling the building to change it from a locked detention facility to a residential substance abuse treatment facility. It is anticipated that this will cost up to \$450.0 but will be a one-time cost. If needed, the division will plan to request supplemental funding if needed to cover these costs.

Regulation and statute changes may need to be made. The division needs the authority to become a Medicaid provider. This will be a high priority for the department.

Impacts to Reprogramming KRYF: Positive Impacts:

- The Johnson Youth Center could absorb the detention numbers as they've been over the past several years. It would require very little resources in terms of staffing, programming and clinical services. Routines at the Johnson Youth Center would basically stay the same. Juneau has an eight-bed detention wing that also has two observation rooms that could be utilized as detention beds if needed.

- Statewide, probation staff will have another treatment referral resource in their tool belt.
- The State of Alaska retains control of the facility with the hope of better outcomes for dually diagnosed youth that are referred to the Ketchikan facility.

The mission of the Division of Juvenile Justice (DJJ) is to address juvenile crime by promoting accountability, public safety and skill development.

Juvenile Probation Officers (JPOs) are responsible for:

- ' Receiving and reviewing police reports involving an offense by a juvenile;
- Determining an appropriate course of action for a youth, which could include counseling with parents, referral to a youth court or other diversion program, or pursuing formal court proceedings. Probation officers base such decisions on a variety of factors, such as the seriousness of the offense, age at time of offense, the youth's offense history, and the ability to manage the issue without formal court processing.
- ' Assisting the youth and family in how to work with the State's public safety, court, and legal systems;
- ' Contacting victims, involving them in the justice process and determining restitution;
- ' Monitoring juvenile offenders to ensure they are held accountable and that the public is safe;
- Partnering with families, local agencies, and organizations to involve juvenile offenders in developing skills and

Juvenile Justice (continued) Probation Services (continued)												
FY2007 Public Safety and Security Through Offender	Inc	933.3	578.1	100.0	222.2	33.0	0.0	0.0	0.0	0	0	0

Juvenile Probation Officers (JPOs) are one of the most important community-based resources deployed by DJJ to ensure that juvenile offenders are supervised, pay restitution, perform community work service and develop the skills required to reduce the likelihood of re-offense. JPOs review every single delinquency referral (report from law enforcement) and make critical pubic safety decisions and recommendations to the court. These positions are vital to the community as they are the first responders to juvenile law violations. Once a report is received from law enforcement, the JPOs ensure that responses are timely and appropriate to the level of seriousness of the offense. This request is critical to ensure continued public safety and security in both urban and rural Alaska. The increment will ensure an adequate and timely response to juvenile offenders who warrant active supervision and monitoring of their behavior in order to prevent repeat or more serious juvenile crime. The increment will avoid layoffs of up to eight juvenile probation officer positions in urban and rural communities statewide. If this request is not funded, the resulting fewer number of JPOs will result in the inability to continue the following services:

- ~Intake investigation and outcome
- ~Formal assessment of youth level of risk and need
- ~Formal court processing, including reports and appearances in support of juvenile prosecution
- ~Supervision and monitoring of juvenile offenders in the community
- ~Supervision of community work service and restitution for youths on informal probation

Since FY01, several positions within the division have been paid for with federal Juvenile Incentive Block Grant (JABG) funds. At that time, the yearly federal award amounts were well over \$1 million dollars (\$1.6 million in FY01; \$1.3 million in FY02; \$1.0 million in FY03). In FY03, the division learned that the funding for the JABG grant was going to be greatly reduced. The division began active and aggressive efforts to begin transferring the funding of these positions to general fund in order to avoid significant service reductions in the urban and rural locations where the JPOs were located.

Over the past few years, DJJ has relied on a variety of approaches to pay for the services of Juvenile Probation Officers due to historically not having sufficient operating funds to cover total costs in the probation services component. Specifically, in FY03, DJJ imposed an agency wide hiring freeze for 4.5 months, including in secure 24-hour facilities. This enabled us to charge some of these personal service costs to general fund dollars.

In FY04 the division received a full year's worth of funding for the new Kenai Peninsula Youth Facility. But due to construction delays, it did not open until mid-year. The operating funds that were available due to the delayed opening were used to pay for probation officers and corresponding costs to youths in communities in the probation services component.

In FY06, in order to avoid significant service reductions or disruptions we are requiring that all of the new positions the division received in the FY06 budget in all components be kept vacant until January 1. As an added precaution, all other vacancies within the RDU, including in 24-hour facilities, are required to be held open for a minimum period of one month prior to posting the position. We are projecting that these measures will allow sufficient funding to be available to avoid a budget shortfall for this current fiscal year although this will be evaluated mid year and adjustments made to keep positions open longer, should this prove necessary.

But, once these new positions are filled, DJJ will need additional general fund dollars to maintain them in FY07.

FY2007 Bring the Kids Home (BTKH) Care Coordination	Inc	120.0	103.8	0.0	16.2	0.0	0.0	0.0	0.0	1	0	0

The Alaska Mental Health Trust initiated four work groups the end of FY04 to inform the Trust's FY06 Budget Planning Process. One work group, comprised of multiple stakeholders across Alaska, was formed to address the significant problem of so many Alaskan youth being sent out-of-state to receive residential psychiatric services. This began the initiative now called "Bring The Kids Home" in which the Department of Health and Social Services is a major partner along with the Alaska planning boards, parent advocacy groups, behavioral health provider agencies and others.

The multi-year plan (FY06-FY12) has identified seven outcomes that are being tracked and monitored: They are:

- 1. Client Shift. Reduction in the total number of seriously emotionally disturbed (SED) children/youth being sent out of state by 90% by FY12 (15% per year).
- 2. Funding Shift. 90% reduction in Medicaid/GF match dollars from out of state services to SED children/youth with corresponding increase in Medicaid/GF match dollars in in-state services by FY12 (15% per year).
- 3. Length of Stay. Reduction in the average length of stay in in-state and out-of-state institutions by 50% by FY12 (8% per year).
- 4. Service Capacity. Increase in the number of beds/slots in home and community based services in communities or regions of meaningful ties by 60% by FY12 (10% per year).
- 5. Effectiveness. Decrease in number of children/youth returning to residential care by 75% by FY12. Defined as youth/child returning within one year to the same (or higher) level of residential care (recidivism measure). This is to reduced by 12.5 per year.
- 6. Client Satisfaction. Via annual reporting, 85% of kids and families report satisfaction with services received.
- 7. Functional Improvement. 85% of children and youth show functional improvement in one or more life domain areas at discharge and one year after discharge.

Through the Bring The Kids Home collaboration, a master-planning document was developed which identified a number of strategies to further build the continuum of care in Alaska for youth experiencing severe emotional disturbances and their families. One of the eight strategies outlined in this comprehensive plan is related to

Social Services Program Coordinator's duties will be focused on participating in the review for youth seeking out-of-state placement. Again, given the extreme proportion and high number of youth in parental custody currently in out-of-state residential psychiatric treatment, these positions are necessary to expand this system for "custody" youth to "non-custody" youth. Both positions are critical to meeting Strategy #7 which is to implement

networks or systems to divert youth from residential psychiatric treatment centers.

Juvenile Justice												

The Division of Juvenile Justice (DJJ) needs a Quality Assurance Unit to ensure that the recently implemented system initiatives are managed appropriately and are achieving the desired outcomes of improved offender outcomes and community safety. This increment request includes funding for one Research Analyst IV position (range 21). This position will be located in Juneau and will report to the single statewide DJJ Quality Assurance Program Coordinator.

The Division of Juvenile Justice (DJJ) has spent the past few years investing in significant system improvements. These changes have been focused on increasing our ability to use objective data to assist in making critical public safety decisions throughout all facets of the juvenile justice service system. Examples of initiatives that have been implemented in the past few years include:

- Adoption of an objective, data-driven gate-keeping method to guide the use of costly, secure detention resources to ensure that these are reserved for juveniles posing a risk to the community.
- Adoption of an updated risk/need assessment and re-assessment tool to ensure the most appropriate use of probation and institutional resources as well as partner agency resources (i.e., Department of Law, court system, public defender agency, etc.)
- Implementation of a performance-based standards (PbS) approach to best practice for all eight juvenile justice facilities in the state.
- Implementation of Aggression Replacement Therapy (ART), which is a skills training class that produces positive outcomes for youth and reduces their rate of re-offense in the juvenile system.

Basing policies and practices on data-driven and "proven" methods is the right thing to do. Research-based tools and approaches increase the likelihood that youths will succeed by planning interventions based on thorough

FY2008 AMD: Quality Assurance Unit for the Division of Juvenile Justice (continued)

assessments and data. Facility programming based on nationally developed and recognized performance standards (PbS) will increase our attention to any identified deficit areas and ensure that these are addressed in a timely and ongoing manner.

These improvements are investments in our state's future, with the desired long-term effect of improving outcomes for juveniles so that they do not commit new crimes, either as a young person or as an adult. This results in safer and healthier communities. Ultimately, reducing re-offense rates results in long-term savings to the state in many ways, including reduced crime and its accompanying costs and increased productivity from law-abiding and contributing young adults.

Implementation of research-based practices requires rigorous attention to details in order to ensure that the desired outcomes are achieved. The success of system improvements and initiatives relies on attention to ongoing quality assurance throughout the system.

Improvement processes typically involve a three-step process to produce verifiable results and continue the cycle of improvement: 1.) Measure; 2.) Review; and 3.) Improve. (And repeat.)

DJJ is incorporating this process into all facets of the changes it is making to the juvenile justice system; we are committed to sustainability of the initiatives and improvements we have implemented. However, we have significant concerns about the agency's ability to sustain these efforts without new resources that will focus exclusively on the issue of quality and oversight of operations.

The majority of juvenile justice systems nationally have internal capacity for program and quality assurance review and improvement. Based on a recent inquiry, we found that Alaska is among the minority by not having this type of agency capability. Many juvenile justice jurisdictions implement system improvements based on a required mandate due to seriously deficient conditions of confinement in their facilities or lawsuits regarding various other system problems. Alaska's system has not had these "crises". Rather, the agency has approached the issue of improvement from a position of strength and ongoing attention to detail. This is a much more desirable approach to continuing to ensure that quality services are delivered and state liability is reduced, versus waiting for something to be identified by an external entity as "broken".

The increment will enhance public safety by investing in the ability to review ongoing information, both case specific and system wide, that will then be used to implement an agency-wide quality assurance process. DJJ will use this investment to ensure that communities and victims are safe and juvenile offenders are provided opportunities to succeed.

#### Performance Measures:

Department Measure E, Outcome Statement #5: Improve juvenile offenders' success in the community following completion of services resulting in higher levels of accountability and public safety.

Target 1: Reduce percentage of juveniles who re-offend following release from institutional treatment facilities to less than 40% of the total.

Target 2: Reduce percentage of juveniles who re-offend following completion of formal court-ordered probation supervision to less than 20% of the total.

Performance-based Standards. Their lack of funding has	forced them t	to raise the cost to	their clients. In	FY08,								

The Council of Juvenile Correctional Administrators (CJCA) is no longer receiving federal funding to help support Performance-based Standards. Their lack of funding has forced them to raise the cost to their clients. In FY08, the increased cost to the division will be covered with federal funding. For FY09 and beyond, because the JABG funding is not guaranteed, this increment in general funds is needed to cover the increased cost to the division.

The Council of Juvenile Correctional Administrators (CJCA) is the only national organization focused exclusively on the improvement of juvenile justice services inside facilities (as opposed to adult corrections), promotion of best practices and adoption of Performance-based Standards (PbS) to promote these best practices in juvenile justice. CJCA developed PbS with the help and funding of the federal Office of Juvenile Justice and Delinquency Prevention and is the only agency that administers the PbS project in the nation.

CJCA provides the division with continued on-site training and implementation of PbS for all eight of Alaska's juvenile facilities and provides ongoing technical assistance to all sites as our facilities progress through the performance levels. CJCA will also visit each of Alaska's facilities to provide feedback and monitoring to ensure continued integration of these standards. PbS provides an ongoing quality assurance process that emphasizes performance and attainment of measurable goals within juvenile institutions. The performance standards focus on outcome measures in key areas of juvenile justice, including safety, order, security, health, programming, justice and reintegration. The PbS process is dynamic and is based upon sound data collection processes including information from records, reports and staff and resident interviews.

Participation in this national continuous self-improvement process allows for the PbS consultants and division staff

The Department of Health and Social Services, Division of	Juvenile Just	ice, is requestin	g a budget amend	lment in								
the amount of \$600,000 in general funds to replace federal				Case								
Management billings. The Division has also requested an i	FY08 supplei	mental funding f	or this amount.									

In the Fall of 2006 (when the FY08 budget was developed), billing for Targeted Case Management was a viable option for the division. The division requested and received a decrement to general funds for the FY08 budget and beyond. During FY07, the division worked to get billing processes in place for these services. In November 2007, the division was made aware of the possible ruling and so did not bill for services beyond August 2007.

The Division will not bill for Targeted Case Management services due to the recent federal ruling that disallows the

ability to bill for these services. See Federal Register/Volume 72, No 232, dated December 4, 2007.

Associate I/II position (PCN 06-#517) in the Valdez office.

The Division of Juvenile Justice recognizes the critical importance of effective transition and aftercare services for youth who have been placed by the court in long-term institutional treatment programs. This program component is essential in our efforts to reduce recidivism by preparing youth to leave secure confinement and adapt successfully to their communities. To effectively carry out this effort, in each of our communities with long-term institutional treatment programs except Bethel, a Juvenile Probation Officer carries this specialized caseload. Two years ago, due to budget constraints, the Aftercare Probation Officer position in Bethel was eliminated. The remaining probation officers attempted to meet this need to the best of their ability, but there has been a marked decrease in our ability to meet the transition and aftercare needs of the region's most serious and/or repetitive offenders.

As part of a department-wide effort to improve services for families dealing with delinquency, the division is proposing the addition of a Mental Health Clinician for the Anchorage Region Probation Office. This clinician would be specifically trained on the Brief Strategic Family Therapy model and work with Juvenile Justice clients and their families to ensure that youth are returning to a healthy, functional family, thus reducing the possibility of

at Anchorage Juvenile Probation receives, investigates, and resolves approximately 2,000 law enforcement referrals each year. The majority of these cases are diverted successfully from deeper penetration into the juvenile justice system because of the work that has been done through this unit. The positions funded through the

State/Municipality collaboration impacted this effort in the following ways:

#### **Juvenile Justice (continued)** Probation Services (continued)

FY2011 Replace Statutorily Designated Program Receipts from Municipality of Anchorage (continued)

> Before the addition of the three officers, the division was unable to respond to cases in a timely fashion. The Intake Unit was simply overwhelmed with referrals. The first-time offenders or those committing minor misdemeanors were often not handled for weeks or until they reoffended with a more serious crime. With the additional officers, juvenile offenders are usually seen at the Intake Unit within a week of their offense. In addition, no legally sufficient behaviors within our scope are overlooked; all offenders are being held accountable more rapidly than before.

> Anchorage is the only city in the state where juvenile probation officers (JPOs) are available seven days a week. Thanks to the addition of the three officers, parents can arrange appointments at more convenient times, which also increases the likelihood of providing a rapid response. The JPOs are also available to provide information to parents, quardians, agencies and the police seven days a week, which enables people to implement immediate interventions. Quicker interventions are preventative and reduce recidivism. The diversion staff also offers "courtesy visits" to parents with problem juveniles when requested. These meetings are strictly preventative, occurring before the juvenile does any delinquent acts. Without the three officers, we would not have the time to supply this service. With the advent of community policing, Anchorage Police Department officers also attend these meetings, which makes the visit even more effective in changing the juvenile's behavior.

With the diversion officers, juveniles who are referred to diversion programs do not escape consequences if they are non-compliant. In other parts of the state, juveniles who do not comply with the youth court requirements/consequences may simply have their cases closed. Here in Anchorage, those juveniles return to the JPO and are still required to fulfill their consequences.

If this program is not replaced with general fund receipts these services will no longer be provided in the Anchorage community. This has been a very successful preventative practice that the division has been involved in for several years.

Labor for the Workforce Investment Act Grant

FY2011 Reflect Reimbursable Service Agreement from Dept of

Reflect the reimbursable service agreement from the Department of Labor and Workforce Development for the Workforce Investment Act grant the division has received for the past several years. This authority will eliminate the need for an unbudgeted RSA each year.

Inc

150.0

The Workforce Investment Act (WIA) reimbursable service agreement provides the division with resources to prepare youth in the juvenile justice system with job skills so once they leave secure facilities so that they have the tools to obtain and maintain employment. Currently, the funds are being used to support a culinary arts program at the Johnson Youth Center in Juneau which includes a job readiness section (job search, interview practice and resume writing). WIA funds also support the staff from the Nome Boys and Girls Club to visit the Nome Youth Facility to conduct three programs including Job Ready (youth also visit the Alaska Job Center Network office). Passport to Manhood, and Power Hour to assist youth in completing their education requirements.

The expected outcome is to reduce recidivism of youth leaving our institutional treatment facilities. 1007 I/A Rcpts (Other) 150.0

FY2016 AMD: Delete Probation Staff (06-3479, 06-3301, 06-3780, 06-3653, 06-4988, 06-N07061)	Dec	-482.4	-482.4	0.0	0.0	0.0	0.0	0.0	0.0	-5	0	-1

The Division of Juvenile Justice will delete five full-time positions and one long-term non-perm position from the Probation Services component. The five positions being proposed are: full-time range 13 Fairbanks Juvenile Probation Officer (06-3780), full-time range 14 Homer Juvenile Probation Officer (06-3301), full-time range 16 Anchorage Juvenile Probation Officer (06-3653 and 06-4988), full-time range 12 Ketchikan Social Services Associate (06-3479) and long-term non-perm range 12 Fairbanks College Intern (06-N07061). The impact of giving up each of these positions is described below:

Full-Time Range 16 Fairbanks Juvenile Probation Officer (06-3780):

Deleting this position in the Fairbanks Probation office increases the caseloads for other probation officers and decrease community and school involvement by the probation staff.

Full-Time Range 14 Homer Juvenile Probation Officer (06-3301):

Deleting the position in Homer will mean closing the Homer office. This will have a direct impact on the Kenai office's workload. The Kenai probation staffs are able to absorb the additional cases, but there will be increased travel to Homer to work with the youth in that area. And, because there will no longer be a full-time probation

Juvenile Justice Health Care FY2018 Inc/Dec Pair: Transfer from Ketchikan Regional Yout Facility for Increased Medical Costs The division is statutorily required to provide necessar		349.2 s to clients who a	0.0	0.0	0.0	0.0	0.0	349.2	0.0	0	0	C

The division is statutorily required to provide necessary medical services to clients who are housed in juvenile justice facilities (AS 47.12.150, AS 47.14.020). Transferring to the Juvenile Justice Health Care component covers anticipated medical costs. Projecting necessary medical service costs is challenging as the health care needs of individual youth vary from year to year and are unpredictable.

Trans

Total

In FY2015, the division spent \$300.0 more in medical costs than was anticipated. In FY2016, the division received \$300.0 in supplemental authority to cover medical costs and expects the trend of increased health care costs to continue.

The Alaska Temporary Assistance Program (ATAP) provides cash assistance and work services to low income families with children to help with their basic needs while they work toward self-sufficiency. The general funds of this component are used primarily to satisfy the Maintenance of Effort (MOE) requirement for the receipt of the Temporary Assistance for Needy Families block grant. A reduction to the general funds in this component has a potential impact to the state's ability to satisfy the MOE requirement, and risks associated with this reduction are potential supplemental requests in the event the caseload and benefits amounts increase. This reduction represents a portion of the projected lapse of authority due to current caseload and program projections.

The ATAP program serves an average of 3,119 recipients monthly. The lifetime benefit to an eligible recipient is 60 months (unless exempted from the lifetime limit due to living in exempted native villages or for child only cases). Cash assistance is dependent upon the family size, income and shelter expenses. The types of benefits provided to eligible recipients include rental assistance, child care, transportation costs, vehicle repairs, clothing for job interviews and grooming, special tools for employment and wage supplementation, to list a few. The intent of the program is to provide cash assistance to families to aid them in obtaining employment to support their families.

The maximum allowable payment under the program per month is \$1,229 for a household of six. Many of the

The Adult Public Assistance Program was established with the mandate to provide income support for needy elderly, blind and disabled persons. APA benefits serve as a supplement to federal Supplementary Security Income (SSI) and allow the individual to meet basic needs and to remain independent in the community. APA also provides Interim Assistance (IA), a state funded cash benefit of \$280 per month for SSI applicants waiting for a disability determination. People who receive APA financial assistance are over 64 years of age or experience severe and long-term disabilities that impose mental or physical limitations on their day-to-day functioning. Certain income and asset eligibility standards apply.

The FY2006 APA formula projection is 16,735 APA cases receiving cash assistance each month at an average supplemental payment of \$288 per case. The projected APA annual rate of caseload increase is 2.1% in FY2005 and 3.4% in FY2006.

FY2004 and FY2005 actions that helped reduce the rate of APA expenditure growth include the following:

- 1. Secondary medical review to the Interim Assistance (IA) application process. Implemented in FY04, this policy change resulted in the opening of fewer IA cases with only those applicants likely to be found disabled and eligible for SSI receiving IA. It reduced IA program expenditures by decreasing the number of persons on IA who subsequently do not qualify for SSI.
- 2. New benefit start for APA cash benefits. This change aligned the APA benefit start date with the date an APA applicant is notified by the Social Security Administration that Social Security benefits have been approved, or the date the Division is notified by the DDS of a state-only disability determination. While applicants may still qualify for retroactive Medicaid back to the date of the initial APA application, they no longer qualify for a retroactive APA cash benefit.
  - 3. New APA payment level for APA recipients residing in assisted living homes. Individuals living in

FY2016 AMD: Reduce Excess Authorization in Adult Public Assistance	Dec	-2,372.4	0.0	0.0	0.0	0.0	0.0	-2,372.4	0.0	0	0	0

The Adult Public Assistance program provides cash assistance to needy, aged, blind and disabled Alaskans to help them remain independent. This component is made up primarily of general funds. Projected caseload and expenditures for FY2016 reflect there will be a lapse of approximately \$6,724.0. Risks associated with this reduction are potential supplemental requests in the event the caseload and benefits amounts increase.

The Adult Public Assistance program serves an average of 18,730 recipients monthly. 13,019 of those recipients are the disabled, 54 are blind and 5,657 are in the old age subtype. A person must be 65 years or older to be eligible if they are not disabled, and persons who are blind or disabled must be at least 18. Many of the recipients of this program are also eligible and receiving assistance from other programs in the division. On average 35 percent of recipients are also receiving Supplemental Nutrition Assistance Program benefits and the recipients of this program are eligible for Medicaid benefits.

Payment levels range from \$200 to \$1,628 per month based on household type and income. Recipients receiving Social Security Income can be eligible for this program as well and make up over 58 percent of the total cases. Payment levels for SSI recipients range from \$30 to \$1,100 per month depending on household types. Household types include:

- Individuals living independently
- Couples both eligible living independently
- Couples, one eligible, living independently
- Individual living in another person's household
- Couple, both eligible, living in another person's household
- Individuals in assisted living home
- Couple, both eligible, in assisted living home
- Couple, one eligible, living in assisted living home
- Nursing home, personal needs

Temporary Assistance Program To Child Care Benefits

While Alaska's TANF caseload has been decreasing, the number of low-income families needing PASS II/III child care subsidy has increased. Child care assistance for families transitioning from public assistance can often make the difference between unemployment and a return to public assistance, and employment leading to self-sufficiency. This transfers a portion of the Alaska Temporary Assistance Program (ATAP) payments savings to Child Care Benefits to meet the demand for child care for low-income working families.

Eligibility determinations for the Child Care Assistance Program are provided throughout the state by local community grantees. The current funding methodology used to fund grantees for this service is inconsistent. The department plans to implement a uniform method to equalize funding inconsistencies, by establishing unit cost rates for this service. Implementation of the unit cost method will occur over three years and be fully implemented in fiscal year 2010, to minimize the negative fiscal impact on grantees that are currently funded at a higher than average rate.

In fiscal year 2008 this increment increases grants to grantees that are funded below the targeted unit cost. In fiscal year 2009 the department will decrease grants to grantees funded above the targeted unit cost. By fiscal year 2010 all grantees will be brought to a uniform level using the unit cost method and applying geographical differential where appropriate. The estimated net cost of this initiative over three years is \$477,946.

Mission and Measures: A unit cost method for the Child Care Assistance Program's eligibility determination

FY2017 AMD: Decrease Burial Assistance Program Through Reform and Efficiencies	Dec	-1,700.0	0.0	0.0	0.0	0.0	0.0	-1,700.0	0.0	0	0	0

General Relief Assistance is financial assistance for a needy person for burials, temporary relief and discretionary assistance to include food, shelter, fuel, clothing, utilities, transportation, medical needs (including, but not limited to hospitalization, nursing, and convalescent care) and other determined needs per AS 47.25.120 -- 47.25.300.

The limits of the general relief benefit are based on the extent of the specific need and the availability of the program funds. Payment for General Relief benefits may only be paid to a vendor or provider and are never made to the recipient.

The majority of the benefit payments for this program, 93% of the total costs in FY2015, are for burial assistance. The Division of Public Assistance provided for 996 burials in FY2015. The existing regulations under 7 AAC 47.130 require the department to pay a vendor for basic funeral and burial services at rates published in the vendors general price list, up to a maximum of \$1,250 to each vendor for each deceased person.

The regulations also allow for additional funeral and burial services deemed necessary to cover the costs of the burial plot; cremation if requested; opening and closing a grave; oversized casket costs, clothing and storage as a result of extraordinary circumstances when prior authorization is obtained; and transportation of the deceased at the request of a next-of-kin. It is under this part of the regulation where the division has the majority of expenditures resulting in an overall increased cost in burial expenses being paid.

Existing regulatory language requires the department to review the maximum payment level for basic funeral and burial services every three years for section 7 AAC 47.130 (a). In addition, regulations are needed to ensure that if budget reductions are made more immediately (i.e. less than the 3 year cycle), benefit reductions can occur to reflect this change. The division will also be pursuing regulation changes that will allow for more increased programmatic oversight and controls to administer the program by reducing costs for funeral and burial services being paid under section 7 AAC 47.130 (b).

This funding in this component provides for grants to tribal entities who administer the Temporary Assistance for Needy Families (TANF) program and provide cash assistance and work services to low income families with children to help with their basic needs while they work toward self-sufficiency.

The general funds of this component are used primarily to satisfy the Maintenance of Effort (MOE) requirement for the receipt of the TANF block grant, through the grant funding to the tribes. A reduction to the general funds in this component has a potential impact to the state's ability to satisfy the MOE requirement. This reduction represents the projected lapse of authority due to current grant awards and program spending by the grantees. The potential impact to the grantees is if caseloads were to increase the administrative capacity would be insufficient to effectively run the program. The division would need to evaluate each grantee individually to determine if additional reductions could be made or if reallocation of existing funds is needed.

The Native Family Assistance Program grantees also receive funding directly from the federal government in the form of a Tribal Family Assistance Grant. The state funding supplements the federal funds and is used by grantees to pay benefits directly to eligible Native families to assist them in moving to self-sufficiency through employment. Resources are allocated based on the projections of how much the division would expend in Temporary Assistance benefits for the service population covered by each Native Family Assistance Program. As caseloads decrease, so does the projected expenditure and award totals for these grantees. Caseloads have decreased by 3 percent annually in FY2013 and FY2014 and are currently reflecting a decrease in FY2015 of 5

The target population includes all families within the service area defined by the boundaries of each of the Alaska Native Regional Non-Profit Corporations responsible for the administration of the program. In some areas, the

This FY2006 decrement adjusts PFD Hold Harmless (PFDHH) component funding to projected formula need. The PFD Hold Harmless provides replacement funding for the loss of benefits due to client ineligibility or benefit reduction in the Alaska Temporary Assistance Program (ATAP), Food Stamps, Supplementary Security Income (SSI), or Medicaid programs due to the receipt of the Alaska Permanent Fund Dividend.

The PFD Hold Harmless program is established in law as AS 43.34.075. The language establishing the hold harmless program was part of the legislation that enabled the initial 1982 dividend distribution, and continues as the statutory basis of the dividend and hold harmless programs.

The decrease in PFDHH represents the net reduction in public assistance formula caseloads. It also reflects a

Attached are budget documents related to the Energy Assistance Program appropriations, the grand total of which equals \$36,746,200.

The three numbers appearing in the legislation are:

- e \$21,125,900 in DPA's numbers section under Energy Assistance Program (\$5,036,500 GF, \$16,089,000 FF)
- e \$10,620,300 in Language Section 15(a), (all GF)
- e \$ 5,000,000 in Language Section 15(b), (all GF)

Total by Fund Source:

- e \$20,656,800 GF
- e \$16,089,400 FF

DPA currently estimates the program may need an additional \$11,150,300 in GF for a total need of \$47,896,500 for FY2013.

FY2016 AMD: Reduce Energy Assistance Program Commensurate with Declining Caseload	Dec	-3,500.0	0.0	0.0	0.0	0.0	0.0	-3,500.0	0.0	0	0	0

A \$3.5 million portion of the DHSS unallocated \$4.8 million reduction is spread to this component.

This reduction to the Alaska Heating Assistance Program can be absorbed without an impact to the program due to the declining caseloads over the past several years. The Energy Assistance Component is funded with federal funds from the Low Income Heating Assistance Program funding (LIHEAP) and with state general funds. The federal funding levels have historically been insufficient to fully fund the program and have been supplemented with general funds, a part of which comprises the Alaska Affordable Heating Program (AKAHP).

- In 2011 we served 12,114 LIHEAP households and 2,509 AKAHP households
- In 2012 we served 10,798 LIHEAP households and 2,234 AKAHP households
- In 2013 we served 11,449 LIHEAP households and 2,304 AKAHP households
- In 2014 we served 10,416 LIHEAP households and 1,992 AKAHP households

Per federal regulations, program administers have been charged with serving the most vulnerable residents. Per state regulations, an applicant must have a minimum out-of-pocket cost for heat of \$200 or more to qualify.

In FFY2014 there were 1,987 AKAHP cases with a total expenditure of \$1,163.7. The majority of this reduction will impact the LIHEAP program benefits. The State award for LIHEAP is not sufficient to fully fund the program,

Substance Abuse Prevention/Intervention - Statewide Multi-media Education Campaign

This project is to develop broad, diverse and comprehensive multi-media campaign aimed at children, youth and parents and the public to involve all Alaskans in recognizing the damage alcohol causes. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Reach Out Now

Utilizing materials developed for this national model, will provide community grants to agencies working with their community's school programs. Program will focus on a school-based educational approach, with trained agency staff providing information, and then developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free Training and leadership for young people who might be experiencing peer pressure to drink. Community grants to youth organizations who would like to partner with the state to increase public awareness of this issue and mobilize action to decrease early on-set drinking and utilize youth as leaders/mentors among their peers. TANF share of project financing is \$500.0.

Behavioral Health RDU AK Fetal Alcohol Syndrome Program component

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free The TANF funded part of this project will fund Community Based Prevention and Service Improvement. This project will fund community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD. TANF share of project financing is \$500.0.

Boards and Commissions RDU Gov's Advisory Council on Faith-Based and Community Initiatives component Creation of Faith Based and Community Initiative Council

Establishing the Governor's Advisory Council on Faith-Based and Community Initiatives and the Office of Faith Based and Community Initiatives in the Department of Health and Social Services will jointly serve to facilitate communication and collaboration between faith-based and community-based organizations and government agencies in order to address gaps in Alaska's work force and health and social services systems. TANF share of project financing is \$105.0.

Public Assistance RDU PA Administration component

Other Federal TANF funded services and initiatives promoting self-sufficiency and client services within the parameters eligible for TANF funding. While Alaska's TANF caseload has been decreasing the number of extremely low-income working families needing Child Care Assistance, PASS II/III has increased. The TANF share of project financing for additional Child Care Assistance is \$595.0.

FY2006 Reduce expenditures for Federal TANF High Performance Bonus Funded Projects (continued)

In October 2004, the Dept. of Health & Social Services, Division of Public Assistance (DPA) was awarded a federal TANF High Performance Bonus of \$3.18 million. DPA received this bonus payment for its exceptional performance in federal fiscal year 2003 in moving welfare recipients from public assistance to the workforce. Alaska received the maximum bonus allowed for ranking highly in the nation in 2003 for the "job entry" category - the percent of people placed in jobs. Alaska also received bonus funds for offering services to families so they can have affordable, quality child care.

The following represents the Department's proposed spending plan for investing the federal TANF performance bonus funds:

Public Health RDU Women Children and Family Health component

Statutory Rape Reduction Project

The Division of Public Health undertook a statewide campaign to reduce the incidence of sexual assault of young girls through a campaign funded in part by Division of Public Assistance, Temporary Assistance to Needy Families (TANF) in FY02 and FY03. These requested funds will continue upon that campaign. TANF share of project financing is \$480.0.

Behavioral Health RDU Behavioral Health Grants component

Substance Abuse Prevention/Intervention - Statewide Multi-media Education Campaign

This project is to develop broad, diverse and comprehensive multi-media campaign aimed at children, youth and parents and the public to involve all Alaskans in recognizing the damage alcohol causes. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Reach Out Now

Utilizing materials developed for this national model, will provide community grants to agencies working with their community's school programs. Program will focus on a school-based educational approach, with trained agency staff providing information, and then developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free Training and leadership for young people who might be experiencing peer pressure to drink. Community grants to youth organizations who would like to partner with the state to increase public awareness of this issue and mobilize action to decrease early on-set drinking and utilize youth as leaders/mentors among their peers. TANF share of project financing is \$500.0.

Quality Workforce: On-going formula Medicaid casework requires adjusting allocations of GF Match to leverage available federal funding (\$118.6 GFM). FY05 funding transfers to directly finance Medicaid eligibility casework in the division did not include sufficient GF match to fund maintenance level work.

Intregrated Services Enhancements: The Tanana Chiefs Conference (TCC) operates the "Athabascan Self-Sufficiency Assistance Partnership" (ASAP), a Tribal Temporary Assistance for Needy Families (TANF) program. ASAP serves approximately 450 TANF-eligible families with cash benefits and employment assistance. Food Stamp participation by ASAP clients fluctuates between 51% and 64%, well below the average of 80% participation by recipients of the Alaska Temporary Assistance Program (ATAP). A significant factor in this disparity is the absence of a single-point of access to both Tribal TANF and Food Stamp services. While TCC serves TANF-eligible families with cash assistance and work services, the state of Alaska Division of Public Assistance (DPA) must provide eligibility determination and certification for food stamp benefits. Families are required to interface with two offices and eligibility systems, two caseworkers and must marshal double the effort to receive the nutrition supports for which they are eligible. DPA staff in turn carry large caseloads that include families served by the ASAP program. As such, these dual systems provide duplicative services at significant cost to the state and to needy families.

To address these barriers to food stamp participation experienced by ASAP families, DPA and TCC have proposed a four-year Food Stamp Demonstration Project in which TCC will administer a Tribal Food Stamp program for those families served by the ASAP program. While plans for the project have not been finalized, the federal Food and Nutrition Service (FNS), which administers the Food Stamp program, has expressed a strong interest in our project proposal. As a condition of authorizing the Food Stamp Demonstration Project, FNS is requiring that the project include an evaluation component. At a minimum, the evaluation must measure timeliness and accuracy of eligibility determinations, as well as administrative costs and program services compared to the existing

system.

This increment is needed to implement new Medicaid case eligibility and medical service review requirements mandated by federal "Payment Error Rate Measurement" (PERM) regulations.

Centers for Medicare and Medicaid Services (CMS) issued proposed regulations that require states to sample payments on Medicaid claims. CMS issued these regulations to meet requirements in the Improper Payments Act (IMPA) passed by Congress. CMS makes these regulations effective October 1, 2005. The regulations mandate a quality control review of payments to medical providers, including a review of the eligibility criteria, medical

FY2007 Expand Family Centered Services Phase II based on results/evaluation underway in Phase I	Inc	880.0	528.5	0.0	351.5	0.0	0.0	0.0	0.0	7	0	0

Phase I of Public Assistance's Family Centered Services (FCS) uses a "Customized Employment" (CE) model to serve 15 families in both Fairbanks and the Mat-Su Valley. DPA's Phase II proposal will expand FCS based on the results and evaluation currently underway for Phase I. We expect that project outcomes will improve the following Division outcome measures:

- A1. Increase the percentage of Temporary Assistance families who leave the program with earnings and do not return for 6 months
- A2. Increase the percentage of Temporary Assistance families with earnings
- A3. Increase the percentage of Temporary Assistance families meeting the federal participation rates.

Phase II will also introduce national best practices to improve service delivery and outcomes for families with complex issues and multiple barriers to self-sufficiency. Phase II builds on Phase I by adding the following elements:

Client Identification - Development and use of a universal screening tool for rapid identification of families appropriate for FCS.

FCS Expansion - In addition to Fairbanks & MatSu, Phase II extends FCS to Juneau, Kenai and the Muldoon Job Center. These sites directly correspond to where the CE model has been in place and proven effective in servicing seriously disabled clients.

Employer Partnership - Provide increased resources for Job Carving / Job Development and employer outreach in each community where FCS is implemented. Experience indicates that the work with employers is beyond both the current capacity and skill of the local teams, yet employer partnerships are critical links to successful long-term placements.

Dedicated FCS Team - Establish a dedicated multi-disciplinary, cross-agency team for the provision of FCS in the Anchorage service area, a community with high numbers of complex cases. This team would compromise of 3 Project Coordinators and 4 Project Assistants. This allows for a comparison of a dedicated work team versus the 'service coordination' approach in the current FCS model. Partners will include experienced staff or providers from Division of Public Assistance, Division of Behavioral Health, Division of Juvenile Justice, and Office of Children's Services, as well as Department of Education and Early Development, Department of Labor and Workforce Development (DOLWD) and community partners.

Women, Infants and Children FY2006 Increase Fed Authorization for WIC Food Program The Office of Children's Services requests an increme Children's (WIC) program of the division's Family Nuti necessary to cover an increase in the number of clien increase in the cost of the food and supplying the food	rition Services co ts who benefit fro	mponent. The add	ditional federal au	thority is	0.0	1,200.0	0.0	0.0	0.0	0	0	0

Currently the WIC food program provides nutritious foods to approximately 26,400 low income pregnant and breastfeeding women, and children each month. The division has seen a steady increase in the number of clients served over the past two fiscal years, and projects to serve over 27,500 clients per month in FY06. The increase in the number of women and children served with WIC food packets each month along with a revision to the food prescriptions available to clients have increased program costs. Over the past year, the division has seen a 12.9% increase in food packet costs. This increase is due in part to rising costs for dairy products, packing supplies, postage and fuel oil.

The division projects that it will meet FY06 participant and program needs including the rising cost of food and supplying the food packet with the increase in federal authority. The OCS anticipants WIC food expenditures will

Request an increase in Statutory Designated Program Receipts (SDPR) authority in order to allow for higher collections of manufacturer's rebates received for specific infant formula products in Women, Infant and Children (WIC) food packages. Federal Regulations require that infant formula rebate revenues be expended on WIC foods only.

The current Statutory Designated Program Receipts authority is inadequate to receive the anticipated level of rebates in FY09. Increases are the result of new contract terms that increase the percentage of rebate levels and change the size and form of several infant formula packages eligible for rebate. Simply, this translates into us receiving a higher rebate per item, as well as more items now being eligible to earn those rebates.

Without increased Statutory Designated Program Receipts, WIC will be unable to receive earnable levels of

rebates received for specific infant formula products.

FY2011 Replace Unrealizable Federal Receipts for Core Services	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

The department is requesting GF to fund core services. A previous federal grant request for \$1,207.0 was not funded. Sixty percent of the grant amount has been identified from other departmental resources, but this fund source change is needed to cover the remainder. Funding enables the Section of Health Planning and Infrastructure (HPI) to provide core department and state government services and provision and dissemination of data and policy analysis related to access to health care, health insurance coverage, utilization of services, health workforce and industry analysis that the department and other state entities must address. The component also provides state planning to advise the Commissioner on the need for new or remodeled health care facilities as required by the certificate of need statute (AS18.07). HPI responds to requests for information and analysis from the Governor's office, legislative offices, federal entities and congressional offices. HPI is tasked with managing the statutorily required Comprehensive Integrated Mental Health Plan on behalf of the department and the Alaska Mental Health Trust Authority.

Advising the Commissioner requires accomplishing due diligence with regard to both certificates of need and requests from health care providers for determinations of need, and with regard to exchange visitor primary

Repayment Extension												

The Alaska State Loan Repayment Program (SLRP) is a Health Resources and Services Administration (HRSA) sponsored effort to help encourage selected healthcare practitioners to work in Alaska. This is done by making

loan repayments on behalf of practitioners while they provide healthcare services in high-need areas. The current budget for practitioner LRPs is \$1,200,000, with 50% from HRSA, and the other 50% from "non-federal match," the later composed of \$400,000 from AMHTA, and \$200,000 from three community health centers.

FY2011 AMD: MH Trust Workforce - Grant 1383.03 Loan Repayment Extension (continued)

Considerable evidence nationwide indicates that healthcare practitioners are finishing their training programs with substantial educational debt. Further, many of these providers are quite willing to work in high-need areas and/or with high-need populations if state &/or federal agencies can help relieve this debt in return. Nationally, this workforce support-for-service strategy has been repeatedly shown to increase both recruitment and retention. The Alaska SLRP program startup was in September 2009, and is scheduled for one year. Of modest size, it will field 23 practitioners, across a broad spectrum of primary care occupations, with each practitioner working on a two-year service contract.

Reason for the Extension Request

The Department of Health and Social Services (DHSS) received approval for a September 2009 start-up of the program from HRSA, well into FY10, and the program has proven complex to begin. DHSS now anticipates that practitioner applications will be accepted starting in February 2010, with placement decisions soon thereafter. This means that DHSS will not be able to spend any more than \$50,000 of the \$200,000 that AMHTA has allocated for its FY10 portion of the program's "non-federal matching funds."

DHSS has identified 23 practitioner slots for the SLRP, and plans to fill all of the slots. Therefore, all federal and non-federal LRP funds will eventually be expended. The carry-over of AMTHA funding in the amount of \$150,000 into FY11 would allow the Alaska SLRP program to fully use the HRSA-provided federal funds, and to actually place all 23 practitioners for their full two-vear contracts.

A)

This project will allow the Department of Health & Social Services to participate in a tri-state collaborative effort with Oregon and West Virginia to work on the following categories of the program:

- (A) test federal government proposed measures of quality of children's care;
- (B) promote the use of Health Information Technology (HIT) in reporting on and improving children's health care delivery; and
- (C) demonstrate effectiveness of practice based models for improved care for children.

The federal grant provides for State Medicaid and Child Health Insurance Programs to work with health care providers and other partners in their states to carry out the activities proposed in the grant guidance.

Alaska is collaborating with Oregon and West Virginia to apply for funds through CHIPRA Quality Improvement Request for Proposals (RFP). The three states point out that testing measures of quality of care, demonstrating patient care models, and implementing electronic health records should be accomplished in rural states (all three are designated as rural by the federal government). CHIPRA targets children and youth 0-18. While the federal government provides funding for children's health care in the form of Medicaid and CHIPRA, the Centers for Medicare and Medicaid Services (CMS) is asking states to assist in testing more comprehensive measures of quality and effectiveness of medical services for children, and in turn is providing support for infrastructure for

The control of infectious diseases has become increasingly complex and challenging. Over the past 30 years more than 30 new infectious diseases have been discovered; recent examples are SARS and the H5N1 strain of avian influenza. To truly protect the health of Alaskans, the Division of Public Health must sustain well-established core public health programs such as tuberculosis control and immunizations, while taking on new challenges, such as pandemic influenza planning and bioterrorism preparedness. This \$1,500.0 (\$960.0 GF plus \$540.0 federal) request will modernize and strengthen an aging and under-funded infectious disease control system to keep Alaskans safe and secure from old and new infectious disease threats and public health emergencies. Associated requests for infectious disease control are found in the Epidemiology and Public Health Laboratories components.

Strengthening our surveillance capacity and outbreak response will assure that communicable diseases are detected earlier and that fewer Alaskans become ill. A stronger public health presence in each community will ensure completion of treatment for those with tuberculosis and other communicable diseases, and will provide each contact with a timely health evaluation, education and preventive treatment. A strengthened immunization program will assure that each child is protected from devastating vaccine-preventable diseases. A strong public health laboratory system will mean that infectious diseases are diagnosed rapidly and will hasten appropriate treatment to prevent further spread. These are core public health activities. When each of these building blocks are in place, we will then also have a strong foundation to respond to public health emergencies, to track the situation, to mount mass vaccination and prophylaxis clinics, to rapidly diagnose cases and to quarantine and isolate to contain disease. These are formidable tasks, but absolutely necessary if the health of Alaskans is to be protected.

New challenges that threaten to shift attention away from core activities have resulted in resurgence of diseases that have previously been contained. We saw this happen at a national level with measles in the 1980s, tuberculosis in the 1990s, and syphilis more recently. Even today, the Division must work hard to keep long-time

#### Public Health (continued) Nursing (continued)

FY2007 Public Health Protection: Infectious Disease Control and Emergency Preparedness (continued)

- public health threats under control.
- During the first 9 months of 2005, 82 cases of pertussis have been identified, more than in 2003 and 2004 combined. Pertussis (whooping cough), an ancient disease, is becoming more common in Alaska, in spite of an effective childhood vaccine. This is due, in part, to a new more sensitive laboratory test and providers are ordering this test more frequently, but there is evidence that there is more disease as well.
- ' In 2000, Alaska reported the highest rate of tuberculosis in the country because of several large outbreaks. There have been no large outbreaks since 2000, but Alaska continues to be among the top five states with the highest TB rates in the U.S. Each case of TB requires a huge amount of work, and requires each dose of medication (up to 20 pills per day) be observed 6 or more months of treatment are required. For each TB patient, there are up to 16 contacts that must be located, tested two times 12 weeks apart, and often treated with preventive therapy.
- In 2003 Alaska had the highest rate of chlamydia disease in the U.S. 3,900 cases for a rate of 606 cases per 100,000 population. An improved testing method and more thorough investigations were successful in uncovering disease that would not have been diagnosed otherwise. Each of these cases requires treatment and partner notification.
- ' In 2004, Alaska ranked 45 of 50 states with only 75.3% of 0-3 year old children fully immunized. This was a decline from a ranking of 27th the previous year, and well below the Healthy Alaskans 2010 goal of 90%. In 1985, children needed immunizations against 7 vaccine preventable diseases; while today in 2005 they need immunizations against 14 diseases. While this is an exciting and unprecedented opportunity to prevent disease, it means that 26 immunizations must be given to each child by the age of 6.
- ' The Division responds to outbreaks related to tourism almost every summer. In 1997 and 1998 large summer influenza outbreaks strained laboratory, epidemiology and public health nursing resources. Norovirus outbreaks on cruise ships frequently overflow into coastal communities. Cases of tuberculosis, typhoid and malaria are cared for in Alaska hospitals because many employees of cruise ships come from countries where these diseases are common.

Of the emerging public health threats, a new deadly strain of avian influenza (H5N1) is most concerning. This virus has only been found in Asia, and to date has had limited impact on humans, with 125 human cases and 64 deaths reported worldwide as of 11/9/05. There has not been well-documented person-to-person spread yet, however the death rate from avian influenza is over 50%, much higher than the 1-2% death rate seen with classic influenza pandemics (H1N1 and H3N1). International public health agencies are monitoring this situation with great unease because the influenza virus mutates frequently, and avian influenza may acquire characteristics of classic influenza that will allow efficient human transmission. With such a high death rate, no vaccine readily available, and limited antiviral drugs, a human epidemic of avian influenza would be devastating. Alaska has many direct air and shipping links to Asia through business, industry, education, and recreational travel, and is a major hub for international air cargo shipping. In addition, Asian birds migrate to Alaska each summer and share nesting grounds with North and South American migratory birds; in theory avian influenza could be introduced to a new continent through Alaska.

#### Public Health (continued) Nursing (continued)

FY2007 Public Health Protection: Infectious Disease Control and Emergency Preparedness (continued)

Public Health must have the capacity to sustain core ongoing activities, while simultaneously developing an agile and flexible posture to address new, unknown threats. The Division has become integrally involved in emergency and disaster preparedness planning at the national, state and community levels. This has required additional resources to participate in preparedness planning activities and exercises, but will serve us well in the event of a disaster.

To control old infectious disease challenges, and detect and respond to new agents, the Division must have a multi-pronged approach. The Sections of Epidemiology, Public Health Nursing, and Public Health Laboratories are each integral and interdependent when it comes to disease control - working together in a continuous cycle of discovery, investigation, intervention, monitoring and reporting.

In order to effectively conduct disease surveillance and outbreak response, the Section of Public Health Nursing must be the public health presence at the local level assuring that communicable diseases are treated, contacts and partners of persons with communicable diseases are examined, tested, and treated, and important health education is delivered. PHNs assure that local providers report infectious diseases appropriately. They are able to initiate a response to an outbreak, assist the epidemiology outbreak investigation team when it travels to a community for a large-scale investigation, and provide ongoing management of infectious disease in the community. PHNs are critical in an outbreak or public health emergency response. By developing a cross-trained and well-staffed public health nursing presence in each region, PHNs can be deployed to other areas of the state when needed to enhance an emergency public health response.

Public Health Nurses also are a critical contributor to disease control by supporting community vaccination efforts to assure all young children are protected. Nearly 15% of all Alaska children, and nearly 25% of children 0 - 3 years of age, are under- or unimmunized. PHNs provide community education and outreach, organize community immunization clinics, and provide immunizations for children who otherwise would not have access to this service. In Alaska, 50% of all childhood vaccines are delivered by Public Health Nurses who have had to shift other public health activities to maintain this core public health service. Both the number of children in Alaska, and the number of diseases against which vaccines are required, have doubled since 1980. Additional PHNs are required to initiate, support, and participate in community vaccination efforts.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the number of cases of disease investigated and the number of emergency exercises sponsored), 2) interim impact goals (e.g., increased immunization rates), and 3) desired long-term outcomes (e.g., reduced illness, disability and death due to infectious diseases). This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU for reduction of tuberculosis and chlamydia incidence rates.

This \$1,500.0 request (\$960.0 GF; \$ 540.0 I/A) will support activities in the Division of Public Health's Section of Nursing, as follows:

#### Public Health (continued) Nursing (continued)

FY2011 Maintaining Local Control of Essential Public Health Services: Stabilize Funding to Public Health Nursing Grantees (continued)

The grantees are part of the essential public health safety net for the State and their inability to meet basic public health needs affects the health of all Alaskans. Basic public health services provided by the grantees have dwindled over the past ten years, while public health concerns are on the rise. The Anchorage tuberculosis rate doubled from 2005 to 2006 with 14.7 cases per 100,000 (U.S. rate was 4.6). The 2008 tuberculosis rate for the Northern Region is 25.4 per 100,000. The 2007 Chlamydia case rate for the Northern Region is 2093 per 100,000 (U.S. rate was 370.2). The challenges and cost of providing immunizations has increased, and more stringent requirements for vaccine handling and distribution have increased staff time spent on that portion of the program. The mean two-year-old rate for childhood immunizations for the Northern Region decreased from 77% in 2000 to 70% in 2009. Due to inadequate funding, the Municipality discontinued its well child and home visiting programs in 2004, removing child rearing education and support for young high risk and high needs families. The North Slope Borough public health nurses no longer can provide prenatal or parenting education, nor offer other health education classes.

In the three northern regions these increased grant monies will primarily be used to stabilize existing operations through support for recruitment and retention of qualified nursing staff and for travel to provide services in 31 northern villages. Well-child care and health promotion/education would be reinstated in the North Slope Borough. Manillaq public health nurses will foster capacity of their community health aides, expand health promotion in the villages and reinforce their community partnering activities. The Municipality will be able to keep existing nursing positions fully staffed and will enable more support staff to free nurses to focus on tuberculosis and other communicable disease activities.

This proposal assures that parts of the state served by grantees continue to receive essential public health nursing services. The public benefit includes prevention, treatment and control of infectious diseases and low cost, readily accessible immunizations to protect against preventable infectious diseases. This increment will support efforts to increase the two year old immunization rate to the 80% goal, and timely treatment and reduction in rates of tuberculosis and sexually transmitted diseases. All children need to have a medical home and to obtain well child care. This desired outcome is addressed by the local public health nurse who facilitates access to care and links families to needed services when it is available in the community, or provides the service directly when it is otherwise not available. The need for public health emergency preparedness and response activities has increased. It is important that all local public health staff be available and prepared to carry out their roles in the case of a natural disaster, pandemic flu or other public health emergency. The work currently underway for preparation and response to the threat of the H1N1 Pandemic Influenza is an excellent example of this. Finally, PHNs are critical to the community health assessment, planning and intervention processes needed to address health issues at their root causes. Outcomes of these efforts are measured by identification of key community issues, success in stakeholder coalition-building to address needs, and heightened awareness and responsibility for health outcomes by citizens in their communities.

If this increment is not funded, services will continue to decrease and in some cases the grantees will discontinue the work and the state will need to resume direct responsibility for providing public health nursing services in those areas. In recent years each of these agencies has expressed some consideration of discontinuing provision of public health nursing services. One of them, Norton Sound Health Corporation, has now given written intent to discontinue acceptance of the public health nursing grant in order to decrease the financial drain on their agency. This would result in elimination of local oversight and contributions to the cost of services and a significant

FY2012 CC: Transfer Public Health Nursing Services from	Inc	420.0	310.6	25.0	44.4	40.0	0.0	0.0	0.0	7	0	0

This request is one of two that will provide the funding necessary for the Division of Public Health to assume provision of all public health services for the inhabitants of the Nome/Bering Strait region on July 1, 2011. The total cost to transfer public health services from Norton Sound Health Corporation (NSHC) to the State will be \$1,452.4 GF in FY12. These costs will be offset by the \$1,002.4 grant monies NSHC receives from the Section of Public Health Nursing (in a separate change record). This increment will supply the remaining \$450.0 GF needed to maintain services for the inhabitants of the Bering Strait area. No new services will be added. Staffing levels will be slightly decreased from the ten current NSHC positions to seven. The NSHC provided essential public health nursing services to the region as one of four grantees of the Section of Public Health Nursing. NSHC gave the Department final formal written notice in April 2010 that they will return responsibility for public health nursing services to the State of Alaska on June 30, 2011 despite a \$250,000 increase to their grant funding for FY11. Assuming direct provision of these services comes at a significant cost to the state, the most significant being that salaries and benefits for state public health nurses are higher than what NSHC pays. Funds will support hiring staff, leasing clinic and office space, traveling to the villages to provide itinerant public health nursing services, purchasing supplies and equipment, and paying overhead costs such as utilities, phone, etc. This includes a one-time \$30.0 purchase of computers, office supplies and medical equipment for the facility. Staffing levels will be slightly decreased from the ten current NSHC positions to seven: 3 PFT Public Health Nurse III, 2 PFT Public Health Nurse II, and 2 PFT Office Assistant II. This is one fewer nurse and two fewer office assistants than NHSC employed. The state has a constitutional mandate to provide for the publics health and must take over provision of public health nursing services for the inhabitants of this area to assure the integrity of Alaskas public health safety net. The NSHC public health nursing region covers 88,000 square miles. The service area has a total population

Public Health (continued) Nursing (continued)											

FY2012 CC: Transfer Public Health Nursing Services from Norton Sound Health Corp to Div of Public Health (continued)

> of approximately 9,275 inhabitants. Nome (pop. 3,502) is the hub community from which itinerant public health nurses serve 15 villages with 5,773 additional inhabitants. Services provided included tuberculosis (TB) screening for school children; treatment and follow-up of persons with tuberculosis; child health exams; pregnancy testing; prenatal education and counseling; sexually transmitted disease prevention, control and treatment; response and investigation of disease outbreaks that may be caused by food, water, or other environmental problems; public health emergency preparedness and response activities; development of community partnerships to address local public health problems such as injury, obesity, and family violence; and immunizations, among many others. This increment will assist in strengthening families and maintaining the local economy. Public health nurses support and strengthen families by screening for domestic / family violence, linking families to needed health and social services, and providing child health and parenting education and support. They help people get and stay employed by providing job required TB and other infectious disease screening and treatment, and by helping people stay healthy enough to work. In the longer term the child health screening and parent support services they provide detect health conditions early and help keep children in school, thus giving the child the best opportunity to grow into a productive member of the community. In addition, this increment will assure the seven jobs that are responsible for performing this work stay in Nome and keeps the income from these jobs in the local Nome economy. If this proposal is not implemented public health services, for both the inhabitants of the Bering Strait area and across the state, will be severely compromised. There will be eight jobs lost in Nome, six of which are high paying public health nurses. Existing resources in the rest of the state will have to be stretched to provide necessary services to this area. Public health nurses will need to travel from Anchorage and other parts of the state to Nome and the Bering Strait villages to provide services; other services will no longer be available at all. A hole will be opened in our public health safety net, weakening our ability to assure access to care for the vulnerable and to prepare and respond to public health threats such as pandemics, and natural and manmade

disasters. 1004 Gen Fund (UGF) 420.0

1004 Gen Fund (UGF) 30.0 FY2012 Stabilize Funding to Public Health Nursing	Inc	750.0	0.0	0.0	0.0	0.0	0.0	750.0	0.0	Λ	Λ	Λ
Grantees-Phase II	Inc	750.0	0.0	0.0	0.0	0.0	0.0	750.0	0.0	U	U	U

This funding would provide for the second phase in an effort to stabilize funding for the public health nursing grantees. Current grants are inadequate to support services at a level consistent with the rest of the state. Even with increased funding, FY2011 (Phase I) grantees still must subsidize operations with local funding. The remainder of the state receives services without the requirement of locally subsidized funding.

The Division of Public Health provides direct public health nursing services to all communities in Alaska except those served by three grantees (Maniilaq Association, North Slope Borough and the Municipality of Anchorage). These grantees are part of the essential public health safety net for Alaska.

Stabilizing grantee funding and maintaining public health nursing services in these areas of the state will both help to strengthen families and maintain local economies. Public health nurses support and strengthen families by screening for domestic/family violence, linking families to needed health and social services, and providing child health and parenting education and support. They help people get and stay employed by providing job-required tuberculosis and other infectious disease screening and treatment, and by helping people stay healthy enough to

> work. In the longer term the child health screening and parent support services they provide detect health conditions early and help keep children in school, thus giving the child the best opportunity to grow into a productive member of the community. In addition, supporting the grantees in keeping their public health nursing programs local keeps these jobs in the communities, helps to support other local jobs that support these staff positions, and keeps the income from these jobs in the local economy as well.

Basic public health services in areas served by the grantees have dwindled over the past ten years. Manillag and North Slope Borough serve a combined 14.160 people in 16 villages covering more than 125.000 square miles. The Municipality of Anchorage serves 42% of the State's population. The Municipality of Anchorage discontinued its well child and home visiting programs in 2004, removing child rearing education and support for young, high needs families, and the overall public health nursing service level of Anchorage is much less than the level supported for the rest of the state. The North Slope Borough public health nurses no longer can focus on pregnancy prevention in the schools, provide prenatal or parenting education, nor offer other health education classes. The Maniilaq Association has been unable to fill vacant public health nurse positions due to their low salaries and as a result has been unable to provide adequate basic public health nursing services to the people in that area. A fourth grantee, Norton Sound Health Corporation, will return public health nursing services to the State beginning in FY2012.

The grantees have gone decades with little or no increased funding for public health nursing services to these areas while local costs and grantee contributions have risen significantly over the years. For example, the State funded 38% of the Municipality's public health nursing services' budget in 2001, which dropped to 25% in 2010. Costs for travel, facility operations, and supplies have increased significantly, burdening the grantees with additional expenses. Grantee public health nurse salaries have not kept pace with State salaries and the rural areas suffer from chronic public health nurse shortages.

If this proposal is not funded, public health nursing services to these areas will continue to decrease. The grantees' inability to meet basic public health needs impacts the health of all Alaskans. If not funded trends are expected to continue in reduced public health service delivery in these regions accompanied by a rise in public health problems. Furthermore, at least two if not all of the grantees may eventually discontinue provision of these services altogether. Despite an increase for FY2011, the Norton Sound Health Corporation returned responsibility for provision of public health nursing services to the State beginning in FY2012. Another grantee has likewise expressed an interest in discontinuing these services.

#### Public Health (continued) Nursing (continued)

FY2012 Reduce vacancy factor to increase the number of authorized positions that can be filled (continued)

parenting education and support; help people get and stay employed by providing job required tuberculosis (TB) and other infectious disease screening and treatment, and by helping people stay healthy enough to work; detect health conditions early and help keep children in school through child health screenings and parent support services, thus giving the child the best opportunity to grow into a productive member of the community; optimize the physical health of Alaskans through direct clinical services and community-based prevention and health education activities; prevent, control, and treat infectious diseases such as tuberculosis, sexually transmitted and vaccine-preventable diseases; prepare for and respond to public health disasters such as pandemic flu, floods, fires, and new emerging infectious diseases; perform health screenings and injury prevention activities; reduce chronic diseases due to obesity and tobacco use by promoting healthy lifestyles; improve oral health through education; and provide clinical services for children and vulnerable adults without access to other health care providers.

This increment would allow Public Health to restore services that have been reduced or eliminated.

- Restore approximately 35 trips to communities and villages;
- Mass vaccination and emergency shelter exercises for communities;
- Family planning services and birth control options;
- Pediatric Tylenol when children receive immunizations;
- Head lice treatment;
- Health prevention and promotion activities; and
- Dissemination of public health information to communities.

If this request is denied public health centers may need to be closed, public health staff positions may have to be cut, and core public health services further reduced or eliminated. This will result in direct public health impacts including decreased immunization rates, increases in rates of tuberculosis and sexually transmitted infections, and other preventable diseases could also increase. For example, Alaska is currently in the midst of a gonorrhea outbreak and consistently has one of the highest chlamydia rates in the nation; however, funds are stretched too

thin to respond adequately to the demand.

Revenue projections for the Section of Public Health Nursing have decreased since December 2010 when the Governor's Budget for FY2012 was prepared. There is sufficient personal services authority in this component; however, the federal funds that support these positions are not collectible. The section now projects a general fund need of \$1,750.0 in FY2012 to replace the uncollectible federal receipts to pay for these positions.

There are 202 budgeted positions for public health centers and offices in 23 communities. Itinerant nurses provide services to approximately 230 communities and villages. There is a total budgeted personal services cost of \$20,843.9. Of the \$5,276.4 in federal funds authorized, \$3,400.0 is anticipated to be received, a difference of \$1.876.4.

If this request is not approved, the division will need to have a 17% vacancy rate, which will require layoffs, closing of health centers, and reduced visits to villages. It has only been possible to continue to meet budget within recent

Public Health (continued) Nursing (continued)										

FY2012 AMD: Stabilize Funding to Maintain Public Health Nursing Services (continued)

years due to difficulty recruiting nurses which resulted in a high vacancy factor. A recent effort to strengthen recruitment of public health nurses has resulted in a decrease in vacancy factor from 16% in July of 2006 to 11% in May of 2010. The requested amount will reduce the current vacancy rate of 13.3% to approximately 10%.

The requested funds will allow Public Health Nursing to maintain and/or restore services that otherwise must be reduced or eliminated:

- Restore approximately 35 trips to communities and villages
- Immunizations to children and adults
- Child health exams to children age 0-5 who have no primary care provider
- Home visits for high risk newborns and young families at social and economic risk
- Follow-up on persons who have been exposed to sexually transmitted diseases and who may not be aware of their exposure
- Mass vaccination and emergency shelter exercises for communities

It has been possible to remain within budget during recent years because of difficulty recruiting nurses which has resulted in a high vacancy rate. If this request is not approved, the division will need to have a 17% vacancy factor, which will require layoffs, closing of health centers, and reduced visits to villages.

The FY2012 Governor's Budget included an increase of \$1,000.0. This amendment provides the additional \$750.0 based on a \$1,750.0 request in the FY2011 supplemental request.

1004 Gen Fund (UGF) 750.0  FY2012 Incorporate partial FY11 distribution of fuel trigger in FY12 base. Trigger start point moves from \$51 to \$65.  1004 Gen Fund (UGF) 26.5	Inc	26.5	0.0	0.0	26.5	0.0	0.0	0.0	0.0	0	0	0
FY2013 Stabilize Funding for Public Health Nursing Grantees Phase 3	Inc	1,100.0	0.0	0.0	0.0	0.0	0.0	1,100.0	0.0	0	0	0

This request is Phase 3 of a series of requests to stabilize funding to public health nursing grantees. Phase 3 provides the three public health nursing grant program recipients with the state grant funding needed to maintain services at their current level without local subsidies. It assures that the three grantees continue to provide public health nursing services for their geographic areas including the prevention, control and treatment of infectious diseases such as tuberculosis, sexually transmitted diseases and vaccine preventable diseases; public health preparedness and response to pandemic flu, new emerging infectious disease, and public health disasters; preventing injury and chronic disease, and accessing care for children and vulnerable adults. Federal funds assume 10% reimbursement from Medicaid administrative claiming.

The Division of Public Health currently provides direct public health nursing services to all communities in Alaska except those served by three grantees (Maniilaq Association, North Slope Borough and the Municipality of Anchorage). These grantees are part of the essential public health safety net for Alaska. Maniilaq and North Slope Borough serve a combined 14,160 people in 16 villages covering more than 125,000 square miles. The Municipality of Anchorage serves 42% of the State's population.

Current grants are inadequate. Until the Division of Public Health began efforts to stabilize grantee funding beginning with the FY2011 budget, the grantees had gone decades with little or no increased funding for public

#### Public Health (continued) Nursing (continued)

FY2013 Stabilize Funding for Public Health Nursing Grantees Phase 3 (continued)

health nursing services. Meanwhile costs for travel, facility operations, and supplies rose significantly, increasing the financial burden on the grantees. Grantee public health nurse salaries have not kept pace with State salaries and the rural areas suffer from chronic public health nurse shortages. Even with increments of \$1 million for FY2011 (Phase 1) and \$1.75 million for FY2012 (Phase 2), grantees still must subsidize operations with \$1,300.0 of local funding. The remainder of the state receives public health nursing services without the requirement of locally subsidized funding.

The public health nursing service level of Anchorage is much less than the level supported for the rest of the state either through grants or operated directly. The recommended national standard is one public health nurse per 5,000 population (1:5,000). In Alaska, the average ratio is closer to 1:2,500, which is appropriate given the vast distances that Alaska nurses are required to travel. In contrast though, the Anchorage-specific ratio is more than four times the national standard, at 1:21,500.

If the Municipality of Anchorage returned public health nursing responsibilities to the state, it would have catastrophic consequences for all Alaskans. Assuming responsibility for the Municipality's population of nearly 300,000 or 42% of the state population would double the workload of the Section of Public Health Nursing, significantly impact the workload of the rest of the Division of Public Health, and more than double the cost of providing public health services to this population at even the current level. It would cost the State more than it currently costs the Municipality for the same services because of the higher state salaries and higher administrative costs within the state system.

The Municipality of Anchorage has expressed an interest in discontinuing these services as they cannot afford to continue to support their public health program. This would mean the state would be required to assume direct provision of these services at a significant increase in cost to the state. This is not unprecedented as Norton Sound Health Corporation was a grantee until July 2012 when they returned responsibility for provision of public health nursing services to the State as a result of chronic underfunding.

Basic public health services have dwindled. The Municipality of Anchorage discontinued its well child and home visiting programs in 2004, removing child rearing education and support for young, high needs families, and the overall public health nursing service level of Anchorage is much less than the level supported for the rest of the state. The North Slope Borough public health nurses no longer can focus on pregnancy prevention in the schools, provide prenatal or parenting education, nor offer other health education classes. The Manillaq Association has been unable to fill vacant public health nurse positions due to their low salaries and as a result has struggled to provide adequate basic public health nursing services to the people in that area. With Phase 1 and 2 funds North Slope was able to increase salaries for their public health nurses, making salaries more competitive. Manillaq Association also gave a raise to their nurses. The Municipality of Anchorage used some of the funds for interpreter services, tuberculosis-related lab tests and x-rays.

The grantees' inability to meet basic public health needs affects the health of all Alaskans. If not funded, we expect to see a continued decline in public health service delivery in these regions, accompanied by an increased rise in public health problems. In addition, supporting the grantees by keeping their public health nursing programs local keeps these jobs in the communities, helps to support other local jobs that support these staff positions, and keeps the income from these jobs in the local economy as well.

FY2015 Reduce Expenditure Level Reduce general funds by \$29.8. The Division of Public Heal travel. The Division of Public Health will utilize performance minimize impact on service delivery.  1004 Gen Fund (UGF) -29.8					0.0	0.0	0.0	0.0	0.0	0	0	0
FY2016 AMD: Close One Public Health Center, Reduce Public Health Nursing Grants, Delete Staffing	Dec	-1,400.1	-1,076.8	0.0	-29.3	-10.0	0.0	-284.0	0.0	-8	-1	0

Implement the following actions to reduce spending:

- 1. Decrease funding to three Public Health Nursing Grantees: Municipality of Anchorage, North Slope Borough, and Maniilaq.
- 2. Close the Seward Public Health Center. Partner with the new federally qualified health center clinic for reproductive services. Utilize an itinerant nurse from Kenai to Seward. Delete a full-time, range 23 Public Health Nurse III (06-1141) in Seward that has been vacant for more than one year. Delete a full-time, range 13 Office Assistant II (06-1022) in Seward; the incumbent will be moving by July 2015. Appointments for Public Health Nurses will be made through Kenai Public Health Center. Find new and free location to complete individual services. The limited local presence in Seward will result in a decrease in the number of appointments with the members of the community.
- 3. Delete a full-time, range 21 Public Health Nurse II (06-1852) in Homer that has been vacant for more than two years. There is no impact to the current services provided.
- Delete a full-time, range 10 Office Assistant II (06-1591) in the Anchorage Central Office; the incumbent will be retiring prior to July 2015. This will provide the division with the opportunity to streamline some processes.
   Delete a full-time, range 8 Office Assistant I (06-2014) in Wasilla that is currently vacant. Reorganize the Mat-Su Public Health Center Office Assistant team.
- 6. Delete a full-time, range 21 Public Health Nurse II (06-1383) in the Fairbanks Public Health Center that is currently vacant. Redistribute the work among the remaining nurses in the Fairbanks Public Health Center. This will have a minimal impact on the services provided.
- 7. Delete a part-time, range 24 Health Practitioner I (06-1215) in Juneau. This itinerate position, which serves the Southeast Region, is currently vacant.
- 8. Delete a full-time, range 23 Public Health Nurse III (06-1544) in the Sitka Public Health Center. The incumbent will be retiring prior to July 2015. Reorganize the Sitka Public Health Center to have one Public Health Nurse II and one Office Assistant II by following the existing, post-retirement succession plan.
- 9. Delete a full-time, range 19 Nurse II (06-1090) in Bethel. Redistribute Bethel Public Health Center Public Health Nurse work. This will decrease opportunities for non-bachelors of science local nurses with limited access to gain public health nursing experience by working in public health nursing while working on a bachelor's degree in nursing.
- 10. Prioritize supply needs. No major expenditures are planned for FY2016.

#### CONSEQUENCES

1. Reduced staffing could lead to a decrease in response/timeliness to an infectious disease outbreak, including increased public health concerns in Seward during cruise ship season.

FY2006 Sustain Poison Control Services for Alaska	Inc	70.0	0.0	0.0	70.0	0.0	0.0	0.0	0.0	0	0	0
On September 1, 2001, Alaska gained access to the nation	nwide toll-fre	e number for pois	son control center									

On September 1, 2001, Alaska gained access to the nationwide toll-free number for poison control center services. Callers in Alaska are connected with the Oregon Poison Center (OPC), answering phone calls from both the public and healthcare providers and providing medical assistance and training to healthcare providers. OPC is a certified poison center with medical toxicologists available 24/7. Alaska has neither a certified poison center nor medical toxicologists. Without this service Alaska would be the only state in the nation without access to a certified poison center.

At this point the incremental costs for the Alaska cases is \$140,000. OPC is currently being reimbursed \$60,000 from federal funds for this service. Beginning October 1, 2004, it will be necessary for Oregon to charge Alaska \$70,000 to make up this difference (they have indicated they will absorb the \$10,000 difference), or discontinue

#### Grant 1440.0

This will replace half of the FY08 Mental Health Trust Authority Authorized Receipts (MHTAAR) funding of \$250.0 with General Fund/Mental Health (GF/MH) funding in FY09 to enhance the capacity to provide diagnosis and comprehensive, active referral for Autism Spectrum Disorders (ASD). A multidisciplinary-team approach assures that children receive an accurate diagnosis from a team of specialists (medical, psychology, speech/language, occupational therapy, physical therapy, audiology, ophthamology) and rules out other possible medical conditions that may be associated with ASD.

This proposal reflects a fund source change of \$125.0 MHTAAR to GF/MH in FY09.

The Legislature requested matching funds from the Trust in FY08 to support the GF/MH increment for autism diagnosis. The Trust originally agreed to provide \$250.0 in MHTAAR for one year only, but has most recently agreed to split full funding and support \$125.0 FY09 MHTAAR and \$125.0 FY09 GF/MH.

Autism is a spectrum disorder that is neurologically based and affects social skills, communication, play and behavior. Nationally, the disorders occurs in approximately 1/166 children - more than three times the number with Juvenile (Type 1) diabetes (CDC, 2005). About 60 Alaskan babies born each year are expected to have an autism spectrum disorder. It is estimated that the cost nationally of this disorder is \$35 billion annually with even

more dollars spent on the loss of productivity of untreated individuals.

Children, who show signs of having an Autistic Spectrum Disorder (ASD) or have risk factors on a screening, require a comprehensive assessment across developmental and physical domains. A team of professionals from multiple disciplines are needed to conduct a comprehensive evaluation (i.e. neurodevelopmental pediatrics, psychology, speech, occupational and physical therapy, ophthalmology, audiology). For young children it is especially critical to perform a differential diagnosis to rule out any other possible genetic or medical disorders that may be associated with autism.

The comprehensive assessment leads not only to a differential diagnosis, but to a plan of intervention and services for the child and family. Families need information and active referral to link up with needed health, educational, financial and family support resources.

The capacity to diagnose ASD in Alaska is impacted by difficulties obtaining current assessments. This is due, in part, to a shortage of qualified professionals who have experience with young children on the autism spectrum and who are trained and experienced in conducting the assessments. In addition, Medicaid restrictions on billing for psychology services impede access. These factors lead to delays in getting a comprehensive diagnosis and thus appropriate services.

This program will enhance the current screening and assessment capacity for autism spectrum disorders leading to earlier intervention. Funds will support a child psychologist, family care coordinator, and a pediatric medical provider with a specialty in autism spectrum disorders, as well as administrative infrastructure needed to operate these services on a regular basis. Regional screening clinics will be held in eight locations throughout Alaska. Because not all children seen will receive a diagnosis of autism, children diagnosised with other possible developmental disabilities will benefit by early detection and referred for other services.

"What will the investment buy?"

- 1. Enhanced support of a statewide system to provide timely, comprehensive diagnosis using a multidisciplinary team and systematic referral to appropriate services. FY08 and FY09 would include the development of a centralized team with diagnostic capacity for autism spectrum disorders building on the existing neurodevelopmental clinic.
- 2. Identification and development of evidence-based, best practice autism treatment services using non-aversive behavioral interventions in FY08.
- Increase in the number of children screened and diagnosed for autism spectrum disorders throughout the state of Alaska.
- 4. With increased capacity, a reduction in the wait time for an appointment for screening a diagnosis from six months to three months.
- 5. The number of outreach clinics offered in smaller Alaska communities will increase from three to six communities in FY08.
- 6. With an earlier diagnosis, families and their children can access services and maximize their effectiveness.

#### Public Health (continued)

Women, Children and Family Health (continued)

FY2009 MH Trust: AB-Gov Cncl -Multidisciplinary diagnostic team and comprehensive referral for autistic spectrum disorder (continued)

1. Number of children identified with a diagnosis of autism spectrum disorder

#### Performance Measures:

- 1. Annual number of children screened with a diagnosis of autism spectrum disorder will increase by 20% from current numbers.
- 2. Number of children referred to early intervention services with a diagnosis of autism spectrum disorder will increase by 20% from current numbers.
- 3. Number of children receiving special education services through their Individual Education Plan (IEP) in association with a diagnosis of autism spectrum disorder.
- 4. Number of outreach clinics offered in smaller Alaska communities. Goal for FY08-FY09 is to increase the number of outreach clinics by 20%.

Trust Write-up: The MH Trust: AB-Gov Cncl: Multidisciplinary Diagnostic Team and Comprehensive Referral for Autistic Spectrum Disorders will continue funding to screen, diagnose and refer children with autism spectrum disorders and other developmental disabilities leading not only to a differential diagnosis, but to a plan of intervention and services for the child and family. The project will be managed by the Section of Women's Children's and Family Health within Public Health and funds will be distributed through a single contract.

This project is a component of the overall initiative to address the growing population of children identified with an autism spectrum disorder. The capacity to diagnose autism spectrum disorders in Alaska is impacted by difficulties obtaining current assessments due, in part, to a shortage of qualified professionals. In addition, Medicaid restrictions on billing for psychology services impede access. Families need information and active referral to link up with needed health, educational, financial and family support resources.

250.0

1037 GF/MH (UGF) 125.0 1092 MHTAAR (Other) 125.0

FY2009 MH Trust: AB-Gov Cncl - Center for Human

Development Capacity building for autism intervention

The MH Trust: AB-Gov Cncl: CHD Capacity Building for Autism Intervention is a component of the overall autism initiative and will provide funding to train individuals to offer effective early autism intervention services. As a result, a cadre of professionals and paraprofessionals will be available to deliver intensive autism intervention soon after a child is diagnosed, and early in a child's life when research shows intervention has the greatest impact. The Department of Health and Social Services, Section of Women's Children's and Family Health will transfer funds to the University of Alaska Center for Human Development through a Reimbursable Services Agreement.

A body of evidence supports the efficacy of early intensive intervention, with nearly 50 percent of those receiving intervention not requiring special education in school, or requiring reduced special education services. It is estimated that early intensive intervention offered over a three-year period to children with autism could save Alaska nearly \$100,000 per child, and nearly \$90 million for all children with autism, just during the school years. However, without the availability of a cadre of trained and qualified professionals and paraprofessionals to provide intensive intervention during the early childhood years the lifetime cost of care can be expected to be \$3.2 million

DHSS Priority: Health and Wellness (Prevention) End Result of "Healthy People in Healthy Communities": Strategy A4 - Assure access to early preventive services and quality health care 1037 GF/MH (UGF) 125.0 280.3 257.3 23.0 0.0 0.0 0.0 0.0 0.0 Inc FY2010 Birth Defects Registry

The Alaska Birth Defects Registry (ABDR) is a statewide program that collects, analyzes and produces information about the prevalence of congenital anomalies in Alaska. Under 7 AAC 27.012, hospitals, physicians and other health facilities are required to report to ABDR when they have provided services to a child with one of the identified conditions. Accurate information on birth defects in Alaska, including fetal alcohol spectrum disorders, is used to target prevention messages, interventions and health services; define populations at increased risk for birth defects; and identify clusters of conditions that may be related to environmental exposures.

The Section of Women, Children and Family Health requests \$280.3 to maintain the Alaska Birth Defects Registry

The ABDR was funded by the CDC between 1998 and 2004. Funding is now received from the MCH Block Grant for ABDR activities, but current funding levels do not adequately support this state-mandated program and its basic surveillance activities; moreover, the high rates of major anomalies require additional staff time for improved case verification and follow-up activities which cannot be implemented with limited funds. Without this increment, the registry case verification and validation of the birth defect reports will be severely restricted as will the capacity to analyze or report data to health care providers and other partners targeting prevention. In addition, determining the best allocation of resources for the development of systems for early identification and treatment for children born with a birth defect will be limited, as will the capacity to explore possible causes of disparities between Natives and non-Natives

In Alaska, the registry has established rates of major congenital anomalies twice that reported nationally; moreover, rates for Alaska Natives are significantly higher than for non-Natives. Approximately 18% of Alaskan infants are born with a reportable birth defect and 6% have a serious congenital anomaly. For many individual birth defects, including FAS, rates in Alaska are higher than those documented in any other state. Birth defects contributed to 33% of neonatal and 20% of postneonatal deaths during 1992-2002 in Alaska. These findings and other vital information on the status of Alaska's children would not be available without the ABDR.

This request would fund existing staff with GF and would be used to maintain the Birth Defects Registry. To date,

National standards projects have identified Applied Behavior Analysis (ABA) as the primary evidence-based intervention that is most likely to improve the quality of life for children and families experiencing Autism. The national certification for providing the services is that of a Board Certified Behavior Analyst (BCBA). Alaska currently has three BCBAs (two just recently certified). This project has recruited six individuals who are currently halfway through their post master's degree course work and have begun the 1,500-hour supervised field

National standards projects have identified Applied Behavior Analysis (ABA) as the primary evidence-based intervention that is most likely to improve the quality of life for children and families experiencing autism spectrum disorders (ASD), provided by a nationally certified Board Certified Behavior Analyst (BCBA). Alaska currently has 7 BCBAs (3 certified within the last month). This project has recruited 12 individuals who are currently halfway through their post master's degree course work and have begun the 1,500 hour supervised field experience component. This project will increase the number of BCBAs and form a group that will supervise future cohorts of students. Other activities to increase workforce capacity include the implementation of an entry-level (degreed and paraprofessional) workforce development structure that is responsive to the direct service provider role for services that support children and youth with ASD and to continue the delivery of the annual ASD Summer Institute that includes two tracks: 1) Early Intensive Behavioral Interventions (EIBI) and 2) Autism and the Transition to Adulthood.

IncM

75.0

Becoming a Board Certified Behavior Analyst is a long, difficult, and expensive process that includes completing a 15-credit post master's degree Behavior Analyst Certification Board (BACB) approved curriculum and a 1,500 hour supervised field experience. The capacity building program has already doubled the number of BCBAs that are in the pipeline for certification by FY13/FY14. In addition to the time commitment and expense, the lack of homegrown BCBAs requires students to contract with out-of-state supervisors. This increases the burden, time and expense on the student. The current autism workforce development capacity building program will use the existing cohort of students as supervisors once they complete their certification, thereby increasing opportunities for others to follow in their footsteps and decreasing the expense of the program. In short, the more BCBAs that we can produce the more we will be able to produce.

Funding will be used for the following activities:

FY2014 MH Trust: Gov Cncl - Grant 3505.02 Autism Workforce

- Student recruitment Continue recruitment efforts to sufficiently increase in-state professionals. Current
  activities include educating the larger service community and developing a pool of interested candidates.
  Continuation of this structure will further the workforce capacity development in Alaska.
- 2. Student financial support Student expenses for the completion of the BCBA can run from \$20.0 \$30.0. This is a deterrent to increasing the number of individuals who have this certification. By providing partial support the number of Alaskans willing to participate in this program has increased. In return for this financial support all

Trans Tota1 Personal Capital Type Expenditure Outlay | Misc PFT PPT Services Travel Services Commodities Grants Public Health (continued) **Emergency Programs (continued)** FY2016 AMD: Reduce Emergency Medical Services Grants and Travel (continued) Health, which reduced Emergency Medical Services and Trauma operations to essential functions. Grantees primarily provide training for local Emergency Medical Services providers. Regulations updates, once approved, will reduce direct instruction time for Emergency Medical Services recertification, which may help reduce the impact of the cuts. Grantee reductions still provide the regions with a significant increment relative to their FY2013 awards. To further support the reduction of general funds, Emergency Medical Services and Trauma will reduce their travel, therefore delaying or eliminating ambulance certification and/or facility trauma designation. While the programs can complete some work remotely, inspections require on-site presence of state staff. Finally, Emergency Programs general funds support the work of the Alaska Council on Emergency Medical Services (ACEMS) and the Trauma System Review Committee (TSRC). Travel for Alaska Council on Emergency Medical Services and Trauma System Review Committee meetings will be reduced by one FY2016 meeting for each advisory group. Some attendees currently attend meetings via teleconference/webinar and some work can be done remotely. Regional Emergency Medical Services grants primarily support training for certified Emergency Medical Services providers and for first responders who are trained at a basic Emergency Trauma Technician (ETT) level. Training reductions may result in fewer trained providers at either the Emergency Medical Services or Emergency Trauma Technician level, particularly in remote rural areas. Reducing travel for state staff significantly affects state ability to assess the status of Emergency Medical Services providers and their patient transport and care equipment and to enhance the capacity of Alaska's rural hospitals to address trauma locally. Our ability to protect and promote the health of Alaskans will be negatively affected as we continue to degrade our ability to sustain an efficient and effective public health system infrastructure. Inadequately supported services lead to increased morbidity and mortality, as well as increased costs. 1004 Gen Fund (UGF) -211.6 FY2018 Replace Unavailable Federal Funds with I/A Rcpts FndChg 0.0 0.0 0.0 0.0 0.0 0.0 0.0 0.0 0 0 from Behavioral Health to Support Opioid Treatment Public Health is developing a strategic plan to meet the challenges of budget reductions and minimizing the loss of programs that ensure the health and well-being of all Alaskans. A new section of Rural and Community Health Systems merges the Section of Emergency Programs with the majority of Section of Health Planning and Systems Development. When the Sections are combined there will be a surplus of unrealizable federal receipt authority. At the same time, the Section of Emergency Programs has taken on new work with the Division of Behavioral Health. The project emphasis will be to develop and implement a comprehensive and sustainable opioid overdose education and prevention framework. Through the Prevent Prescription Drug/Opioid Overdose-Related Deaths (PDO) project the State of Alaska in partnership with the Advisory Board on Alcoholism and Drug Abuse, Alaska Mental Health Trust Authority, Alaska Opioid Policy Task Force, and local jurisdictional first responders and prevention partners will promote sustainable policy, systems, and environmental change, and enhance existing service delivery systems across disciplines.

The Section will work on the project over the next five years and will need interagency receipt authority. With this

fund change it would negate the need for an unbudgeted reimbursable services agreement.

Tobacco use is the number one cause of preventable death in Alaska. Of the adult Alaskan population, 24 percent of all adults, 48 percent of low income, 44 percent of Alaska Natives, and 45 percent of adults with less than a high school education use tobacco. More than 77 percent of adult tobacco users in Alaska report that they want to quit. Each year, tobacco use and/or exposure to secondhand smoke cuts short the lives of nearly 600 Alaskans and costs the State over \$329 million in direct medical costs and lost productivity due to tobacco-related deaths. This amount is almost certainly an underestimate since it does not account for lost productivity from tobacco-related illness. At the same time, the tobacco industry spends an annual estimated \$32.8 million in Alaska to promote tobacco use (2003 estimate). This \$343.7 Tob Ed/Ces increment will fund strategies to help Alaskan communities reduce tobacco use. A companion request is included in the Tobacco Prevention and Control component.

The number one cause of death in Alaska is cancer. Lung cancer, cancer of the oral cavity, esophagus, pancreas, cervix, colon and rectum are associated with tobacco use. In the Alaskan population, lung cancer is the most common and most fatal cancer, resulting in over 30 percent of cancer related deaths. Ninety percent of lung cancer is tobacco related. Many other health conditions are related to tobacco use. These include heart disease, stroke, emphysema, asthma, upper respiratory diseases, diabetes, and low birth weight babies. Given the high rate of tobacco use in Alaska and the disparities in tobacco use that exist in Alaska, it is vital to implement

### Public Health (continued)

### Chronic Disease Prevention and Health Promotion (continued)

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

programs that decrease death, disability and the economic burden related to tobacco.

The Division of Public Health (DPH) will stem the tide of increasing poor health and health care costs and decreasing quality and length of life in Alaska due to tobacco use by implementing

- 1) Community-Based Primary Prevention;
- 2) Community-Based Secondary Prevention;
- 3) Provider-based Secondary Prevention; and
- 4) Expanded Statewide Media.

#### COMMUNITY-BASED PRIMARY PREVENTION

In order to achieve reductions in secondhand smoke exposure and individual behavior change that supports non-use of tobacco, communities must change the way tobacco is promoted, sold and used. Communities can also change social norms around tobacco use by targeting tobacco-related knowledge, attitudes and practices. Geography, culture and climate vary greatly around the State of Alaska and no single approach will work for all communities. As such it is important to recognize that for any strategy to be successful and for long-term health outcomes to improve, the work has to be done at the community level where people live, work and go to school. Local governments, community groups, school boards, and employers need to take the lead in developing and instituting these opportunities but DPH can offer support. This increment will fund staff with expertise in comprehensive school tobacco programs and community development to provide information, tools, training, and technical assistance to communities and schools implementing programs. The companion increment request in the Tobacco Prevention and Control component will increase resources for community grants.

Following are examples of expected impacts of these community level activities:

- More Alaskan communities maintaining programs and implementing policies that promote no tobacco use and prevent secondhand smoke exposure, and more training and technical assistance to those communities.
- More Alaskan schools implementing programs and policies to promote no tobacco use among children and training and technical assistance to these schools.
- Support to Alaskan employers to implement and maintain policies and programs that promote no tobacco use and reduce exposure to secondhand smoke.
- Improved reporting and evaluation system for community- and school-based tobacco prevention and control in order to identify promising practices that can be replicated in other communities.

#### COMMUNITY-BASED SECONDARY PREVENTION

Health care systems and providers play an important role in reducing tobacco use. Evidence-based clinical practice guidelines describe a variety of strategies for health care systems that are effective in helping tobacco users to quit, including brief advice by providers to quit, and provision of FDA-approved medications. Population-based cessation, such as the Alaska Tobacco Quit Line, is an additional proven strategy. The Division of Public Health will increase the number of health care centers that receive funding to implement health system changes that support tobacco cessation; provide training and technical assistance to those health care centers; and increase the capacity of the Alaska Tobacco Quit Line to provide direct support to tobacco users statewide who want to quit.

Following are examples of expected impacts of these community level activities:

- More Alaskan health care centers maintaining comprehensive tobacco cessation programs that systematically

### Public Health (continued)

### Chronic Disease Prevention and Health Promotion (continued)

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

identify tobacco users and assist them to quit.

- Training and technical assistance to health care centers and providers implementing comprehensive tobacco cessation programs.
- Increased capacity for the Alaska Tobacco Quit Line to provide counseling and medication to tobacco users statewide.
- More Alaskan tobacco users making quit attempts and more increasing their chance of success by using cessation programs including the Alaska Tobacco Quit Line in order to quit.

#### PROVIDER-BASED SECONDARY PREVENTION

The division will integrate how risk factors for cardiovascular disease are addressed by removing barriers that prevent practitioners from simultaneously treating high blood pressure and tobacco use.

Following are examples of expected impacts of these community level activities:

- Describe the current practice standards of health care providers for treating tobacco users with high blood pressure.
- Describe the barriers preventing health care practitioners from simultaneously prescribing tobacco cessation medications while treating high blood pressure.
- Training and technical assistance to health care providers to systematically treat tobacco use and high blood pressure using an algorithm approach.

#### **MEDIA**

Research shows that counter-marketing promotes quitting, decreases the likelihood that individuals will start to use tobacco, and supports community efforts to create tobacco-free social norms. The division will expand the existing statewide tobacco prevention and control media program to increase the duration and intensity of statewide urban and rural tobacco prevention media, including more specific messages targeting youth and populations known to have high rates of tobacco use (Alaska Natives, Alaska Native youth, smokeless tobacco users, Alaskans with lower educational attainment, low income Alaskans), and more messages that describe the link between tobacco use and heart disease and stroke.

Following are examples of expected impacts of these community level activities:

- More incentives to quit tobacco through widespread understanding of heart disease and stroke as major health effects of tobacco use.
- More widespread awareness of the health effects of secondhand smoke.
- More widespread awareness of cessation resources, including the Alaska Tobacco Quit Line, by population segments with high rates of tobacco use.
- Evaluation of expanded media efforts in order to ensure that they effectively reach Alaskans, especially population segments most affected by tobacco use.
- Increased education for health care providers regarding tobacco cessation treatment protocols while treating high blood pressure.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. If funded, it will provide multiple Alaskan communities with resources that can be used to begin the work to reduce the burden of tobacco use and to increase positive health outcomes of all Alaskans. The return on investment of these increment dollars will be

### Public Health (continued)

### Chronic Disease Prevention and Health Promotion (continued)

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the activities bulleted above), 2) interim impact goals (e.g., decreased exposure to secondhand smoke, decreased tobacco consumption, increased quit attempts), and 3) desired long-term outcomes (e.g., reduced tobacco use, reduced illness and disability due to cancer, heart disease, stroke, respiratory disease).

This increment will bring Alaska closer to the minimum amount (\$8,100.0) recommended by the U.S. Centers for Disease Control and Prevention as needed to fund a successful comprehensive tobacco prevention and control program for our state. This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU and the DHSS agency budget for reduction of cancer deaths and heart disease deaths.

#### MISSIONS AND MEASURES REFERENCE:

Public Health M&M for heart disease death rate (A:3)

Public Health M&M for cancer death rate (A:4)

Public Health M&M for prevalence of tobacco use in Alaskan youth (A2:1)

The requested \$343.7 Tob Ed/Ces funds will support activities as follows:

#### Personal Services - \$171.2 (2.0 New FTE's) \$28.8 (under-funded existing FTE's)

These funds will support one new Public Health Specialist I to support development and implementation of comprehensive school based tobacco prevention programs; one new Associate Coordinator to oversee implementation of a strategic plan to identify and eliminate tobacco related disparities; three Public Health Specialists (existing positions; under-funded) to provide technical expertise for the implementation and evaluation of an initiative to integrate tobacco cessation treatment with treatment for high blood pressure; and one Administrative Clerk (existing under-funded position) to provide clerical and administrative program support to this initiative.

#### Travel - \$ 15.0

These funds will be used for travel for training of new program staff and for new program staff to provide training and technical assistance to community sites.

#### Contractual - \$82.3

These funds will support routine administrative overhead costs associated with personnel maintenance, such as space lease, computer and human resources support, risk management, and communication costs.

#### Supplies - \$95.0

These funds will support purchase of educational supplies as well as computer and general office supplies for staff and desktop computers, software and other office equipment for new staff. In addition, these funds will also be utilized to purchase additional nicotine patches and cessation materials for distribution through the Alaska Tobacco Quit Line.

This increment will allow the Division of Public Health to address the following areas, as a part of the comprehensive, evidence-based statewide Alaska Tobacco Prevention and Control (TPC) Program, to stem the tide of increasing poor health and health care costs, and decreasing quality and length of life in Alaska due to tobacco use.

Travel - \$20.0

These funds will used to support grantees and other organization's staff travel and participation in FY09 training mentioned in the following paragraph. These funds will also cover travel for speakers.

#### Contractual Services - \$167.0

These funds will go towards the planning and support of different training opportunities. A series of trainings centered on capacity building and readiness geared towards communities not yet prepared to apply for the Community-Based Tobacco Prevention Grants, but ready to begin addressing tobacco issues will be provided. More training opportunities for our new school districts FY09 grantees, including training and in-service days on: curriculum, policy, capacity building, information and training for parent and community groups, and enforcement issues will also take place. Funding is needed for printing and greater dissemination of published reports and findings from the Alaska TPC Program, including poster presentations, and audiovisual displays.

#### WHY DOES IT MATTER TO ALASKANS?

Tobacco use is the number one cause of preventable death in Alaska. Of the adult Alaskan population: 24% of all adults, 48% of low income adults, 44% of Alaska Native adults, and 45% of adults with less than a high school education use tobacco. More than 77% of adult tobacco users in Alaska report that they want to quit. Each year, tobacco use and/or exposure to secondhand smoke cuts short the lives of nearly 600 Alaskans and costs the state over \$329 million in direct medical costs and lost productivity due to tobacco-related deaths. This amount is almost certainly an underestimate since it does not account for lost productivity from tobacco-related illness. At the same time, in 2003 it was estimated that the tobacco industry spends an annual estimated \$32.8 million in Alaska to promote tobacco use.

The number one cause of death in Alaska is cancer. Lung cancer, cancer of the oral cavity, esophagus, pancreas, cervix, colon and rectum are associated with tobacco use. In the Alaskan population, lung cancer is the most common and most fatal cancer, resulting in over 30% of cancer related deaths. Ninety percent of lung cancer is tobacco related. Many other health conditions are related to tobacco use. These include heart disease, stroke, emphysema, asthma, upper respiratory diseases, diabetes, and low birth weight babies.

Two new landmark reports issued this summer by the President's Cancer Panel and the Institute of Medicine, both recommend every state fund comprehensive tobacco prevention and cessation programs, at levels recommended by the Centers for Disease Control and Prevention, as one of the principle ways to combat tobacco-related disease and deaths. Currently, only three states - Maine, Delaware and Colorado - meet that standard. Alaska just reached the CDC minimum level funding recommendation in FY08 for the first time.

Given the high rate of tobacco use in Alaska and the disparities in tobacco use that exist in Alaska, it is vital to

FY2010 Cancer Registry, Retain Current Staffing Levels for the Alaska Cancer Registry	.04,											

Cancer is the leading cause of death in Alaska; it is in the public health interest of the State to ensure that the ACR is adequately funded so it can continue to collect data on the ongoing burden and status of this devastating

levels for the Alaska Cancer Registry (ACR). No new positions are requested with this increment.

disease. It is this knowledge that will lead to interventions and treatments that will ultimately save lives. State law

requires health care providers to report cancer under 7 AAC 27.011.

Center for Disease Control (CDC) requires that the State match \$1 for every \$3 of federal funds. CDC funding for the registry has remained flat for many years while costs have risen. Due to flat funding, one administrative position to support the program already has been eliminated; without this increment additional reductions will be necessary and the quality of data will suffer. This in turn will ieopardize further CDC funding because the state's overall Cancer Program will not meet established reporting standards.

The mission of ACR is to identify all reportable cancers in Alaska to provide information on the overall burden, types, and changing patterns of cancer among residents. This information is cumulative over the lifespan of each Alaska resident who is diagnosed with cancer and it contributes to our understanding of this disease.

DHSS Priority: Health and Wellness (Prevention)

FY2011 AMD: ARRA Funding for Prevention and Wellness IncOTI 414.5 An American Recovery and Reinvestment Act (ARRA) Prevention and Wellness funding opportunity was announced in September 2009 for Communities Putting Prevention to Work, State Supplemental Funding for Healthy Communities, Tobacco Control, Diabetes Prevention and Control, and Behavioral Risk Factor

Surveillance System.

There are two purposes for this funding: 1) policy and environmental change related to obesity/overweight, physical activity, nutrition and tobacco use and 2) enhancement of tobacco quit lines and associated media. Funds will also be used to pay for one (existing) FTE (Public Health Specialist II) and related supported costs which have largely been funded through federal earmarks, which expire September 2010. Activities will focus on implementing policies to a) improve nutrition, b) increase physical activity and c) promote tobacco cessation through enhanced

### Chronic Disease Prevention and Health Promotion (continued)

FY2011 AMD: ARRA Funding for Prevention and Wellness (continued)

media promotion and outreach for the Quit Line with a follow-up evaluation.

One goal is implementation of policies and food systems changes that improve availability and affordability of healthy local foods, thus, increasing the intake of fruits and vegetables, and reducing the prevalence of obesity in Alaska. To increase physical activity, the State will work with physical education (PE) stakeholders to increase quality PE in schools, and implement strategies to reach the goal of providing quality daily PE to all students (or 150 minutes per week at the elementary level and 225 minutes per week at the secondary level). The Obesity Prevention and Control Program will work primarily on adoption of PE Content Standards by the State Board of Education, and establishment of a statewide PE coordination position. Funds will also be used to enhance the Tobacco Quit Line and building public support for smoke free air policies.

The cumulative amount of the grant over the 24-month period is projected to be \$828.9. About \$207.2 will be needed in FY10 with the remainder spread over FY11 and FY12. This increment request for \$414.5 federal ARRA funds represents the amount of additional authorization needed in FY11.

This funding will improve the DHSS performance related to healthy people in healthy communities in the two

5.7% adult diabetes prevalence for 2005-2007; prevalence has increased 40% since 1998-2000. 28.2% adult obesity prevalence for 2007 continues worsening trend and is higher than the 26.3% national average.

1212 Stimulus09 (Fed) 414.5

FY2011 AMD: ARRA funding for Communities Putting Prevention to Work

Inc0TI 2.856.3 281.4

27.3

252.8

2.4

2.292.4 0.0

An American Recovery and Reinvestment Act (ARRA) Prevention and Wellness competitive funding opportunity was announced in September 2009 for Communities Putting Prevention to Work. Eligibility for Alaska is limited to tribal organizations and the state, which can apply on behalf of up to 2 communities. The Centers for Disease Control specified that communities must have existing coalitions in place that are ready to begin utilizing these funds as soon as they become available.

Seventy-five percent (75%) of the funds will be awarded to the communities as grants for services described below. Anchorage and Wrangell have been selected based on their comprehensive plans for how they would spend these funds. Anchorage will receive \$2.5 million and Wrangell \$2.1 million over the 24 month project.

The remaining 25% of this total grant award will be used to manage the grant funds and provide technical assistance. Two, long-term non-perm positions (1.75 FTE) will manage these grant programs. The grant will also support the Obesity Prevention and Control Program Manager position at 0.75 FTE, an existing epidemiologist/data collections position at 0.25 FTE, and an existing public health specialist position at 0.5 FTE. Two of these positions are currently funded by a federal earmark, which ends September, 2010.

The Municipality of Anchorage will focus on increasing physical activity and access to healthy foods through social networking, media, and other communication strategies. The Healthy Wrangell Coalition will also focus on increasing physical activity and healthy foods. They will implement worksite health promotion programs at their largest worksites; assist the Wrangell Community Garden, the Wrangell Recreation Center, and community eateries in developing business plans that expand services and improve the nutritional content of food served; and

Chronic illnesses such as diabetes, high blood pressure, stroke, and cancer are among the leading causes of premature mortality in the state of Alaska. Obesity is a significant contributor to these chronic illnesses.  Obesity-related chronic illness treatment costs the state \$477 million per year. This is higher than the \$380 million/yr cost associated with tobacco-related illnesses. While adult obesity rates are alarmingly high (66% of adults are currently either overweight or obese), obesity rates among children portend growing future problems in these public health areas. 27% of current high school students are either obese or overweight, and approximately 40% of incoming kindergarten age children fall in this category. Approximately 40% of children who are already obese demonstrate cardiovascular risk factors such as high blood pressure or high blood cholesterol.  The department has recently established a comprehensive working model for addressing obesity that involves community groups ranging from school boards and PTAs, to faith groups and food banks. In Anchorage, cooperation between the department, the Anchorage Mayor's Task Force on Obesity and Health, and the Anchorage School District leveled the trend of increasing obesity in children. This demonstrates that working models to reduce obesity exist and can be built upon to combat this growing epidemic.

Chronic Disease Prevention and Health Promotion (continued)

FY2012 CC: Alaska Family Violence Prevention Project: the Connection between Dating Violence, Substance Abuse and Brain Dev (continued)

Director and Project Coordinator budgeted positions are funded on a year-to-year basis and there is only enough funding for the Project Director to work part-time (0.8 FTE). There is no funding to develop materials or travel to work with service providers on prevention strategies. A few trips a year are possible through the generosity of third parties.

Alaska has the highest domestic violence homicide rate in the U.S.--nearly twice the national rate. Nearly 1 in 4 (22%) Alaskans have experienced domestic violence in their lifetime. Dating violence is a precursor of domestic violence, the focus of a current initiative by Governor Parnell. Dating violence is associated with substance abuse among youth, and both are predictors of additional risk behaviors, as well as a host of negative health outcomes--including those affecting brain development. Levels of both dating violence and substance abuse are high in Alaska youth:

- 13% of Alaskan teens have been hit, slapped or physically hurt by a dating partner;
- 21% of high school students had 5 or more drinks of alcohol in a row in the past 30 days;
- 44.5% of high school students have used marijuana 1+ times; 7.4% have used cocaine.

Preventing dating violence and substance abuse promotes optimal brain development, improves adolescent health and wellness, and interrupts the cycle of relationship violence. By abstaining from violence in relationships and substance abuse Alaska youth maximize their brain potential. Disseminating state-of-the-art information to service providers and youth can lead to earlier detection of emerging problems, more effective intervention, and scientifically informed policies and practices.

The Alaska Family Violence Prevention Project, a nationally recognized best practice program for violence prevention, uses a train-the-trainers (TTT) program to efficiently create and support multidisciplinary teams of educators, health care providers, public health nurses, and behavioral health/substance abuse professionals. These individuals become local training resources and community change agents to promote sustained primary prevention. By supporting regional teams with training, technical assistance, and prevention resources, prevention can be initiated and sustained at the local level in the most economical, yet effective way.

This request will allow full funding for the two existing positions as well as a train-the-trainer conference (travel/ per diem, speakers, conference coordinator and site), provide professional development and technical assistance (including travel to sites); purchase prevention curricula and tools; and print and disseminate resource materials for providers.

This increment will enable the AFVPP to provide these services to support the TTT teams:

- Integrated curriculum on dating violence, substance abuse, adolescent brain development and prevention strategies to be disseminated through TTT teams;
- Integrated assessment tools for dating violence and substance abuse that can be used in health care settings including school health;
- Technical assistance and site visits to teams to facilitate local training, policy development, and implementation of prevention strategies;
- Educational resources for service providers and parents;

Control											

This request is tied to and supports the Tobacco Prevention and Control component's request to expand tobacco cessation efforts. Every \$1 spent on tobacco prevention and control saves \$3 in health care related costs.

Funds will enhance a key database, the Behavioral Risk Factor Surveillance System, used for planning and assessment of tobacco prevention and control efforts through 1) a data collection system contract to augment BRFSS; 2) travel to conduct cessation outreach activities and site visits for grantees; 3) supplies for cessation outreach activities for local communities; and 4) partial funding (0.1 FTE) of an existing position to oversee and manage the data collection contract.

Tobacco remains a significant public health problem in Alaska, killing nearly 600 people annually and generating almost \$380 million in medical costs and lost productivity each year. Alaska has made considerable progress in reducing the burden of tobacco use by implementing a sustained, comprehensive tobacco prevention and control program that includes a tobacco Quit Line, media, community programs, and grants to schools and healthcare organizations. Since the inception of the program adult smoking rates have declined significantly and youth smoking rates have been cut in half.

Despite the progress made, tobacco use remains a critical health issue in Alaska and disproportionately affects Alaska Natives, individuals of low socioeconomic status, and rural residents. Forty-one percent of Alaska Natives adults smoke, compared to the state average of 22%. Smoking prevalence among adults of lower socioeconomic status is 38%, and 36% of adults living in rural areas report being current smokers.

As the program continues to grow there are increasing calls from partners and stakeholders for community-level prevalence data, as well as more detailed information on various aspects of tobacco use and cessation, including barriers to successful quitting, reasons for relapse to tobacco use, and utilization of cessation services. Central to the success of a comprehensive Alaska tobacco prevention and control program is a robust data system that can reliably collect quality data on the prevalence of tobacco use. Such data allow the program and its partners to monitor trends, evaluate the success of programs, and provide critical input into program and service development and implementation.

To date, the majority of these data needs have been met by the Alaska Health Survey Lab within the Section of Chronic Disease Prevention and Health Promotion; however, the Health Survey Lab does not have staff capacity

Chronic Disease Prevention and Health Promotion (continued) FY2015 CC: Reduce Authority in Order to Sustain Long-Term Tobacco Prevention and

Control Efforts (continued)

averted. Studies estimate that for every 1,000 youth kept from smoking by a state program, future healthcare costs in the state decline by roughly \$16 million. The true return on investment is not just measured in health care costs, but also in the lives saved from tobacco-related death and the quality of life improved among those who are tobacco-free.

The Tobacco Prevention and Control program is mostly supported by the Tobacco Use Education and Cessation Fund. In FY2014, the Division of Public Health received about 90% of the \$10.4 million appropriated from the fund. The fund, which had a current balance of \$10.2 million at the end of November, receives annual revenues of about \$9 million composed of approximately 1/3 cigarette taxes (received monthly) and 2/3 tobacco master settlement agreement (received annually in April). Since FY2011, annual expenditures have outpaced revenues, requiring a drawdown of the surplus balance. Without action, current projections indicate that by FY2017 the program is expected to run into cash flow issues and by FY2019 will be facing a shortfall. In FY2014, the Tobacco Use Education and Cessation Fund appropriation was reduced by \$746.4 (6.7% of \$11.1 million overall). This reduction was not sufficient to fully restore balance to the Tobacco Use Education and Cessation Fund. This reduction of \$1,600.0 represents the maximum decrement needed to reduce spending to bring the fund back into balance.

The program and its partners recognize that stable and sustainable funding from the Tobacco Use Education Cessation Fund is essential to ongoing tobacco prevention and control efforts. In order to sustain the Tobacco Use Education and Cessation Fund for the long-term, a sufficient balance must be maintained to provide cash flow and annual expenditures need to be in line with revenues. The division and its partners have committed to developing a joint 3-year plan for a balanced and sustainable fund that maintains outcomes at the highest level possible.

In FY2013, the Centers for Disease Control and Prevention ranked Alaska number one at 101.6% in spending. The full decrement results in a level of funding that is 82% of the CDC recommendation, ranking Alaska number two. A reduction of \$1.6 million will impact Alaskans. Studies of other states that reduced their anti-tobacco programs show that reducing program efforts resulted in increased tobacco use. While the likelihood exists for increased rates of tobacco use in the short term, failing to address the impending shortfall in the fund puts at risk the progress made over decades. If we do nothing the reality will be a negative cash flow which would prevent timely payments to grantees which in turn would mean grantees would not be able to provide services and the effect could be much greater. Long term sustainability will assure that the fund is available for tobacco prevention and control activities for the future. By working with our partners and stakeholders the program will be able to retool and reduce services while maintaining outcomes at the highest level possible. The fund balance is more than sufficient to allow for a phased approach which will mitigate the impacts.

FY2016 AMD: Reduce School Districts' Grants for Obesity Prevention, Reduce Travel, and Hold Positions Vacant Implement the following items to reduce spending:	Dec	-157.5	-47.1	-4.6	-45.2	0.0	0.0	-60.6	0.0	0	0	0

- Reduce Anchorage-Juneau in-state travel for supervision of Juneau staff from three trips to one.
- Eliminate one out-of-state trip to the Council of State and Territorial Epidemiologists Conference
- Reduce by 150 the number of surveys conducted by the Behavioral Risk Factor Surveillance System
- Eliminate funds to procure a Cancer Registry contract
- Reduce Alaska Family Violence Prevention Project contractual funds by 50 percent
- Reduce seven of the grants to school districts in the Obesity Prevention program.
- Hold positions vacant for additional time when vacancies occur

#### CONSEQUENCES

- The Section staff is housed in Anchorage and Juneau offices. This proposal reduces travel between Anchorage and Juneau to one trip annually for on-site supervision of staff. One out-of-state trip to an Epidemiology Conference is omitted.
- A reduction in the cancer registry contractual services may result in failure to meet national data quality standards. These are required matching funds and there is a risk of losing federal dollars. This contract has been necessary to ensure compliance with grant and cancer registry national standards. The Behavioral Risk Factor Surveillance System is the only source for representative statewide data for many chronic health conditions, risk factors, and injuries. These data are vital to program planning and evaluation by state local, tribal, and non-profit organizations. Effectiveness and efficiency can be measured by sample size and the size of the confidence intervals around estimates produced from these data. Estimates will not be as precise and the ability to provide data, in particular for small areas and important disparate groups, would be reduced. Reducing funding for the Alaska Family Violence Prevention Project's training contract will decrease the availability of information and technical assistance in the implementation of evidence-based practices for assessment and intervention of childhood exposure to violence and other adversities. This is at a time when communities and organizations are increasingly aware of the long-term impact of victimization on leading public health issues in Alaska including school readliness and performance, substance abuse, suicide, and obesity. These reductions will impact Division of Public Health Outcomes to "reduce preventable death, disease and injury," and to "produce and release meaningful and timely public health data."
- Each of the seven school districts' obesity prevention grantees (Ketchikan, Kodiak, Mat-Su, Nome, North Slope, Petersburg, Sitka) will be reduced. They will reduce supplies to support student nutrition and physical activity goals, as well as to travel for staff training in evidence-based best practices for obesity prevention. Schools play a key role in the prevention of obesity, a high priority of the Division of Public Health. Grantee efforts to create supportive nutrition and physical activity policies and programs at school can improve the health of over 25,000 Alaskan kids. This proposal will reduce our capacity to promote and protect the health and well-being of Alaskans.

Prevention and Control Fund  Reduce the Tobacco Use Education and Cessation Fund appropriation for the Division of Public Health by \$375.0 as part of the multi-year plan for fund sustainability.  This fund has previously been reduced by \$1,146.4 to date or 10.3 percent of the \$11.1 million starting point (\$746.4 in FY2014 and \$400.0 in FY2015). The proposed FY2017 reduction is not sufficient to fully restore balance to the fund and future reductions are anticipated in FY2019 and FY2021. Long-term sustainability will assure that the fund is available for tobacco prevention and control activities for the future. By working with our partners and stakeholders, the program will be able to retool and reduce services while maintaining outcomes at the highest level possible.  The Tobacco Prevention and Control program is mostly supported by the Tobacco Use Education and Cessation Fund. Without action, current projections indicate that the program is expected to run into cash flow issues by FY2020 and will be facing a shortfall by FY2021.  Between FY2011-2014, annual expenditures outpaced deposits, requiring a drawdown of the surplus balance. The Tobacco Use Education and Cessation Fund, which had a current balance of \$11.8 million as of August 13, 2015, receives annual deposits of about \$9 million composed of approximately one-third cigarette taxes (received monthly) and two-thirds tobacco master settlement agreement (received annually in April).

The control of infectious diseases has become increasingly complex and challenging. Over the past 30 years more than 30 new infectious diseases have been discovered; recent examples are SARS and the H5N1 strain of avian influenza. To truly protect the health of Alaskans, the Division of Public Health must sustain well-established core public health programs such as tuberculosis control and immunizations, while taking on new challenges, such as pandemic influenza planning and bioterrorism preparedness. This \$1,000.0 GF request in Epidemiology will help modernize and strengthen an aging and under-funded infectious disease control system to keep Alaskans safe and secure from old and new infectious disease threats and public health emergencies. Associated requests for infectious disease control are included in the Nursing and Public Health Laboratories components.

Strengthening our surveillance capacity and outbreak response will assure that communicable diseases are detected earlier and that fewer Alaskans become ill. A stronger epidemiologic outbreak team will give us a better foundation for response to a disease outbreak, and will provide each contact with a timely health evaluation, education and preventive treatment. This core public health activity will help provide a strong foundation to respond to public health emergencies, to track emergency events, to mount mass vaccination and prevention clinics, to rapidly diagnose cases and to quarantine and isolate to contain disease. These are formidable tasks, but absolutely necessary if the health of Alaskans is to be protected.

### Public Health (continued) Epidemiology (continued)

FY2007 Public Health Protection: Infectious Disease Control and Emergency Preparedness (continued)

New challenges that threaten to shift attention away from core activities have resulted in resurgence of diseases that have previously been contained. We saw this happen at a national level with measles in the 1980s, tuberculosis in the 1990s, and syphilis more recently. Even today, the Division must work hard to keep long-time public health threats under control.

- During the first 9 months of 2005, 82 cases of pertussis (whooping cough) have been identified, in spite of an effective childhood vaccine.
- ' In 2000, Alaska reported the highest rate of tuberculosis in the country because of several large outbreaks. There have been no large outbreaks since 2000, but Alaska continues to be among the top five states with the highest TB rates in the U.S.
- ' In 2003 Alaska had the highest rate of chlamydia disease in the U.S., with 3,900 cases for a rate of 606 cases per 100,000 population.
- In 2004, Alaska ranked 45 of 50 states with only 75.3% of 0-3 year old children fully immunized.
- ' The Division responds to outbreaks related to tourism almost every summer. Large summer influenza outbreaks strain resources, Norovirus outbreaks on cruise ships frequently overflow into coastal communities, and cases of tuberculosis, typhoid and malaria among cruise ship employees are cared for in Alaska hospitals.

Of the emerging public health threats, a new deadly strain of avian influenza (H5N1) is most concerning. This virus has only been found in Asia, and to date has had limited impact on humans, with 125 human cases and 64 deaths reported worldwide as of 11/9/05. There has not been well-documented person-to-person spread yet, however the death rate from avian influenza is over 50%. With such a high death rate, no vaccine readily available, and limited antiviral drugs, a human epidemic of avian influenza would be devastating and Alaska is potentially at higher risk due to direct air and shipping links to Asia, as well as migratory bird routes.

Public Health must have the capacity to sustain core ongoing activities, while simultaneously developing an agile and flexible posture to address new, unknown threats such as avian flu. The Division has become integrally involved in emergency and disaster preparedness planning at the national, state and community levels. This has required additional resources to participate in preparedness planning activities and exercises, but will serve us well in the event of a disaster.

To control old infectious disease challenges, and detect and respond to new agents, the Division must have a multi-pronged approach. The Sections of Epidemiology, Public Health Nursing, and Public Health Laboratories are each integral and interdependent when it comes to disease control - working together in a continuous cycle of discovery, investigation, intervention, monitoring and reporting.

In order to effectively conduct disease surveillance and outbreak response, the Section of Epidemiology must:

- Strengthen ongoing disease surveillance to improve day-to-day reporting of important public health diseases.

### Public Health (continued) Epidemiology (continued)

FY2007 Public Health Protection: Infectious Disease Control and Emergency Preparedness (continued)

- Maintain sufficient and well-trained staff capacity for early recognition and rapid response to outbreaks, able to mobilize quickly, 24 hours a day, seven days a week, to investigate unusual events anywhere in the state. These staff make up the Surveillance and Outbreak Investigation Team for the Division. Members of this Team must be licensed physicians, nurses or veterinarians, and each individual must be able to lead an epidemiological investigation for an infectious disease event anywhere in Alaska. Each individual serves as expert consultants to Public Health Nurses, midlevel providers and physicians for a wide range of diseases. They must have an understanding of statistics and be able to use investigational software tools to evaluate risk to individuals and communities. They must be able to prepare and update disease control protocols and emergency preparedness plans. These staff can also provide surge capacity for community-based public health activities such as mass immunization and prevention clinics.
- Maintain a second team specially trained in AIDS and sexually transmitted disease (STD) control, who travel to all parts of the state to conduct investigations into STD outbreaks, work with Public Health Nurses and other health care providers to treat cases and to examine and, where appropriate, treat partners. Members of this team provide consultative expertise to medical providers for the diagnosis and treatment of HIV, AIDS and other STDs. They monitor disease trends and prepare reports about efforts to control AIDS and STDs in Alaska.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the number of cases of disease investigated and the number of emergency exercises sponsored), 2) interim impact goals (e.g., increased immunization rates), and 3) desired long-term outcomes (e.g., reduced illness, disability and death due to infectious diseases). This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU for reduction of tuberculosis and chlamydia incidence rates.

This \$1,000.0 GF request will support activities in the Division of Public Health's Section of Epidemiology, as follows:

#### Personal Services - \$842.1: 3 New FTE

These funds will support three Nurse Consultant II positions (1 new PCN 06-#048, 2 existing insufficiently funded FTEs) who will provide the capacity to respond rapidly to investigate and control outbreaks in all region of the state. These positions will also provide consultative expertise to Public Health Nurses, private providers and the Anchorage Department of Health and Human Services. They will collect, evaluate and analyze all infectious disease reports to the Division, and serve as an expert liaison with other emergency response partners at the state and federal level. A Public Health Medical Specialist will provide medical expertise and consultative support to the Nurse Consultants and other health care providers in the state, develop intervention programs, oversee outbreak activities, respond to public health emergencies, and serve as an expert liaison with other emergency response partners at the state and federal level. A Public Health Veterinary Epidemiologist will provide expert consultation on diseases transmitted from animals to humans, will participate as a leader on disease outbreak investigation teams, and will conduct epidemiological studies. The medical public health specialist and veterinary epidemiologist are existing positions that are insufficiently funded. Two new Public Health Specialist positions (PCN 06-#049 and PCN 06-#050) will expand the capacity to identify, locate and treat partners of patients with

Travel - \$67.3 These funds will support travel from Anchorage to communities around the state by Outbreak Investigation Teams from the Section of Epidemiology to respond to new disease outbreaks, perform partner notification, and conduct population-based screenings for tuberculosis. Contractual - \$45.6 These funds will support administrative overhead costs associated with personnel maintenance, such as space lease, computer and HR support, risk management, and communication costs. Supplies - \$45.0 These funds will support pharmaceuticals and medical supplies for detection and treatment of infectious diseases; computer and general office supplies; and office equipment. 1004 Gen Fund (UGF) 500.0 Inc 563.6 0.0 0.0 0.0 563.6 0.0 0.0 FY2007 Public Health Protection: Pandemic Influenza Preparedness AK Stockpile of Antiviral Drugs An influenza pandemic has the potential to cause more disease and death than any other public health threat. Influenza pandemics occur when a new strain of influenza emerges that can be transmitted easily from person to

An influenza pandemic has the potential to cause more disease and death than any other public health threat. Influenza pandemics occur when a new strain of influenza emerges that can be transmitted easily from person to person. Three such pandemics occurred during the past century and as many as 10 are thought to have spread around the globe during the past 300 years. Given the rapid spread of influenza pandemics in the past, global transmission of the first pandemic of the 21st Century over a period of weeks to months seems assured. Although recent instances of bird-to-human and limited human-to-human transmission of H5N1 influenza in Asia have raised concerns that a new pandemic may occur soon, the timing and severity of the next pandemic, as well as the viral strain responsible, cannot be known with certainty.

Preparedness will be vital to reducing the health effects of the next influenza pandemic. In the absence of intervention, a severe influenza pandemic, such as the Great Pandemic of 1918-19, could sicken nearly 200,000 Alaskans and kill as many as 4,000 over a period of several months. Even a milder pandemic, such as those that occurred in 1957 and in 1968, could cause hundreds of deaths and the economic effects could be considerable. Because a vaccine against a new pandemic influenza strain would not be available using current technology at the beginning of the next pandemic, and isolation and quarantine procedures would be expected to only slow but not stop spread of infection, antiviral drugs are an important part of the preparedness plan for the next pandemic.

On November 2, 2005, the US Department of Health and Human Services released the national Pandemic Influenza Plan. The plan calls for national stockpiles of antiviral medications for use in the event of a pandemic, as well as stockpiles of antiviral drugs within states. Federal support of procurement of state stockpiles will be limited to 25% of purchase costs. The plan also identifies priority groups for treatment with antiviral drugs. Based on projected needs contained in the national Plan, treatment of the top five priority groups (persons hospitalized with influenza; health care workers and emergency medical providers; immune compromised persons and pregnant women; public health and safety workers; and persons aged 12-23 months, aged 65 years and older, and those with chronic medical conditions) would require approximately 62,000 courses of antiviral drug. In order

#### Public Health (continued) Epidemiology (continued)

FY2007 Public Health Protection: Pandemic Influenza Preparedness AK Stockpile of Antiviral Drugs (continued)

to stockpile 30% of this need in-state (the remaining 70% anticipated from the Strategic National Stockpile), 18,600 courses would need to be procured by the state at \$50/course.

In addition to the purchase for treatment of ill priority groups, an additional 6,000 courses should be purchased for preventive treatment for a limited number of essential workers before onset of illness.

#### Performance Measure

This increment request will establish an in-state stockpile of antiviral drugs that would be immediately available for distribution throughout Alaska using established mechanisms to provide treatment to persons at highest risk of severe illness or death from influenza and to those needed to return to work as soon as possible after recovery in order to provide essential functions. Additionally, a smaller portion of the state stockpile will be available for preventive treatment of a limited number of essential workers at high risk of becoming infected.

The control of infectious diseases has become increasingly complex and challenging. Over the past 30 years more than 30 new infectious diseases have been discovered; recent examples include SARS and the H5N1 strain of avian influenza. To protect the health of Alaskans, the Division of Public Health must sustain well-established core public health programs such as tuberculosis control and immunizations, while taking on new challenges such as pandemic influenza planning and bioterrorism preparedness. For FY07, \$500.0 was appropriated for the Section of Epidemiology to help modernize and strengthen an aging and under-funded infectious disease control system and to protect Alaskans from old and new infectious disease threats and public health emergencies. This request for \$221.0 adds additional critical capacity by funding two additional activities: 1) Operations of the Alaska Immunization and Disease Reporting Registries and 2) Completion of Tuberculosis Treatment.

Operation of the Alaska Immunization and Disease Registries, \$121.0 - In FY 2007, the capital budget included a \$1.7 million GF investment to establish a real-time, secure electronic registry of immunization records and reportable conditions data. This new system is now in the process of being procured and an operating budget increment is needed to staff the operation of these registries. A statewide immunization registry is necessary to allow providers to quickly and accurately determine which vaccines each Alaskan child needs anywhere in the state. A registry will improve the efficiency of vaccine administration by saving time searching for medical records and by eliminating repeated, unnecessary vaccinations. A robust, adaptable electronic communicable disease surveillance system will streamline the input and analysis of reportable diseases to allow rapid detection of unusual disease trends and rapidly detect outbreaks. A portion of the increment will provide staff capacity for registry program development and implementation.

Alaska's children frequently receive immunizations in a variety of settings resulting in scattered and incomplete immunization records. Because our state lacks a centralized patient immunization record, medical providers, schools, and parents expend a large amount of time determining each child's immunization history. Incomplete and/or unverified information results in children being inadequately protected from vaccine-preventable diseases or, in some cases, being over-immunized due to unnecessary repetition of doses.

### Public Health (continued) Epidemiology (continued)

FY2008 AMD: Public Health Protection: Infectious Disease Control (continued)

There are approximately 10,000 children born each year in Alaska. At the time of the 2000 census there were 208,117 children 0 - 18 years of age in Alaska. Ultimately, immunization information about each child in Alaska will be housed in the Alaska Immunization Registry. During 2006, each child received immunizations to prevent 12 diseases requiring around 20 injections from birth up through the age of 18. The number of injections depends on age at vaccination and what vaccine combinations are used; total doses could be less or even greater than 20. Assuring that each child is protected against all vaccine-preventable diseases becomes even more complex and challenging as new vaccines are developed and added to the immunization schedule. For example, in 2007, two new vaccines were added to the national immunization schedule and these will be available to children in Alaska this year.

In addition to childhood records, immunization records for adults - including public health providers and first responders - will also be housed in the system. If mass prophylaxis or vaccinations are necessary in a public health emergency, all of these people will be entered as well.

Four primary groups will benefit from an immunization registry: 1) providers, 2) patients and Alaska citizens, 3) public health and Alaska Native health corporations, and 4) schools/child care providers. Improvements over the current methods for tracking immunizations include automated reminders, electronic vaccine inventory management, reduced time for record tracking, and opportunities to increase immunization rates while reducing over-immunization of individuals.

The value of an immunization registry crosses state boundaries. Following Hurricane Katrina, children were displaced throughout the country. Many lost everything, including their immunization records, and faced challenges meeting immunization requirements to get into schools in other states. The Louisiana Immunization Registry was quickly reconfigured to provide interstate access, which proved invaluable in getting these children into school.

This increment also addresses the need for a communicable disease surveillance system for input and analysis of reportable diseases to allow rapid detection of unusual disease trends or an outbreak. There are 54 infectious diseases that are reportable in Alaska. In 2005 there were 6,164 infectious disease reports that were entered into the existing data system. The purpose of disease reporting is not always to provide services, and not every report of a disease results in direct services. Still, it is estimated that some form of intervention is provided for 70-80% of these reports (4,207 - 4,809 people). However, information about the services provided for contacts to infectious conditions such as chlamydia, HIV, tuberculosis, meningococcus, and other diseases where follow-up and treatment are indicated is fragmented in numerous different data systems, so comprehensive reporting is not possible. An electronic communicable disease surveillance system would allow direct electronic reporting by providers throughout the state and would record, monitor, and track each reported case. It would also allow the division's epidemiologists to rapidly analyze disease trends and map occurrences of a disease, a capacity that is critical both to detect and to respond to an infectious disease emergency.

#### RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the number of immunizations administered and tracked), 2) interim impact goals (e.g.,

FY2008 AMD: Public Health Protection: Infectious Disease Control (continued)

increased immunization rates), and 3) desired long-term outcomes (e.g., reduced illness, disability and death due to infectious diseases). This investment will contribute to meeting or exceeding the end results targets included in the Public Health Division for reduction of tuberculosis and chlamydia incidence rates.

The requested \$121.0 for immunization and disease registry operation will be distributed as follows:

Personal Services - \$91.0 (1 New FTE)

These funds will support a new Health Program Manager II who will serve as the manager for the registries. Implementation and ongoing management of the registries requires continuous education of and marketing to health care providers across the state, user training, coordination and oversight of day-to-day operations, and data analysis and use. This position will be responsible for planning the systems, developing informational materials and conducting provider recruitment (soliciting health care providers to participate in the registry), developing and providing user training.

Travel - \$15.0

These funds will support travel for registry system recruitment of health care providers and user training for health care providers across the state.

Supplies - \$15.0

These funds will support the purchase of office equipment for this new position, a computer and education materials.

Tuberculosis Control, \$100.0 - Tuberculosis (TB) has been described as the "Scourge of Alaska." TB remains deeply entrenched in many regions of Alaska and will remain so for the next several generations. This is especially true for the Alaska Native population; in some communities up to 90% of Alaska Natives who are over 55 years old are infected with TB. The homeless and foreign-born residents also suffer disproportionate rates of TB. The resurgence of TB throughout the United States in the late 1980s and early 1990s demonstrates the ability of this disease to return when support for public health control programs flags. A strong public health team, knowledgeable about current issues of TB control, is necessary if we hope to control TB in Alaska.

The rate of TB in Alaska increased from 8.9 cases per 100,000 in 2005 to 10.5 in 2006, an 18% increase. Alaska's 2005 rate was almost double the national rate (8.9 vs. 4.8), the highest incidence rate of TB reported by any of the 50 states that year. In 2005, the Northern Region (which includes North Slope Borough, Maniilaq, and Norton Sound Regional Health Corporations) reported the highest incidence rate in Alaska at 59/100,000. An intensive TB control program by the Norton Sound Regional Health Corporation over the last 10 years has paid off by decreasing TB transmission among residents in its region. Still, 14 cases of active TB were found in the Northern Region last year, well above the previous year's case number of 2. Ongoing programs to control and limit the spread of TB in Alaska will be needed because of the large numbers of older Alaskans who were infected in their youth. These persons are at risk of developing active, infectious TB, and spreading the infection to others.

TB spread can be controlled and TB disease can be cured by providing appropriate medications and isolation.

Treatment of active (infectious) TB requires a minimum of 6 months using multiple medications. The TB patient must be in isolation, usually in the home environment, until treatment renders him or her noninfectious. Relapses of TB have occurred after patients have failed to complete a full course of treatment. Additionally, partial treatment

### Public Health (continued) Epidemiology (continued)

FY2008 AMD: Public Health Protection: Infectious Disease Control (continued)

is an important cause of multiple-drug resistant TB (MDRTB) strains. MDRTB is much more difficult and expensive to treat and to control. A 2004 MDRTB case cost the Alaska TB Control Program approximately \$55,000 to treat. The best method for providing curative therapy to persons with active TB is to provide directly observed therapy (DOT), where public health providers administer the medications to the patient throughout the course of treatment. In addition, TB patients need support during the prolonged treatment course. While infectious, patients are unable to work, to go to religious events, to visit with friends, or even go to the grocery store. Incentives and enablers are used to support the patient and encourage compliance with the necessary treatment to protect the public health. Examples of incentives are store coupons, small toys, a paperback book, a video to watch while in isolation. Examples of enablers, things that facilitate treatment completion, include food, utility bill payments, bus tokens, or temporary housing for homeless persons or those not yet able to fly home from treatment in a health care facility. Incentives and enablers are essential tools to control TB prior to implementation of legal actions such as a medical order or a court order.

#### RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

Past experience has demonstrated the TB control programs work and can reduce the rates of TB transmission. In 2004 86% of people in Alaska with TB completed treatment in a timely manner. This increment will support an increased treatment completion rate up to the target of 95% and will support reduction of Alaska's TB rate to the M&M target of less than 6.8/100,000 population.

The requested \$100.0 for tuberculosis control will be used as follows:

Contractual - \$50.0

These funds will provide client support during isolation and treatment and will support Directly Observed Therapy (DOT) activities.

Supplies - \$50.0

These funds will support purchase of tuberculosis medications and treatment incentives.

Vaccinating animals against rabies is a longstanding public health intervention that minimizes the potential for humans to contract rabies by creating a buffer between domestic animals and wildlife that serve as reservoirs of the rabies virus. Since the 1970's the Division of Public Health (DPH) has certified appropriate personnel as lay vaccinators to administer rabies vaccine to domestic animals. By regulation, only veterinarians and lay vaccinators may administer rabies vaccine to animals in Alaska. As well, only veterinarians, veterinary biologic supply firms, or public agencies may buy animal rabies vaccine. DPH buys rabies vaccine, syringes, and metal

The impact of this decrement is expected to be minimal. Many veterinarians in the state already purchase their own rabies vaccine directly because of brand preference or because we prohibit them from charging clients for state-supplied vaccine. Continuation of the purchase and distribution of vaccine and supplies to lay vaccinators, however, is extremely vital to continuing efforts to control rabies and protect human health.  1004 Gen Fund (UGF)  -40.0												
FY2009 Decrease Federal Receipts for Tuberculosis Control	Dec	-150.0	0.0	0.0	-150.0	0.0	0.0	0.0	0.0	0	0	0

Alaska has the highest rate of tuberculosis in the country; the disease - once called the "Scourge of Alaska" - can still kill our citizens. Four Alaskans died with TB in 2004 because of delayed diagnosis and treatment. TB is an equal opportunity disease. It is transmitted through the air and can infect anyone at any time. A recent high-profile international case involved an American attorney who crossed several borders with a contagious, highly dangerous drug-resistant strain of the disease; it is still not known how he contracted TB. Even young children can be infected: Since 2000, as many as 27 percent of the cases in Alaska have involved children. Last year, 10 percent of the TB cases in Alaska were pediatric cases.

The TB rate in Alaska is more than twice the national average. In 2006 in Anchorage alone, 41 cases of TB were reported. Despite hard work and strong coordination between the Section of Epidemiology and the Municipality of Anchorage, that outbreak is continuing. It has lessened because of timely and persistent work with infectious patients, but it is not over - and the necessary interventions take time and money. On average 16 - 18 "contacts" are identified for each confirmed case of TB in Alaska. Each of these "contacts" to the confirmed case must be located and tested to determine if they also have TB. Some people with suspected or actual TB are hard to locate; this requires labor-intensive, gumshoe detective work. For those who do contract the disease, the treatment regimen can require as many as 62 doses of medication administered over 6-9 months. Each dose can consist of as many as 15 pills and must be given under direct observation to be sure that the pills are actually swallowed. Without this increment, the state's ability to undertake these necessary contact investigations and to assure each patient completes the required therapy will be seriously jeopardized.

Lack of proper follow-through for any TB case is dangerous. For starters, a person with TB who is not properly treated is a risk to anyone else - at the movies, in a restaurant, on the bus. Also, lack of funding can increase the risk of multi-drug resistant TB (MDR-TB). The threat of deadly and costly MDR-TB is very real in Alaska, now a worldwide crossroads. In recent years there has been a steady increase in resistance to the cornerstone treatment drug, isoniazid - the greatest factor being the failure of patients to complete required therapy. This, in turn, allows the still-present disease to survive, mutate and spread. One MDR-TB case can cost more than \$100,000 to treat, while treating just two full-blown cases of extensively-resistant tuberculosis (XDR-TB) would likely cost in excess of \$1 million.

Alaska's TB Control Program has a long tradition of effectiveness - especially when today's rates are compared to the deadly outbreaks of the early to mid 20th Century. But it is a mistake to assume the war has been won. TB can

### Public Health (continued) Epidemiology (continued)

FY2009 Decrease Federal Receipts for Tuberculosis Control Program (continued) still be a killer in any corner of Alaska.

This request - to replace lost federal funds - is critical if the state is to successfully maintain control and treatment of TB in Alaska. Since 2000, base federal funding from CDC has decreased from \$495.8 in 2004 to the CY2008 projection of \$431.1. Actual purchasing power has been lost to inflation and other costs, such as the soaring price of TB medications. However, the biggest impact on the TB Control Program is the loss of additional funding from federal earmarks, totaling about \$1.4 million since 2000. The last earmark - \$496.0 in addition to base CDC funding - was expended in SFY07. An earmark request for FFY08 was rejected by Congress.

With the requested state funding, this program will provide:

- -Rapid detection of TB cases and outbreaks, to decrease transmission of the TB germ to other people.
- -Directly observed therapy--the curative treatment for each new case of TB
- -Contact investigations-timely investigation of each person who is a contact to a TB case, and where appropriate, treatment for TB infection or disease.
- -Enhanced TB control efforts in regions of Alaska with the highest rates of disease.
- -Tuberculosis medications for each Alaskan with TB disease or TB infection.

As a cost-saving measure, program activities and services t	that will ho	educed or elimin	ated include the f	allowina:								
in and out of state travel; hard convider thutton of Enidemi				•								

As a cost-saving measure, program activities and services that will be reduced or eliminated include the following: in- and out-of-state travel; hard-copy distribution of Epidemiology Bulletins; a portion of lease space costs for the Alaska Vaccine Depot will be paid for by the Alaska Vaccine Assessment Program; the Tuberculosis Program will no longer supply purified protein derivative (PPD) to low-risk schools in Alaska for Tuberculosis screening; and decreased spending on office supplies. Program work will continue to be accomplished by way of strategic planning, improving efficiencies, and seeking out alternative funding options (e.g., billing for services).

<sup>-</sup> Less travel funds will mean less in-state travel for outbreak investigations, meetings, lectures, community engagement activities (e.g., town hall meetings), etc.

<sup>-</sup> Epidemiology Bulletin subscribers will no longer receive hard copy bulletins.

Bureau of Vital Statistics FY2006 AMD: Increase Receipt Supported Services authorization for lease costs and electronic entry of older	Inc	300.0	40.0	0.0	260.0	0.0	0.0	0.0	0.0	1	0	0

The Bureau of Vital Statistics (BVS) moved from state-owned office space to commercial rental space in Juneau during the 2003 fiscal year. The new annual lease cost, in excess of \$300.0, was initially partially funded through a \$100.0 increment. The full annual lease cost was first experienced in FY 04. In that fiscal year the Public Health RDU was able to absorb the unfunded cost increase through transfers from other components. Other public health programs will not be able to support the increased BVS costs in FY 05.

BVS has experienced a 2% to 3% annual growth in demand for services in the Anchorage, Fairbanks and Juneau offices over the last five years. Since 9/11 there has been an increased need for Alaskans to provide absolute proof of their identity. Many times Alaskans become aware of this requirement at the last minute, such as on the day of travel, or when needed for documentation for school activities or obtaining a drivers license. Additionally, certified copies of vital records are needed to settle estates, change bank and credit card account information, transfer real estate, obtain spousal benefits, change social security account information, and to obtain passports or other identity information. With BVS offices in Juneau, Anchorage, and Fairbanks, approximately 70% of Alaskans can walk into a Bureau office and receive immediate service.

In addition, BVS increased fees from \$10.00 to \$15.00 per certificate issued in FY 2001 and saw a \$340.0 increase in fees collected the following fiscal year. Fees were increased again this fiscal year by \$5.00 to \$20.00 per certificate issued. Increased revenues resulting from increased service demand and increased fees results in an over-collection of fees from the public for BVS services. This amendment will allow BVS to retain the fees generated by their program to fully fund program costs. If this is not funded, BVS may be required to close the Fairbanks Office and reduce other services to the public to absorb the increased lease cost.

This amendment will also allow BVS the ability to automate birth records prior to 1952 and death records prior to 1977. BVS currently maintains records dating as old as the 1890s, but only has 52 years' worth of birth records and 27 years' worth of death records available electronically. This increment will support the electronic entry of the older records, protecting the existing paper records from wear and tear, and will ensure that misfiling of these records doesn't result in the loss of information and the ability to obtain certification. Having electronic records will decrease manual search requirements and therefore the time the public must wait to receive a certificate from these years.

This amendment will support the addition of one clerical position to assist with data entry and provide enhanced staff capacity for improved turn-around times for certificate requests, and contractual costs for the procedures assessment and development of new processing systems.

Of the \$300.0 RSS requested, \$260.0 is required in the contractual services line to support payment of the lease costs (\$175.0) and the contractual costs for the procedures assessment and the development of a new processing system required to convert from a manual to an electronic system (\$85.0). The remaining \$40.0 is requested for the addition of one clerical position and to begin the process of transferring old manual records to electronic form.

The SME office has a public health role in surveillance through death investigations to detect new or unexpected infectious diseases and to provide information about preventable causes of death. This mission is accomplished very rarely. Additionally, families often request autopsies to assist their own grieving process and assist in closure of the death of a loved one. Families often want to know with more certainty what caused an unexpected death.

be considered: the public health mission and determinations of cause of death to support families.

FY2007 Public Health Protection-Medical Examioner: support staffing and safety/operation improvements in Anchorage	Inc	500.0	307.1	10.0	82.9	50.0	50.0	0.0	0.0	2	0	0

An increment of \$500.0 GF is requested to provide the State Medical Examiner's Office with sufficient staffing to perform the full range of death investigations under their mission, and to support needed improvements in safety and operations at the SME facility in Anchorage. At full capacity, State Medical Examiner's Office would benefit Alaskans by providing more information on causes of unexplained deaths, resulting in improved efforts to reduce the rates of early and violent deaths in Alaska. It would also benefit Alaskans by supporting grieving families searching for answers to unexpected deaths.

The Alaska State Medical Examiner's Office (SME) has a critically important role in three functions of state government: criminal justice, consumer safety, and public health. Their work has been limited to their highest priority, forensic death investigations under their criminal justice mission, due to insufficient funding and staffing. In FY 06 the legislature initiated expansion of SME capacity by adding a new statutory requirement for a Deputy Medical Examiner (ME), and increasing funding to fully support the second ME and an additional Autopsy Assistant. The resulting additional capacity is enabling more attention to the consumer safety and public health functions, providing capability to perform over 400 autopsies per year (up from 252 in FY 05).

In November 2004 the National Association of Medical Examiners (NAME) conducted a review of Alaska's SME operations to assess readiness for national Medical Examiner Office accreditation. NAME made a number of safety and operational recommendations, such as substantial upgrade of the radiology equipment. They also recommended, for a state with our population, that a full-capacity State Medical Examiner's Office should be able to perform over 700 autopsies per year.

This \$500.0 increment request will fund a third Medical Examiner, an additional Autopsy Assistant, and an additional Investigator, providing capacity to perform 750 autopsies per year. This will allow for investigation of more non-natural deaths and sudden natural deaths; adding important knowledge for consumer safety initiatives, public health surveillance, and epidemiological research. This increased death investigation capacity will provide better information on the methods and causes of the suicide epidemic in Alaska in order to improve suicide prevention efforts across the state. It will also provide better information on unintentional injury deaths, such as those caused by motor vehicle accidents, to improve injury prevention efforts as well. It will also allow the SMEO to bring in more toxicology cases for autopsy than are processed at this time, and possibly all pilot fatalities under investigation by the FAA.

# Public Health (continued) State Medical Examiner (continued)

facility (continued)

FY2007 Public Health Protection-Medical Examioner: support staffing and safety/operation improvements in Anchorage

The distribution of the increased workload between three medical examiners (instead of two medical examiners) will provide safer working conditions and will eliminate the frequent backlog of cases. It will also provide the opportunity for the SME to accept requests for some autopsies for those instances of individuals dying under unexpected circumstances, where no "foul play" is expected, but where a grieving family needs information to help with understanding the medical reasons for the loss of their loved-one.

With the addition of the new Investigator position (bringing the total staff in this classification up to five), 24-hour on-call duties will be more appropriately distributed, and retention of staff in these positions should be markedly improved. The new Investigator position will also allow for more on-scene investigations to take place to facilitate better decision-making about when an autopsy is required and when it's not.

The SME is actively working on implementing practice and low-cost safety improvements with an eye towards national accreditation. If this increment is funded the SME will apply and should qualify for national accreditation in 2008. Accreditation would support the state's criminal justice system by documenting the quality of services provided in forensic death investigations brought before the courts. It might also help bring additional non-GF resources to support the office, and would assist in attracting new staff in national recruitments required when positions become vacant.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the number of autopsies performed), 2) interim impact goals (e.g., increased knowledge and understanding of causes of death in Alaska, and improved prosecution of criminal homicide cases), and 3) desired long-term outcomes (e.g., reduced illness, disability and death due to injury (intentional and unintentional) and chronic disease).

The requested \$500.0 will be distributed across line items as follows:

Personal Services - \$307.1

These funds will support three positions: one Medical Examiner (existing PCN), one Autopsy Assistant (PCN 06-#111), and one Investigator (PCN 06-#110).

Travel - \$10.0

These funds will support travel for recruitment and relocation of the new Medical Examiner, travel for staff training, and travel to support on-site investigations outside of Anchorage.

Contractual - \$82.9

These funds will support toxicological laboratory tests, x-ray and other equipment maintenance agreements, lease for an additional vehicle for on-site death scene investigations and body transportation, air cargo costs associated with transportation of human remains from other Alaskan communities to Anchorage, and increased communication costs (telecommunications and postage).

159.0

15.0

The purpose of the State Medical Examiner's Office is to bring trained medical evaluation to the investigation of deaths that are of concern to the public health, safety, and welfare of the State of Alaska. The State Medical Examiner's Office investigates sudden, violent, unexpected, and suspicious deaths that occur in the state. In addition to determining the cause and manner of death, the office works to provide accurate identification of decedents under their iurisdiction, and to notify the next of kin.

The State Medical Examiner's Office and its staff are located in Anchorage, so most deaths investigated and cases examined and/or autopsied by staff are located in Anchorage and the Mat-Su Valley. This is partly due to the fact that Anchorage and the Mat-Su Valley have the largest population base in Alaska. Another factor is that death-scene investigators can drive to the death scene from Anchorage and easily return the decedent to the Medical Examiner's Office by road. Other cases throughout Alaska are independently investigated by local law enforcement and reported to the Medical Examiner. If the Medical Examiner determines the decedent should be transported to Anchorage for further examination/autopsy, the decedent must be transported to Anchorage by plane. Transporting decedents to/from the Medical Examiner's Office is costly and causes stress to friends/family of the decedent at a difficult time. It benefits everyone if cases can be examined and resolved quickly so the decedent can be returned to their loved ones.

Historically, with limited available resources, staffing shortages in the Medical Examiner's Office meant only the most controversial deaths are fully investigated, including a trained investigator attending the scene of death and initiating an investigation independent of law enforcement. Based on national standards, the State Medical Examiner should be initiating an investigation at some level for 100% of the deaths that fall under their jurisdiction and examine or autopsy approximately 75% of those cases. Of the 3,362 deaths reported in Alaska during FY09, the State Medical Examiner's Office took jurisdiction in 1,556 cases. Autopsy was performed in only 253 cases (16%) and external inspection done in 124 (8%) for a total examination rate of just 24%. Recently, however, the Medical Examiner's Office has become fully staffed with a new Chief Medical Examiner and, for the first time, a

additional funding in future years. This increment, Phase I, 8	•	,							

The consequences of not investigating and examining all cases on scene that fall under the Medical Examiner's jurisdiction are extensive. Homicides may go undetected; suicides may be misdiagnosed causing inaccurate statistics and undue hardship for families. Infant deaths may not be classified correctly with cases being classified as "undetermined" due to no available scene investigation. Misidentification may abet identity theft or homicide, or cause undue hardship on families; thus creating indeterminate liability for the State of Alaska. The increase in scientific identification would decrease potential liability and aid in possible criminal prosecution. Examining all appropriate cases will aid law enforcement in determining cause and manner of death and help in determining if a criminal act is suspected. The district attorney can be assured that when a case is adjudicated, there is an accurate examination or autopsy report and identity is confirmed, and that proper photographs and handling of evidence has been performed. Additionally, by investigating and transporting all appropriate deaths, the office will be able to accurately classify the cause and manner of death, thus providing accurate statistical results for the health department and partner agencies that rely on the data. Expanding services statewide and ensuring the office is practicing and maintaining the highest standards in the profession in which it functions moves the State Medical Examiner's Office closer to its ultimate goal to develop operational standards and obtain accreditation by the National Association of Medical Examiners.

(not part of this increment) will expand services to two or three geographic areas with a large number of cases.

Phase III (also not part of this increment) will further expand services throughout the state.

In a related change record, PCN's 06-2423 and 06-1734 are being transferred from Public Health Administration

These funds will ensure that the present level of service can be maintained by funding the anticipated shortfall.

- Phase I, begun in FY10, helped stabilize funding for an increased caseload. However, actual costs exceeded estimates, resulting in a \$500.0 projected shortfall for FY12.
- Phase II will expand services to 3 geographic areas with a large number of cases and provide additional stabilization funds for the increasing caseload.
- Phase III will further expand services throughout the state; maintain funding for the increasing caseload; and move the Office closer to national accreditation.

These reforms are needed because the present Medical Examiner's Office is completely centralized in Anchorage. When a death occurs in Anchorage, a full investigation into the death occurs, including a trained Medical Examiner's investigator attending the scene of death and initiating an investigation independent of law enforcement. Currently no independent death investigation takes place in communities outside of Anchorage/Mat-Su.

The purpose of the State Medical Examiner's Office is to bring trained medical evaluation to the investigation of deaths that are of concern to the public health, safety, and welfare of the State of Alaska. The Medical Examiner's Office investigates sudden, violent, unexpected, and suspicious deaths that occur in the state 24/7/365. The Office's independent investigator makes the determination whether a body should be transported to the office for further medical examination by a pathologist. In addition to determining the cause and manner of death, the Office works to provide accurate identification of decedents under their jurisdiction and to notify the next of kin.

Phase I reforms have already improved services to Alaskan families and communities. Death Certificates are signed in a timelier manner, within 48 hours after examination and autopsy report requests are being mailed timely. Cases are released to next-of-kin for final disposition (i.e. funeral home, back to next-of-kin) within 24 hours after examination and authorization from family. Outreach to communities (i.e. Bethel, Valdez, Kodiak, Juneau, and Fairbanks) informed stakeholders about changes in the Medical Examiner's Office policies and procedures and provided valuable information on the increase in cases in the past year.

In FY2010, the Medical Examiner's Office experienced a marked increase in the volume of cases that were examined and autopsied. The number of cases under the Medical Examiner's Office jurisdiction increased 28% from FY2009 to FY2010. Of the 3,300 deaths reported in Alaska during FY2010, the Medical Examiner's Office took jurisdiction in 60% of the cases (1,989), up from 46% in FY2009 (1,556/3,362). The number of cases examined or autopsied doubled from 377 (24%) to 754 (38%) cases. This trend is expected to continue.

The drastic increase in caseload resulted in a \$300.0 shortfall for FY2010, primarily for freight costs to transport cases. The Office received \$300.0 GF supplemental funding in FY2010 and a \$300.0 GF increase to the base budget in FY2011. However, this still leaves a projected deficit of \$300.0 to simply maintain services in FY2011,

The control of infectious diseases has become increasingly complex and challenging. Over the past 30 years more than 30 new infectious diseases have been discovered; recent examples are SARS and the H5N1 strain of avian influenza. To truly protect the health of Alaskans, the Division of Public Health must sustain well-established core public health programs such as tuberculosis control and immunizations, while taking on new challenges, such as pandemic influenza planning and bioterrorism preparedness. This \$1,000.0 GF request will modernize and strengthen an aging and under-funded infectious disease control system to keep Alaskans safe and secure from old and new infectious disease threats and public health emergencies. Associated requests for infectious disease control are included in the Nursing and Epidemiology components.

Strengthening our surveillance capacity and outbreak response will assure that communicable diseases are detected earlier and that fewer Alaskans become ill. A strong public health laboratory system will mean that infectious diseases are diagnosed rapidly and will hasten appropriate treatment to prevent further spread. These are core public health activities. With a stronger laboratory using modern technology this will allow us to rapidly diagnose cases and to quarantine and isolate to contain disease. These are formidable tasks, but absolutely necessary if the health of Alaskans is to be protected.

New challenges that threaten to shift attention away from core activities have resulted in resurgence of diseases that have previously been contained.

- During the first 9 months of 2005, 82 cases of pertussis have been identified, more than in 2003 and 2004 combined. Pertussis (whooping cough), an ancient disease, is becoming more common in Alaska, in spite of an effective childhood vaccine. This is due, in part, to a new more sensitive laboratory test and providers are ordering this test more frequently, but there is evidence that there is more disease as well.
- ' In 2000, Alaska reported the highest rate of tuberculosis in the country because of several large outbreaks. There have been no large outbreaks since 2000, but Alaska continues to be among the top five states with the highest TB rates in the U.S.
- In 2003 Alaska had the highest rate of chlamydia disease in the U.S. 3,900 cases for a rate of 606 cases per 100,000 population. An improved testing method and more thorough investigations were successful in uncovering disease that would not have been diagnosed otherwise. Each of these cases requires treatment and partner notification.

# Public Health (continued) Public Health Laboratories (continued)

FY2007 Public Health Protection: Infectious Disease Control and Emergency Preparedness (continued)

- ' In 2004, Alaska ranked 45 of 50 states with only 75.3% of 0-3 year old children fully immunized.
- ' The Division responds to outbreaks related to tourism almost every summer. In 1997 and 1998 large summer influenza outbreaks strained laboratory, epidemiology and public health nursing resources.

Of the emerging public health threats, a new deadly strain of avian influenza (H5N1) is most concerning. This virus has only been found in Asia, and to date has had limited impact on humans, with 125 human cases and 64 deaths reported worldwide as of 11/9/05. With a death rate of over 50%, no vaccine readily available, and limited antiviral drugs, a human epidemic of avian influenza would be devastating. Alaska has many direct air and shipping links to Asia, and is a major hub for international air cargo shipping. In addition, Asian birds migrate to Alaska each summer and share nesting grounds with North and South American migratory birds; in theory avian influenza could be introduced to a new continent through Alaska. The Public Health Labs are working in conjunction with other agencies for the protection of all Alaskans against avian flu.

To control old infectious disease challenges, and detect and respond to new agents, the Division must have a multi-pronged approach. The Sections of Epidemiology, Public Health Nursing, and Public Health Laboratories are each integral and interdependent when it comes to disease control - working together in a continuous cycle of discovery, investigation, intervention, monitoring and reporting.

The Section of Public Health Laboratories is critical to effective disease surveillance (such as West Nile virus, influenza, tuberculosis), as well as for the rapid and accurate identification of the agents during an investigation or outbreak. The Public Health Laboratory is the only laboratory in Alaska with the ability to test for a wide variety of diseases. Specimens that would otherwise be sent out of state for analysis include those requiring analysis for anthrax, botulism, tuberculosis and influenza, as just a few examples. Laboratory staff must maintain high competency levels and each state-of-the-art test requires sophisticated equipment and expensive reagents. The State Laboratory is also a reference laboratory for medical laboratories throughout Alaska and other agencies such as the FBI, HAZMAT teams, the Municipality of Anchorage, and the military. The Public Health Laboratories are also required at times to develop special testing methodologies for conditions unique to Alaska.

Scientists within the Public Health Laboratory must be cross trained to maximize efficiency and workforce capacity and allow for rapid and seamless reassignment during unexpected public health events and emergencies (surge capacity). Because of the security, complexity, and biocontainment requirements of this needed training, the staff of the public health laboratories must travel to highly specialized reference and training laboratories outside of Alaska, such as the BioSafety Level 4 laboratories at the Centers for Disease Control and Prevention in Atlanta, Georgia, to receive this training.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as improved turnaround times of test results, and number of new testing methodologies implemented), 2) interim impact goals (e.g., improved diagnosis and treatment rates), and 3) desired long-term outcomes (e.g., reduced illness, disability and death due to infectious diseases). This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU for reduction of tuberculosis and

chlamydia incidence rates.

This \$1,000.0 GF request will support activities in the Division of Public Health's Section of Laboratories, as follows:

Personal Services - \$538.6; 4 New PFT positions

These funds will support two Public Health Microbiologist positions (1 new - PCN 06-#112, 1 existing insufficiently funded) and one new Laboratory Technician in the Fairbanks Public Health Laboratory (PCN 06-#113) to enhance virology testing capacity to rapidly detect influenza, a critical resource for pandemic influenza and avian influenza surveillance in Alaska. These new positions will also strengthen the laboratory detection of other viral agents, including Norovirus and enteroviruses, which also cause outbreaks in Alaska. Two Public Health Microbiologists (1 new-PCN 06-#114, 1 existing insufficiently funded) and one new Laboratory Technician in Anchorage (PCN 06-#115) will allow the Laboratory to meet increasing demand for laboratory testing that is offered only at the State Public Health Laboratory. These positions will allow the Laboratory to utilize increasingly complex technology that provides more rapid and accurate test results. A Public Health Specialist II position will provide laboratory funded position).

Travel - \$30.0

These funds will support laboratory personnel travel for required training in laboratory analysis techniques.

Contractual - \$200.0

These funds will support laboratory equipment maintenance and calibration service contracts, as well as routine administrative overhead costs associated with personnel maintenance, such as space lease, computer and HR support, risk management, and communication costs.

Supplies - \$206.4

These funds will support the purchase of laboratory supplies and reagents for running laboratory tests for detection of infectious diseases; computer and general office supplies; and office equipment.

Equipment - \$25.0

These funds will support the purchase of new laboratory equipment to support the increased staff capacity in the Anchorage and Fairbanks public health laboratories.

In 2002 the Alaska Public Health Laboratory (APHL), Division of Public Health, developed the capacity to utilize a new testing technology for detecting gonorrhea and Chlamydia infection. These two organisms are by far the most common agents of sexually transmitted diseases in Alaska. Infertility, pregnancy complications, and spontaneous abortion are just a few of the possible consequences of infection. The new testing system, Aptima, is a cost effective, non-invasive technique utilizing urine samples. The APHL currently tests over 20,000 specimens per year using the Aptima system.

DPH's Public Health Laboratories requests \$256.0 for preventing and controlling epidemics and the spread of infectious disease.  The new Fairbanks virology lab will open on the University of Alaska Fairbanks (UAF) campus in January 2009. It is the only lab of its kind in Alaska; it tests for new diseases such as avian flu, SARS, West Nile and re-emerging diseases such as measles and rabies. The new lab will occupy 26,940 sq. ft., of which 9,495 sq. ft. will be occupied by UAF. A fully functional, modern virology laboratory will enable efficient and safe laboratory testing. Additionally, the State of Alaska will be able to respond to emergencies involving exotic diseases such as smallpox and novel influenza in a timely and efficient manner. The virology lab is such an important asset to the State that UAF has contributed over \$1.5 million to this project. UAF researchers will have access to both a Biological Safety Level 3 (BSL3) and an Animal BSL3 laboratory for research purposes. UAF will also contribute an estimated additional \$400,000 for yearly operational costs.  DPH received an increment to heat and light the lab as construction continued in the first half of FY09. Most of this FY10 request - \$256.0 - adds to current funding and will provide funding for the first full year of operations - heat, lights and other utilities. This request also includes funds for establishing a unique shared position with the UAF Arctic Health Program - a Medical Virologist, a highly trained specialist who plays a vital role in the diagnosis, treatment and study of infectious diseases caused by viruses such as HIV, hepatitis and influenza. DPH's Section of Laboratories will contribute salary and benefits, through an RSA to UAF, \$60.0, which represents 50% of the incumbent's compensation. UAF will contribute the remaining 50%.

Increased program receipt authority will enable the Public Health Laboratories (Labs) to maintain services. During the past five years, the number of tests performed by the Laboratories has nearly doubled from 77,000 to over 148,000. The complexity and cost of these tests have increased exponentially while the budget has remained flat. Additionally, overhead costs have increased more than 25% during the same period. To keep up with rising costs and yet maintain services the Public Health Laboratories are standardizing fees charged for lab testing services.

Contractual services will pay for maintenance contracts for scientific instruments (required under 42 CFR 493) personnel costs with cover the on-call requirements of operating a 24/7/365 facility.

The Public Health Laboratories provide a cost-efficient service. The Labs expended approximately \$6,400.0 for lab testing in FY10 compared to more than \$20,000.0 if these services were contracted out. It is essential that scientific and medical supplies, as well as energy and other contractual services be sufficient to effectively and efficiently provide public health laboratory services.

More and more scientific data indicates that persons abusing drugs, diabetics, the young, elderly, native Alaskans, rural and subsistence-dependent populations are more at risk of contracting infectious diseases. It is prudent that early and accurate diagnostics be available to prevent, mitigate and treat these morbidities. The programs and laboratory testing offered by the Public Health Laboratories are of such vital importance to the State of Alaska that

### Public Health (continued)

#### **Tobacco Prevention and Control (continued)**

FY2006 Utilize increased tobacco tax revenue for tobacco prevention and cessation activities (continued)

The Tobacco Prevention and Control Program in the Division of Public Health has four major public health goals: (1) to prevent initiation of tobacco use among young people; (2) to promote quitting among adults and young people; (3) to identify and eliminate tobacco-related disparities in specific populations identified as of special vulnerability or with above-norm tobacco use patterns; and, (4) to eliminate exposure to secondhand smoke. The Centers for Disease Control and Prevention's (CDC) Best Practices for Comprehensive Tobacco Control Programs recommends both minimum and maximum funding levels as well as program composition for comprehensive tobacco programs in each state. Alaska's tobacco program is organized and funded in order to follow CDC's Best Practices and to achieve the program goals noted above. Alaska's FY 05 funding level for tobacco activities of \$5,251.8 (Federal and Tobacco Fund) currently falls short of CDC's recommended minimum level of \$8,100.0 by \$2,848.2. This increment will bring Alaska to within one and a half million dollars of CDC's recommended minimum.

Based on the Centers for Disease Control and Prevention's Best Practices for Comprehensive Tobacco Control Programs and specific recommendations from the Alaska Tobacco Control Alliance, the Division will utilize these funds in the following program areas:

- ' Community-based programs to reduce tobacco use (\$400,000)
- ' Cessation programs (\$500,000)
- ' Media/countermarketing (\$100,000)
- ' Surveillance and Evaluation (\$230,000)

It will support the expansion of grants and contracts to community-based organizations and statewide associations involved in supporting the goals of tobacco prevention and cessation in Alaska.

Too many Alaskan children initiate tobacco use at a young age. Some are addicted before they even reach high school. Reducing and eventually eliminating tobacco use among youth is one of the State's highest public health priorities. The entire \$500.0 in Tobacco funds requested in this increment will be provided to communities for activities specially targeted to helping schools, parents, and students in their efforts to protect our children from tobacco addiction.

We should be encouraged that Alaska's 2003 Youth Risk Behavior Survey demonstrated that far fewer of our high school youth are smoking now than in the mid-90's (down to 19%, from 37% just 10 years ago). But we cannot become complacent. There is emerging evidence that the downward trend in youth smoking may be flattening out, and potentially starting to move upward. Knowing that tobacco use is the leading cause of preventable death in Alaska, with one in every five deaths attributable to tobacco, and knowing the majority of adult tobacco users began this habit in their youth, it is imperative we do everything we can to prevent our children from developing the tobacco habit, and helping those who've started to quit.

Examples of activities that will be supported with these new community grant funds include:

- Development and distribution of educational materials that provide information specific to cessation resources in each community, to help parents and schools in assisting their tobacco-addicted children kick-the-habit.

#### **Public Health (continued)**

#### **Tobacco Prevention and Control (continued)**

FY2007 Alaska's Healthy Future: Communities Keeping our Kids Tobacco-Free (continued)

- Provision of information and technical assistance to local school districts, school boards, parents, teachers and students to help with the development of tobacco-free policies within public schools and at sporting events and other school activities.
- Development of culturally-appropriate anti-tobacco curricula for use in our schools.
- Training for school staff who will be teaching anti-tobacco curricula.
- Development and implementation of community-based evaluation plans, so communities can make informed decisions about how their youth tobacco prevention efforts should be improved or continued.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

Helping Alaska's children to be tobacco-free not only helps them to start healthy and grow strong. It will result in a healthier workforce (and thus a healthier economy) when today's youth become tomorrow's adults, with decreased absenteeism and lower employer-supported health care costs. And eventually today's investment in youth tobacco prevention will result in reduction in early deaths, more years of productive life, decreased disability and suffering, and increased quality of life, as our children reach their later years free from lung cancer, emphysema, heart disease, and other tobacco-related illnesses. The return on investment of these increment dollars will be evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the activities bulleted above), 2) interim impact goals (e.g., reduced teen smoking rates), and 3) desired long-term outcomes (e.g., reduced illness and disability due to cancer, lung and heart disease). This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU for reduction of cancer and heart disease deaths.

Grant funds will be distributed to current and new community-based Tobacco Prevention and Control Program grantees to support specially targeted youth-prevention activities in their communities, at sporting events, and in schools.

Tobacco use is the number one cause of preventable death in Alaska. Of the adult Alaskan population, 24 percent of all adults, 48 percent of low income, 44 percent of Alaska Natives, and 45 percent of adults with less than a high school education use tobacco. More than 77 percent of adult tobacco users in Alaska report that they want to quit. Each year, tobacco use and/or exposure to secondhand smoke cuts short the lives of nearly 600 Alaskans and costs the state over \$329 million in direct medical costs and lost productivity due to tobacco-related deaths. This amount is almost certainly an underestimate since it does not account for lost productivity from tobacco-related illness. At the same time, the tobacco industry spends an annual estimated \$32.8 million in Alaska to promote tobacco use (2003 estimate). This \$1,000.0 increment will fund strategies to help Alaskan communities reduce tobacco use. A companion request for tobacco prevention and control is included in the Chronic Disease Prevention and Health Promotion component.

The number one cause of death in Alaska is cancer. Lung cancer, cancer of the oral cavity, esophagus, pancreas, cervix, colon and rectum are associated with tobacco use. In the Alaskan population, lung cancer is the most common and most fatal cancer, resulting in over 30 percent of cancer-related deaths. Ninety percent of lung cancer is tobacco-related. Many other health conditions are related to tobacco use. These include heart disease, stroke, emphysema, asthma, upper respiratory diseases, diabetes, and low birth weight babies. Given the high

**Tobacco Prevention and Control (continued)** 

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

rate of tobacco use in Alaska and the disparities in tobacco use that exist in Alaska, it is vital to implement programs that decrease death, disability and the economic burden related to tobacco.

The Division of Public Health (DPH) will stem the tide of increasing poor health and health care costs and decreasing quality and length of life in Alaska due to tobacco use by implementing

- 1) Community-Based Primary Prevention;
- 2) Community-Based Secondary Prevention;
- 3) Provider-based Secondary Prevention: and
- 4) Expanded Statewide Media.

#### COMMUNITY-BASED PRIMARY PREVENTION

In order to achieve reductions in secondhand smoke exposure and individual behavior change that supports non-use of tobacco, communities must change the way tobacco is promoted, sold and used. Communities can also change social norms around tobacco use by targeting tobacco-related knowledge, attitudes and practices. Geography, culture and climate vary greatly around the state of Alaska and no single approach will work for all communities. As such it is important to recognize that for any strategy to be successful and for long-term health outcomes to improve, the work has to be done at the community level where people live, work and go to school. Local governments, community groups, school boards, and employers need to take the lead in developing and instituting these opportunities but DPH can offer support. This increment will provide additional resources to community agencies working to change local policies and social norms around tobacco, and increase the number of communities statewide that receive local funding.

Following are examples of expected impacts of these community level activities:

- More Alaskan communities maintaining programs and implementing policies that promote no tobacco use and prevent secondhand smoke exposure, and more training and technical assistance to those communities.
- More Alaskan schools implementing programs and policies to promote no tobacco use among children, and training and technical assistance to these schools.
- Support to Alaskan employers to implement and maintain policies and programs that promote no tobacco use and reduce exposure to secondhand smoke.
- Improved reporting and evaluation system for community- and school-based tobacco prevention and control in order to identify promising practices that can be replicated in other communities.

#### COMMUNITY-BASED SECONDARY PREVENTION

Health care systems and providers play an important role in reducing tobacco use. Evidence-based clinical practice guidelines describe a variety of strategies for health care systems that are effective in helping tobacco users to quit, including brief advice by providers to quit, and provision of FDA-approved medications. Population-based cessation, such as the Alaska Tobacco Quit Line, is an additional proven strategy. The Division of Public Health will increase the number of health care centers that receive funding to implement health system changes that support tobacco cessation; provide training and technical assistance to those health care centers; and increase the capacity of the Alaska Tobacco Quit Line to provide direct support to tobacco users statewide who want to quit.

Following are examples of expected impacts of these community level activities:

- More Alaskan health care centers maintaining comprehensive tobacco cessation programs that systematically

# Public Health (continued)

#### **Tobacco Prevention and Control (continued)**

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

identify tobacco users and assist them to quit.

- Training and technical assistance to health care centers and providers implementing comprehensive tobacco cessation programs.
- Increased capacity for the Alaska Tobacco Quit Line to provide counseling and medication to tobacco users statewide.
- More Alaskan tobacco users making quit attempts and more increasing their chance of success by using cessation programs including the Alaska Tobacco Quit Line in order to quit.

#### PROVIDER-BASED SECONDARY PREVENTION

The division will integrate how risk factors for cardiovascular disease are addressed by removing barriers that prevent practitioners from simultaneously treating high blood pressure and tobacco use.

Following are examples of expected impacts of these community level activities:

- Describe the current practice standards of health care providers for treating tobacco users with high blood pressure.
- Describe the barriers preventing health care practitioners from simultaneously prescribing tobacco cessation medications while treating high blood pressure.
- Training and technical assistance to health care providers to systematically treat tobacco use and high blood pressure using an algorithm approach.

#### MEDIA

Research shows that counter-marketing promotes quitting, decreases the likelihood that individuals will start to use tobacco, and supports community efforts to create tobacco-free social norms. The division will expand the existing statewide tobacco prevention and control media program to increase the duration and intensity of statewide urban and rural tobacco prevention media, including more specific messages targeting youth and populations known to have high rates of tobacco use (Alaska Natives, Alaska Native youth, smokeless tobacco users, Alaskans with lower educational attainment, low income Alaskans), and more messages that describe the link between tobacco use and heart disease and stroke.

Following are examples of expected impacts of these community level activities:

- More incentives to quit tobacco through widespread understanding of heart disease and stroke as major health effects of tobacco use.
- More widespread awareness of the health effects of secondhand smoke.
- More widespread awareness of cessation resources, including the Alaska Tobacco Quit Line, by population segments with high rates of tobacco use.
- Evaluation of expanded media efforts in order to ensure that they effectively reach Alaskans, especially population segments most affected by tobacco use.
- Increased education for health care providers regarding tobacco cessation treatment protocols while treating high blood pressure.

#### CHANGE IN RESULTS TO BE ACHIEVED WITH INCREMENT FUNDING:

This increment request is a long-term investment in the health of Alaskans. If funded, it will provide multiple Alaskan communities with resources that can be used to begin the work to reduce the burden of tobacco use and to increase positive health outcomes of all Alaskans. The return on investment of these increment dollars will be

### Public Health (continued)

#### Tobacco Prevention and Control (continued)

FY2008 AMD: Alaska's Healthy Future:

Tobacco Prevention and Control (continued)

evaluated by establishing a series of indicators to measure achievement of 1) short-term process objectives (such as the activities bulleted above), 2) interim impact goals (e.g., decreased exposure to secondhand smoke, decreased tobacco consumption, increased quit attempts), and 3) desired long-term outcomes (e.g., reduced tobacco use, reduced illness and disability due to cancer, heart disease, stroke, respiratory disease).

This increment will bring Alaska closer to the minimum amount (\$8,100.0) recommended by the U.S. Centers for Disease Control and Prevention as needed to fund a successful comprehensive tobacco prevention and control program for our state. This investment will contribute to meeting or exceeding the end results targets included in the Public Health RDU and the DHSS agency budget for reduction of cancer deaths and heart disease deaths.

Last year's additional investment of \$500.0 appropriated in an FY 07 operating budget increment is currently supporting development and implementation of comprehensive urban and rural school tobacco prevention programs. Successful implementation of these programs has been shown in other states to lead to decreases in tobacco use among children in participating schools.

#### MISSIONS AND MEASURES REFERENCE:

Public Health M&M for heart disease death rate (A:3)

Public Health M&M for cancer death rate (A:4)

Public Health M&M for prevalence of tobacco use in Alaskan youth (A2:1)

The requested \$1,000.0 Tob Ed/Ces funds will support activities as follows:

#### Contractual - \$500.0

These funds will support expansion of the statewide tobacco prevention and control media program; contracts for the provision of additional technical assistance to school, community, and cessation grantees; initiation of a joint program with the Heart Disease and Stroke Prevention Program to increase referrals by health care providers to cessation resources and improve management and treatment of high blood pressure; and, expansion of capacity for the Alaska Tobacco Quit Line.

#### Grants - \$500.0

**Tobacco Prevention & Control** 

These funds will be used to enhance grant awards to community-based tobacco prevention and control grantees, and to increase the number and funding levels of cessation grants available to health care centers.

# Public Health (continued) Tobacco Prevention and Control (continued)

FY2010 Tobacco prevention and control (continued)

2007. This is a statistically significant decrease that means:

- o There are 27.000 fewer smokers in Alaska now than in 1996:
- o Nearly 8,000 tobacco-related deaths will be averted; and
- o Nearly \$300 million in medical costs will be saved.

Yet there are still approximately 94,000 adults in Alaska who smoke. More than 65 percent of adult tobacco users in Alaska report that they want to quit. The Center for Disease Control (CDC) developed evidence-based guidelines for tobacco prevention and control, including recommended funding levels for states. The Alaska program is funded at \$1.6 million below the current CDC recommendation.

The number one cause of death in Alaska is cancer; tobacco use is the top preventable contributor to cancer. Ninety percent of lung cancer is tobacco related. Many other health conditions are related to tobacco use. These include heart disease, stroke, emphysema, asthma, upper respiratory diseases, diabetes, and low birth weight babies.

Details of this request:

Grants - \$328.0

These funds will be used to enhance grant awards to the existing Community-based Tobacco Prevention Grant Program, the K-12 School-Based Grant Program, and the Cessation Interventions Grant Program.

o Increase community grantee coordinators to a minimum of 1.0 FTE: (\$193.0)

This funding will permit the TPC program to require each community-based grantee to employ a coordinator at a minimum of a 1.0 FTE (currently .75 FTE). The coordinator is essential to organizing community efforts aimed at coalition building, counter-marketing strategies and youth-focused prevention activities supporting regional and community policy efforts.

o Evaluation training for grantees: (\$35.0)

All grantees will be required to attend a one-day training in Anchorage specific to tobacco program evaluation.

These funds will support grant coordinator travel for one to two staff per grantee to Anchorage.

o Expansion of the school-based grantee program: (\$100.0).

One new K-12 School-based grant will be awarded to a community not currently served by the TPC program.

Contractual - \$227.0

These funds will be used to provide technical assistance (TA) focused specifically on communications to the three Tobacco Grant Programs, as well as evaluation of this effort. To sustain the success of all these programs and improve their reach to high-risk populations, more expertise at the local, community-based level is needed. Grantees will receive technical assistance to develop tobacco cessation and prevention messages tailored to specific populations, such as pregnant women, Alaska Natives and individuals of low socioeconomic status.

The TA will consist of the following:

The training will focus on building the Leadership for Eliminating Alaskan Disparities (LEAD) Coalition's capacity to implement the 2007 Disparities Strategic Plan statewide. 3) Evaluation: (\$25.0) The TPC's Surveillance and Evaluation Unit is instrumental when developing plans to address efforts at the community and priority population level in Alaska. The TPC program is committed to rigorous data collection and analysis and will use these funds to increase the dissemination of local and regional data to better serve the needs of all grantees and programs, as well as provide the necessary training and technical assistance regarding the interpretation and use of these publications for grantees and partner organizations. DHSS Priority: Health and Wellness (Prevention) End Result of "Healthy People in Healthy Communities": Strategy A2 - Reduce suffering, death and disability due to chronic disease; Target #1 - Less than 17% of high school youth in Alaska smoke 1168 Tob ED/CES (DGF) FY2011 Empowering Alaskans to Take Personal Responsibility: 400.0 0.0 0.0 40.0 0.0 0.0 360.0 0.0 0 0 Inc Sustained Progress in Tobacco Prevention and Control

This increment will promote and protect the health of Alaskans by reducing death and disability associated with tobacco use

Funding is needed to build on the progress made by the Tobacco Prevention and Control program to reduce smoking and smokeless tobacco use, with a focus on priority populations. Over the past 12 years, Alaska successfully developed a statewide, comprehensive, evidence-based tobacco prevention and control program funded through the Tobacco Use and Cessation Fund. As a result of these efforts, the percentage of adults who smoke has dropped from 27.7% in 1996 to 21.5% in 2007. To realize further reductions in the prevalence of smoking, achieve additional savings in health care costs resulting from reduced tobacco use, and increasing quality and length of life, the comprehensive, evidence-based statewide Tobacco Prevention and Control Program must be sustained and efforts to reach disparate populations with higher prevalence rates must be increased.

A smokeless tobacco prevention and cessation project will be piloted in rural Alaska, where nearly a quarter of the population uses smokeless tobacco. Funds will also be made available through established grant programs for expanded tobacco prevention and control work with high prevalence populations. Additional funds will be used to expand the scope and reach of the Cessation Interventions grant program of the Tobacco Prevention and Control program.

Outcomes will be measured in terms of progress toward Healthy Alaskans 2010 tobacco use targets among Alaskan adults and youth of all racial and ethnic backgrounds living in all areas of the state. Key targets are:

FY2012 Sustaining Progress in Tobacco Prevention and	Inc	750.0	0.0	0.0	0.0	0.0	0.0	750.0	0.0	0	0	0

This funding would support an expanded network of health care professionals trained to address tobacco use with their patients. The funding would broaden outreach throughout Alaska to inform the public on the dangers of tobacco use and increase the number of providers who are referring tobacco users for cessation services. The contract is estimated to provide funding for 4-6 jobs outside of state government and the expansion of the types of providers aware of and referring clients to cessation services.

Tobacco remains a significant public health problem in Alaska, killing nearly 600 people annually and generating almost \$380 million in medical costs and lost productivity each year. Every \$1 spent on tobacco prevention and control saves \$3 in health care related costs. Alaska has made considerable progress in reducing the burden of tobacco use by implementing a sustained, comprehensive tobacco prevention and control program that includes a tobacco Quit-line, media, community programs, and grants to schools and healthcare organizations. Since the inception of the program adult smoking rates have declined significantly and youth smoking rates have been cut in half.

Despite the progress made, tobacco use remains a critical health issue in Alaska and disproportionately affects Alaska Natives, individuals of low socioeconomic status, and rural residents. Forty-one percent of Alaska Natives adults smoke, compared to the state average of 22%. Alaska Native youth are also more likely to smoke than their non-Native peers (32% vs. 13%). Smoking prevalence among adults of lower socioeconomic status is 38%, and 36% of adults living in rural areas report being current smokers.

The Alaska Tobacco Prevention and Control (TPC) Program will build on the success demonstrated by the Community and Tobacco Cessation grant programs. These programs have succeeded in educating Alaskan communities and populations regarding the negative effects of tobacco use, and have provided resources to implement and sustain prevention and cessation efforts. Grants to the nine Cessation Grant Program grantees have supported the kinds of sustainable changes in healthcare system policy that mean more tobacco users get screened and referred for treatment.

Funds will be used to coordinate a statewide tobacco outreach and training effort, provide strong leadership and subject matter expertise, education and resources to raise the awareness of providers and other agencies to support implementation of sustainable tobacco screening and education policy in health care provider communities and treatment systems. The TPC will provide training, technical assistance and community assessment to all health care providers and agencies throughout Alaska, not just the current grantee pool, identifying gaps and providing necessary expertise to assist in the implementation of sustainable systems necessary to effectively identify, intervene and refer for nicotine dependence treatment. Healthcare providers and agencies would include private and public healthcare professionals, tribal health entities, Dental Health Aides, Community Health Aides, Behavioral Health Aides, social service agencies and treatment facilities.

This increment replaces federal funding with general funds due to the discontinuation of the Private ProShare Medicaid program by the federal Medicaid agency.

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

Trans

Total

ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program.

# Public Health (continued) Community Health Grants (continued)

FY2009 Discontinue Private ProShare

Refinancing (continued)

ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for these services provided Health Care Services with the matching GF through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed under federal law and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost its appeal with the U.S. Department of Health and Human Services Department Appeals Board.

The department is committed to continue funding these services at the current level to support its mission to provide health care for Alaskans in need. In order to maintain current service levels, the department is requesting additional GF in the divisions that refinanced grants/services to replace this lost federal money.

#### MISSIONS AND MEASURES:

Performance Measures Affected:

Dept-Core Services: Manage health care coverage for Alaskans in need

Dept-Core Services: Protect and promote the health of Alaskans

Dept-D-4 Provide quality management of health care coverage services providers and clients

HCS-A Mitigate service reductions by replacing general funds with alternate funds

HCS-B Provide affordable access to quality health care services to eligible Alaskans

DPH-A Healthy people in healthy communities

DPH-A-A4--Assure access to early preventative services and quality health care

SDS-A Improve and enhance the quality of life for seniors and persons with disabilities through cost-effective delivery of services

The Division of Public Health provides financial assistance for the support of community-based health programs by providing grant funds, as well as guidance and technical assistance, to grantees to develop health promotion and education activities.

Multi-program grants supporting public health functions are provided by Maniilaq Association, Norton Sound Health COrporation, Southeast Alaska Regional Health COnsortium, Tanana Chiefs Conference, and Yukon Kuskokwim Health Corporation. These public health functions include, but are not limited to: public health nursing, community health aide training and supervision, emergency medical services, tuberculosis control, and injury prevention.

FY2010 Assuring access to early preventive services and quality health care - CHATS Program Funding	Inc	173.1	0.0	0.0	0.0	0.0	0.0	173.1	0.0	0	0	0

A 10% increase is being requested in the Community Health Grants component to assure access to early preventive services and quality health care through the Community Health Aide Training and Supvervision (CHATS) Program Funding.

In FY09, CHATS grants totaling \$1,730,765 are being awarded to the following 16 organizations:

Aleutian/Pribilof Islands Association Bristol Bay Area Health Corporation Chitna Traditional Indian Village Council Chugachmiut Copper River Native Association Council of Athabascan Tribal Governments Eastern Aleutian Tribes Kodiak Area Native Association Maniilag Association Mt. Sanford Tribal Consortium North Slope Borough Norton Sound Health Corporation South East Alaska Regional Health Consortium Tanana Chiefs Conference Yakutat Tlingit Tribe Yukon Kuskokwim Health Corporation

The Community Health Aide Training and Supervision Grants (CHATS) Program provides funds to support the training and supervision of primary community health aides who deliver health care services in rural communities throughout the State. This grant program is provided under the authority of AS 18.28.010-AS 18.28.100 and 7 AAC 78.

The Community Health Aide Training and Supervision grant program is guided by the CHATS Program Standards. These include training, certification, supervision, and instruction requirements for community health aides/practitioners. The purpose of the CHATS grant program is to improve the ability of local and regional health organizations to extend and improve training and supervision of community health aides/practitioners. Grants are for basic, advanced, and continuing education of community health aides and community health practitioners.

The funding level for the CHATS Program is based on a formula established during the 1985 legislative session set out in AS 18.28.020. It is adjusted based on the amount of funding appropriated. During each fiscal year, a qualified regional health organization or local health organization is entitled to a grant of \$8,000 multiplied by the number of primary community health aides who were employed by that organization or another local or regional health organization during the previous fiscal year who each week during the previous year averaged at least 20 hours of service in the communities proposed to be served by the grant, but not to exceed the number of primary

1092 MHTAAR (Other) 80.0 FY2008 AMD: Early Intervention/Infant Learning Services Needs	Inc	300.0	0.0	0.0	0.0	0.0	0.0	300.0	0.0	0	0	0

The early intervention/infant learning program (El//ILP) provides family centered services for very young children who experience significant developmental delay or are at high risk to manifest such a delay without intervention. In Alaska most of the children served in early intervention/infant learning programs have experienced a 50% or greater delay in one area of development or have a diagnosed condition which may lead to a significant delay such as Down Syndrome or Autism.

The program has identified unmet needs in the areas of adequate support services for very young children with substantiated reports of abuse and neglect as well as in the frequency of services for all children and families in

Services Needs (continued)

need. In addition, funding for El/ILP has remained level for more than five years, and the program can no longer absorb the increased costs for services required.

This funding will allow El/ILP to make progress toward achieving 100% compliance in screening all children with a substantiated report or harm. Currently we are screening about 40% of required screenings. These funds will be used toward improvement strategies to reach our goal of 100% screenings as required by the Child Abuse Prevention and Treatment Act (CAPTA, 2003). These strategies include improving the referral process between child protection workers and early intervention.

The El/ILP program requests an increment of \$300.0 to strengthen available supports and services for children and families as needed and evidenced by program data. These funds will ensure that grantee programs have access to adequate training, and support for the expected influx of children with high social and emotional needs, as well as provide continued, enhanced services to children currently enrolled. Funds would also be used to pay for limited consultation from licensed mental health practitioners to consult and work with Individual Family Service Plan (IFSP) teams to develop and implement pre-clinical support. Funds would be used to identify or procure further clinical assessment as appropriate.

Performance measures affected:

Department:

C1: Strategy - Institute repeat maltreatment portocol to address child protective services reports received within six months of an initial protective services report that has been substantiated.

A: Outcome Statement: To prevent children from abuse and neglect.

A1: Improve referral process from child protective services to early intervention/infant learning services.

supports for early childhood system

The MH Trust: AB-Gov Cncl: Behavior Intervention and Supports for the Early Childhood System is a continuing pilot/demonstration project to gather information about the effectiveness of ongoing, statewide training in the use of positive behavioral supports (PBS) for direct service providers and families supporting individuals who experience developmental disabilities. PBS is an approach to help people improve difficult behavior based on an understanding that people do not control others but seek to support others; a belief that there is a reason behind most difficult behavior and that people with difficult behavior shoud be treated with compassion and respect and are entitled to effective services and lives of quality; the application of a large and growing body of knowledge about how to better understand people and make humane changes in their lives that can reduce the occurence of difficult behavior; and a conviction to continually move from coercion - the use of unpleasant events to manage behavior. Specifically, this project targets children receiving early intervention services and early childhood special education. The project is managed by the Office of Children's Services through a grant to an agency experienced in providing PBS training.

FY2010 Maintain Service Levels for Children's Services Infant Learning Program Grantees	Inc	314.9	0.0	0.0	0.0	0.0	0.0	314.9	0.0	0	0	0

The Department of Health and Social Services recognizes the need to provide an inflationary allowance to grantees. While many of the grants in the Office of Children's Services are at least in part funded by the federal government, no recognition from the federal government for the tremendous increase in living expenses has been forthcoming. Because of the extraordinary increases seen of late, the DHSS is requesting a 4.6% increase (tied to CPI) in grant funds. This is necessary to simply maintain current levels of services. If not for this increase, existing grant funds must be used to cover overhead costs, reducing the services currently being provided to vulnerable Alaskans. These grants now total \$7.4 million.

Infant Learning Program grants ensure children who may have developmental delays or disabilities are evaluated for the potential need for early intervention services. If significant problems are identified, these grantees follow through with individualized family plans and provide comprehensive, coodinated, home-based early intervention.

If these Children's Services grantees must absorb the hike in energy costs and other general overhead costs, grantees will have no alternative but to reduce services. A reduction in services will affect every outcome for the Office of Children's Services as we depend on our grantees/community partners to provide these preventative services to help keep children safe and families together.

#### Department Level Measures:

End Result C, Outcome Statement #3 Children who come to the attention of the Office of Children's Services are, first and foremost, protected from abuse and neglect.

Strategy C1: Implementation of new safety assessment model to provide front line workers with a better tool to identify safety issues in the home.

Strategy C2: Children placed outside the home are protected from further abuse and neglect.

Strategy C3: Retain and effective and efficient workforce.

#### Children's Services Results Delivery Unit Measures:

End Result A. To prevent child abuse and neglect.

Strategy A1: Increase the number of referrals from Child Protective Services to Early Intervention/Infant Learning Program services.

Strategy A2: To reunify children in out-of-home placements with parents or caretakers as soon as it is safe to do

End Result B. Safe and timely adoptions.

Strategy B1: Promote the adoption of older youth ages 12 - 18 years.

According to the Center on the Social and Emotional Foundations for Early Learning, the prevalence rate of challenging behaviors among young children in childcare and classroom settings is 10 to 30%. Childhood ratings of behavior problems at age 3 and 5 are the best predictors of later antisocial outcomes. Around 48% of children with problem behaviors in kindergarten have been placed in special education by the 4th grade. Over 65% of students identified with emotional and behavioral disorders drop out of school, which ultimately leads to poor job outcomes, limited income, and patterns of failure that may persist into adulthood. [Fox, L. and Smith, B., Policy Brief: Promoting Social, Emotional and Behavioral Outcomes of Young Children Served Under IDEA, January 2007.]The state Early Intervention/Infant Learning Program Office (EI/ILP) office is supporting 3 demonstration sites to fully implement the "pyramid model" to fidelity. The EI/ILP office sees the support for the parent training modules as an integral part of the larger early childhood social emotional support system. This project currently

between families who are in need of intervention supports, but whose provider agencies have not yet adopted these strategies. Initial data from this project has indicated significant change in parental beliefs and attitudes with regard to positive engagement and strategies to reduce challenging behaviors.

While many approaches and methods have been used in various early childhood settings, the "Teaching Pyramid" is an evidence based research model for "supporting social competence and preventing challenging behavior in young children." [National Association for the Education of Young Children, Young Children, July 2003]. The model addresses challenging behaviors of young children through a comprehensive and systematic process. The "pyramid" framework starts at the lower level of intervention and moves upward: 1) positive relationships with children, families, and providers; 2) home childcare and classroom preventive practices; 3) social and emotional teaching strategies; and 4) intensive individualized interventions. Implementing the teaching pyramid training component for families interested in reducing challenging behavior truly works.

Training will be provided to foster and biological families on the following six (3-hour) modules:

- 1) "Making a Connection: Building Positive Relationships with Children"
- 2) "Making It Happen: The Power of Encouragement"
- 3) "Why Children Do What They Do: Determining the Meaning of Behavior"
- 4) "Teach Me What to Do: Making Expectations Clear and Consistent"
- 5) "Facing the Challenge -- Part 1: Strategies to Promote Positive Child Behavior in Home & Community Settings"
- 6) "Facing the Challenge -- Part 2: Developing and Using an Individualized Positive Behavioral Support Plan" 1092 MHTAAR (Other) 80.0

This increment provides \$350.0 GF/MH and \$175.0 MHTAAR/MH to DHSS/Children's Services to continue and expand implementation of two projects recommended by the Alaska Early Childhood Comprehensive Systems Plan in order to improve services for young children (birth to five) with behavioral health challenges. Behavioral problems can greatly impact young children and their families: the study, Pre-kindergartners Left Behind: Expulsion Rates in State Prekindergarten Systems, found that "... children in pre-school programs were literally...more than three times as likely to be expelled as children in kindergarten through grade 12 ..." These two projects started in 2008 and have been highly effective at 1) building an in-state workforce competent to use evidence-based interventions for young children and their families and 2) demonstrating the impact of early childhood therapeutic service models. Services to young children focus on the family system, on building protective factors, and can improve outcomes for the whole family. The Anchorage early childhood therapeutic pre-school is full, has a waiting list and has been asked to expand into Matsu. Most areas of the state do not yet have an ECMHC program.

- For FY11, 610 children were served through the Anchorage project
- It had a 100% childcare placement rate: all children served either maintained in current childcare or found childcare that was a better match.

This increment provides \$200.0 MHTAAR + \$400.0 GF to expand early intervention efforts for young children and to maintain them after Bring The Kids Home ends. FY14 funding will support:

-Eight additional Social Emotional Pyramid Model sites (21 total sites across Alaska).

-A Family Preservation project focused on preventing young children in the child protection system from being removed from their homes by providing crisis intervention and support services to their families.

According to the Center on the Social and Emotional Foundations for Early Learning, the prevalence rate of challenging behaviors among young children in childcare and classroom settings is 10 to 30%. Childhood ratings of behavior problems at age 3 and 5 are the best predictors of later antisocial outcomes. Around 48% of children with problem behaviors in kindergarten have been placed in special education by the 4th grade. Over 65% of students identified with emotional and behavioral disorders drop out of school, which ultimately leads to poor job outcomes, limited income, and patterns of failure that may persist into adulthood. [Fox, L. and Smith, B., Policy Brief: Promoting Social, Emotional and Behavioral Outcomes of Young Children Served Under IDEA, January 2007.]

While many approaches and methods have been used in various early childhood settings, the "Teaching Pyramid" is an evidence based research model for "supporting social competence and preventing challenging behavior in young children." [National Association for the Education of Young Children, Young Children, July 2003]. The model addresses challenging behaviors of young children through a comprehensive and systematic process. The "pyramid" framework starts at the lower level of intervention and moves upward: 1) positive relationships with children, families, and providers; 2) home childcare and classroom preventive practices; 3) social and emotional teaching strategies; and 4) intensive individualized interventions. Implementing the teaching pyramid training component for families interested in reducing challenging behavior truly works.

Training will be provided to foster and biological families on the following six (3-hour) modules:

- 1) "Making a Connection: Building Positive Relationships with Children"
- 2) "Making It Happen: The Power of Encouragement"

Senior and Disabilities Services Administration FY2006 Replace unavailable federal funds for the Nursing Facilities Transition Program	Inc	225.0	0.0	0.0	225.0	0.0	0.0	0.0	0.0	0	0	0

This federal grant was awarded to the state September 30, 2001. The program has transitioned 53 people from nursing home facilities into the community at an average cost of \$1,900 per transition. Ten people were transitioned in FY2003, 34 in FY2004 and as of September 15 - 13 in FY2005. The program staff estimates that we will transition 35 to 50 per year at a cost of approximately \$2,000 per person for transition costs for a total annual grant cost of \$70,000 to \$100,000. Currently, we are averaging about 5 per month.

The budget under the federal grant is:

Personal Services	\$ 70.
Travel	15.0
Commodities	39.0
Supplies	1.0
Grants	100.0

The services provided from this grant have been extremely varied and may include chore services, PCA services, cleaning, lifeline, ramp, transportation, moving costs, wheelchair repair, handrail, and some Environmental Modifications. The services are enough to physically get the person into the community so that they qualify for waiver services.

The main function of the program staff has been to expedite waiver approval so we can be sure that the person will have services and supports after they are transitioned. This program has been staffed by a long-term, non-permanent position with a permanent position being established in the FY2005 Management Plan.

The annual savings is approximately \$85,000 per person. Based on the annual costs for FY2003, nursing facility costs for this group of individuals would have been \$6,132,365; whereas the waiver costs for the same group was \$2,843,921 for a savings of \$3,288,444 per year. The savings is reapplied to the SDS Medicaid Component, and reduces the need for the building of additional Nursing Facilities throughout the state.

In order to continue moving clients from Nursing Facilities to Community Services, this GF increment is needed, as many of the initial services which this program pays for are not covered by Medicaid. The federal grant was awarded for three years; and we have had a no cost extension due to the slow start up. The grant is slated to end in September, 2005.

	Assurance Integrity												

The Adult Protective Services (APS) unit of the Division of Senior and Disabilities Services (DSDS) helps to prevent or stop harm (abandonment, abuse, exploitation, neglect or self-neglect) from occurring to vulnerable adults who have a physical/mental impairment or a condition that prevents them from protecting themselves or from seeking help from someone else. Services that are provided include: 1) information and referral; 2) investigation of reports of harm; 3) protective placement; and 4) guardianship counseling.

Reported cases of harm and subsequent caseloads assigned to APS staff have grown in recent years, both as a result of the increase to the elderly population (a national trend) in Alaska and as a result of an increase in age-related disorders such as Alzheimer's and Dementia. This increase can also be attributed to the newly increased responsiveness of this unit which is getting out by word of mouth to Alaska residents and increases the level of faith that something will be done with reports that are received. While the APS unit has grown by one position in FY06, DSDS does not believe this additional position plus the existing 6 positions will be able to absorb all of the increased caseload effectively. If each report of harm/neglect cannot be given the attention it requires, Alaskan seniors will suffer and may experience injury or death. This increment requests two additional positions in the unit to help reduce overall caseload assigned to each staff member, allowing them to more effectively (and personally) handle the cases they are assigned.

The number of active investigations performed by the Adult Protective Services unit has grown from 1,227 in FY04 to 1,684 (projected) in FY06. This represents an increase of 37.3%. At the same time, there has only been one additional position assigned to this work unit, an increase of only 16.7%. Based on the first three months of this fiscal year, there are estimated to be an average of 140 new investigations each month in FY06. That is an increase from 102 new investigations each month in FY04. This upward trend in cases is expected to continue into FY07 and beyond. The average duration of each investigation is approximately three months, although they

Harm - Adult Protective Services												

The Adult Protective Services Program is responsible for the protection of vulnerable adults. The staff is charged with preventing or stopping harm from occurring to those vulnerable Alaskans who have a physical or mental impairment that prevents them from protecting themselves or from seeking help from someone else. Having adequate staffing in the Adult Protective Services Unit is essential for the division to be able to provide investigations of reports of harm, abuse or neglect in a timely manner. The longer it takes an adult protective services case worker to investigate a report of harm, the longer a vulnerable adult may experience physical harm, neglect or be taken advantage of financially.

Adult protective services caseloads have increased from 168 cases per worker in FY2004 to 240 cases per worker in FY2006. New positions were added to the FY07 budget and have been filled, so the growth in the caseload per worker has started to decrease. Adding additional positions in FY08 should help bring caseloads down to a number that's closer to the national caseload average. With enough staffing, Adult Protective Services staff will be able to investigate reports of harm in a timely manner and reduce the amount of time vulnerable adults are exposed to harm.

This change will add two new Social Services Specialist II positions to the DSDS budget as phase 2 of a request that first appeared in the FY07 Governor's Budget. DSDS is trying to anticipate and request the number of case workers needed to keep up with growth in the Alaska senior population.

funding needed for FY11 is \$1,942.0.												

This funding will be used to:

- 1) fund positions recommended by the Federal Centers for Medicare and Medicaid Services (CMS);
- 2) outfit the workspaces of the employees including computer, workstation and communications equipment;
- 3) improve existing communications; and
- 4) explore the replacement of the division's current assessment process and instrument.

The division has requested resources that were partially funded in the past; however, with the current emphasis that CMS has placed on compliance with their expectations there is added urgency to obtain the appropriate resources needed in order to retain the ability to use their waiver and entitlement programs.

If funded, SDS will be able to deliver core services and implement the program enhancements agreed to in the Corrective Action Plan (CAP) mandated by CMS. If this request is not approved, the division will be unable to meet the program performance requirements, and commitments documented in the CAP.

There are more than 10,000 Alaskans living with disability due to brain injury. There are currently 262 Alaskans with Acquired and Traumatic Brain Injury (ATBI) each year that qualify for medical assistance. The current State of Alaska and statewide resources available to best prevent, treat, and support (long-term) Alaskans after brain injury are extremely scarce; they do not meet the current needs or the increasing demand. Without the proper resources Alaskans with brain injury are at risk of job loss, divorce, substance abuse, bankruptcy, and homelessness, often negatively impacting many State of Alaska departments and service systems. The passage of SB 219 in 2010 established an Acquired/ Traumatic Brain Injury program and registry within the Department. This has given DHSS statutory and regulatory authority to address the many service gaps. Funding, staffing, planning infrastructure, and development expertise, are imperative to successfully meet the requirements of SB 219. These requirements will provide the foundation to then work (collaboratively) to reduce the incidence of brain injury and minimize the disabling conditions through the expansion of services and supports for TBI survivors and

to access the programs for new applicants and non-compliance with Federal waiver requirements resulting in the Centers for Medicare and Medicaid Services potentially not renewing the waivers and civil litigants taking SDS back to court for failing to meet our court-mandated timeline obligations for conducting critical elements of waiver management. Non-renewal of waivers will also result in the loss of hundreds of millions of dollars of services to aging and vulnerable Alaskan populations. These waiver programs allow the state to provide long-term care in less restrictive, more cost effective home and community-based settings for Alaskan seniors needing certain levels of care. These programs were developed in response to the high costs and limited availability of nursing home care. If these other care options were not available, Alaska would face two alternatives: the need to build more nursing homes and/or the loss of residents to other states for services.

The FY2012 Governor's Budget included an increase of \$1,250.0. This amendment provides an additional \$250.0 based on a FY2011 supplemental request.

The Division of Senior and Disabilities Services (SDS) requests \$550.0 to ensure compliance with the Centers for Medicare and Medicaid Services (CMS) requirements to protect the health and welfare of persons receiving waiver services and to deliver improved and measurable services to vulnerable adults.

The Adult Protective Services (APS) Program provides services designed for the protection of vulnerable adults suffering from exploitation, abuse, neglect or self-neglect and abandonment. This unit also functions as statewide Central Intake for all Reports of Harm as well as all Critical Incident Reports for Senior and Disabilities Services. In FY2011, including Assisted Living Home reports, APS received 4,425 Reports of Harm and investigated 3,272 of these reports for abuse and/or risk of abuse. With only nine investigators statewide, it is becoming increasingly difficult to meet statutory requirements for protection of vulnerable adults across the state, especially in the rural areas.

Caseloads per worker are approximately triple (75) the recommended average (25). The number of Reports of Harm has increased 183% over the last five years and is expected to continue to climb as the Baby Boomers continue to age. The lack of adequate staffing levels, as well as extremely high caseloads, have resulted in slower response times, worker burnout, inability to follow-up on interventions to ensure that safety provisions are adequate and the inability to close cases. APS is no longer able to provide information and referral services to vulnerable adults due to the lack of resources.

The division has and will need to continue to rely on long term non-permanent Social Services Specialists positions to allow for smaller case loads and enable the permanent investigators to conduct full and comprehensive investigations to ensure safety and well-being for vulnerable adults. Long term non-permanent staff would also allow APS to promote public policies to effectively and efficiently recognize, report, and respond to the needs of the increasing number of older persons and adults with disabilities who are abused, neglected, and exploited, and to prevent such abuse whenever possible; and to increase public awareness of abuse of elders and adults with disabilities.

The General Relief/Temporary Assisted Living program has experienced significant growth over the last few years due to an increase in the aging population in Alaska. This program pays for temporary assisted living costs in assisted living homes for adults over the age of 18 that are experiencing harm, abuse or neglect, until such time that other funding sources can be identified (e.g., Medicaid Waiver). Many of these individuals are homeless or living in an unacceptable environment. Adult Protective Services case workers must remove them from their current living situation for placement in assisted living homes. Ideally, the assisted living home would be a temporary arrangement, but because finding alternate funding sources can be difficult, many beneficiaries of this program receive support for an extended period. The General Relief/Temporary Assisted Living Program can be the only thing keeping beneficiaries off the street.

In FY06, the DSDS requested an increment of \$750.0 to help fund this program. This increment was not approved. Approximately \$1.0 million of additional funds had to be provided to keep this program functioning in FY06 through a supplemental and reallocation of division funds. There was no increase in funding in FY07, so this request is for additional program funds in this component to offset anticipated growth in this program in FY2007-2008. The division anticipates that program growth will exceed \$500.0 thousand dollars, but will make every attempt to manage this program. Program regulations will also be reviewed and revised as needed to minimize the length of time that seniors rely on this program for safe housing support.

#### Senior and Disabilities Services (continued) Senior Community Based Grants (continued)

FY2010 MH Trust: ACoA - Grant 1927.01 Aging and Disability Resource Centers (continued)

SDS is requesting \$125.0 MHTAAR authorization to distribute to three (3) grantee agencies throughout Alaska that are currently acting as Aging and Disability Resource Centers. These agencies are "no-wrong-door" agencies that can provide valuable information about how to access services to both seniors and persons with developmental disabilities. These agencies provide a valuable community service to vulnerable adults that are seeking Long Term Care either in their home or community based institution.

Aging and Disability Resource Centers (ADRC's) serve as a visible, trusted place for people to go to for information and assistance with accessing services that support them in the community. The integration of information regarding long term care can reduce the frustration and feelings of being overwhelmed experienced by people when trying to understand and access available long term care options. ADRC services are unique from other information and referral services because they have the added focus of assisting with streamlining the entrance into long term care services as well as targeted efforts to reach ADRC Users who are able to privately pay for services. The primary target populations are the elderly with Alzheimers Disease or related dimentia, or people at risk of these conditions, and people with disabilities. However, assistance is provided for anyone who seeks information or referral services on any long-term care issue. The project will be administered by DHSS Senior and Disabilities Services and will unify the referral process for beneficiaries under this service division.

ARDC's provide assistance to seniors and persons with disabilities with completing applications, long-term care options, counseling and decision support. In FY09, management of the ADRC's is transitioning from Alaska Housing Finance Corporation and the State Independent Living Council to the Division of Senior and Disabilities Services. Regional ADRC's currently operate in Anchorage, Southeast Alaska and the Kenai Peninsula. ADRC's will evollve into a statewide information resource, accessible to all Alaskans via phone, internet and agency outreach. They will also be able to pre-screen individuals for Medicaid and other program eligibility.

The intent is to obtain an annual budget of \$750.0 including MHTAAR for this program by the end of FY2011 so additional regional centers may be funded. Full funding of this program will result in the establishment of two additional ADRC's in locations not currently served by the existing centers. Potential locations include Fairbanks/Interior Alaska, Northwest Alaska regiona dn Southwest Alaska region.

grants for ADRD beneficiaries

The mini-grants for Alz.

The mini-grants for Alzheimer's Disease and Related Dementia (ADRD) beneficiaries program has been funded by the Trust since FY99 and is administered through the DHSS Senior and Disabilities Services grantee, Alzheimer's Association of Alaska. Mini-grants provide Trust beneficiaries with a broad range of equipment and services that are essential to directly improving quality of life and increasing independent functioning. These can include, but should not be limited to, therapeutic devices, access to medical, vision and dental, and special health care, and other supplies or services that might remove or reduce barriers to an individual's ability to function in the community and become as self-sufficient as possible. Assistance with basic living needs not covered by current grants, such as transportation, clothing and the like, will also be considered. These services help Trust beneficiaries attain and maintain healthy and productive lifestyles. These items are determined to support beneficiaries in achieving stability/comfort and are key supports to maintaining families' self-sufficiency and ability to care for a family member. Consumer mini-grants are an important component of a system delivering individualized services that promote stability.

FY2014 MH Trust: ACoA - Alzheimer's Disease & Related Dementia Education & Support Program (ADRD-ESP)	Inc	230.0	0.0	0.0	0.0	0.0	0.0	230.0	0.0	0	0	0

The increment will build capacity in ADRD education, training and supports for ADRD-persons, family caregivers, and professional caregivers by increasing current service levels annually (10%) and adding new services.

- Increase statewide ADRD education, training, consultation and supports, targeting rural and underserved areas, to enhance ADRD understanding, promote education about brain healthy behaviors, and reduce stigma.
- Increase the number of consultations/supports to ADRD individuals and families, focusing on personalized plans of care and interventions.
- Increase availability of memory screenings statewide.
- Expand education and peer support to improve understanding, reduce depression, and encourage future planning for individuals newly diagnosed.
- Increase training to service providers to strengthen the ADRD workforce and improve understanding/care of ADRD persons for direct care workers, assisted living, nursing homes, and supervisors.
- Enhance technical assistance to strengthen dementia-care. Introduce "dementia-care mapping" to assisted living/nursing homes (new).
- Translate educational materials for dissemination to diverse cultural communities (new).
- Increase statewide information/referral/assistance services through in-person and "warm-line" telephone support.

Enhanced ADRD services will increase ADRD public awareness, reduce stigma in addition to improving quality of

The department has made payments to hospitals and community health care providers for several years under the ProShare program as an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are funded entirely with general funds.

ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative strategy to optimize Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions that would otherwise have issued general fund grants for

In part, SB74 authorizes Department of Health and Social Services to apply for federal waivers and options to reform the Medicaid program and to assess the most cost-effective method for revising expansion coverage.

Section 36 charges the department with "reducing the cost of... senior and disabilities services provided to recipients of medical assistance under the state's home and community-based services waiver."

Section 38(d) (1) of the bill directs the Department to apply for the 1915(i) option under Medicaid.

Making use of the 1915(i) option offers the Department the opportunity to shift eligible recipients from 100% general funded grant programs to the 50% federal/50% general fund funded 1915(i) Medicaid option. Individuals receiving home and community-based services through the Community Developmental Disabilities Grant (CDDG) program must meet the definition of a person with a developmental disability presented in AS 47.80.900. The CDDG program provides home and community-based services to support individuals' desire to live as independently as they are able.

The department will use the 1915(i) funding option to refinance services provided through the Community Developmental Disabilities Grant program. 969 individuals accessed CDDG services in FY2015 with an average cost per recipient of \$12,008.04 per individual per year, for a total budget of \$11,635.8 general fund authority. All recipients could be transitioned from the CDDG program to the 1915(i) Medicaid option.

Changes to the State Plan and regulations are required to implement the new option and would involve extensive

Senior Residential Services FY2016 AMD: Reduce Senior Residential Services Grants Supporting Rural Elders' Residential Services	Dec	-200.0	0.0	0.0	0.0	0.0	0.0	-200.0	0.0	0	0	0

The Senior Residential Services (SRS) grant provides essential funds to rural-remote providers to operate and sustain supported residential living services to frail elders. The intent of the SRS program is to provide support in a residential setting so elders can remain in their communities of choice as they age, recognizing the importance of community, family and culture for one's well-being while avoiding the need to leave their families, culture and familiar surroundings for institutionalization in larger urban settings. Residents receive individual support in a residential setting which includes assistance with Activities of Daily Living and Instrumental Activities of Daily Living, in addition to social and cultural activities.

This program currently funds three rural assisted livings homes. In the past, funding was set aside for development of a fourth assisted living home. Reduction in this program would eliminate development funds for a fourth assisted living home.

In an effort to fund a fourth assisted living home, four planning grants were funded at \$50.0 each between FY2013-FY2015 to explore the possibility and feasibility of developing either assisted living or independent living for seniors in rural communities. The original recipients of the SRS planning grants were Native Village of Unalakleet, Illiamna Village Council, Eastern Aleutian Tribes, and Upper Tanana Wellness Court. Of those four, Upper Tanana withdrew in FY2015, Illiamna Village Council and Eastern Aleutian Tribes have made moderate progress but do not have a business plan in place. The Native Village of Unalakleet has made good progress in planning and has acquired local support but will still need to meet the challenge of securing funding for construction of the new facility.

The Native Village of Unalakleet has used their planning funds to contract with Agnew Beck to conduct a feasibility study. To date, the development committee has reviewed the study and decided to move forward with their

FY2009 Alaskans With Disabilities Who Are Victims of Violence Federal Grant	Inc	89.5	0.0	0.0	89.5	0.0	0.0	0.0	0.0	0	0	0

The Governor's Council on Disabilities and Special Education (Council) successfully reapplied for funding from the Department of Justice, Office on Violence against Women, to build upon past activities to meet the needs of women with disabilities who are the victims of physical or sexual assault or stalking. This project focuses on building regional collaboration in Southcentral Alaska where the majority of Alaskans with disabilities who are victims of violence live and where the most complete and complex service systems exist.

Alaska's FY 2004 project, Alaskans Speak Up (ASU), developed valuable tools and resources enabling disability providers and victim advocates to better respond to individual victims' needs and to collaborate agency to agency. It did not, however, fundamentally alter the relationship between two systems serving a shared population. The 3 year project initiated in FY 2008 (10/1/07 - 9/30/10) will promote regional service collaboration and capacity-building, creating a more effective and sustainable service paradigm.

During the first year, a regional needs assessment will be conducted. The assessment will inventory disability and victim advocacy system resources and relationships, detecting training and technical assistance needs. It will assess capacity to collect and share data across systems. Collaboration, capacity and skill building will be the first year focus, continuing through the project's life. The team will use its expertise and experience to promote cross-training to increase accessibility, expand staff knowledge and skills, and improve referral policies and systems. This has been initiated on a limited scale, via local Disability Advocacy Response Team (DART) seminars and training people with disabilities as ASU trainers.

Once the regional assessment is completed, a regional strategic plan focusing on collaboration, training, resource, and technical assistance needs identified through the assessment will be developed. By the end of year one, the assessment and strategic plan will be complete; the team will ensure women with disabilities are involved in assessment and planning. The assessment will identify cross-system challenges, as well as unique system and cultural needs. Strategic planning will address these policy issues as well as guide enhanced and improved service delivery.

During year two, the team will provide advocacy, outreach, training, and technical assistance to enhance regional collaboration and to promote delivery of and access to appropriate services to individuals with disabilities, which is often impeded by policy and procedure that is inadequately responsive to individual circumstances. Year three will see systematic building of capacity around the implementation of a DART model adapted to the region and

The Governor's Council on Disabilities & Special Education proposes three items for funding for FY09. First, the Council is requesting funds to hire a contractor to research Nebraska's developmental disability provider profiles as well as models from other states, and to gather similar information in Alaska. The Nebraska example describes outcomes for individuals served and profiles agency characteristics, such as the length of employment of staff, training staff receive, and reasons individuals have left the agency. A quality of life questionnaire is used to determine client outcomes such as social belonging, economic security, growth and development and perception of well being. The contractor will establish a system for collecting similar data and conducting a quality of life questionnaire that can be implemented in future years by existing state and provider staff.

A second activity will involve a third-party analysis of residential services in Alaska. This analysis is timely, as community-based residential services have grown tremendously since Harborview was closed, and as the number of individuals served through waivers has increased. This analysis will utilize the qualify of life survey and provider profiles, as well as focus groups to describe common elements of community-based residential services that lead to success. Focus groups will consist of residential staff, individuals supported in residential environments, as well as family members (both those with sons or daughters who receive residential supports as well as those with adult sons or daughters who live at home). The state council on developmental disabilities in North Carolina convened a group of innovative programs from across the country to describe and document best practices. The common features of these innovative and best practices with demonstrated outcomes will be incorporated into the

Transfer \$20.0 general funds from HSS State Facilities Rent to align personal services authority with anticipated expenditures (\$17.2) and to support the component's computer refresh program costs (\$2.8).

Quality Assurance and Audit has experienced a general fund shortfall in the past few years. This component's activities have increasingly supported Medicaid-related programs. Medicaid collects at a 50/50 rate of general funds to federal funds. The transfer will lessen the need for transfers during the fiscal year and at year-end closeout. It will also align authority to the component where the projected need exists.

HSS State Facilities Rent has sufficient general funds to accommodate the transfer. Internal changes in the lease

## Agency Unallocated Appropriation (continued)

FY2006 Find qualifying GF reductions opportunities rather than create new programs. (continued)

Substance Abuse Prevention/Intervention - Statewide Multi-media Education Campaign

This project is to develop broad, diverse and comprehensive multi-media campaign aimed at children, youth and parents and the public to involve all Alaskans in recognizing the damage alcohol causes. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Reach Out Now

Utilizing materials developed for this national model, will provide community grants to agencies working with their community's school programs. Program will focus on a school-based educational approach, with trained agency staff providing information, and then developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free Training and leadership for young people who might be experiencing peer pressure to drink. Community grants to youth organizations who would like to partner with the state to increase public awareness of this issue and mobilize action to decrease early on-set drinking and utilize youth as leaders/mentors among their peers. TANF share of project financing is \$500.0.

Behavioral Health RDU AK Fetal Alcohol Syndrome Program component

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free The TANF funded part of this project will fund Community Based Prevention and Service Improvement. This project will fund community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD. TANF share of project financing is \$500.0.

Boards and Commissions RDU Gov's Advisory Council on Faith-Based and Community Initiatives component Creation of Faith Based and Community Initiative Council

Establishing the Governor's Advisory Council on Faith-Based and Community Initiatives and the Office of Faith Based and Community Initiatives in the Department of Health and Social Services will iointly serve to facilitate communication and collaboration between faith-based and community-based organizations and government agencies in order to address gaps in Alaska's work force and health and social services systems. TANF share of project financing is \$105.0.

Public Assistance RDU PA Administration component

Other Federal TANF funded services and initiatives promoting self-sufficiency and client services within the parameters eligible for TANF funding. While Alaska's TANF caseload has been decreasing the number of extremely low-income working families needing Child Care Assistance, PASS II/III has increased. The TANF share of project financing for additional Child Care Assistance is \$595.0.

1003 G/F Match (UGF) -3,180.0

FY2006 Restore GF reduction

In October 2004, the Dept. of Health & Social Services, Division of Public Assistance (DPA) was awarded a

federal TANF High Performance Bonus of \$3.18 million. DPA received this bonus payment for its exceptional performance in federal fiscal year 2003 in moving welfare recipients from public assistance to the workforce.

## Departmental Support Services (continued) Agency Unallocated Appropriation (continued)

FY2006 Restore GF reduction (continued)

Alaska received the maximum bonus allowed for ranking highly in the nation in 2003 for the "job entry" category - the percent of people placed in jobs. Alaska also received bonus funds for offering services to families so they can have affordable, quality child care.

The following represents the Department's proposed spending plan for investing the federal TANF performance bonus funds:

Public Health RDU Women Children and Family Health component

Statutory Rape Reduction Project

The Division of Public Health undertook a statewide campaign to reduce the incidence of sexual assault of young girls through a campaign funded in part by Division of Public Assistance, Temporary Assistance to Needy Families (TANF) in FY02 and FY03. These requested funds will continue upon that campaign. TANF share of project financing is \$480.0.

Behavioral Health RDU Behavioral Health Grants component

Substance Abuse Prevention/Intervention - Statewide Multi-media Education Campaign

This project is to develop broad, diverse and comprehensive multi-media campaign aimed at children, youth and parents and the public to involve all Alaskans in recognizing the damage alcohol causes. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Reach Out Now

Utilizing materials developed for this national model, will provide community grants to agencies working with their community's school programs. Program will focus on a school-based educational approach, with trained agency staff providing information, and then developing an ongoing dialogue with 11-12 year olds about alcohol and drugs. TANF share of project financing is \$500.0.

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free Training and leadership for young people who might be experiencing peer pressure to drink. Community grants to youth organizations who would like to partner with the state to increase public awareness of this issue and mobilize action to decrease early on-set drinking and utilize youth as leaders/mentors among their peers. TANF share of project financing is \$500.0.

Behavioral Health RDU AK Fetal Alcohol Syndrome Program component

Substance Abuse Prevention/Intervention - Leadership Initiatives to Keep Children Alcohol-Free The TANF funded part of this project will fund Community Based Prevention and Service Improvement. This project will fund community-based FASD improved services programs focusing on interventions and services such as respite care, case management, mental health services, substance abuse services, job training/vocational rehabilitation and services to work with women at risk for giving birth to a child with an FASD. TANF share of project financing is \$500.0.

Boards and Commissions RDU Gov's Advisory Council on Faith-Based and Community Initiatives component Creation of Faith Based and Community Initiative Council

Establishing the Governor's Advisory Council on Faith-Based and Community Initiatives and the Office of Faith Based and Community Initiatives in the Department of Health and Social Services will jointly serve to facilitate communication and collaboration between faith-based and community-based organizations and government

The Department of Health and Social Servies has contracted with Meyers and Stauffer to review rates for various programs including several components of the Medicaid program. Results of the rate study will provide department decision makers data on a variety of subjects including:

- 1. How long has it been since a particular rate has been adjusted?
- 2. What is a reasonable rate?
- 3. How will the department best equalize rates across all programs?

Programs identified for possible inclusion in a rate adjustment are:

Medicaid Facility Rates - Inpatient Pysch Hospitals
Increase Outpatient Behavioral Health Rates
Increase Child Care Program Rates
Foster Care Base Rate Increase
Therapeutic Foster Care
Medicaid Facility Rates - Hospitals
Increase Rates for Emergency Transportation
Change Primary Dispensing Rate
Increase Medicaid Indian Health Service Dental Services Rates
Increase Dental Rates to non-IHS Providers

The Grantee Partnership Project is a department-wide effort to increase the efficiency and effectiveness of the DHSS grant making process. The goals of the project are to:

- 1) reduce the administrative burden for DHSS while ensuring adequate fiduciary control;
- 2) increase customer/grantee satisfaction; and

the Grantee Partnership Project (GPP).

3) reduce administrative burden for grantees to interface with the department.

The Department of Health and Socials Services expends approximately \$140,000,000 per year in support of social service to citizens of Alaska funded through grant programs administered by the Department. The process of allocating and awarding funds to and subsequent management of these awards through closure, for a wide array of providers and communities, is time consuming and burdensome for the Department. The entire process within the Department from the development of the Requests for Proposal, through conducting proposal evaluation committee meetings, to making the grant awards and monitoring ongoing compliance with grant requirements, occupies the time of hundreds of staff. From a grantee perspective, developing grant proposals, ensuring programmatic and fiscal compliance with grant requirements and compiling and filing reports also takes numerous staff hours. In many instances these reports contain information about what grantees are doing but very little about what is being accomplished (outcomes). In addition a number of grantees have to submit separate reports for each grant they receive. In many cases, the process remains paper-based.

FY2010 Grantee Partnership Project (continued)

The Department, with assistance from the Rasmuson Foundation, contracted for an internal and external business process review with Cliff Consulting, Inc. The review identified the strengths and weaknesses of the Department's grant process, areas of possible improvement for the Department as well as the non-profit sector, and recommendations for the partners to pursue.

The Grantee Partnership Project will begin by implementing recommendations provided by the partnering group and approved by steering committee. Ongoing efforts will be to:

- Develop policies and procedures for Department internal communication to ensure a timely process of issuing RFPs, RFLOIs, Grant Awards, Payment Advances, and Technical Assistance, while gathering only the appropriate reporting information required for evaluation.
- Improve grantee relations by working together as partners in efforts to provide the highest level of services and to increase the amount of services available to the citizens of Alaska.
- Streamline the grant process to eliminate the administrative inefficiencies that reduce success among programs and limit the amount of direct services to the citizens of Alaska.
- Develop and train grantees and Department staff on how to use Logic Models, which will guide program managers through a strategic planning process.

The Rasmuson Foundation has committed \$519,150 over three years to this project and the Mental Health Trust has committed \$50,000 for FY09. Upon review and continued progress, the Mental Health Trust Authority has indicated a willingness to award another \$50,000 in FY2010 and again in FY2011. The Mat-Su Health Foundation has partnered with the Foraker Group to provide Logic Model Training to the Department staff as well as non-profit organizations statewide through a direct grant from the Mat-Su Health Foundation to the Foraker Group.

The funding detail below presents the combination of this change record fund source and its companion MHTAAR change record of \$50.0. The total request for this project for FY2010 is \$346.1.

Purpose and use of funds by funding source:

SDPR- \$196.1- Rasmuson Foundation funding

- -\$100.0 Personal Services for Project Coordinator
- -\$4.5 Travel for Project Coordinator and GPP committee members
- -\$91.6 Contractual for Consultant(s) to advise management, provide grantee liaison, and project evaluation/measuring staff perception and project evaluation.

GF- \$100.0

- -33.1 Personal Services for Project Coordinator
- -\$4.5 Travel for Project Coordinator and GPP committee members
- -\$62.4 Contract RFP proofreader to ensure consistency throughout the Department, training internal staff and grantee on new Streamline Small Grant process, online application for proposals submitted in response to the Departments RFP, and training/testing of new online RFP system for grantees, program managers and grant administrators. Software coding and testing in support of online proposal submission.

MHTAAR- \$50.0

-\$15.0 Contractual for professional development and grantee training

The position was created in FY2008 to manage the Grantee Partnership Project. Utilizing grant funds awarded by the Rasmuson Foundation, the position was tasked with building relationships between the department and its grantee partners, streamlining the grant process, and initiating strategic planning to ensure movement towards agreed upon outcomes of success. These efforts also include the ongoing management of a contract with the Foraker Group. The grant with the Rasmuson Foundation was completed in FY2012, although some efforts continue to date.

The position also manages the Human Services Community Matching Grant (HSCMG) and the Community Initiative Matching Grant (CIMG). Funding for these programs in FY2015 was \$1,785.3 and \$879.3 respectively. There are a total of three grant awards and fifty-one sub-grant awards under the HSCMG and seventeen grant awards under the CIMG.

The position assumed the responsibility as the Grantee Liaison, supporting both grantees and the department program staff when grant program issues or concerns arise.

The position is responsible for collecting all departments past performance reports, to ensure the ability to consider grantees past performance in future funding decisions. Upon completion of the Grant Electronic Management System, this duty will no longer be required.

In response to budget reduction requests, this full-time range 21 Juneau Project Coordinator (06-0614) in the Commissioner's Office will be deleted, and the duties of the position will be assumed within the department.

The State of Alaska, Department of Health and Social Services, is seeking to expand the Program Integrity/Quality Improvement functions in the Office of Program Review. This expansion is necessary to comply with new federal regulations to conduct Medicaid Program and State Children's Health Insurance Program (SCHIP- a.k.a. Denali KidCare) Payment Error Rate Measurement (PERM) pursuant to 42 CFR Parts 431 and 457. This rule requires State agencies to estimate improper payments in the Medicaid Program and SCHIP program.

The Improper Payments Information Act of 2002 (Public Law 107-300) requires Federal agencies to annually

The Department of Administration charges central Core Services. Higher rates are charged for Mail Services, Leasing Services, Human Resource Services, Accounting and Payroll, and Computer Services and Telecommunications. In addition, increases have occurred in general categories for some of the central chargeback services for the department. An increase in federal funds is necessary because based on the department cost allocation program federal sources can be tapped for these charges. The rates are based on overhead and factors.

FY2007 Improve Revenue Management/Cost Allocation	Inc	232.5	222.4	1.5	7.8	0.8	0.0	0.0	0.0	2	0	0

The Department of Health and Social Services, Administrative Services component is requesting the addition of three new positions. These positions will be responsible for the department's revenue/cost allocation management system.

The Department of Health and Social Services currently uses a set of Microsoft Excel spreadsheets to implement the Cost Allocation Plan/Revenue Management functions. Due to the nature of the work involved and the growing size of the spreadsheets currently employed to do this work, the Department is putting itself at great risk of a failure that will cripple the ability to properly earn Federal revenue. Because of the importance to the Department for this fundamental process and the instability of the current solution, it is critical that we develop a more stable and robust process. Losing our ability to accurately earn Federal revenue would seriously impact the service delivery for the entire Department.

The existing methods of utilizing the spreadsheets for this function are getting increasingly complex and prone to error. The spreadsheets can only be accessed by one individual at a time. Due to the complexity and size of these spreadsheets, they periodically become corrupted and must be restored from backup, losing hours of valuable work product. Other errors can occur that negatively impact the ability to maximize the earning of Federal revenue. In addition, only two staff members in the fiscal section understand the intricacies of how revenues are collected. The number of grant awards has increased so dramatically that existing staff cannot keep up with the workload.

SB 64 established a Recidivism Reduction Program to promote the rehabilitation through transitional re-entry programs of persons incarcerated for offenses and recently released from correctional facilities. The Recidivism Reduction Program must (1) include case management; (2) require sober living; (3) provide, on site or by referral, treatment for substance abuse or mental health treatment; (4) require employment, educational programming, vocational training, or community volunteer work as approved by the director of the treatment program; and (5) limit residential placements in the program to a maximum of one year.

In FY2015 a total of \$101.0 (\$30.3 Federal Receipts and \$70.7 Inter Agency Receipts) from Department of Corrections and one full-time Grants Administrator II position was appropriated to implement the Recidivism Reduction contract.

This full-time range 17 Juneau Grants Administrator (06-?009) has not been filled. After careful consideration of the potential workload this program would bring, it was determined that a full-time position was not necessary to administer the grant, and that the workload could be absorbed by existing Grants Administrators within the Department of Health and Social Services Grants and Contracts Unit. A negative FY2015 supplemental removing the unfilled position would not negatively impact the department.

The Department of Health and Social Services is transferring an initial wave of positions to the Shared Services of Alaska organization for accounting and administrative activities.

It is anticipated that an initial ten percent savings in personal services costs can be realized in FY2018 for these activities, with increased savings in future fiscal years as the organization matures.

The Department conducted an independent assessment of its security. This request would fund two positions (a Security Officer and another information technology position) and support costs to bolster the department's security on the network. The independent assessment has recommended this new structure.

The Department of Health and Social Services requires a Department Security Officer to ensure the department

adheres to federal and state regulations regarding security of	of its electronic data and a te	echnician to help	build the								
security infrastructure. Specifically, the Health Insurance Po	ortability and Accountability	Act of 1996 (HIPA	1 <i>A)</i>								
security regulations requires assigned security responsibility	in 45 CFR 164.308(a)(2).	This position will	have the								
overall responsibility of ensuring that the appropriate information	ation technology and non-in	formation technol	ogy								
security safeguards are in place, the policies and procedure	s are developed, reviewed,	agreed upon, roll	ed-out,								

Persona<sub>1</sub>

The Department Security Officer will provide independent oversight for the Department's electronic data security. It is important that the security position have no competing interests with the Information Technology section, who may have conflicting demands with regard to IT functionality and costs, and that the duties between the two are separate. The security position will use contractual and other resources to provide risk management for all aspects of electronic information security including administrative, physical, and technical safeguards. Responsibility for the right level of security is a business decision based on risk assessment. Ideally, the Department should separate information security program management and monitoring from the daily security duties required in IT operations. The Department Security Officer will be independent and report directly to the Assistant Commissioner.

and up-to-date, and that all users of information systems understand their responsibilities. This position will

provide independent oversight for the Department's electronic data security.

The department manages many databases with highly confidential personal or medical information concerning clients. Any security breach would not only be devastating for DHSS clients, but would put DHSS at great liability and risk. Putting an adequate system in place is a key prevention strategy to reduce the risk to the state. If DHSS is not HIPAA compliant, serious federal fines could be levied.

Training:

The Department of Health & Social Services currently has a team of IT professionals providing Information Technology services across the Department. This group of individuals has been put together in a cohesive unit within DHSS to provide IT services in areas such as Business Applications, Customer Services and Network Services. One of the major challenges facing the IT service delivery group is restructuring the organization to provide enterprise services across the Department. With our newly adopted approach, the entire IT staff has re-organized and areas of responsibility have expanded to cover larger service areas. In addition, the Department has adopted standards across the enterprise to meet service requirements.

Currently, we have staff that DSS/ITS has inherited with skill sets specific to their legacy areas of responsibility and these need to be expanded to more efficiently support our infrastructure. This training request will provide funding for IT staff to train within Customer Services, Business Applications and Network Services.

#### Departmental Support Services (continued) Information Technology Services (continued)

FY2008 Replace federal funding due to Deficit Reduction Act for Title IV-E (continued)

Act for indirect costs charged to federal programs for the Commissioner's Office and Finance and Management Services.

The Department of Health and Social Services, Information Technology component requests \$102.0 of general funds for anticipated reduced federal receipts as a result of the Federal Deficit Reduction Act of 2005 reversal of Rosales v. Thompson and the ability to claim for IV-E eligible children placed in unlicensed relative homes.

Rosales and Unlicensed Relative Placements

The Ninth Circuit Court ruling in Rosales provided the State of Alaska the opportunity to broadly apply Aid to Families with Dependent Children (AFDC) income and resource requirements to determine IV-E eligibility that did not need to be based on the same home from which a child was removed. This meant that a child's eligibility could be established using the home of any relative with whom the child resided within six months of the month in which eligibility was determined. Alaska became eligible to claim reimbursement for administrative costs under this ruling on July 1, 2003, the date Alaska's IV-E state plan amendment became effective.

The Federal Deficit Reduction Act of 2005 (DRA) reverses that ruling and limits the state's ability to claim IV-E maintenance and administrative costs by requiring all Title IV-E agencies determine eligibility for federal foster care assistance on the specified relatives home from which the child is removed.

The Federal Deficit Act of 2005 also changed Title IV-E administrative claiming allowances pertaining to unlicensed foster care. Previously the State of Alaska was reimbursed for its Title IV-E administrative expenditures for children in both relative and non-relative unlicensed foster care placements. The new law prohibits claiming federal fund participation for not-fully licensed non-relative foster care placements and restricts reimbursement to less than 12 months for any relative foster care placement in the process of getting licensed.

The Information Technology component estimates the reduced ability to claim federal funds for services provided to the Office of Children's Services IV-E eligible children through the Information Technology component to be \$102.0. Rosales accounts for about 15% of the foster care population resulting in a parallel drop in the foster care administrative penetration rate. The penetration rate determines the percent of state administrative expenditures that will be considered reimbursable at 50%.

Mission and Measure: Without these funds the days to respond to service calls will increase by 2 days. In FY2005 response time was 8.2 days. In FY2006 it had decreased to 4.9 days. By not receiving these funds the response time will increase to 7.0 days and we will have to keep an additional 1% of our positions vacant (currently we have a 7% vacancy).

End Result: IT users will not be as efficient using technology due to increased wait times which could impact client outcomes.

Division Level End Result D: Facilitate the Department's day-to-day operations through effective and efficient delivery of information technology services. Target #1: Reduce the length of time and number of hours to respond and close out service calls. Measure #1: Number of hours to close out service calls. 1004 Gen Fund (UGF) 102.0

Replace a reduction in interagency receipts from the division of Health Care Services to maintain core services provided by the Commissioner Office. A review of the cost allocation plan found Health Care Services was not charged correctly and, without this fund replacement, continuing to charge Health Care Services at this level may result in audit findings, potential federal compliance issues, and the return of federal funding. While the additional costs could be borne by the divisions, no additional funding to cover this increase has been requested by the divisions and a reduction in core services provided throughout the department will result.

exceptionally challenging.

Information Technology Services (ITS) acts in a reactionary mode in areas of desktop replacement and infrastructure upgrades. Typically, it takes the failure of a desktop computer, server, switch or router before ITS performs a replacement upgrade. Often these failures leave customers without service until ITS can react to the failure, greatly affecting the service offered in the community.

ITS proposes the establishment of an information technology rural support program to proactively address the unique needs of our rural customers. Desktops and network infrastructure should be replaced in a staggered approach depending on the life of the equipment. ITS has determined that it is necessary to refresh 25% of the approximately 700 workstations annually, resulting in 180 desktop computers replaced each year, at a cost of \$1,300 per machine (including disposal). Monitors will be an extra cost, but it is anticipated that new monitors will only be needed in some cases. Yearly network infrastructure upgrades are estimated at \$10,000 per site, for 28 sites. Additionally, ITS is requesting \$72.0 for travel, which will allow an average of two days of on-site support, three times each year, for each of the 28 rural sites. This on-site time is required to install and configure new

FY2013 Establish Rural Information Technology Support Program (continued)

workstations and server equipment.

Underfunding or not funding information technology rural support will reduce the department's ability to deliver critical services that impact all Alaskans, especially those in rural areas. This was recently demonstrated when the Ketchikan Public Assistance office went offline for two days. The inability to stay current with desktop and server-based hardware jeopardizes the effective operation of the myriad of computer-based case management systems upon which the department relies, leaving the organization at the mercy of hardware failures.

Problem Statement

DHSS and other health entities nationwide are facing an increasingly aggressive regulatory oversight environment. This became evident when the Office of Civil Rights (OCR) sanctioned DHSS for insufficient compliance with the safeguarding of Protected Health Information. The Office of Civil Rights imposed a \$1.7 million penalty and placed the department on a Correction Action Plan that mandates a Risk Assessment and Remediation Plan to be completed by January 2013. It is anticipated that the Office of Civil Rights will require DHSS to begin security remediation immediately following the assessment which will result in a supplemental request in FY2013 to begin the work prior to any FY2014 funding being available.

#### Proposal

This request addresses the resources needed to comply with regulatory requirements not currently being fully addressed. The complexity of the department's information systems continues to grow, with over three hundred servers, a hundred applications, sixty terabytes of data and dozens of critical information systems required for the everyday work within the department. To ensure compliance with a multitude and growing number of federal and State legal requirements contractual services, task orders, tools, training, travel, and legal advice, such as the below, are required to reasonably and appropriately safeguard the department's information, while meeting regulatory requirements and reducing the likelihood and cost of public breach notification.

- Manage effective security measurements
- Security awareness & education
- Maintain and implement security policies, procedures & guidelines
- Schedule and provide system and application assessments
- Remediate ongoing identified security risks to DHSS systems
- Manage & remediate security incidents
- Test and certify systems and applications
- Audit and direct security & compliance controls
- Provide timely reporting of corrective action progress
- Provide preventative and proactive accountability to executive management.
- Assessment, auditing and reporting tools
- Legal services from Department of Law

FY2016 AMD: Reduce Personal Services for Support to the Automated Services Plan System  In FY2012, Departmental Support Services, Information Technology.	Dec	-145.0	-145.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

In FY2012, Departmental Support Services, Information Technology Services, received an increment to support the Division of Senior and Disabilities Services in the development of a comprehensive case management system, DS3. The request included personal services authority necessary to fund Information Technology (IT) positions that had been held vacant to meet vacancy guidelines. Those funded IT positions were to become a service team within IT to support service delivery and address corrective action as required by the Center for Medicaid and Medicare Services (CMS), and support ongoing system modification and maintenance. IT, however, continues to experience recruitment difficulties in finding viable candidates with the skillset needed to support the DS3 system at a successful level.

In a department wide response to budget reductions, this request reduces the original increment. A request to transfer the remaining funding, \$255.0 General Fund and \$255.0 Federal, will be submitted in the next budget scenario to the division, so they may request the authority be moved to the services line item. The division would

Human Services Community Matching Grant Human Services Community Matching Grant FY2006 HSCMG Program Increase to Maintain Grant Levels for Anchorage and Fairbanks	Inc	76.0	0.0	0.0	0.0	0.0	0.0	76.0	0.0	0	0	0

To maintain grant levels consistent with FY04 and FY05 for Anchorage and Fairbanks in the HSCMG program a slight increase of \$76.0 is required to hold these two communities harmless from any reductions. This is because the individual grants to the three communities that qualify (Anchorage, Fairbanks and Mat-Su) is based on population and the pro-rated amount shifts due to slight variations in the certified population estimates. The intention is that the grant levels will not be reduced for any one grantee, thus the total amount of the program has to increase so the individual pro-rated amount for any one of the three communities is not less than the year before.

The final grant amounts per community expected in FY06 is outlined in the table below.

The allocation based on using 2003 certified populations figures and using \$239,700 as the target would be:

·	c Award (70%) Match (30%) To Cost	t Proj

This funding would establish regional community mental health care teams with individualized funding pools to implement care coordination and gatekeeping for the Bring the Kids Home program.

There has been a steady increase in the number of custody and non-custody children and youth placed in out of state residential psychiatric treatment centers. In FYO4 it was estimated that 733 children ranging in age from six to seventeen will be served out of state. The Child and Adolescent Needs Assessment revealed that Alaska Native children represent 49% of the population of children in custody and 22% of the non-custody children sent to out-of-state placements. Frequently out-of-state treatment is not as therapeutically beneficial to the children and their families as services delivered close to home.

The long-term goals of the Alaska Mental Health Trust Authority Bring the Kids Home proposal are consistent with those of the Alaska Community Mental Health Services Association; these agencies work collaboratively with the Division of Behavioral Health to bring to bear the collective experience and expertise of member agencies to the achievement of these goals. The Bring the Kids Home proposal has been broken into phases and strategies which can lead to significant improvements in the system of care for children and youth and work towards meeting the long-term goals of the program.

Assessment and Care Coordination is the process for determining the level of care for both custody and non-custody children. The objectives are to divert children from avoidable and unneccessary out of state residential psychiatric teatment placements by linking families and children with alternative community-based care or other in-state services, and facilitating patient progress toward treatment objectives with an emphasis on discharge planning. Regional community mental health care teams will be formed and composed of state agency representatives, community behavioral health providers (1 Native and 1 non-Native), the individual service provider already treating the child/family, the child and the parents/legal guardians.

In addition to assessing the level of need for specific children, the team will be involved in making the determination as to the specific residential treatment center program that best meets a child's unique treatment needs. This will provide authority to the team to place children in facilities that are responsive to working with local providers in case coordination and discharge planning.

Case coordination is another function of the team. With their knowledge of the individual child and family's unique needs, and familiarity with local community resources, the local mental health rehabilitation agencies are best suited to providing this function.

The State Children's Health Insurance Program (SCHIP), operated through Denali KidCare, each month provides health insurance for nearly 11,000 uninsured children under age 19. SCHIP helps reach uninsured children whose families earn too much to qualify for Medicaid, but not enough to get private coverage. Since its implementation in August 1998, Alaska has provided over \$230 million in medical benefits to more than 46,700 Alaskan SCHIP eligible children.

Each federal fiscal year states receive an allotment, which must be spent within three years. SCHIP allotments are determined by a formula based on a national ranking of the number of low-income children and average wages in the health industry. After three years, unspent allotments from all the states are combined into a redistribution fund, which is then reallocated to states according to need. States must spend redistributed funds in the year they are awarded. While Alaska was quick to get its program started, many states were slow to implement. This meant large sums of unspent allotments from other states were available to Alaska for redistribution. Since Alaska's annual allotment represents only about 25% of our costs, we have relied heavily on redistributed funds to support our program. In recent years the allotment has remained between \$7 and \$9 million; meanwhile, as more states have ramped up their programs our redistributed funds have shrunk from a high of \$38 million in FFY 2006.

SCHIP benefit costs are reimbursed at an enhanced FMAP. If costs exceed total allotted and redistributed funds, claims are reimbursed at the regular FMAP. In SFY07, SCHIP total benefit costs are projected to be \$34,485.0, of which \$24,246.4 is federal. Our total available federal SCHIP funds are projected to be only \$14,335.4, for an

The Rehavioral Health Medicaid Services component funds	three types	of services: resi	dential nevehiatric					•				

The Behavioral Health Medicaid Services component funds three types of services: residential psychiatric treatment centers, inpatient psychiatric care, and community mental health services. Behavioral Health Medicaid Services have experienced significant continued growth. This increment request is necessary to maintain the current level of behavioral health services provided to Alaskans with effective cost containment measures in place.

DBH Medicaid costs grew 9% from FY04 to FY05. This projection assumes the same growth rate in FY06 and FY07. Growth is due to increases in the number of patients served, increases in the utilization of services, and increases in facility rates. The average monthly number of beneficiaries rose 6% while the cost-per-recipient rose 3%.

Most of the increase can be attributed to Residential Psychiatric Treatment Center services (RPTC) and Inpatient Psychiatric Hospital services provided to children. Residential Psychiatric Treatment Centers experienced a 14% increase from FY04 to FY05. Inpatient Psychiatric Hospitals grew slightly faster than RPTC, making it the fastest growing category of service in Behavioral Health Medicaid with a 15% increase from FY04 to FY05.

While the department anticipates that the Bring the Kids Home initiatives will begin to slow the growth in these areas, the increase is necessary to support expected increases in utilization of outpatient services necessary to treat this population in their home communities.

However, please note that the increment request is based on FY06 existing authorization compared to FY07 growth need. FY07 fund source projections are based on regular FMAP of 57.58% (all 4 quarters) and enhanced FMAP of 70.31% (all 4 quarters). Projected expenditures are allocated by DBH Medicaid's actual expenditures by FMAP in FY05, resulting in an effective fed reimbursement rate for DBH of approximately 60%.

Medicaid Services (continued) Behavioral Health Medicaid Services (continued)												
FY2008 Shortfall due to shrinking redistribution of unspent State Children's Health Insurance Program (SCHIP) allotments	Dec	-1,305.0	0.0	0.0	0.0	0.0	0.0	0.0	-1,305.0	0	0	0

This request replaces lost federal revenues resulting from a decrease in the amount of federal funds available for the State Children's Health Insurance Program (SCHIP), a part of Alaska's Medicaid program operated through Denali KidCare. This increment is necessary to maintain the current level of health care provided to these children and supports the department's mission to manage health care for Alaskans in need.

SCHIP helps reach uninsured children whose families earn too much to qualify for regular Medicaid but not enough to afford private coverage. Each month. SCHIP provides health coverage for about 9.000 uninsured children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their SCHIP health coverage and become uninsured.

The federal and state governments jointly fund SCHIP. The amount of federal funding depends on the federal SCHIP allotment which has not grown to keep pace with SCHIP expenditures. The federal medical assistance percentage, or FMAP, determines the amount of state matching funds. The state receives a higher, enhanced FMAP for SCHIP than for regular Medicaid; however, this enhanced reimbursement is capped at the SCHIP allotment. If costs exceed available SCHIP funds, claims are reimbursed at the lower, regular FMAP, resulting in reduced federal revenues. Alaska will have only 41% of the federal SCHIP funding needed to cover program expenditures in 2008, exhausting its SCHIP funds in the second quarter. When it reverts to regular Medicaid, the difference in federal reimbursement rates means that Behavioral Health Medicaid Services component will need an additional \$1.305.0 GF in 2008.

Alaska's annual allotment has fluctuated between \$7 and \$11 million. Since Alaska's annual allotment represents only about 25% of our costs, we have relied heavily on unspent funds from other states which were redistributed to Alaska to maintain access to the enhanced FMAP. As more and more states have increased their SCHIP programs, there is less and less redistributed funding available and we do not anticipate any further

This increment will help the department improve the following performance measures:

Dept-D-4--Provide quality management of health care coverage services providers and clients DBH-A-1-A2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

Federal Authorization

Outpatient behavioral health services provided by Tribal facilities are currently reimbursed based on the lesser of the billed charges, the provider's lowest billed charge, or on a fee for service (per procedure) rate schedule established by the State. Alaska Native Tribal organizations have asked the State to consider changing the reimbursement methodologies available to Tribal providers.

The Department will be submitting a Medicaid State Plan Amendment to reimburse Tribal outpatient behavioral health providers at the published Indian Health Service (IHS) outpatient hospital encounter rate. If that plan amendment is approved, Tribal services will no longer be reimbursed based on the above.

Reimbursing Tribal behavioral health providers at the IHS outpatient hospital encounter rate provides improved

Numbers and Language

follow-up care.

Trans Tota1 Personal Capital Type Expenditure Outlay | Services Travel Services Commodities Grants Misc PFT PPT Medicaid Services (continued) Behavioral Health Medicaid Services (continued) FY2008 Increase Medicaid Tribal Mental Health Services Federal Authorization (continued) financial stability allowing Tribal organizations to expand the volume and scope of behavioral health services offered. The more Medicaid services provided to beneficiaries in Tribal facilities the more Alaska saves limited state general funds by insuring the federal government meets its trust responsibility to those beneficiaries. The IHS outpatient hospital encounter rate is closer to the cost of actually delivering the broad range of health services offered at Tribal facilities. The financial viability of the Tribal health care infrastructure insures access to health care for all the residents in many areas of the state. And lastly, the availability of local access to health care avoids the costs of Medicaid clients traveling to receive the care they need elsewhere in the state. The Department estimates that the cost to Medicaid for outpatient behavioral health services will increase by \$15,000.0 in FY08 due to the change to encounter based reimbursement for Tribal providers. Because Tribal services are 100% matched with federal funding, no additional general funds are needed. This increment will help the department improve the following performance measures: Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems Dept-D-4--Provide quality management of health care coverage services providers and clients DBH-A-1-A1.1a-Improve and enhance the quality of life of children with serious emotional disturbance by implementing the Bring the Kids Home program DBH-A-1-A2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system HCS-B---Provide affordable access to quality health care services to eligible Alaskans HCS-B--T1-Increase the number of providers HCS-A--A1-Increase IHS participation DPH-A---Healthy people in healthy communities DPH-A--A2-Reduce suffering, death and disability due to chronic disease DPH-A--A4-Assure access to early preventative services and quality health care 1002 Fed Rcpts (Fed) 15.000.0 FY2008 Increase Residential Psychiatric Treatment Center Inc 1,400.0 0.0 0.0 0.0 0.0 0.0 1,400.0 0.0 0 0 In-state Provider Medicaid Rates Behavioral Health increased per diem rates for in-state residential psychiatric treatment centers (RPTC) facilities effective for FY07 (effective July 1, 2006 through June 30, 2007) after the Department's Office of Rate Review completed a rate study and recommended the new rates. That rate adjustment was not included in the FY08 growth projection. The RPTC daily rate was \$325 through June 30, 2006. Effective July 1, 2006 the rate for regular in-state RPTC beds increased to \$357.58. The rate for secured in-state RPTC beds was set at \$399.30 per day. Therapeutic transition days remain at \$211 per day. The division also added 60 new RPTC beds (North Star RPTC, DeBarr), some of which are secured and charge at

a higher rate. With additional beds available, the division anticipates keeping a number of children in Alaska rather than out-of-state facilities. However, it costs more to provide comparable institutional services in-state, so "bring the kids home" efforts will likely contribute to some increased RPTC costs in FY08 as well. We anticipate some of those costs will be offset by shorter RPTC stays and use of less expensive community based services for

FY2008 FY08 Projected Medicaid Growth	Inc	7,042.9	0.0	0.0	0.0	0.0	0.0	7,042.9	0.0	0	0	0

This increment funds increases in Medicaid service costs due to increases in enrollment and utilization.

For FY08, Behavioral Health Medicaid costs are projected to grow 4% over the authorized amount of 155,071.5. This increment request is necessary to maintain the current level of behavioral health services in Medicaid. The Behavioral Health Medicaid Services component funds three types of services: inpatient psychiatric hospitals, residential psychiatric treatment centers, and outpatient behavioral health services.

In FY06 Behavioral Health Medicaid provided services to nearly 13,000 beneficiaries at an average cost of \$867 per person per month. Cost containment efforts begun in FY04 have successfully dampened the rate of growth in recent years. Behavioral Health Medicaid claims grew 9% from FY04 to FY05, but only 4% from FY05 to FY06. The projection for FY08 is to maintain the same 4% growth rate.

Residential psychiatric treatment centers, which had been the fastest growing segment of the behavioral health budget in recent years, experienced the least growth of the 3 service categories between FY05 and FY06, increasing only 2%. Most of the increase can be attributed to general mental health services which comprises about half of the claims and showed a 6% increase from FY05 to FY06. Inpatient psychiatric hospital services grew 10% from the prior year, making it the fastest growing segment in this component.

The fund source projection is based on the actual amount of federal revenue collected in FY06 in this component, 60%, and assumes that the proportion of expenditures eligible for each type of federal reimbursement remains the same. It also assumes that the FY08 average federal medical assistance percentage remains at 57.58% for regular Medicaid and 70.31% for SCHIP.

Medicaid paid for inpatient psychiatric hospital services for 962 persons in FY06, 944 of them in Alaska facilities. Ninety percent of Medicaid inpatient psychiatric clients in FY06 were children and 10% were disabled individuals. Two Alaska inpatient psychiatric hospitals serve about 98% of all Alaska Medicaid inpatient psychiatric clients. Less than 2% of Alaska Medicaid recipients receiving inpatient psychiatric services obtained services out-of-state in FY06.

This increment is necessary to maintain Alaska inpatient psychiatric hospital services at their current level and to prevent loss of provider participation. By regulation, payment rates for most facilities must be re-based at least every four years [7 AAC 43.685(a)(6)(B)]. Hospital, nursing home, and inpatient psychiatric hospital facilities were last re-based in FY04.

Inpatient psychiatric hospital payment rates for FY08 will be adjusted based on review of FY06 operating expenses and Medicaid billing activity for each facility. The new rate for each facility will become effective at the start of that facility's 2008 fiscal cycle. The Department estimates that the average adjustment will be 8%.

#### Medicaid Services (continued)

Behavioral Health Medicaid Services (continued)

FY2008 Medicaid Facility Rates Rebased -

Inpatient Psychiatric Hospital (continued)

The North Star Behavioral Health System inpatient psychiatric hospital will be re-based effective January 1, 2008 (will bill under increased rates for the last six months of FY08). The other in-state facility, Alaska Psychiatric Institute (API), will not rebase until FY09. There are currently no in-state IHS inpatient psychiatric facilities (the McCann facility is a residential psychiatric treatment center and is not included in this analysis). About 2% of the inpatient psychiatric payments processed in FY06 were for services provided by out-of-state facilities which are not subject to rate re-basing by the department.

The requested increment was calculated based on the percent of inpatient psychiatric hospital payments made to the North Star Behavioral Health facility in FY06. Almost 41% of payments for inpatient psychiatric hospital services will be impacted by re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in effect for six months of FY08.

The formula for calculation of the requested increment is: 8% X 40.8% X base projection for all FY08 inpatient psychiatric hospital services.

The base projection for inpatient psychiatric hospital services is \$21,671.7. Inpatient psychiatric hospital facility rate adjustments will increase that projection to \$22,379.1. The additional cost to Medicaid from re-basing in FY08 will be \$707.4.

This increment will help the department improve the following performance measures:

Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-B---Provide affordable access to quality health care services to eligible Alaskans

HCS-B--T1-Increase the number of providers

DPH-A---Healthy people in healthy communities

DPH-A--A2-Reduce suffering, death and disability due to chronic disease

There are currently no in-state IHS inpatient psychiatric featilities (the McCann facility is a residential psychiatric reaprent center and is not included in this analysis). About 2% of the inpatient psychiatric payments processed in FY06 were for services provided by out-of-state facilities which are not subject to rate re-basing by the department.  The requested increment was calculated based on the percent of inpatient psychiatric hospital payments made to the North Star Behavioral Health facility in FY06. Almost 41% of payments for inpatient psychiatric hospital services will be impacted by re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in FY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in Experiments and increase in Affair for PY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in Experiments and increase in Affair for PY08, based on North Star's 81.6% share of FY06 payments and with re-based rates in Experiments and increase in Affair for Py08, based on North Star's 81.6% share of FY06 payments and with re-based rates in Experiments and increase in Affair for Py08, based on North Star's 81.6% share of FY06 payments and with re-based rates in Experiments and increase in Experiments and incr	The North Star Behavioral Health System inpatient psychia	tric hospital v	vill be re-based	effective Januar	y 1, 2008								
McCann facility is a residential psychiatric treatment center and is not included in this analysis). About 2% of the inpatient psychiatric payments processed in FV96 were for services provided by out-of-state facilities which are not subject to rate re-basing by the department.  The requested increment was calculated based on the percent of inpatient psychiatric hospital payments made to the North Star Behavioral Health facility in FY06. Almost 41% of payments for inpatient psychiatric hospital services will be impacted by re-based rates in effect for six months of FV08.  The formula for calculation of the requested increment is: 8% X 40.8% X base projection for all FY08 impatient psychiatric hospital services.  The base projection for inpatient psychiatric hospital services is \$21,671.7. Inpatient psychiatric hospital facility rate adjustments will increase that projection to \$22,379.1. The additional cost to Medicaid from re-basing in FY08 will be \$707.4.  This increment will help the department improve the following performance measures:  Deph-B-2-Improve and enhance the quality of life for Alaskans with serious behavioral health problems Deph-D-4-Provide quality management of health care coverage services providers and clients DBH-A-1A.2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system HCS-B-Provide affordable access to quality health care services to eligible Alaskans DH-ARealthy people in healthy communities DPH-ARealthy people in hea	(will bill under increased rates for the last six months of FY	08). SCHIP FFY07 Funding		"	0." ···									

This request assumes that the federal government will take action to fully fund the State Children's Health Insurance Program (SCHIP), a part of Alaska's Medicaid program operated through Denali KidCare. The national SCHIP program is up for reauthorization in Congress and some proposals should fix the flaw in the current national formula and allotment for Alaska. If the federal government does not take action, the department will need to seek a supplemental appropriation.

SCHIP helps reach uninsured children whose families earn too much to qualify for regular Medicaid but not enough to afford private coverage. Each month, SCHIP provides health coverage for about 9,000 uninsured children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their SCHIP health coverage and become uninsured.

The federal and state governments jointly fund SCHIP. Alaska's annual allotment has fluctuated between \$7 and \$11 million. Since Alaska's annual allotment represents only about 25% of our costs, we have relied heavily on unspent funds from other states which were redistributed to Alaska to maintain access to the enhanced FMAP. As more and more states have increased their SCHIP programs, there is less and less redistributed funding available and we do not anticipate any further redistributions.

\*\*CONTINGENT UPON CONGRESSIONAL ACTION TO REAUTHORIZE SCHIP PROGRAM. CURRENT LEGISLATION BEFORE CONGRESS COULD FULLY FUND THE CURRENT PROGRAM AND NEGATE THE NEED FOR THIS INCREMENT.

This request replaces lost federal revenues resulting from a decrease in the amount of federal funds available for the State Children's Health Insurance Program (SCHIP), a part of Alaska's Medicaid program operated through Denali KidCare. This increment is necessary to maintain the current level of health care provided to these children and supports the department's mission to manage health care for Alaskans in need.

SCHIP helps reach uninsured children whose families earn too much to qualify for regular Medicaid but not enough to afford private coverage. Each month, SCHIP provides health coverage for about 9,000 uninsured children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their SCHIP health coverage and become uninsured.

The federal and state governments jointly fund SCHIP. The amount of federal funding depends on the federal SCHIP allotment, which has not grown to keep pace with SCHIP expenditures. The federal medical assistance percentage, or FMAP, determines the amount of state matching funds. The state receives a higher, enhanced FMAP for SCHIP than for regular Medicaid; however, this enhanced reimbursement is capped at the SCHIP allotment. If costs exceed available SCHIP funds, claims are reimbursed at the lower, regular FMAP, resulting in reduced federal revenues. Alaska will have only 49% of the federal SCHIP funding needed to cover program expenditures in 2009, exhausting its SCHIP funds in the second quarter. When it reverts to regular Medicaid, the difference in federal reimbursement rates means that Behavioral Health Medicaid Services component will need an additional \$900.0 GF in 2009.

Medicaid Services (continued) Behavioral Health Medicaid Services (continued) FY2009 FFY09 Federal Medical Assistance Percentage (FMAP) Rate Change for Medicaid (continued) The federal and state governments jointly fund Medicaid. The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. One in five Alaskans is enrolled in Medicaid at some time each year. Without the increment the state would be forced to reduce eligibility or services currently provided to low income children, pregnant women, persons with disabilities, and the elderly. By approving this change record, the department will be able to continue to meet its mission of managing health care for Alaskans in need. The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1 with the start of a new federal fiscal year. The bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the federal medical assistance percentage or FMAP. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%. Also affected are the State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC) which are part of Alaska's Medicaid program. Eligible claims for SCHIP and BCC are reimbursed at an enhanced FMAP rate that reduces the state share of costs by 30% over the regular FMAP. The regular FMAP is projected to drop from 52.48% to 50.53% in FFY09 and the enhanced FMAP from 66.74% to 65.37%. The regular FMAP for SFY09 will average 51.02% across two federal fiscal years (52.48% from July-Sept. 2008 and 50.53% from Oct. 2008-June 2009). The enhanced FMAP for SFY09 will average 65.71% (66.74% from July-Sept. 2008 and 65.37% from Oct. 2008-June 2009).

The rates used here are estimates. The final FMAP rate for FFY 2009 will not be known until November/December.

-4.560.6 1002 Fed Rcpts (Fed) 4.560.6 1037 GF/MH (UGF)

FY2009 FY09 Projected Medicaid Formula Growth

This increment funds increases in Medicaid service costs due to increases in enrollment and utilization. For SFY09, Behavioral Health Medicaid costs are projected to grow 4% over the authorized amount of 170,541.3. This increment request is necessary to maintain the current level of behavioral health services in Medicaid. The Behavioral Health Medicaid Services component funds three types of services: inpatient psychiatric hospitals,

6.821.6

Inc

residential psychiatric treatment centers, and outpatient behavioral health services.

In SFY07 Behavioral Health Medicaid provided services to about 12,600 beneficiaries at an average cost of \$914 per month. Cost containment efforts begun in SFY04 have successfully dampened the rate of growth in recent years. Behavioral Health Medicaid claims grew 9% from SFY04 to SFY05, but only 4% from SFY05 to SFY06. The growth rate from FY06 to FY07 was 5%. The projection for FY09 is to use the projected growth rate between the FY08 projected and the FY09 Baseline from the short term forecasting model. STAMP.

Approximately 91% of the Behavioral Health Medicaid Services component's claims are reimbursed at the regular FMAP and another 4% at the enhanced FMAP (the remaining 5% is IHS and is not affected by the change in FMAP). Based on current estimated expenditures for Medicaid, the FFY09 change in FMAP will require an estimated \$4,560.6 increase in GF to replace the lost federal funds and maintain services at the current level.

#### Medicaid Services (continued)

Behavioral Health Medicaid Services (continued)

FY2009 AMD: Increase Outpatient Behavioral

Health Provider Rates - 8% (continued)

Behavioral health professionals are reimbursed for many procedures at lower rates than other medical professionals providing similar services. For example, physicians are paid \$94.59 for individual psychotherapy but mental health clinics are paid only \$40.00 for the same service. For psychological testing, physicians are paid \$139.58 while mental health clinics are paid only \$85.00. For neuropsychological testing, physicians are paid \$190.16 while mental health clinics are paid \$85.00.

Within the mental health provider community, mental health clinics are sometimes reimbursed at different rates than substance abuse clinics for similar services. For example, mental health clinics are paid \$12.50 for case management services while substance abuse clinics are paid only \$7.50 for similar services. Mental health clinics are paid \$7.50 for group skills development while substance abuse clinics are paid \$5.00 for group counseling.

The Division of Behavioral Health (DBH) has completed a formal rate study and estimates that rate increases to address such fee-for-services inequities could increase total outpatient behavioral health services costs by 8% in SFY09.

An 8% increase to outpatient behavioral health fee for service rates will add \$6,837.8.

Federal % = 51.02% SFY09 ava FMAP

This increment will help the department improve the following performance measures:

Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A1.1a-Improve and enhance the quality of life of children with serious emotional disturbance by implementing the Bring the Kids Home program

DBH-A-1-A2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse disorder through the development of a comprehensive, integrated BH service system

HCS-B---Provide affordable access to quality health care services to eligible Alaskans

HCS-B--T1-Increase the number of providers

DPH-A---Healthy people in healthy communities

DPH-A--A2-Reduce suffering, death and disability due to chronic disease

Psychiatric Hospital (API) - 6.5%

This increment is necessary to maintain Alaska inpatient psychiatric hospital services at their current level and to prevent loss of provider participation.

By regulation, payment rates for most in-state facilities must be re-based at least every four years. In other years the facility gets a rate adjustment for inflation. The last rebasing year was FY04.

This is the second year of a two year process to phase in these required rate increases. Only the rate increase for the Alaska Psychiatric Institute will require an increment to the FY09 budget. North Star's rate was re-based last

Rebased - Inpatient Psychiatric Hospital (API) 6.5% (continued)

year.

There are two in-state inpatient psychiatric hospital facilities, Alaska Psychiatric Institute and North Star. Medicaid paid for inpatient psychiatric hospital services for 788 persons in FY07. Based on claims paid during FY07, about 79% of Medicaid inpatient psychiatric clients were children and 21% were disabled.

The rebased rates for Alaska Psychiatric Institute (API) are cost-based from a review of API's FY07 operating expenses and Medicaid billing activity. Its new rate will become effective at the start of its 2009 fiscal cycle. The Department estimates that the rate adjustment will be about 6.5% above medical inflation.

The additional cost to Medicaid inpatient psychiatric hospital rate increases (API) in FY09 is estimated to be \$288.1.

Federal % = 51.02% SFY09 avg FMAP.

This increment will help the department improve the following performance measures:

Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems

For FY2010, Behavioral Health Medicaid costs are projected to grow 6% from FY2009. Spending will rebound from the 11% drop seen between 2007 and 2008, returning to a slightly higher level than 2007. The current FY2010 forecast (with FMAP 2009) is \$148,000.0 (67,534.8 GF/78,765.2 federal/1,700.0 Other). The forecast has a 95% confidence interval that it is accurate to within +/- 5%. Projections are revised monthly and this increment request will be revisited for the Governor's Amended budget.

In recent years, the department has implemented Medicaid reforms aimed at improving Medicaid sustainability. Cost containment efforts begun in FY2004 have successfully reduced the rate of growth from the high of 19.1% for

Trends												

This item reduces authorization to reflect current Medicaid projections.

One in five Alaskans is enrolled in Medicaid in any given year. In an average week, 25,500 Alaskans receive some level of medical care that costs the Medicaid program \$17-25 million for benefit payments made to 2,100 health care providers. Medicaid services are funded through both state general funds and federal matching funds. There must be sufficient state general funds available in order to maximize utilization of federal funds. Good business practice requires the department to maintain adequate funding to ensure that timely payments can be made to service providers.

The Legislature has requested that departments minimize supplemental budget requests through careful budget projections. The department uses both long-term and short-term forecasting models to project Medicaid spending. The Medicaid budget is based on projections of the number of eligible Alaskans who will access Medicaid funded services, estimates of the quantity of services that may be used and the anticipated changes in the costs of those services. The long-term trend indicates annual increases in costs driven by inflation and population changes. Short term projections are influenced mainly by enrollment and utilization of services. The change over a long period is generally smoother and more gradual than the fluctuations experienced in the short term. The budget preparation cycle requires projections up to 24 months in the future, often before recent policies have been fully implemented and reflected in the baseline spending data; therefore it is too early to know if recent changes in spending are temporary or will last.

The department has implemented reforms in Medicaid aimed at improving Medicaid sustainability. For example, the department has been successful in avoiding some costs and in containing growth rates that can result in authorization being briefly ahead of the trend. The department can adjust its authorization this year to reflect current trends by reducing the Behavioral Health Medicaid Services component budget by \$8.3 million (\$3.8 million in state general funds, and \$4.5 million in federal Medicaid revenue). The \$3.8 million GF cut represents 5% of the Behavioral Health Medicaid Services component's existing authorization of \$70.8 million GF. This will

The Behavioral Health Medicaid Services component funds three types of services: inpatient psychiatric hospitals, residential psychiatric treatment centers, and outpatient behavioral health services. The programs support the department's mission to manage health care for eligible Alaskans in need. Providing behavioral health services through Medicaid improves and enhances the quality of life for Alaskans with serious behavioral health problems. Behavioral Health Medicaid services are also a major component of the department's Bring the Kids Home initiative.

12,000 Alaskans with serious behavioral health problems, about 10% of all those enrolled in the Alaska Medicaid

For FY11, Behavioral Health Medicaid costs are projected to grow 4.4% from FY10. The FY11 forecast (with the 2010 FMAP) is \$151,723.2 (96,015.0 Federal / 55,647.2 GF / 61.0 Other). Projections are revised monthly and this increment request will be revisited for the Governor's Amended budget.

In recent years, the department has implemented Medicaid reforms aimed at improving Medicaid sustainability.

Medicaid Services (continued) Children's Medicaid Services FY2007 Medicaid Behavioral Rehabilitative Services Rate Increase to fully reimburse providers for Kids in Custody	Inc	2,214.0	0.0	0.0	0.0	0.0	0.0	2,214.0	0.0	0	0	0

Funding of this request will permit OCS Children's Medicaid Services to fully reimburse Behavioral Rehabilitative Service (BRS) providers for actual costs associated with the care of Alaskan children in custody. It will also give BRS providers the ability to participate in the "Bring the Kids Home" project. Bring the Kids Home aims to return Alaskan children from out-of-state placements to communities closer to their homes within the state.

Medicaid approved behavioral rehabilitative services include crisis intervention, family, group, and individual psychotherapy, and pharmacological management. Services are offered to children between the ages of 0 and 18 years who are in custody of the State of Alaska. These children may have primary mental, emotional, and behavioral disorders or developmental disabilities resulting from substance abuse and/or mental illness of the parents. They may exhibit symptoms such as anti-social behaviors that require close supervision, intervention, and structure; mental disorders with persistent nonpsychotic or psychotic symptoms; drug and/or alcohol abuse; or sexual behavior problems that severely or chronically impair their ability to function in typical family or community roles.

Typical services provided to children with these special needs fall into four levels of care. Alaska does not fund programs that fall into Level I Day Treatment Program. This level provides day treatment services to children that exhibit behavioral and emotional problems but are able to remain in the family or foster home.

Alaska does fund Level II, III, and IV services to children with special needs. These services for children in OCS custody are budgeted in two components: Behavioral Rehabilitative Services (Medicaid eligible medical/mental health services) are budgeted in Children's Medicaid Services; Basic Care (room, board and supervision) are budgeted in the Residential Child Care (RCC) component.

Level II - Emergency Stabilization and Assessment Centers provide BRS and temporary residential care for children in immediate danger. These children may be in crisis due to recent disclosure of abuse, neglect, or the commission of a delinquent act. This level is responsible for assisting and resolving the crisis, stabilizing the child, and assisting in the return to the home or an alternative placement;

Level III - Residential Treatment programs provide 24-hour behavioral rehabilitation services and treatment for children with emotional and behavioral disorders who are in need of, and are able to respond to, therapeutic intervention but cannot be treated effectively in their own family, foster family, or a less-restrictive setting; and

Level IV - Residential Diagnostic Treatment Centers are small therapeutic facilities with up to nine beds of which one or more may be for crisis placements.

Alaska's BRS providers have not received a rate increase since 1999/2000 when the program was developed. Currently, 65 percent of our BRS providers must supplement their budgets to keep services in place for our children. Examples of the supplemental funding BRS providers have had to rely on include:

The Alaska Family Baptist Mission has augmented their budget for the past two years from their endowment. They have continued to provide a utilization rate of 83% in their 10-bed facility, but have not been able to provide staff wage increases for 3 years, and it has been necessary to cut 3 direct service staff.

Presbyterian Hospitality House has supplemented their emergency stabilization and assessment center's budget

# Medicaid Services (continued) Children's Medicaid Services (continued)

FY2007 Medicaid Behavioral Rehabilitative Services Rate Increase to fully reimburse providers for Kids in Custody (continued)

with local funds for at least the last two years while providing a 93% utilization rate of service in their 5-bed facility.

This request to fund a rate increase of 18 percent per day per bed will reimburse providers for their costs and enable them to re-focus funds, now used to supplement costs not covered by the state, to provide services to children with needs that must currently be met out-of-state. This will allow: development of facility infrastructure; increased ability to attract the most experienced and educated workforce; and, provide necessary staff training and development based on innovative philosophies, techniques, and methodologies to meet the needs of Alaskan children within Alaska.

The proposed 18 percent increase was determined using the regional National Consumer's Price Index (CPI). From 1999 through 2004, the CPI grew an average of 2.6 percent annually. Allocated forward, the total percentage increase between 1999 and 2006, rounded, is 18 percent.

In addition to an 18% rate increase for each service level, DHSS is requesting an augmented rate of \$3.70 per day for Level II beds. Level II facilities serve youth with the most egregious behaviors in emergency placements and stabilization capacity until the appropriate acute care services are arranged. To manage the behaviors exhibited, facilities often need to provide intensive levels of supervision for the safety of the child. As of this date, actual levels of additional funding are not available, but facility reported estimates support \$100,000 statewide - or approximately \$3.70 per day per bed. Level II facilities in Alaska have a total of 74 beds where children who demonstrate the most egregious behaviors are placed pending acute care openings and/or out-of-state placement.

Statewide	# Beds	Current Cost/Day	Increase Per Bed	Allocated Annually
Level II	74	\$128	\$27	\$721,167
Level III	112	\$171	\$31	\$1,258,286
Level IV	15	\$238	\$43	\$234,549
Total	201			\$2,214,002
1,285,671	FFP			
928,331	GFM			
2,214,002	Total			

The funding request is based on blended FY07 regular FMAP of 50.84%, enhanced FMAP of 65.59%, and 100% IHS colections adjusted to reflect OCS Medicaid's actual collections by FMAP in FY05. The effective federal reimbursement rate for OCS is 58.07%.

A separate request for Basic Service cost increases (room, board, supervision) has been included in the Residential Child Care component.

Trans Total Personal Capital Type Expenditure Outlay | Services Travel Services Commodities Grants Misc PFT PPT Medicaid Services (continued) Children's Medicaid Services (continued) FY2007 Bring the Kids Home - Expand Behavioral Rehabilitation Services (BRS) (continued) Bring The Kids Home (BTKH) is an initiative to return children with severe emotional disturbances from behavioral health care in out-of-state residential facilities to in-state or community-based care. It will reinvest funding that currently provides expensive distant care to in-state services and capacity development to serve children closer to home, keep families more involved and intact, and more effectively carry out transitions and discharges. Funding for existing services has often been inadequate and has led to the lack of a fully implemented continuum of care in Alaska. With financial support, this initiative will focus on successfully building upon the existing infrastructure. This approach is intended to assist in the development of expanding existing programs to treat children and youth in their own community or in-state. This funding will allow utilization of additional existing beds in residential facilities in Alaska. Through the Office of Children's Services (OCS) Behavioral Rehabilitation Services (BRS) payment system, facilities receive funding for a set number of BRS beds. These beds are for custody children only. However, some facilities are licensed for more beds than have been purchased by OCS. In the past, there was no funding mechanism/source to allow the facility to utilize these beds to serve non-custody children. Through this funding, these in-state beds will become available to non-custody children. It has been determined that there are approximately 50 additional beds at a variety of levels of care which will become available. This funding will provide access for non-custody children to a wider range of in-state care, allowing families and children to remain closer together, keeping families engaged in their children's care, and facilitating transitions and shorter lengths of stay. The average number of bed days for residential psychiatric treatment centers in-state was approximately 159 in 2004 while the average number of bed days in out of state care was 187 for the same year. If funding is received it will enable existing, but un-utilized, BRS residential beds to be "purchased" and accessible to non-custody children, who may otherwise be placed in a higher level of care than is justified, and/or placed in an out of state institution. 1002 Fed Rcpts (Fed) 1.250.0 1037 GF/MH (UGF) 1,250.0 0.0 0.0 0.0 0.0 0.0 580.0 0.0 0 0 FY2007 Medicaid Behavioral Rehabilitative Services Rate Inc 580.0 Increase for Non-Custody Kids The Department is about to complete a rate study for residential care, which will identify the actual cost of providing Behavioral Rehabilitation Services (BRS) at each level of care. This BRS Rate Study will form the basis for an anticipated rate increase at all levels of care. OCS has proposed a rate increase of approximately 19% for beds for kids in their custody. This proposal would

OCS has proposed a rate increase of approximately 19% for beds for kids in their custody. This proposal would provide the same increase for the 50 non-custody beds proposed in a separate increment in this component, and 88 new beds, half of which are currently in development around the state under BTKH funds or are proposed for development in FY 07. This would let us bring custody and non-custody rates into alignment. We can take into account the desire to prioritize services for custody children by ensuring that the core capacity rate for custody children is higher than the core capacity payment for non-custody children. This will allow for consistency in the rate for the actual treatment services.

This request replaces lost federal revenues resulting from a 1.95% decrease in the annual rate the federal government reimburses the state for Medicaid benefits that will take effect on October 1, 2008.

The federal and state governments jointly fund Medicaid. The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid Services and is outside the control of the state government. One in five Alaskans is enrolled in Medicaid at some time each year. Without the increment the state would be forced to reduce eligibility or services currently provided to low income children, pregnant women, persons with disabilities, and the elderly. By approving this change record the department will be able to continue to meet its mission of purchasing health care for Alaskans in need.

The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year. The bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the federal medical assistance

FY2009 FFY09 Federal Medical Assistance Percentage (FMAP) Rate Change for Medicaid (continued)

percentage or FMAP. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%. Also affected are the State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC) which are part of Alaska's Medicaid program. Eligible claims for SCHIP and BCC are reimbursed at an enhanced FMAP rate which reduces the state share of costs by 30% over the regular FMAP.

The regular FMAP is projected to drop from 52.48% to 50.53% in FFY09 and the enhanced FMAP from 66.74% to 65.37%. The regular FMAP for SFY09 will average 51.02% across two federal fiscal years (52.48% from July-Sept. 2008 and 50.53% from Oct. 2008-June 2009). The enhanced FMAP for SFY09 will average 65.71% (66.74% from July-Sept. 2008 and 65.37% from Oct. 2008-June 2009).

Approximately 75% of the Children's Medicaid component's claims are reimbursed at the regular FMAP and another 2% at the enhanced FMAP. The remaining 23% is Indian Health Service (IHS) or non-reimbursable and is not affected by the change in FMAP. Based on current estimated expenditures for Medicaid, the FFY09 change in FMAP will require an estimated \$355.6 increase in GF to replace the lost federal funds and maintain services at the current level.

The rates used here are estimates. The final FMAP rate for FFY 2009 will not be known until November/December.

FY2010 Medicaid Program - Change in Federal Financial

Participation

This fund change request rebalances state and federal funding needs resulting from a 0.9-point increase in the

annual rate the federal government reimburses the state for Medicaid benefits.

FndChg

0.0

The new federal medical assistance percentage, or FMAP, takes effect on October 1st at the start of the federal fiscal year. The preliminary rate for FFY2010 is 51.43%, up from 50.53% in FFY2009. For FFY2010 the preliminary enhanced FMAP is 65.37%. The final rates will be published in December but are not expected to change much from the current estimates.

One in five Alaskans is enrolled in Medicaid at some time each year. By approving this change record the department will be able to continue to meet its mission of managing health care for Alaskans in need.

The federal and state governments jointly fund Medicaid. The total amount of federal reimbursement for Medicaid depends on a complex array of federal financial participation rates; however, the bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the FMAP rate. The State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC), which are part of Alaska's Medicaid program, are reimbursed at an enhanced FMAP rate. Indian Health Service and family planning service reimbursement rates of 100% and 90%, respectively, are fixed and do not change annually. U.S. Department of Health and Human Services sets the FMAP rate; it is outside the control of the state government. The FMAP is based on a state's national rank of a three-year average of per capita personal income but can be no less than

include preventative and restorative care up to a cap of \$1,150 per person annually. Prior to the passage of HB 105 only emergency dental care was offered to relieve pain or to fight acute infection. This service expansion makes available such dental services for Medicaid eligible adults as exams, cleanings, tooth restorations or extractions, and upper or lower full dentures, in addition to the existing dental emergency services. The coverage level allows adult Alaskans to receive a complete set of dentures over a two-year period.

The bill has provisions in place to keep total program costs within the fiscal limits set by the legislature. There is an

This request replaces lost federal revenues resulting from a 1.95% decrease in the annual rate the federal government reimburses the state for Medicaid benefits that will take effect on October 1, 2008.

The federal and state governments jointly fund Medicaid. The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. One in five Alaskans is enrolled in Medicaid at some time each year. Without the increment, the state would be forced to reduce eligibility or services currently provided to low income children, pregnant women, persons with disabilities, and the elderly. By approving this change record the department will be able to continue to meet its mission of managing health care for Alaskans in need.

The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1 with the start of a new federal fiscal year. The bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the federal medical assistance percentage, or FMAP. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%.

The regular FMAP is projected to drop from 52.48% to 50.53% in FFY09 and the enhanced FMAP from 66.74% to 65.37%. The regular FMAP for SFY09 will average 51.02% across two federal fiscal years (52.48% from July-Sept. 2008 and 50.53% from Oct. 2008-June 2009). The enhanced FMAP for SFY09 will average 65.71% (66.74% from July-Sept. 2008 and 65.37% from Oct. 2008-June 2009).

Approximately 92% of the Medicaid Services component's claims are reimbursed at the regular FMAP, and the remainder, 8%, is Indian Health Service, which is not affected by the change in FMAP. Based on current estimated expenditures for Medicaid, the FFY09 change in FMAP will require an estimated \$258.1 increase in GF to replace the lost federal funds and maintain services at the current level.

The rates used here are estimates. The final FMAP rate for FFY 2009 will not be known until November/December.

Health Care Medicaid Services FY2006 Increase for Unrealized Cost Containment Efforts In the FY2005 budget the Department proposed an aggress	Inc	19,709.7	0.0	0.0	0.0	0.0	0.0	19,709.7	0.0	0	0	0

In the FY2005 budget the Department proposed an aggressive package of cost containment proposals to reduce Medicaid costs. For the Health Care Services Medicaid Program the total reduction was estimated at \$41.5 million, including \$18.4 million in general funds.

The Department is requesting an increment of \$19.7 million, including \$9.3 million in general funds, to restore funding to the base budget for those areas of cost containment that are not anticipated to be attainable at this time. However, it should be noted that the department continues to consistently work towards containing costs of Medicaid wherever possible.

Progress has been made towards implementation of many of these proposals despite delays, political and industry push-back, administrative difficulties, provider complaints, etc. that have hindered implementation and subsequently reduced the original estimate of cost savings. Additionally, the current Medicaid Management Information System (MMIS) has limitations that have delayed system changes until approximately the spring of 2006 when the new information system currently under development can be implemented.

Although, it is difficult to identify the results of cost containment over a short interval of time, the department will continuously track the progress of cost containment implementation and reassess any additional savings or potential shortfalls that may result from this activity.

## Medicaid Services (continued) Health Care Medicaid Services (continued)

FY2006 Increase for Unrealized Cost Containment Efforts (continued)

Breakdown of Increment

FY2004 Cost Containment Efforts - 2,704.8 GF

In FY2004, the department proposed various cost containment reductions and in FY05 took a further reduction of the annualized costs for those. Below is a summary of those areas that have been unattainable:

Hospitals - More Flexible Revenue Codes: This project was tabled until all other priority cost containment measures have been implemented since the project would require dedicated resources with relatively minimal savings.

Implementation not only requires review of hospital outpatient and inpatient cost centers in order to develop clear criteria for billing these revenue codes, but 100% prepayment review of hospital claims to ensure accurate billings. Facilities:

- Separate Psychiatric Rate for Acute Care Hospital Psych Beds: This project was tied to increased bed capacity that was postponed until December of 2006.
- Exclude Home Office Costs from Facility Rates: Regulations have been implemented that result in no cost savings until a rebase of facility rates has been done by the Office of Rate Review, which is not anticipated until 2007. The initiative depends on facility reports that were not required under old regulations and therefore the State has no authority to make this change until the next rebase.

#### Pharmacv.

- Cost Avoid Rather Than Pay And Chase Third Party Liability Recoveries. The current Medicaid Management Information System (MMIS) system has limitations that make it impossible to implement this project until the new information system currently under development can be implemented (in approximately spring of 2006).
- Reduce Pharmacy Dispensing Fee -
- Decrease % of AWP for Brand Name Drugs -
- Decrease % of AWP for Generic Drugs and State Maximum Acquisition Costs -

These projects were tabled to focus on building collaboration for the PDL project which was anticipated to have greater cost savings potential.

#### Physicians:

- Reduce Physician Payment Schedule After regulations were drafted, the decision was made not to implement in order to focus on building collaboration for the PDL project.
- Increase Co-Payments: This project was tabled because it required more staff resources than the anticipated savings potential.

Administration - New Reconsideration Process - This project was deemed impossible to accomplish by Department of Law findings that it did not comply with the Administrative Procedures Act.

Unattainable FY2005 Cost Containment Proposals

Cost avoid Medicare Covered Drugs: \$521.0 GF, \$879.0 Federal. The original estimate of \$2.7 million, including \$1 million in general funds, savings has not been achievable. The decision was made to implement cost

## Medicaid Services (continued) Health Care Medicaid Services (continued)

FY2006 Increase for Unrealized Cost

Containment Efforts (continued)

avoidance for Medicare covered drugs along with the broader project of implementing cost avoidance for all pharmacy services. Implementation of cost avoidance for all pharmacy services required regulatory and MMIS system changes, which has resulted in some delay to realizing savings. The required regulation changes have already been put out for public notice and cost avoidance for all pharmacy services is scheduled for early calendar year 2005, six months into FY05.

Expand Case Management of high cost recipients: \$720.0 GF; \$1,080.0 FFP. There are currently 37 lock-in cases which require case management for high cost recipients. However, providers are hesitant to build practices on lock-in cases, since all recipients have appealed lock-in status.

Expand effort to identify Drug Abuse: \$459.0 GF; \$741 FFP. The original estimate for this item was \$760.0 GF and \$1,140.0 FFP. The expanded effort to identify Drug Abuse requires expanded prior authorizations for certain classes of drugs. The implementation of this project is being done by specific drug class in conjunction with expanding the PDL for those classes of drugs.

Expand Preferred Drug List: 4,464.9 GF, 7,327.4 FFP. The original estimate for these proposals was \$8,076.9 GF and \$12,115.4 FFP. This project was delayed by 2 to 3 months due to PHARMA's interest in trying to stop these types of state projects. Additionally, Alaska is one of a handful of states which has broken new ground with a multi-state supplemental drug rebate pool, which was delayed for 5 months by Centers for Medicare and Medicaid Services (CMS), further delaying implementation. As this supplemental rebate pool attracts additional states (there are now 8 participating states), savings will increase.

Implementation was also delayed in order to maintain cooperation from Pharmacy providers and Physician groups. As a result, a phased approach to determining and adding specific drug classes became the preferred method of implementing and expanding the PDL.

Approximately one-third of the estimated PDL savings is attached to behavioral health drugs, one of the last drug classes phases to be implemented.

Implement Prior Authorization requirement for Outpatient visits: \$147.3 GF; \$220.9 FFP. Expansion of case management and prior authorization programs have been delayed to allow division resources to be used on other priority projects such as: development and implementation of a new MMIS, Medicare Part D, Senior and Disability Services payment projects, PERM, school based services, Bring the Kids Home, and the State Travel Office.

Eliminate Duplicative services: \$17.6 GF; \$29.9 FFP. This estimate has been reduced by half from the original request. This project to enhance claim check editing to include a variety of provider types was scaled back due to span date billing instead of single date of service billing for many provider types. Implementation is still anticipated for September 2005 at this time.

Implement Prior Authorization for Physical Therapy: \$160.9 GF; \$241.3 FFP. Implement Prior Authorization for Occupational Therapy: \$32.5 GF; \$48.5 FFP.

More in-depth research and analysis of estimated costs savings determined that implementing these projects would, in fact, increase costs rather than save.

allotments 1004 Gen Fund (UGF) 1,166.4 FY2007 Medicare Part D 90% Clawback per Medicare Prescription Drug, Improvement, and Modernization Act (MMA)	Inc	4,360.0	0.0	0.0	0.0	0.0	0.0	4,360.0	0.0	0	0	0

The Medicare Prescription Drug Improvement and Modernization Act of 2003 created a new Medicare Part D prescription drug benefit available to all Medicare recipients, effective January 1, 2006. Medicare recipients who qualify for Medicaid will no longer be eligible to receive prescription drug coverage through Medicaid.

States' direct spending on drugs for dual eligibles will decrease, but savings are offset by the state's phased-down contribution (also known as the "clawback"), a provision of the new law requiring states to pay the federal government according to a formula intended to estimate those savings. States will be required to pay 90% of the estimated savings in the first year, phasing down to 75% in 10 years.

The formula uses gross Medicaid expenditures for prescription drugs in 2003, inflated forward using a national inflation factor for prescription drugs, rather than individual state Medicaid drug inflation. This rate may be higher than the rate experienced by an individual state. States, including Alaska, have taken aggressive measures to reduce prescription drug spending since 2003. We have used a prescription drug list (PDL) to achieve savings that are not reflected in 2003 spending.

The state's general fund share of savings is computed by the Centers for Medicaid and Medicare Services (CMS) using its current FMAP rate. No adjustment is made for prescription drugs provided by tribal pharmacies, for which we receive 100% federal reimbursement. This will overestimate Alaska's savings, resulting in a higher payback for Alaska.

Some cost containment measures, such as PDL, take advantage of volume purchasing to achieve their savings. As states experience a significant reduction in the amount of prescription drugs they are purchasing, they may find that the net price available through a PDL, or other volume discount arrangement, increases for the drugs they continue to purchase. No adjustment is made for this impact on drug pricing in the savings estimate.

The department estimates the FY07 clawback (or phase down) payment for Alaska to be \$20,668.8 (90% of CMS' estimated savings based on 2003 actual spending). The clawback estimate is based on CMS' calculation of a \$145.35 per capita cost, times DHSS estimate of 11,850 dual eligibles, times 12 months.

Pharmacy expenditure and Drug Rebate reductions are estimated at \$33.2 million in SFY07 (16,866.2 fed, 16,308.8 GF) due to Part D implementation. The net impact of Part D drug savings and clawback payments is a decrease of \$16,866.2 federal and an increase of \$4,360.0 general funds. The net GF increment is shown here and the federal savings are in a separate change record.

**1004 Gen Fund (UGF)** 4,360.0

FY2007 Projected FY07 Growth

Health Care Medicaid Services experienced an approximate 6% rate of growth from FY04 to FY05. The projection for growth of \$61.8 million (16,113.1 GF, 45,636.9 federal) assumes the same growth rate from FY06 projected to

FY07. While the overall growth was about 6%, growth in direct services was around 11%. Direct service's growth is mostly due to increases in the number of clients served. The number of recipients rose an average of 9% while

FY2007 Add Tribal Targeted Case Management Services (TCM). TCM state plan amendment approved June 2005.	Inc	4,750.0	0.0	0.0	0.0	0.0	0.0	4,750.0	0.0	0	0	0

Targeted case management services (TCM) are provided to Medicaid-eligible recipients who are Alaska Native/American Indians served through an IHS 638 facility. The Tribal TCM state plan amendment was approved in June 2005. TCM services include developing case plans for medical, education, social, or other services; facilitating access to resources; evaluating services; and reassessment. (One other TCM program, Infant Learning, is served through Office of Children's Services and does not fall under this component.) Tribal TCM services are reimbursed at 100% IHS FFP. Payments are based on a monthly encounter rate of \$200.00. Implementation of TCM will be phased in during FY06 and FY07 due to necessary system changes and staff training. By FY07 nearly 2,000 persons a month (5.6% of the approximately 36,000 eligible enrollees) are expected to receive Tribal TCM benefits.

TCM services that will be covered include:

#### Assessment

After the need for tribal targeted case management services has been determined, the tribal case manager assesses the specific areas of concern, family strengths and resources, community resources and extended family resources available to resolve those identified issues. At assessment, the tribal case manager makes preliminary decisions about needed medical, social, educational, or other services and the level or direction tribal case management will take.

#### Case Planning

The tribal case manager develops a case plan, in conjunction with the client and family (where applicable), to identify the goals and objectives, which are designed to resolve the issues of concern identified through the assessment process. Case planning includes outlining activities to be completed by the tribal case manager, the family and client. The case planning activity includes accessing medical, social, educational, and other services to meet the clients' needs.

#### Case Plan Implementation

The tribal case manager links the client and family with appropriate agencies and medical, social, educational, or other services by calling or visiting these resources. The tribal case manager facilitates implementation of agreed-upon services by ensuring the clients and providers fully understand how the services support their case plan and then assisting the client and family to access them.

#### Case Plan Coordination

After these linkages have been established, the tribal case manager will perform an ongoing evaluation of whether or not the medical, social, educational, or other services are being provided and used as agreed. Coordination activities include personal, mail and telephone contacts with providers and others identified by the case plan, and meetings with the client and family.

#### Case Plan Reassessment

The tribal case manager works with the individual to determine whether or not medical, social, educational or other services continue to be adequate to meet the goals and objectives identified in the case plan. Reassessment decisions include those to continue, change or terminate those services. Reassessment will also determine whether the case plan itself requires revision. This may include assisting clients to access different medical, social,

Receipts (continued)

returned 90% of the payment to the state in the form of statutory designated program receipts (SDPR). The payments offered needed support to providers as well as generating SDPR receipts to the state which could be applied as match to other Medicaid payments and reduce the general fund need.

Though the technique was widely utilized by states across the country, the Center for Medicaid and Medicare Services (CMS) objected to the practice and began pressuring states to discontinue this form of refinancing. During FY05, the department revised its regulations to no longer allow payments of this type. Unfortunately, the information about the regulation request came to the budget section too late to include a fund change request in the FY06 budget request.

This component has a total of \$55,890.5 in SDPR authorization in FY06. A fund change request was submitted as part of the FY07 Governor's Budget to cover lost SDPR receipts from the discontinued FairShare refinancing program leaving \$10,890.5 in SDPR authorization. In FY03 SDPR collections from non-Fairshare refinancing was approximately \$4 million; in FY04 the department increased its refinancing efforts resulting in collections of \$11.5 million. Due to the regulation changes, FY05 SDPR collections were reduced to approximately \$4 million and in FY06 the department anticipates no SDPR receipts from DSH or ProShare refinancing.

It was the department's hope that new refinancing programs could be developed for FY07 that would allow collection of the remaining SDPR. However, that does not appear to be a possibility and those matching funds must be replaced with general funds.

Lack of matching funds would mean that the department would be unable to disburse DSH and ProShare funds to eligible providers for uncompensated care.

This is to transfer funds into the Rate Review component for critical Medicaid items:

Independent Certified Audits for Disproportionate Share Hospital Payments: By federal law, beginning with FY 2005 each state must submit an independent certified audit of its Medicaid disproportionate share hospital (DSH) program to the federal Centers for Medicare and Medicaid (CMS) Services to receive Federal disproportionate share hospital payments. The department relies almost exclusively on the DSH program for operational expenses

#### Medicaid Services (continued) Health Care Medicaid Services (continued)

FY2008 Decline in Upper Payment Limit -

Proshare (continued)

ProShare payments are eligible for average federal reimbursement of 53,22% in FY08 (57,58% from July-Sept. 2007 and 51.76% from Oct. 2007-June 2008), but only up to the amount of the UPL allotment. Any amount of ProShare over the allotment does not receive federal reimbursement. Since 2003 the UPL allotment had increased annually and the total amount of ProShare expenditures was below the cap. The funding need arose because an audit finding changed the way the department calculates the UPL and shortened the amount of time to expend it. The additional funding is needed because the change resulted in a UPL allotment lower than our current ProShare payment level. Without ProShare the same services would have to be funded through grant programs that are totally GF.

The department is committed to continue ProShare funding at the same level in support of its mission to manage health care for Alaskans in need. The additional GF would allow the department to continue providing the same level of services.

This increment will help the department improve the following performance measures:

Dept-B-2--Improve and enhance the quality of life for Alaskans with serious behavioral health problems

Dept-D-4--Provide quality management of health care coverage services providers and clients

DBH-A-1-A2.1b-Improve and enhance the quality of life of Alaskans with SED, SMI and /or a substance abuse

disorder through the development of a comprehensive, integrated BH service system

HCS-B---Provide affordable access to quality health care services to eligible Alaskans

HCS-B--T1-Increase the number of providers

DPH-A---Healthy people in healthy communities

DPH-A--A2-Reduce suffering, death and disability due to chronic disease

DPH-A--A4-Assure access to early preventative services and quality health care

SDS-A---Improve and enhance the quality of life for seniors and persons with disabilities through cost-effective delivery of services

4.044.0

Inc

1002 Fed Rcpts (Fed)

-4,044.0 FY2008 Replace federal reduction due to Upper Payment Limit

Decline - Proshare

This change record replaces a federal funding reduction in the Medicaid ProShare program. The ProShare program allows the state to make payments to qualifying hospitals for the difference between Medicare and Medicaid rates. This difference is called the Upper Payment Limit or UPL.

Typically Medicaid rates do not cover the full billed amount for services so some providers choose not to see Medicaid patients. General hospitals, however, are required to see patients regardless of their income or insurance coverage. UPL helps to compensate these hospitals for the cost of providing care to persons who are publicly insured. The department has made payments to hospitals and community health care providers for several years under this program and ProShare is an important part of the department's strategy to provide access to quality health care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans.

ProShare payments are eligible for average federal reimbursement of 53.22% in FY08 (57.58% from July-Sept. 2007 and 51.76% from Oct. 2007-June 2008), but only up to the amount of the UPL allotment, Any amount of ProShare over the allotment does not receive federal reimbursement. The federal and state governments jointly fund SCHIP. The amount of federal funding depends on the federal SCHIP allotment which has not grown to keep pace with SCHIP expenditures. The federal medical assistance percentage, or FMAP, determines the amount of state matching funds. The state receives a higher, enhanced FMAP for SCHIP than for regular Medicaid; however, this enhanced reimbursement is capped at the SCHIP allotment. If costs exceed available SCHIP funds, claims are reimbursed at the lower, regular FMAP, resulting in reduced federal revenues. Alaska will have only 41% of the federal SCHIP funding needed to cover program expenditures in 2008, exhausting its SCHIP funds in the second quarter. When it reverts to regular Medicaid, the difference in federal reimbursement rates means that Health Care Services Medicaid Services component will

children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their

SCHIP health coverage and become uninsured.

Children's Health Insurance Program (SCHIP) allotments												
This request replaces lost federal revenues resulting from a												
the State Children's Health Insurance Program (SCHIP), a p Denali KidCare. This increment is necessary to maintain the												

and supports the department's mission to manage health care for Alaskans in need.

SCHIP helps reach uninsured children whose families earn too much to qualify for regular Medicaid but not enough to afford private coverage. Each month, SCHIP provides health coverage for about 9,000 uninsured children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their SCHIP health coverage and become uninsured.

The federal and state governments jointly fund SCHIP. The amount of federal funding depends on the federal SCHIP allotment which has not grown to keep pace with SCHIP expenditures. The federal medical assistance percentage, or FMAP, determines the amount of state matching funds. The state receives a higher, enhanced FMAP for SCHIP than for regular Medicaid; however, this enhanced reimbursement is capped at the SCHIP allotment. If costs exceed available SCHIP funds, claims are reimbursed at the lower, regular FMAP, resulting in reduced federal revenues. Alaska will have only 41% of the federal SCHIP funding needed to cover program expenditures in 2008, exhausting its SCHIP funds in the second quarter. When it reverts to regular Medicaid, the difference in federal reimbursement rates means that Health Care Services Medicaid Services component will need an additional \$2,612.1 GF in 2008.

Alaska's annual allotment has fluctuated between \$7 and \$11 million. Since Alaska's annual allotment represents only about 25% of our costs, we have relied heavily on unspent funds from other states which were redistributed to Alaska to maintain access to the enhanced FMAP. As more and more states have increased their SCHIP programs, there is less and less redistributed funding available and we do not anticipate any further redistributions.

Travel

This increment allows the department to fully utilize its annual Medicaid Disproportionate Share Hospital (DSH) federal allotment by providing the necessary GF match. Hospitals that provide a disproportionately high share of care to persons who are uninsured or underinsured may qualify for DSH payments to help offset their loss of revenue for uncompensated charity care.

Trans

Total

Type Expenditure

The State of Alaska will use the additional Medicaid funds to make payments to hospitals for the otherwise uncompensated cost of charity care for the uninsured or underinsured. The state plans to negotiate agreements with qualifying hospitals to preserve or expand health care services that will benefit the state or local community.

Full utilization of the DSH allotment furthers the department's mission to manage health care coverage for Alaskans in need. The number of uninsured adults has grown steadily since 2000. Many underinsured and uninsured patients wait to seek needed care until it becomes an emergency, increasing the cost of their care and placing pressure on the health care system. They are seriously impacted by waiting until they have a health care emergency - their recovery may take longer, and sometimes they will put their lives in jeopardy. The health care needs of the uninsured and underinsured have a huge impact on hospitals and other health care providers in Alaska, as well as on the Department of Health and Social Services. Many Alaska hospitals have a high amount of uncompensated care. These hospitals often have low private caseloads and are thus less able to shift the cost of uncompensated care to privately insured patients.

The department does not currently have sufficient funding to expend the full allotment. Under federal and state laws, there are mandatory programs for qualifying hospitals that must be met: institutes for mental disease (such as Alaska Psychiatric Institute), Medicaid inpatient utilization, low-income DSH, single-point-of-entry psychiatric hospital, and designated evaluation and treatment hospitals. Without additional funding the department can only make the mandatory DSH payments.

Alaska's allotment of federal DSH funds increases by 16% each federal fiscal year; however, the level of funding in the state's budget for DSH has not increased in many years. The amount of state matching funds required each year is based on the regular FMAP, which is projected to average 53.22% for FY08 (57.58% from July-Sept. 2007 and 51.76% from Oct. 2007-June 2008). In FFY08 the allotment is projected to be \$19,186.7 (federal) which will require \$16,864.9 GF in matching funds to expend the full \$36,051.6. The increment of \$22,701.6 (11,499.7 fed/11,201.9 GF) is the difference between the amount allocated in the HCS Medicaid Services component for DSH of \$13,350.0 (\$7,686.9 federal/5,663.1 GF) and the amount needed to fully utilize the FFY08 allotment.

FY2008 Medicaid Rate Increase - Primary Care Inc Reimbursement rates for Medicaid physician services (fee for service only) are tied to Medicare rates through relative value units (RVU's) determined by the Centers for Medicaid and Medicare Services (CMS). CMS will be re-basing Medicare reimbursements for each covered procedure, effective January 1, 2007. The State bases its Medicaid rates on the Medicare rates, and will need to change them as Medicare rates change.

Trans

Both Medicare and Medicaid use the resource-based relative value scale (RBRVS) formula to determine reimbursement rates for procedures billed by primary care physicians. In the formula, both RVU and geographic cost payment indexes (GCPI) have separate components adjusting for the cost of work, operating costs, and insurance/malpractice costs. Medicare rates are determined by RVU, GCPI, and state conversion factors established by the CMS. Alaska Medicaid reimbursement is determined using the Medicare RVUs for a procedure, coupled with the GCPIs and conversion factor established in Alaska regulation [7 ACC 43.108]. The Medicaid conversion factor has not been changed since its implementation in 1997, when the RBRVS methodology was adopted.

Reimbursement rates for Medicaid primary care services provided by IHS physicians are adjusted annually by the Indian Health Service (IHS) and are not subject to the RBRVS formula. Encounter rates for clinics (IHS, federally qualified health clinics, and rural health clinics) are also not subject to the RBVRS method for re-basing.

Because of the large number and variety of Current Procedural Terminology, or CPT codes, used for billing physician services and the fact that each is reviewed separately for RVU's by CMS, it is difficult to estimate the net impact of Medicare rate adjustments on the division's Medicaid budget until CMS publishes the new rates in the federal register. CMS has predicted that they will be lowering RVU's for some procedure codes but substantially increasing the RVU's for evaluation and management procedures.

Evaluation and management procedures such as office visits and hospital visits are the most frequently billed codes for Medicaid primary care services in Alaska. Fee for service claims comprised almost 95% of physician services payments in 2005 and about two thirds of that was for procedures billed by non-IHS physicians. About 60% of non-IHS physician fee for service payments were for evaluation and management procedures in 2005.

January 1, 2007 by a non-IHS physician. The fee increase	for this pro	cedure code alon	e will increase p	ayments							

The FY08 growth projection for all physician services is \$139,361.0 (fee for service and encounter billing combined) with \$97,328.0 needed for non-IHS claims. The requested increment will increase the projection for all physician services to \$147,361.0 and increase the non-IHS need to \$105,328.0. The additional cost to Medicaid in FY08 due to Medicare adjustments to relative value units in the RBRVS formula for physician fees will be \$8,000.0 (3,742.4 GF and 4,257.6 Fed).

This increment will help the department improve the following performance measures:

by over \$1.8 million, assuming no increase in the number of clients or utilization.

Dept-D-4--Provide quality management of health care coverage services providers and clients

HCS-A--A1-Increase IHS participation

HCS-B---Provide affordable access to quality health care services to eligible Alaskans

This increment is necessary to maintain acute care hospital services at their current level.

By regulation, payment rates for most facilities must be re-based at least every four years [ 7 AAC 43.685(a)(6)(B) ]. Hospital, nursing home, and inpatient psych hospital facilities were last re-based in SFY04.

Hospital payment rates for FY08 will be adjusted based on review of FY06 operating expenses and Medicaid billing activity for each facility. The new rate for each facility will become effective at the start of that facility's 2008 fiscal cycle. The Department estimates that rates will be adjusted by an average of 8%.

Hospitals that will bill under re-based rates for the full 12 months of FY08 include Petersburg Medical Center, Sitka Community Hospital, South Peninsula Hospital, Providence Seward Medical Center, and Providence Valdez Medical Center. Alaska Regional Hospital, Fairbanks Memorial Hospital, Providence Alaska Medical Center, and Valley Hospital will only bill under new rates for the last six months of the fiscal year. Remaining in-state hospitals subject to review under this regulation will re-base effective FY09.

Not all hospitals providing services to Alaska Medicaid patients are subject to the re-basing addressed by this increment. Payment rates for smaller in-state facilities (acute care, specialty, or psychiatric hospital or combined acute care hospital-nursing facilities billing 4,000 or fewer acute care patient days, or freestanding nursing home facilities billing 15,000 or fewer nursing facility days) are determined using a different methodology, established under a separate regulatory authority [7 ACC 43.689]. Payment rates for out-of-state facilities are determined by that outside state. This analysis assumes no significant rate changes for small Alaska facilities or for out-of-state facilities.

## Medicaid Services (continued) Health Care Medicaid Services (continued)

FY2008 Medicaid Facility Rates Rebased -

Hospitals (continued)

Data for Indian Health Service (IHS) facilities has been excluded from this analysis. The only IHS hospital facility currently subject to re-basing by the Department under 7 ACC 43.685 is Norton Sound Regional Hospital. It will rebase effective July 1, 2008 (FY09) and its re-basing will not affect the requested increment. Payment rates for most other IHS facilities are determined annually by the federal government.

To calculate the increment required to cover facilities rate increases in FY08, the percentage of non-IHS hospital payments made to hospitals scheduled to re-base for the full 2008 fiscal year and the percentage made to non-IHS hospitals scheduled to re-base for only the last six months were determined, based on Medicaid claims payments for all non-IHS inpatient, outpatient, and outpatient surgery hospitals in SFY06. Less than a third (29%) of payments for non-IHS hospital services will be impacted by re-based rates in FY08.

The formula for calculation of the requested increment is: 8% X 28.95% X growth projection for FY08 non-IHS hospital services.

The FY08 growth projection for non-IHS hospital services is \$259,248.2. Facilities rate adjustments will increase that projection to \$265,252.2 and will increase the projected cost of all hospital services (IHS facilities included) to \$288,116.6. The additional cost to Medicaid from re-basing in FY08 will be \$6,004.2 (2,779.4 GF and 3,224.8 Fed).

This increment will help the department improve the following performance measures:

Dept-D-4--Provide quality management of health care coverage services providers and clients

HCS-B---Provide affordable access to quality health care services to eligible Alaskans

HCS-B--T1-Increase the number of providers

DPH-A---Healthy people in healthy communities

# Medicaid Services (continued) Health Care Medicaid Services (continued)

FY2008 FY08 Projected Medicaid Growth (continued)

Medicaid. The Medicaid Services component funds acute health care services such as hospitals, physicians, pharmacy, and dental and other Medicaid services such as premium assistance and supplemental hospital payments.

In FY06 Health Care Services' Medicaid provided services to approximately 122,000 beneficiaries at an average cost of \$379 per person per month. Medicaid Services' claims grew 3% from FY04 to FY06. The projection for FY08 is for the growth rate to remain the same.

Most of the increase can be attributed to hospital services which experienced a 6% increase from FY05 to FY06 due to an increase in the number of hospitalizations. The fastest growing segments are some of the smallest categories of service and therefore do not affect the total growth rate by much. Diagnostic services (laboratory and x-ray), durable medical equipment, and rehabilitation services (occupations/physical/speech therapy and chiropractic) all grew more than 10%. Another contributing factor is an increase in tribal claims for early, periodic, screening, diagnosis and treatment services, which are 100% federally funded.

The fund source projection is based on the actual amount of federal revenue collected in FY06 in this component, 69%, and assumes that the proportion of expenditures eligible for each type of federal reimbursement remains the same. It also assumes that the FY08 average federal medical assistance percentage remains at 57.58% for regular Medicaid and 70.31% for SCHIP.

This increment also provides \$750.0 authority for statutory designated program receipts (SDPR) in the Behavioral Health Medicaid Services component for recoveries of overpayments to Medicaid providers discovered through audits.

Per AS 47.05.200 the department is required to audit Medicaid provider payments. Overpayments to the providers must be returned by the provider to the state. The overpayment includes both the federal and state match portion of the original claim. The amount actually recovered can include only the federal funds or the state matching funds, too. This increment provides budget authority to collect the state matching fund portion of the audit recovery.

The additional funding supports the department's mission to manage health care for Alaskans in need. This increment will help the department improve the following performance measures:

Dept-D-4--Provide quality management of health care coverage services providers and clients HCS-A-A2--Expand fund recovery efforts
HCS-B---Provide affordable access to quality health care services to eligible Alaskans
DPH-A---Healthy people in healthy communities
DPH-A---A2-Reduce suffering, death and disability due to chronic disease
DPH-A---A4-Assure access to early preventative services and quality health care

This decrement reverses the request in the Governor's budget for additional funding to allow the department to fully utilize its annual Medicaid Disproportionate Share Hospital (DSH) federal allotment by providing the necessary GF match. Hospitals that provide a disproportionately high share of care to persons who are uninsured or underinsured may qualify for DSH payments to help offset their loss of revenue for uncompensated charity care.

DSH uses the additional Medicaid funds to make payments to hospitals for the otherwise uncompensated cost of charity care for the uninsured or underinsured.

The number of uninsured adults has grown steadily since 2000. Many underinsured and uninsured patients wait to seek needed care until it becomes an emergency, increasing the cost of their care and placing pressure on the health care system. They are seriously impacted by waiting until they have a health care emergency - their recovery may take longer, and sometimes they will put their lives in jeopardy. The health care needs of the uninsured and underinsured have a huge impact on hospitals and other health care providers in Alaska, as well as on the Department of Health and Social Services. Many Alaska hospitals have a high amount of uncompensated care. These hospitals often have low private caseloads and are thus less able to shift the cost of uncompensated care to privately insured patients.

The department does not currently have sufficient funding to expend the full allotment. Under federal and state laws, there are mandatory programs for qualifying hospitals that must be met: institutes for mental disease (such

This request replaces lost federal revenues resulting from a 5.1% decrease in the annual rate the federal government reimburses the state for Medicaid benefits that will take effect on October 1, 2007.

The federal and state governments jointly fund Medicaid. The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. One in five Alaskans is enrolled in Medicaid at some time each year. Without the increment the state would be forced to reduce eligibility or services currently provided to low income children, pregnant women, persons with disabilities, and the elderly. By approving this change record the department will be able to continue to meet its mission of managing health care for Alaskans in need.

The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year. The bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the federal medical assistance percentage or FMAP. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%. Also affected are the State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC) which are part of Alaska's Medicaid program. Eligible claims for SCHIP and BCC are reimbursed at an enhanced FMAP rate which reduces the state share of costs by 30% over the regular FMAP.

The regular FMAP is projected to drop from 57.58% to 52.48% in FFY08 and the enhanced FMAP from 70.31% to 66.74%. The regular FMAP for SFY08 will average 53.76% across two federal fiscal years (57.58% from July-Sept. 2007 and 52.48% from Oct. 2007-June 2008). The enhanced FMAP for SFY08 will average 67.63% (70.31% from July-Sept. 2007 and 66.74% from Oct. 2007-June 2008). Approximately 68% of the Medicaid Services component's claims are reimbursed at the regular FMAP and another 3% at the enhanced FMAP. The remaining 29% is Indian Health Service or family planning and is not affected by the change in FMAP. The FFY08 change in FMAP will require an estimated \$23,834.5 increase in GF to replace the lost federal funds and maintain services at the current level.

\*\*CONTINGENT UPON CONGRESSIONAL ACTION TO REAUTHORIZE SCHIP PROGRAM. CURRENT LEGISLATION BEFORE CONGRESS COULD FULLY FUND THE CURRENT PROGRAM AND NEGATE THE NEED FOR THIS INCREMENT.

This request replaces lost federal revenues resulting from a decrease in the amount of federal funds available for the State Children's Health Insurance Program (SCHIP), a part of Alaska's Medicaid program operated through Denali KidCare. This increment is necessary to maintain the current level of health care provided to these children and supports the department's mission to manage health care for Alaskans in need.

SCHIP helps reach uninsured children whose families earn too much to qualify for regular Medicaid but not enough to afford private coverage. Each month, SCHIP provides health coverage for about 9,000 uninsured children under age 19. Without this funding, low-income children now enrolled in Denali KidCare could lose their SCHIP health coverage and become uninsured.

The federal and state governments jointly fund SCHIP. The amount of federal funding depends on the federal SCHIP allotment which has not grown to keep pace with SCHIP expenditures. The federal medical assistance percentage, or FMAP, determines the amount of state matching funds. The state receives a higher, enhanced FMAP for SCHIP than for regular Medicaid; however, this enhanced reimbursement is capped at the SCHIP allotment. If costs exceed available SCHIP funds, claims are reimbursed at the lower, regular FMAP, resulting in reduced federal revenues. Alaska will have only 43% of the federal SCHIP funding needed to cover program expenditures in FY09, exhausting its SCHIP funds in the second quarter. When it reverts to regular Medicaid, the difference in federal reimbursement rates means that Health Care Services Medicaid Services component will need an additional \$1,000.0 GF in FY09.

Alaska's annual allotment has fluctuated between \$7 and \$11 million. Since Alaska's annual allotment represents only about 30% of our costs, we have relied heavily on unspent funds from other states which were redistributed

Refinancing (continued)

care services. ProShare funds have supported rural health care, mental health care, and children's health care programs that benefit many Alaskans. Without ProShare the same services would have to be funded through grant programs that are totally GF.

ProShare came about in SFY 2004 when the Division of Medical Assistance (now Health Care Services) proposed an innovative move to optimize use of Medicaid funding through the Private Hospital Proportionate Share Program. ProShare made payments for certain medical assistance services to qualified private hospitals. The hospital in turn granted funds to qualified community service providers to secure services in rural, remote areas. ProShare funds also were used to refinance medical care for children in juvenile justice facilities. Health Care Services paid the hospitals the ProShare payments and the divisions provided Health Care Services with the matching GF through reimbursable services agreements. The general funds saved through refinancing these grants/services were removed from the divisions' budgets and replaced with federal funds in Health Care Services' budget. The Legislature supported this cost containment effort and about \$16 million in general funds was replaced with federal funds in that first year. Since 2004, the state has saved approximately \$36 million in GF through ProShare refinancing.

In 2006 the Centers for Medicare & Medicaid Services (CMS) decided that Alaska's ProShare program was not allowed and denied reimbursement for these payments. The department appealed this decision, and with the agreement of the Legislature, decided to continue the program until the case was resolved. CMS again disallowed the ProShare claim for 2007. On July 31, 2007 the department learned that it had lost the appeal when the U.S. Department of Health and Human Services Department Appeals Board upheld the disallowed claim.

The department is committed to continue funding these services at the same level in support of its mission to manage health care for Alaskans in need. While the federal authority is no longer needed in Health Care Services, in order to maintain current service levels, the department is requesting additional GF in the divisions with refinanced grants/services to replace this lost federal money.

By regulation, payment rates for most in-state facilities must be re-based at least every four years. In other years the facility gets a rate adjustment for inflation. The last rebasing year was FY04.

This increment is necessary to maintain Alaska acute care hospital services at their current level.

This is the second year of a two year process to phase in these required rate increases. Some hospitals were rebased last year. Hospitals remaining to be rebased in FY09 include Bartlett Regional Hospital in Juneau, Central Peninsula General Hospital in Soldotna, Cordova Community Medical Center, Ketchikan General Hospital, Wrangell Medical Center, and Norton Sound Regional Hospital in Nome. Most Indian Health Service (IHS) facilities are subject to payment rates determined by the federal government and adjusted annually. Norton Sound Regional Hospital is an exception in that its reimbursement schedule is determined by the state.

The six hospitals scheduled to rebase in FY09 comprise about 9.8% of Medicaid claims payments for all acute care hospitals and outpatient surgery centers in FY07. In FY07, claims for hospital services were paid by Medicaid for approximately 66,000 Medicaid beneficiaries.

The rebased rates are facility-specific and are cost-based from a review of FY07 operating expenses and Medicaid billing activity. Each facility's new rate will become effective at the start of its 2009 fiscal cycle. The Department estimates that the rate adjustment will be about 6.5% above medical inflation.

The additional cost to Medicaid from re-basing acute care hospitals in FY09 will be \$1,521.5.

Federal % = 51.02% SFY09 avg FMAP.

FY2010 Medicaid Program - Change in Federal Financial Participation	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0

This fund change request rebalances state and federal funding needs resulting from a 0.9-point increase in the annual rate the federal government reimburses the state for Medicaid benefits.

The new federal medical assistance percentage, or FMAP, takes effect on October 1st at the start of the federal fiscal year. The preliminary rate for FFY2010 is 51.43%, up from 50.53% in FFY2009. For FFY2010 the preliminary enhanced FMAP is 65.37%. The final rates will be published in December but are not expected to change much from the current estimates.

One in five Alaskans is enrolled in Medicaid at some time each year. By approving this change record the department will be able to continue to meet its mission of managing health care for Alaskans in need.

The federal and state governments jointly fund Medicaid. The total amount of federal reimbursement for Medicaid depends on a complex array of federal financial participation rates; however, the bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the FMAP rate. The State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC), which are part of Alaska's Medicaid program, are reimbursed at an enhanced FMAP rate. Indian Health Service and family planning service reimbursement rates of 100% and 90%, respectively, are fixed and do not change annually. U.S. Department of Health and Human Services sets the FMAP rate; it is outside the control of the state government. The FMAP is based on a state's national rank of a three-year average of per capita personal income but can be no less than 50%. The enhanced FMAP reduces the state's share of costs by 30% over the regular FMAP. The enhanced rate can be no lower than 65%.

The average FMAP for the state fiscal year is 51.21% (50.53% from July-September and 51.43% from October-June). The enhanced FMAP for FY2010 will average 65.84% (65.37% from July-September and 66.00% from October-June). Approximately 67% of the Health Care Services/Medicaid Services component's claims are reimbursed at the regular FMAP and another 6% at the enhanced FMAP. The remaining 27% is not affected by the change in FMAP.

1002 Fed Rcpts (Fed) 6,692.8 1003 G/F Match (UGF)

> This increment is necessary to maintain the current level of quality Medicaid health-care services for nearly 117,000 eligible Alaskans, about 95% of all those enrolled in the Alaska Medicaid program during the year.

The Medicaid Services component funds acute health care services such as hospitals, physicians, prescription drugs, dental, and transportation. Providing acute health services through Medicaid improves the department's success of reaching its goal of healthy people in healthy communities. These programs support the department's

One in five Alaskans is enrolled in Medicaid in any given year. In an average week, 25,500 Alaskans receive some level of medical care that costs the Medicaid program \$17-25 million in benefit payments made to 2,100 health care providers. Medicaid services are funded through both state general funds and federal matching funds. There must be sufficient state general funds available in order to maximize utilization of federal funds. Good business practice requires the department to maintain adequate funding to ensure that timely payments can be made to service providers.

The Legislature has requested that departments minimize supplemental budget requests through careful budget projections. The department uses both long-term and short-term forecasting models to project Medicaid spending. The Medicaid budget is based on projections of the number of eligible Alaskans who will access Medicaid funded services, the estimates of the quantity of services that may be used and the anticipated changes in the costs of

cost containment strategies.  While great inflationary pressures are appearing in drug mar reform the pharmacy program and pursue cost containment actual amount of avoided costs from these efforts is highly u prescription drug market.  One successful cost containment strategy is the Preferred D The department will review a new class of drugs, the Atypica	efforts for ncertain d rug List, w	a sustainable Me ue to the inflationa which the departm	dicaid program. dary pressures on ent continues to g	The the grow.								

Another method of counteracting the inflationary pressure on prescription drugs is the supplemental rebate program. In FY2009 the pharmacy program should be able to offset some inflationary cost increases with rebates on the Antipsychotic drugs.

this drug class to the PDL may provide cost containment in FY2009 of \$800.0. Another cost containment strategy employed in the pharmacy program is prior-authorization for proton pump inhibitors. Implementing this change avoided costs of \$400.0 over six months in FY2008 and is expected to avoid an additional \$400.0 in FY2009.

The department is in the process of completing a Fee Survey which may increase reimbursement for dispensing fees; however, this should be mitigated with a corresponding decrease in the Estimated Acquisition Cost of drugs and adoption of a State Maximum Acquisition Cost. Currently the EAC is 95% of average wholesale price. The net effect of these initiatives will be an anticipated decrease in pharmacy costs of \$200.0. This change in reimbursement is contingent on approval of a state plan amendment as required by CMS.

These cost containment reforms to the Medicaid pharmacy program help the department manage health-care coverage for Alaskans in need.

FY2011 Medicaid Growth	Inc	34,544.3	0.0	0.0	0.0	0.0	0.0	34,544.3	0.0	0	0	0

This increment is necessary to maintain the current level of quality Medicaid health care services for eligible Alaskans. For FY11, Health Care Services' Medicaid costs are projected to grow 2.1% from FY10. Projections for formula growth are based on historical trends in enrollment, utilization, provider reimbursement, and federal financial participation. The formula growth projection does not speculate on future or proposed changes to eligibility, benefits or federal medical assistance percentage (FMAP). The current FY11 forecast (with FMAP 2010) is \$686,782.9 (472,187.6 Federal / 207,455.3 GF / 7,140.0 Other). Projections are revised monthly and this increment request will be revisited for the Governor's Amended budget.

Without the increment the state would be forced to reduce eligibility or services currently provided to low income children, pregnant women, persons with disabilities, and the elderly.

In recent years the department has implemented Medicaid reforms aimed at improving Medicaid sustainability. Cost containment efforts begun in FY04 have successfully reduced the rate of growth in recent years for direct benefits from a high of 21.5% for 2003. Cost containment has been especially effective in pharmacy services; costs for this category have fallen 27% since the high of \$95.7 million in 2005. Additional enrollment and utilization will contribute to the approximate 2.1% increase in costs forecast for FY11.

The Medicaid Services component funds acute health care services such as hospitals, physicians, prescription drugs, dental, and transportation. Providing acute health services through Medicaid improves the department's

FY2016 2/17 AMD: Medicaid Cost Containment Initiatives The Department of Health and Social Services has worked Medicaid program. The following list includes initiatives the	,	, ,			0.0	0.0	0.0	-20,000.0	0.0	0	0	0

The majority of these initiatives will require new regulations and fee schedules along with holding public hearings and consultation with tribes. This will

require reallocating staff and priorities to accomplish this in a timely manner. The Department will need the cooperation of the Department of Law and the Lieutenant Governor's office to meet tight deadlines to realize savings in FY2016.

general fund (GF) savings in FY2016 in the current Medicaid program.

10% shift in expenses to 100% Federal Medicaid Assistance Percentages (FMAP) for tribal for Neonatal Intensive Care Unit (NICU), Orthopedic, Obstetrics (OB) -- \$10,000.0 GF

Based on federal fiscal year 2012 (FFY12) figures, Alaska Native/American Indian Medicaid recipients received services at non-tribal providers that totaled\$316 million, which is approximately \$158 million in general funds. A conservative 10% of this would equate to a \$20 million cost shift from non-tribal to tribal providers. The expenditures still occur, but the federal match would go up to 100% and offset \$10 million in general funds. It is

SB 74 section 34 (b) allows the Department to assess interest on recoveries for audits performed under AS 47.05.200 as well as other audits and reviews conducted by the state and federal government. There is no additional cost to the department to implement interest penalties on identified overpayments, but recoveries will increase. The Department estimates it will take three years to reach the current volume of outstanding appeals subject to interest penalties. Interest penalty recoveries are calculated by taking the current amount of outstanding appeals and applying an estimated recovery percentage. The result is multiplied by the statutory rate for post-judgment interest of 3.75% and phased in over a period of three years, as shown below. Recoveries will be categorized as revenue receipts, recorded under new fund code #1247, Medicaid Monetary Recoveries.

Section 36 47.05.270 Medical assistance reform program (a) (2) of this bill requires the department to provide an electronic distribution of an explanation of medical assistance benefits to recipients for health care services

FY2018 Second Year Medicaid Reform; Telemedicine; Drug Database Ch25 SLA2016 (SB74) (continued)

received under the program. It is the intent of the department to fully implement this section of the bill through the My Alaska Portal. The department estimates that it will cost \$707.5 (90% federal/10% GF) to fully implement the electronic distribution of an explanation of medical assistance benefits in FY2017. After the initial set-up, estimated on-going costs are the concurrent user license, \$76.5, and the yearly maintenance fee, \$17.0, for a total of \$93.5 (50% federal/50% GF) annual costs.

Section 37 directs the department to implement the Primary Care Case Management system authorized under AS 47.07.030(d). This is a foundational component to other initiatives and projected savings. This system would assign Medicaid enrollees to a case manager in order to increase use of primary and preventive care, and decrease the use of specialty care and hospital services. The department proposes expansion of an existing case management contract, at \$500.0 across FY2017-2018 (50% federal/50% GF match). The contractor will case manage at \$3.85 per member per month to approximately 30,000 recipients. This approach would reduce implementation timelines.

The Prescription Drug Monitoring Program (PDMP) is an integral part of this initiative, as it is required to help prevent the misuse and abuse of opioids prescribed or administered through emergency departments. Access to the PDMP database by physicians and pharmacists could be improved if the current stand-alone system was integrated into the Health Information Exchange (HIE). The following costs are one -time in addition to \$20.0 annual operating costs:

FY2017 PDMP system and interface to the HIE is \$285.0 (90%federal/10%GF), and FY2017 costs to connect pharmacies is \$480.0 (90%federal/10% GF)

Section 39 (47.07.039)(C) authorizes the department to contract with one or more entities to demonstrate the use of local, provider-led coordinated care entities that agree to monitor care across multiple care settings and that will be accountable to the department for the overall cost and quality of care. This demonstration project will be implemented in three regions of the state. Planning and development would begin in FY2017, with implementation starting in FY2019. An estimated 30,000 Medicaid recipients would be enrolled to receive services through this demonstration project. For purposes of estimation, the Department assumes the entities would be reimbursed on a fee-for-service basis plus shared-savings, with the entities receiving a portion of any savings accrued to the state Medicaid program, for the first two years. The department's best estimate at this time is approximately \$1,500.0 in GF savings. The state's fiscal agent will require 3 additional staff members for the additional work in provider enrollment, claims processing, and telephone inquiries as a result of the change - increase contract by \$318.0 (50% federal/50% GF). These individuals will provide support across the primary care case management project, health homes, and the hospital emergency room project as well.

Senior and Disabilities Medicaid Services (continued)

FY2006 Increase for Unrealized Cost Containment and adding back efforts achieved via changes to PCA regulations (continued)

Progress has been made towards implementation of many of these proposals despite delays, political and industry push-back, administrative difficulties, provider complaints, etc. that have hindered implementation and subsequently reduced the original estimate of cost savings. Additionally, the current Medicaid Management Information System (MMIS) has limitations that have delayed system changes until approximately the spring of 2006 when the new information system currently under development can be implemented.

Although, it is difficult to identify the results of cost containment over a short interval of time, the department will continuously track the progress of cost containment implementation and reassess any additional savings or potential shortfalls that may result from these proposals.

Increment Breakdown

OA/AD Contract: \$681.8 GF: \$1.022.7 Federal.

In March 2004, the assessment function for Level of Care Assessments was removed from the Care Coordinator to an independent contractor working for DSDS. However, each year, Waiver clients must be reassessed for medical eligibility. There have been several cases in which clients were denied Level of Care at annual renewal, yet because they can appeal such decisions while continuing to receive services, and since this process can take several months to complete, savings do not occur until the appeal process is complete.

Medicaid Waiver Savings: \$2,174.5 GF; \$3,255.8 Federal

The DSDS issued a Request for Proposals to conduct a cost study for the Medicaid Waivers with the intent of standardizing the methodology for calculation of reimbursement rates and establishing a fair and reasonable reimbursement rate for each of the Waiver services. The Department received no responses to this RFP. DSDS staff then organized a Cost-Study Task Force to review all Waiver payment structures for the various service categories. Task Force members included DSDS staff, provider representatives from each of the four Medicaid Waiver services, and Older American Act grantees. The task force reviewed reimbursement information by region and type of service for each provider. Given the magnitude of the cost differential from one agency to another and absent appropriate regulatory authority to make changes to "annual reimbursement rates," the cost study was placed on hold. (This occurred at the same time the industry was extremely upset and vocal over other regulatory changes.) DSDS is now working with the GCDSE, the ACoA and the AMHTA in preparing another RFP to conduct a long-term study for the state of Alaska regarding all LTC expenditures including Nursing Homes, the four Medicaid Waivers and the PCA program. This study will investigate appropriate reimbursement rates, a comparison of Alaska's long-term care system with those in other states (including served and under served populations), and make recommendations for responsible change. The new Home and Community Based Regulations that took effect on June 28, 2004 have placed a moratorium on any increases in cost-based reimbursement rates. DSDS staff is currently working with DD provider agencies to establish a uniform cost based rate for each service category within the provisions of the moratorium. Once this project is complete any new client placed in service will have a specific rate for each type service and will not be allowed to receive "bundled" services. (Under the DD program, the cost of service is based upon the client and not the individual services.)

Eliminate Exceptional Relief: \$1,000 GF: \$1,355.0 Federal

Final regulations did not eliminate exceptional relief but did add two cost containment provisions. Both of these provisions help to clarify that the department intends to offer exceptional relief only when Medicaid patients will lose access to services to a greater degree than the general public. At this time it is not possible to determine how

FY2006 Increase for Unrealized Cost Containment and adding back efforts achieved via changes to PCA regulations (continued)

much of this reduction is achievable through these regulatory cost containment efforts.

Limit Administrative and General Costs: \$580.0 GF; \$870.0 Federal

Reduce Respite Utilization: \$1.590.0 GF: \$2.392.0 Federal

The regulations for these services became effective on June 28, 2004, and it is anticipated that part of the originally proposed cost savings should be achieved. However, under the four Medicaid Waiver programs, clients receive approval for a one year Plan of Care.. On the advice of legal counsel, the Plan of Care is considered a contract between the state and the client and could not be changed by regulation. As each Plan of Care comes up for renewal, the new regulatory provisions will take effect. However, the MRDD Waiver program currently requires manual input of data since the conversion has had significant problems and rejected about 20% of client

Nursing Homes - Preadmission Care Plans: \$1,540.9 GF; \$2,459.1 Federal

This reduction proposal did not take into consideration the level of need for Nursing Home care. Although this cost containment measure has been implemented and DSDS staff has been very successful in reducing admission to Nursing Homes or transferring existing clients out of nursing homes, savings have not been realized since each time an individual has been transferred out, another individual in need of Nursing Home care has been admitted

Other savings through implemented cost containment measures not budgeted:

Implementation of the following items results in additional savings in FY05 not originally anticipated in the FY05 budget and reduces the net incremental need for FY06.

Additional Personal Care Attendant Contract Savings - \$282.9 GF; \$183.8 Federal Tribal Refinancing - \$200.0 GF savings; increased federal participation \$700.0 Refinance PCA Grants - \$864.5 Additional Federal Receipts

1002 Fed Rcpts (Fed) 7,606.3 5.084.4 1003 G/F Match (UGF)

FY2006 CC: Unrealized Cost Containment and adding back efforts achieved via changes to PCA regulations

-6,345.3

In the FY2005 budget the Department proposed an aggressive package of cost containment proposals to reduce Medicaid costs. For the Senior and Disability Services Medicaid Program the total reduction was estimated at \$48.5 million, including \$20.3 million in general funds.

The Department is requesting an increment of \$16.7 million, including \$7.1 million in general funds, to restore funding to the base budget for those areas of cost containment that are not anticipated to be attainable at this time. However, it should be noted that the department continues to consistently work towards containing costs of Medicaid wherever possible.

Progress has been made towards implementation of many of these proposals despite delays, political and industry push-back, administrative difficulties, provider complaints, etc. that have hindered implementation and subsequently reduced the original estimate of cost savings. Additionally, the current Medicaid Management Information System (MMIS) has limitations that have delayed system changes until approximately the spring of 2006 when the new information system currently under development can be implemented.

# Medicaid Services (continued) Senior and Disabilities Medicaid Services (continued)

FY2006 CC: Unrealized Cost Containment and adding back efforts achieved via changes to PCA regulations (continued)

Although, it is difficult to identify the results of cost containment over a short interval of time, the department will continuously track the progress of cost containment implementation and reassess any additional savings or potential shortfalls that may result from these proposals.

Increment Breakdown

OA/AD Contract: \$681.8 GF: \$1.022.7 Federal.

In March 2004, the assessment function for Level of Care Assessments was removed from the Care Coordinator to an independent contractor working for DSDS. However, each year, Waiver clients must be reassessed for medical eligibility. There have been several cases in which clients were denied Level of Care at annual renewal, yet because they can appeal such decisions while continuing to receive services, and since this process can take several months to complete, savings do not occur until the appeal process is complete.

Medicaid Waiver Savings: \$2,174.5 GF; \$3,255.8 Federal

The DSDS issued a Request for Proposals to conduct a cost study for the Medicaid Waivers with the intent of standardizing the methodology for calculation of reimbursement rates and establishing a fair and reasonable reimbursement rate for each of the Waiver services. The Department received no responses to this RFP. DSDS staff then organized a Cost-Study Task Force to review all Waiver payment structures for the various service categories. Task Force members included DSDS staff, provider representatives from each of the four Medicaid Waiver services, and Older American Act grantees. The task force reviewed reimbursement information by region and type of service for each provider. Given the magnitude of the cost differential from one agency to another and absent appropriate regulatory authority to make changes to "annual reimbursement rates," the cost study was placed on hold. (This occurred at the same time the industry was extremely upset and vocal over other regulatory changes.) DSDS is now working with the GCDSE, the ACoA and the AMHTA in preparing another RFP to conduct a long-term study for the state of Alaska regarding all LTC expenditures including Nursing Homes, the four Medicaid Waivers and the PCA program. This study will investigate appropriate reimbursement rates, a comparison of Alaska's long-term care system with those in other states (including served and under served populations), and make recommendations for responsible change. The new Home and Community Based Regulations that took effect on June 28, 2004 have placed a moratorium on any increases in cost-based reimbursement rates. DSDS staff is currently working with DD provider agencies to establish a uniform cost based rate for each service category within the provisions of the moratorium. Once this project is complete any new client placed in service will have a specific rate for each type service and will not be allowed to receive "bundled" services. (Under the DD program, the cost of service is based upon the client and not the individual services.)

Eliminate Exceptional Relief: \$1,000 GF; \$1,355.0 Federal

Final regulations did not eliminate exceptional relief but did add two cost containment provisions. Both of these provisions help to clarify that the department intends to offer exceptional relief only when Medicaid patients will lose access to services to a greater degree than the general public. At this time it is not possible to determine how much of this reduction is achievable through these regulatory cost containment efforts.

Limit Administrative and General Costs: \$580.0 GF; \$870.0 Federal Reduce Respite Utilization: \$1,590.0 GF; \$2,392.0 Federal The regulations for these services became effective on June 28, 2004, and it is anticipated that part of the

Initial projections for PCA growth in FY05 were 11.6%. However, based on FY05 actuals to date, the growth rate in FY05 will exceed 19%.

Similarly, initial projections for Nursing Home growth in FY05 were 3.6%. However, based on FY05 actuals to date, the growth rate in FY05 will exceed 18%. A large part of this growth is attributable to the "re-basing" of nursing home rates which occurs once every 4 years. A comparison is made between actual costs and the current rate and a true up rate established. Re-basing of rates resulted in a weighted average increase of 8.7% from calendar year 2004 and calendar year 2005.

Conversely, waiver growth is coming in lower than the original projections. Overall FY05 component costs are now estimated to increase by approximately 8%.

This request for FY06 reflects a 5.3% growth above the current FY05 projection.

#### Medicaid Services (continued)

Senior and Disabilities Medicaid Services (continued)

FY2008 Medicaid Facility Rates Rebased -

Nursing Homes (continued)

Alaska nursing home facilities currently serve about 1563 Medicaid clients per year. Most of these persons are elderly (69%) or disabled (30%). Twenty percent are over 84 years of age and 16% are under age 55.

This increment is necessary to maintain nursing home services at their current level and to prevent loss of provider participation. By regulation, payment rates for most facilities must be re-based at least every four years [7 AAC 43.685(a)(6)(B)]. Hospital, nursing home, and inpatient psych hospital facilities were last re-based in FVNA

Nursing home payment rates for FY08 will be adjusted based on review of FY06 operating expenses and Medicaid billing activity for each facility. The new rate for each facility will become effective at the start of its 2008 fiscal cycle. The Department estimates that rates will be adjusted by an average of 8%. Long Term Care (nursing home) facilities that will bill under re-based rates for the full 12 months of FY08 include collocated nursing facilities in Petersburg Medical Center, Sitka Community Hospital, South Peninsula Hospital, and Providence Valdez Medical Center, and the Providence Seward Medical Center/Wesley Care Center. Fairbanks Memorial Hospital/Denali Center, Providence Extended Care, Mary Conrad Center, Wildflower Court, and nursing home facilities at Providence Kodiak Island Medical Center will bil under rebased rates for the last six months of the fiscal year. Remaining in-state nursing facilities subject to review under 7ACC 43.685 will re-base effective FY09.

Not all nursing home facilities providing services to Alaska Medicaid patients will be subject to the re-basing addressed by this increment. Payment rates for any smaller in-state facilities (acute care, specialty, or psychiatric hospital or combined acute care hospital-nursing facilities billing 4,000 or fewer acute care patient days, or freestanding nursing home facilities billing 15,000 or fewer nursing facility days) are determined using a different methodology, established under a separate regulatory authority [7 ACC 43.689]. This analysis assumes no significant rate changes for small Alaskan facilities. There are currently no out-of-state nursing home facilities billing for services to Alaska Medicaid enrollees.

Data for Indian Health Service (IHS) facilities has been excluded from this analysis. The only IHS nursing home facility currently subject to re-basing by the Department under 7 ACC 43.685 is Quyanna Care Center (Norton Sound Regional Hospital). It will rebase effective July 1, 2008 (FY09) so its rate adjustment will not affect the requested increment. Payment rates for most other IHS facilities are determined annually by the federal government.

Alaska Pioneer Homes are assisted living facilities, not nursing homes, and are not considered here.

To calculate the increment required to cover nursing home rate increases in FY08, the percent of FY06 non-IHS nursing home payments made to nursing facilities scheduled to re-base for the full 2008 fiscal year and the percent made to non-IHS nursing homes scheduled to re-base for only the last six months were determined, based on Medicaid claims payments for all non-IHS nursing home services in FY06. Re-based rates will impact 52.3% of payments for non-IHS nursing home services in FY08.

The formula for calculation of the requested increment is: 8% X 52.3% X growth projection for FY08 non-IHS nursing home services.

#### Medicaid Services (continued)

Senior and Disabilities Medicaid Services (continued)

FY2008 FY08 Projected Medicaid Growth (continued)

In FY06 Senior and Disabilities Medicaid provided services to approximately 7,700 beneficiaries at an average cost of \$3,031 per person per month. Senior and Disabilities Medicaid claims grew 10% from FY04 to FY05, and 9% from FY05 to FY06. The projection for FY08 is for the growth rate to decrease slightly. This is due to changes in the personal care attendant program that have curtailed growth.

Most of the increase can be attributed to home and community based waiver services which experienced a 14% increase from FY05 to FY06. This figure is somewhat skewed, however, as billing delays in FY05 artificially lowered that year's claim payments. The true growth rate was closer to 5% averaged over two years. Personal care attendant services, which grew 23% between FY04 and FY05, grew only 4.8% in the prior year. Nursing homes increased 5.1%.

The fund source projection is based on the actual amount of federal revenue collected in FY06 in this component, 59%, and assumes that the proportion of expenditures eligible for each type of federal reimbursement remains the same. It also assumes that the FY08 average federal medical assistance percentage remains at 57.58% for regular Medicaid and 70.31% for SCHIP.

This increment also provides \$1,200.0 authority for statutory designated program receipts (SDPR) in the Behavioral Health Medicaid Services component for recoveries of overpayments to Medicaid providers discovered through audits.

Per AS 47.05.200 the department is required to audit Medicaid provider payments. Overpayments to the providers must be returned by the provider to the state. The overpayment includes both the federal and state match portion of the original claim. The amount actually recovered can include only the federal funds or the state matching funds, too. This increment provides budget authority to collect the state matching fund portion of the audit recovery.

The additional funding supports the department's mission to manage health care for Alaskans in need. This increment will help the department improve the following performance measures:

Dept-A-1--Provide a safe environment for Alaska pioneers and veterans

Dept-D-4--Provide quality management of health care coverage services providers and clients

HCS-A-A2--Expand fund recovery efforts

HCS-B---Provide affordable access to quality health care services to eliqible Alaskans

HCS-B--T1-Increase the number of providers

DPH-A---Healthy people in healthy communities

DPH-A--A2-Reduce suffering, death and disability due to chronic disease

DPH-A--A4-Assure access to early preventative services and quality health care

SDS-A---Improve and enhance the quality of life for seniors and persons with disabilities through cost-effective delivery of services

	(FMAP) Rate Change for Medicaid												

This request replaces lost federal revenues resulting from a 5.1% decrease in the annual rate the federal government reimburses the state for Medicaid benefits that will take effect on October 1, 2007.

The federal and state governments jointly fund Medicaid. The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of the state government. Without the increment the state would be forced to reduce eligibility or services currently provided to low income persons with disabilities and the elderly. By approving this change record the department will be able to continue to meet its mission of managing health care for Alaskans in need.

The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year. The bulk of the federal funding for Medicaid benefits comes from claims reimbursed at the federal medical assistance percentage or FMAP. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%. Also affected are the State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC) which are part of Alaska's Medicaid program. Eligible claims for SCHIP and BCC are reimbursed at an enhanced FMAP rate which reduces the state share of costs by 30% over the regular FMAP.

The regular FMAP is projected to drop from 57.58% to 52.48% in FFY08 and the enhanced FMAP from 70.31% to 66.74%. The regular FMAP for SFY08 will average 53.76% (57.58% from July-Sept. 2007 and 52.48% from Oct. 2007-June 2008). The enhanced FMAP for SFY08 will average 67.63% (70.31% from July-Sept. 2007 and 66.74% from Oct. 2007-June 2008). Approximately 93% of the Medicaid Services component's claims are reimbursed at the regular FMAP and another 2% at the enhanced FMAP. The remaining 5% is Indian Health

Senior and Disabilities Medicaid Services is proposing to increase reimbursement for personal care attendant services in FY09 by 6%. Rates for most providers have been frozen since 1999. Rate adjustments are necessary to maintain the current level of services and prevent loss of provider participation.

Inc

4.968.9

Personal care attendant (PCA) services are typically provided in a consumer's home by health care paraprofessionals called personal care assistants. These services enable functionally disabled Alaskans of all ages, and frail elderly Alaskans, to live in their own homes instead of being placed in a more costly and restrictive long-term care setting. Recipients have a choice between two different options of PCA services:

The Agency-Based PCA model allows consumers to use one of the qualified agencies that oversee, manage and supervise their care.

The Consumer-Directed PCA model allows consumers to select, train, supervise, and discharge their PCA.

In FY07, PCA services were provided to nearly 3,800 individuals.

This increment provides interim relief to personal care attendant reimbursements to promote and sustain access to services until a consistent rate methodology is developed and implemented. The increment requested here is to raise rates, frozen for nearly 10 years, by 6%, which is medical inflation for two years, as a starting point.

The additional cost to Medicaid from rate adjustments in SFY09 for care coordination services is estimated to be \$4,968.9.

Federal % = 51.02 SFY09 FMAP.

Senior and Disabilities Medicaid Services is proposing to increase reimbursement for home and community based (HCB) waiver assisted living homes in FY09 by 4%. Rates for most services provided to waiver clients have been frozen since 2004. Rate adjustments are necessary to maintain the current level of services and prevent loss of provider participation.

Inc

1,292.5

Last year (FY07) Alaska Medicaid processed waiver services claims for 3,792 individuals. The Adults with Physical Disabilities waiver program served 32% of waiver services recipients last year, the Mentally Retarded/Developmentally Disabled (MRDD) waiver served 24%, the Older Alaskan waiver served 39%, and the Children with Complex Medical Conditions waiver served almost 6% of all waiver clients.

These four waiver programs serve different populations of clients with different medical needs and, depending on the waiver program, may provide care coordination, residential supported living services, chore and respite services, supplies and medical equipment, environmental modifications, meal services, or transportation services. Average costs per client vary widely between waiver programs, with costs for mentally retarded clients under the MRDD Waiver being higher than costs for clients served by any of the other three waivers. Older Alaskan Waiver clients on average cost less than other clients served by other waivers.

Typically, residents of assisted living homes are not able to live without some form of daily assistance. They may require nursing and other physical and emotional support services offered in a licensed assisted living facility. Professional services range from assurance of a safe environment and occasional help with daily life skills, to assistance with health care, personal care and other support services including end of life care. Alaska Pioneer Homes are licensed as assisted living homes.

This increment provides interim relief to assisted living home reimbursements to promote and sustain access to services until a consistent rate methodology is developed and implemented. The increment requested here is to raise rates by 4%, which is medical inflation for one year, as a starting point.

#### Medicaid Services (continued)

Senior and Disabilities Medicaid Services (continued)

FY2009 AMD: Home & Community Based Waiver Rate Increases (Residential Habilitation)

- 4% (continued)

These four waiver programs serve different populations of clients with different medical needs and, depending on the waiver program, may provide care coordination, residential supported living services, chore and respite services, supplies and medical equipment, environmental modifications, meal services, or transportation services. Average costs per client vary widely between waiver programs, with costs for mentally retarded clients under the MRDD Waiver being higher than costs for clients served by any of the other three waivers. Older Alaskan Waiver clients on average cost less than other clients served by other waivers.

Residential habilitation services provide assistance for activities of daily living, such as personal grooming and cleanliness, bed making and household chores, eating and preparing food, and social and adaptive skills. Without residential habilitation the individual would have to reside in an institutional setting. Payments are not for room and board, or facility costs. Payments can be for modifications or adaptations to assure the health and safety of residents or to meet life safety codes. Payments are not made directly or indirectly to members of the individual's immediate family nor for routine care and supervision which a family or group home provider is expected to provide.

This increment provides interim relief to residential habilitation provider reimbursements to promote and sustain access to services until a consistent rate methodology is developed and implemented. The increment requested here is to raise rates by 4%, which is the equivalent of medical inflation for one year, as a starting point.

The additional cost to Medicaid from rate adjustments in SFY09 for residential habilitiation services is estimated to be \$3,956.2.

Federal % = 51.02 SFY09 FMAP.

This increment will help the department improve the following performance measures:

Medicaid Services (continued) Senior and Disabilities Medicaid Services (continued) FY2009 AMD: Medicaid Facility Rates -Nursing Homes - 6.5% (continued) By regulation, payment rates for most in-state facilities must be re-based at least every four years. In other years the facility gets a rate adjustment for inflation. The last rebasing year was FY04. This is the second year of a two year process to phase in these required rate increases. Some nursing facilities were rebased during FY08. Facilties included in this budget request are the Quyanna Care Center associated with Norton Sound Regional Hospital in Nome, the Heritage Place facility associated with Central Peninsula Hospital in Soldotna, and nursing beds associated with Wrangell Medical Center, Ketchikan General Hospital, and Cordova Community Medical Center. Alaska nursing home facilities currently serve about 1,400 Medicaid clients per year. About 65% are are elderly and 35% are persons with disabilties. Nursing home payment rates for FY09 will be based on review of FY07 operating expenses and the Medicaid billing activity for each facility. The new rate for a facility will become effective at the start of its 2009 fiscal cycle. The Department estimates that the rate adjustment will be an average of 6.5% above medical inflation.

Federal 5 = 51.01% SFY09 avg FMAP.

This fund change request rebalances state and federal funding needs resulting from a 0.9-point increase in the annual rate the federal government reimburses the state for Medicaid benefits.

The new federal medical assistance percentage, or FMAP, takes effect on October 1st at the start of the federal fiscal year. The preliminary rate for FFY 2010 is 51.43%, up from 50.53% in FFY 2009. For FFY 2010 the preliminary enhanced FMAP is 65.37%. The final rates will be published in December but are not expected to change much from the current estimates.
